WORKBOOK
FALL/WINTER 2026/27

SKI TOURING / ROCKRIDE / GROUND UP / CORE / ALPITUDE / BASE LAYER / JUNIOR / HEADWEAR & GLOVES / EQUIPMENTS

BEYOND THE SEASON WHERE PERFORMANCE MEETS PASSION

Ogni nuova stagione rappresenta per noi un viaggio: un percorso di ricerca, passione e innovazione che ci spinge a immaginare capi in grado di affrontare la forza e la bellezza dell'inverno in montagna.

La collezione Fall/Winter 2026/2027 segna un nuovo capitolo del nostro cammino, una linea dedicata a chi vive la neve come terreno di libertà, avventura e connessione profonda con la natura.

Dallo sci da discesa allo sci alpinismo, dall'alpinismo tecnico alle lunghe escursioni su sentieri innevati, ogni capo nasce per accompagnare chi cerca la performance senza rinunciare al comfort.

Le nostre soluzioni tecniche garantiscono protezione e traspirabilità anche nelle condizioni più estreme, mentre i tagli ergonomici assicurano piena libertà di movimento in ogni fase dell'attività.

Negli ultimi anni la montagna è diventata molto più di una meta: è un luogo di equilibrio, rispetto e consapevolezza. Crediamo in un modo di vivere l'outdoor che unisce prestazione e sostenibilità, tecnica e stile, tradizione e innovazione.

Il nostro lavoro nasce dall'esperienza diretta sul campo: collaboriamo con atleti e professionisti che mettono alla prova i nostri capi ogni giorno, in condizioni reali, fornendo feedback preziosi che ci permettono di migliorare costantemente.

Questa collezione è dedicata a chi affronta l'inverno come una nuova opportunità per muoversi, esplorare e mettersi alla prova. A chi si alza prima dell'alba per una risalita con le pelli, a chi ama la sensazione della neve fresca sotto gli sci o il silenzio della montagna coperta di ghiaccio.

Qualunque sia la vostra avventura, vogliamo offrirvi capi pensati per accompagnarvi con sicurezza, calore e libertà — passo dopo passo, vetta dopo vetta.

Buone avventure invernali a tutti!

Each new season represents a journey for us: a path of research, passion, and innovation that drives us to imagine garments capable of facing the power and beauty of winter in the mountains. The Fall/Winter 2026/2027 collection marks a new chapter in our journey, a line dedicated to those who experience snow as a place of freedom, adventure, and deep connection with nature.

From downhill skiing to ski mountaineering, from technical mountaineering to long excursions on snow-covered trails, each garment is designed to accompany those who seek performance without sacrificing comfort. Our technical solutions guarantee protection and breathability even in the most extreme conditions, while ergonomic cuts ensure full freedom of movement at every stage of the activity.

In recent years, the mountains have become much more than just a destination: they are a place of balance, respect, and awareness. We believe in a way of experiencing the outdoors that combines performance and sustainability, technique and style, tradition and innovation. Our work stems from direct experience in the field: we collaborate with athletes and professionals who test our garments every day, in real conditions, providing valuable feedback that allows us to constantly improve.

This collection is dedicated to those who see winter as a new opportunity to move, explore, and challenge themselves. To those who get up before dawn for a climb with ski skins, to those who love the feeling of fresh snow under their skis or the silence of the ice-covered mountains. Whatever your adventure, we want to offer you garments designed to accompany you with confidence, warmth, and freedom—step by step, peak by peak.

Happy winter adventures to all!

A handwritten signature in black ink, reading 'Michele Frigerio'.

Michele Frigerio
CEO Rock Experience

FIT YOUR BEAT

ELEVATE YOUR WINTER EXPERIENCE

Ogni movimento nasce da un ritmo. È quel battito interiore che ti spinge a partire, a sfidare il freddo, a cercare la libertà tra le montagne. È il tuo modo unico di vivere l'outdoor. La nuova collezione Fall Winter 2026/2027 nasce proprio da qui: dal desiderio di creare capi capaci di adattarsi non solo al clima, ma anche alla persona che li indossa.

FIT YOUR BEAT significa sentire la natura al proprio passo. Significa muoversi in sintonia con l'ambiente, con il corpo, con le emozioni. Ogni giacca, ogni pantalone, ogni strato tecnico è pensato per offrirti la massima protezione e libertà, permettendoti di restare connesso con ciò che ami davvero: l'esperienza pura dell'avventura.

ELEVATE YOUR WINTER EXPERIENCE è il nostro invito a spingerti oltre. A vivere la stagione invernale con energia, con consapevolezza, con stile. Abbiamo scelto materiali innovativi, performanti e sostenibili, sviluppati per affrontare qualsiasi condizione senza rinunciare al comfort e all'estetica. Ogni dettaglio è studiato per alzare il livello della tua esperienza outdoor. Perché la montagna non si conquista: si ascolta, si vive, si sente.

