MERISTEM
DESIGN

Bringing nature into your workspace

Plants do more than beautify a space — they improve wellbeing, support focus, and refresh the air we breathe. That's why we select plants that are not only easy to care for but also bring lasting benefits to every workspace.

Designing your office with plants

We thoughtfully design plant arrangements that complement each office's style and purpose. By following biophilic design principles, we create green spaces that inspire, energise, and foster a deeper connection to nature.

Professional Plant Care Services

We offer professional plant care services to keep office plants thriving year-round. Our expert maintenance plans include regular visits, watering, pruning, and health checks. Each plan is customised to fit your space, style, and plant selection — ensuring every workplace enjoys beautiful, healthy greenery without the hassle of daily upkeep.

Live Table

Pots

Combining functionality with a style that fits any aesthetic, each pot is crafted with care to suit your location and enhance the space. Helping to add greenery to both indoor and outdoor areas, hanging or on the floor, pots create welcoming spaces that benefit people, businesses and the environment.

Living Walls

We create, install, and maintain innovative living wall systems for commercial projects, offering flexible, sustainable solutions that enhance any environment while providing a diverse selection of beautiful, easy-to-care-for plants.

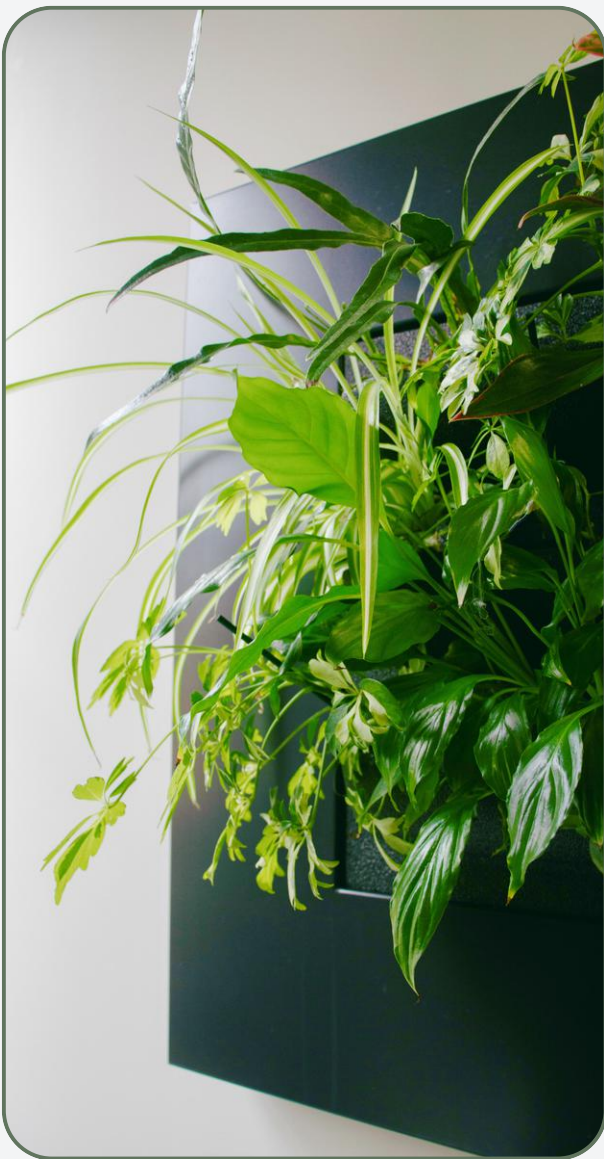

MERISTEM
DESIGN

Live Pictures

Crafted to enhance small spaces, our live pictures offer a space-efficient and stylish way to bring greenery into any office. They transform plain walls into vibrant, living features that promote wellbeing and create a natural atmosphere.

MERISTEM
DESIGN

Live Dividers

These green partitions create natural privacy, improve air quality, and add a fresh, calming atmosphere to any workspace. We also offer sustainable, space-saving solutions that double as bins, storage, or filing cabinets.

MERISTEM
DESIGN

Live Table

Bespoke designed for both function and beauty, our live table seamlessly integrates greenery into your workspace. With a central planter surrounded by counter space and seating, it fosters a natural, calming atmosphere while promoting wellbeing and connection.

Investing in Sustainability

Urban greening in the commercial sector is an investment in wellness, sustainability, and aesthetics, that provides lasting value for organisations. Businesses can meet corporate social responsibility (CSR) objectives, contribute to local biodiversity, enhance their brand image and improve job satisfaction for employees.

Implementing urban greening increases the visual appeal and value of commercial properties while creating more memorable experiences for customers.

Benefits of Office Planting

Improved employee productivity

Plants improve focus, as well as boost creativity, productivity, and wellbeing.

Enhanced brand image

Green spaces enhance beauty, reflecting positively on the business identity, and impress customers.

Creating healthier environments

Plants purify air, reduce noise, and counteract the drying effects of central heating and air conditioning.

Office mindfulness

Plants reduce stress by enhancing mood, promoting relaxation, and creating a soothing environment.

Economic benefits

Greenery attracts customers, increases property value, and reduces long-term building maintenance costs.

Natural space dividers

Plants divide and define spaces naturally, adding structure, privacy, and visual interest.

Simon-Kucher

Project overview

We worked with Simon-Kucher to bring greenery to their open-plan office space. The project focused on creating spatial division whilst introducing biodiversity to create an office that's welcoming, calming and visually appealing.

Goal

To transform the space into a more comfortable and uplifting environment for the Simon-Kucher team by using plants to define areas and enrich the experience of being in the workplace.

Solutions

We delivered a diverse and bold selection of plants to enhance the space. Clusters of tall and medium plants were used to create subtle work zones. Live frames were installed in meeting rooms to introduce natural texture on the walls. The species were selected for their aesthetic and air-purifying qualities.

Impact

Simon-Kucher's office space has been elevated into a more functional and uplifting environment with a refreshed and modern identity. The greenery has created a more balanced and inviting work space for staff and visitors.

Miro Offices

Project overview

We partnered with Miro to create a biophilic Fleet Street office, using plants and natural elements to enhance aesthetics, wellbeing, and productivity, while promoting a healthier, more inspiring space for employees.