FIT YOUR BEAT. ELEVATE YOUR WINTER EXPERIENCE.

Every movement comes from a rhythm. It is that inner beat that drives you to set off, to brave the cold, to seek freedom in the mountains. It is your unique way of experiencing the outdoors. The new Fall Winter 2026/2027 collection stems from precisely this: the desire to create garments that adapt not only to the climate, but also to the person wearing them.

***FIT YOUR BEAT** means feeling nature at your own pace. It means moving in harmony with the environment, with your body, with your emotions. Every jacket, every pair of pants, every technical layer is designed to offer you maximum protection and freedom, allowing you to stay connected to what you truly love: the pure experience of adventure.*

***ELEVATE YOUR WINTER EXPERIENCE** is our invitation to push yourself further. To experience the winter season with energy, awareness, and style. We have chosen innovative, high-performance, and sustainable materials, developed to cope with any condition without compromising on comfort and aesthetics. Every detail is designed to raise the level of your outdoor experience. Because the mountains are not conquered: they are listened to, lived, and felt.*

FIT YOUR BEAT. ELEVATE YOUR WINTER EXPERIENCE.

COLOUR BOARD

La colour board di questa collezione nasce da un dialogo costante con la natura: ogni tonalità è ispirata agli elementi autentici dell'ambiente outdoor. I verdi richiamano le foreste e la vegetazione alpina, i marroni e i beige ricordano la solidità della roccia e della terra, mentre le sfumature di blu evocano il cielo limpido e le acque cristalline di laghi e torrenti. L'insieme dei colori definisce una palette equilibrata e armoniosa, pensata per trasmettere un senso di connessione con l'ambiente naturale e, al tempo stesso, dare identità e carattere ai capi della collezione.

The colour board of this collection is born from a constant dialogue with nature: each shade is inspired by the authentic elements of the outdoor environment. Greens recall forests and alpine vegetation, browns and beiges evoke the solidity of rock and earth, while shades of blue bring to mind the clear sky and the crystalline waters of lakes and streams. Together, these colours create a balanced and harmonious palette, designed to convey a sense of connection with the natural environment while giving identity and character to the garments in the collection.

SYNCRO LINE

NEXT GENERATION PERFORMANCE

La **SYNCRO LINE** unisce **innovazione tecnologica, performance e comfort**, offrendo capi per l'alpinismo e l'outdoor. Assicurano protezione dagli agenti atmosferici e si adattano perfettamente a ogni movimento e condizione climatica. Ogni capo della linea è studiato per garantire il **massimo equilibrio tra protezione, leggerezza e traspirabilità**. Il cuore del progetto è la gestione dell'aria: tecnologie avanzate regolano il flusso d'aria tra i tessuti, creando un microclima ideale che mantiene il corpo sempre asciutto e alla temperatura ottimale durante l'attività.

The **SYNCRO LINE** combines **technological innovation, performance and comfort**, offering garments for mountaineering and outdoor use. They ensure protection from atmospheric agents and adapt perfectly to every movement and weather condition. Each garment in the line is designed to guarantee the **maximum balance between protection, lightness and breathability**. The core of the project is air management: advanced technologies regulate the flow of air between fabrics, creating an ideal microclimate that keeps the body dry and at the optimum temperature at all times during activity.

Una tecnologia innovativa che utilizza una **struttura a maglia tridimensionale** per ottimizzare il ricircolo dell'aria e garantire una memoria attiva del materiale. Questa **imbottitura offre un'elevata stabilità in termini di CLO e peso**, mantenendo le sue prestazioni costanti indipendentemente dalle condizioni meteo o dall'intensità dell'attività fisica.

An innovative technology using a three-dimensional mesh structure to optimise air recirculation and ensure active material memory. This padding offers high stability in terms of CLO and weight, keeping its performance constant regardless of weather conditions or intensity of physical activity.