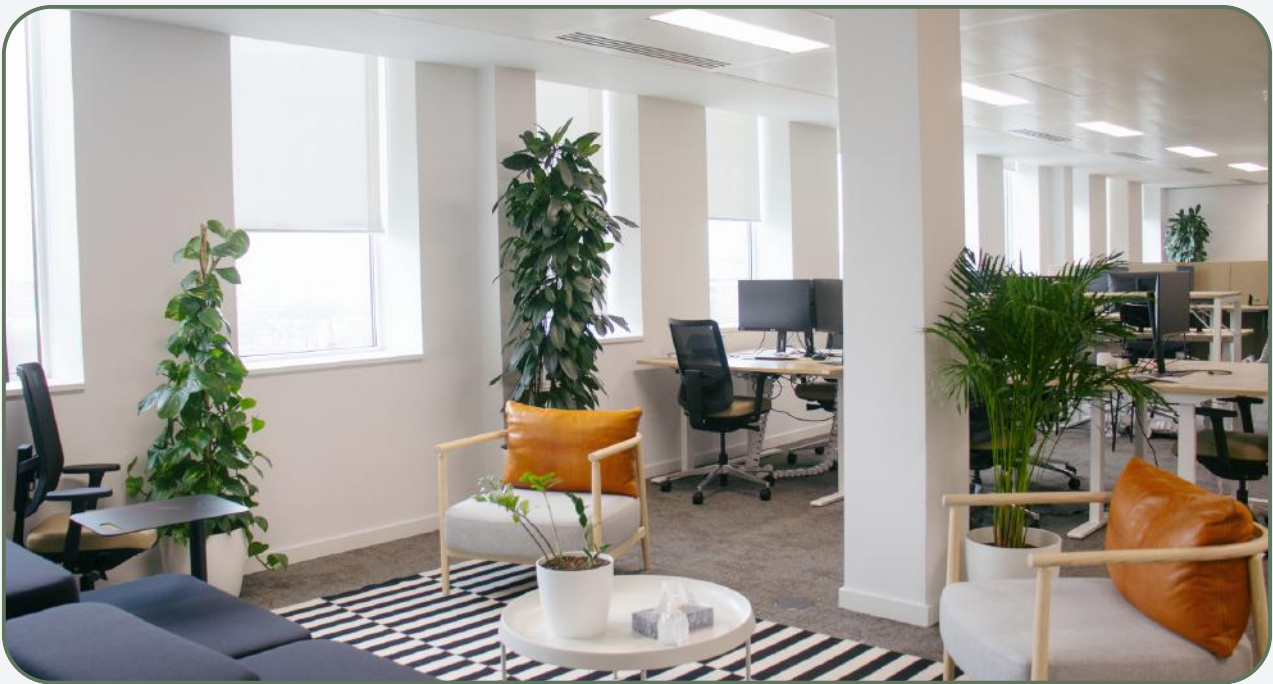

Goal

Miro aimed to reflect its dynamic ethos through biophilic design, creating a healthier, greener workplace supporting employee creativity and wellbeing.

Solutions

We structured the office into zones for various work styles, each with tailored planting schemes - from calm, minimal arrangements in focus areas to lush, vibrant greenery in collaborative spaces.

Impact

The Miro Office exemplifies the potential of creating a sustainable and plant-filled workspace, where employees thrive in an environment that promotes their physical and mental wellbeing.

eOffice

Project overview

We collaborated with eOffice to bring biophilic design into co-working hubs, using greenery to create calming, flexible spaces that enhance wellness, collaboration, and a welcoming atmosphere.

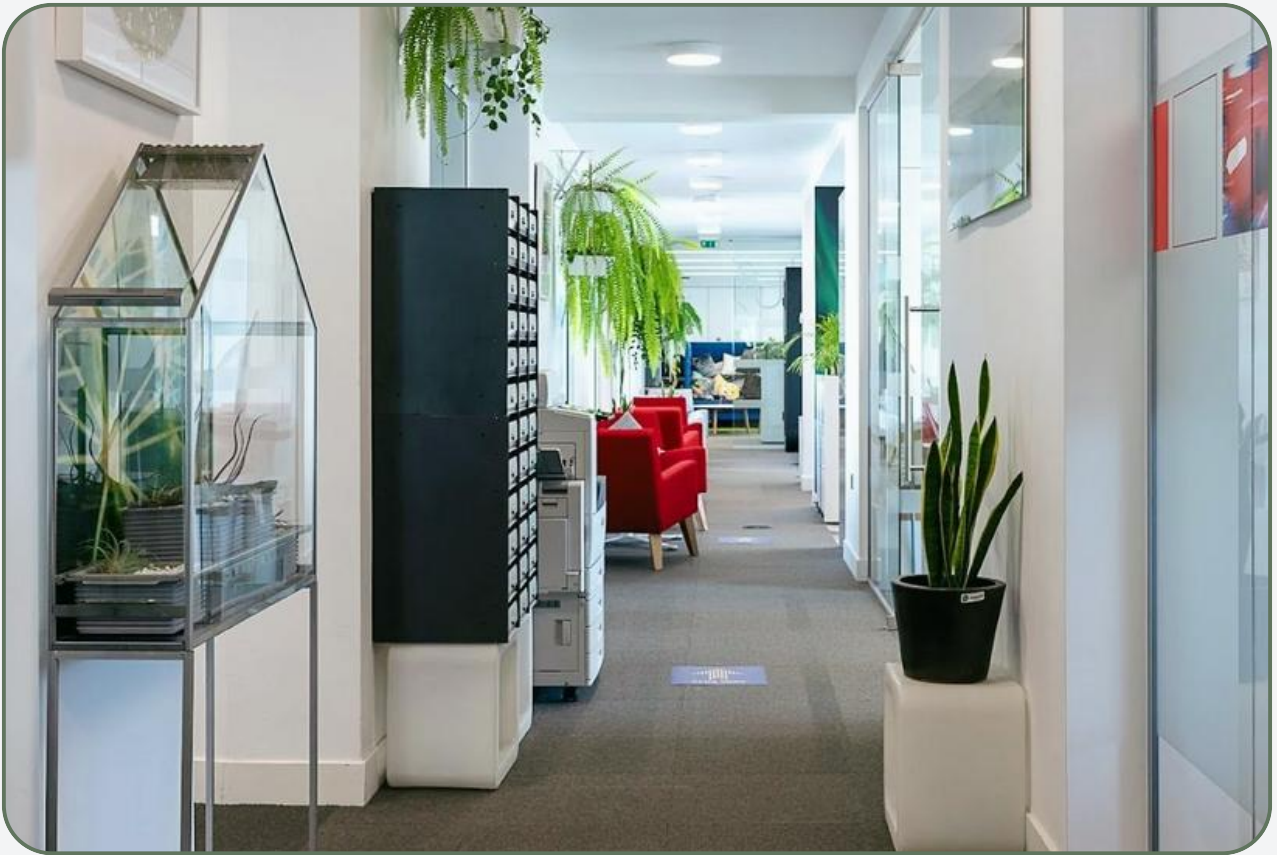

Goal

eOffice looked to transform shared offices into refreshing, nature-filled environments that support creativity, reduce stress, and promote productivity for individuals and teams working in dynamic co-working spaces.

Solutions

To maximise greenery in limited space, we installed ceiling and wall-mounted planters, vertical plant pillars, and Live Pictures - integrating bold, space-efficient planting that adds texture, depth, and visual impact.

Impact

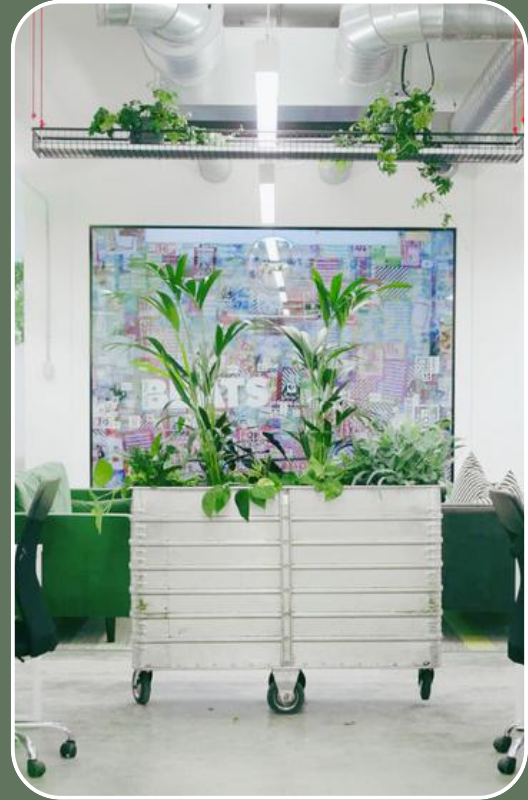

eOffice's greenery promotes wellbeing, creativity, and sustainability, using space-efficient, low-water designs like vertical planters and Live Pictures.

Forever Beta

Project overview

Forever Beta partnered with us to create a vibrant, nature-inspired workspace using biophilic design, promoting creativity, wellbeing, and sustainability throughout the office.

Goal

To incorporate natural elements into the office space, enhancing air quality, boosting employee productivity, and fostering a calming, aesthetically pleasing atmosphere.

Solutions

We transformed Forever Beta's industrial space with creative space-saving planting — suspended trays, vintage bottle planters, hanging pots, and sculptural succulents — blending greenery seamlessly into their bold, collaborative workspace.

Impact

Forever Beta's green office boosts well-being, creativity, sustainability, and creates an attractive, functional workspace for employees and clients.

Berners Street

Project overview

We transformed the reception and interior of this office into a vibrant green oasis. The project included a living wall and over 2000 plants to create a striking workspace.

Goal

The goal was to create a welcoming and visually striking green environment to enhance colleague wellbeing and air quality. The project aimed to use planting to complement the building's design.

Solutions

We structured the planting according to lighting intensity to ensure the plants thrive. Hardy, tropical plants were chosen to create a unique office environment. A bi-weekly maintenance plan was implemented to ensure consistent care and health of all plants.

Impact

The Berners Street office is now a thriving example of a well-balanced workspace, offering green focal points, improved air quality and enhanced employee experience.