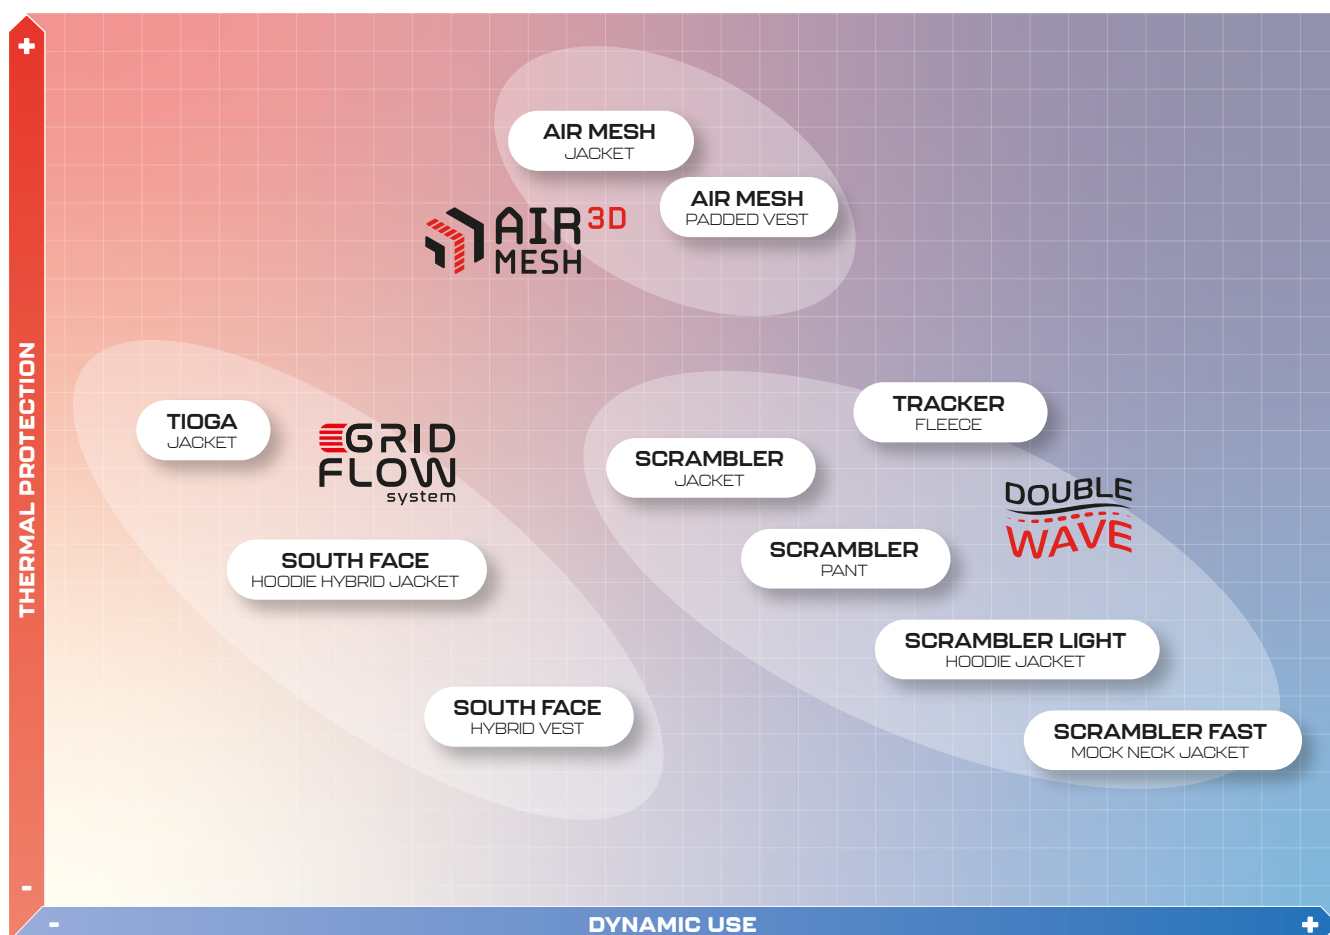

Grazie a un **design a doppia onda** che prevede l'utilizzo in sincronia di due diversi tessuti, questa tecnologia bilancia perfettamente **elasticità e robustezza**. Il risultato sono capi che seguono il movimento naturale del corpo, offrendo il miglior rapporto tra **protezione e traspirabilità, isolamento e peso**.

Thanks to a double wave design that uses two different fabrics in sync, this technology perfectly balances elasticity and strength. The result is garments that follow the body's natural movement, offering the best balance between protection and breathability, insulation, and weight.

Una **struttura a griglia** che migliora la **ventilazione e l'elasticità**, assicurando una gestione ottimale del microclima corporeo. La tecnologia GRID FLOW permette di ridurre al minimo il peso e l'ingombro, rendendo il capo confortevole e pratico da indossare a lungo.

A grid structure that improves ventilation and elasticity, ensuring optimal management of body microclimate. GRID FLOW technology minimizes weight and bulk, making the garment comfortable and practical to wear for a long time.

Il grafico mette in relazione due caratteristiche fondamentali dei capi della linea SYNCRO LINE:

- Il **Thermal Protection**, ovvero la capacità del capo di trattenere il calore e proteggere dal freddo. Salendo verso l'alto, i capi offrono un isolamento maggiore, pensati per temperature più rigide.
- Il **Dynamic Use**, che misura quanto un capo sia adatto a un'attività fisica intensa: più si va verso destra, più il capo è leggero, traspirante e studiato per garantire libertà di movimento.

Questo tipo di visualizzazione aiuta a comprendere a colpo d'occhio il comportamento tecnico dei capi e facilita la scelta in base all'attività e all'ambiente in cui verranno utilizzati.

The graph relates two fundamental characteristics of SYNCRO LINE garments:

- The **Thermal Protection**, which is the garment's ability to retain heat and protect against the cold. Moving upwards, the garments offer greater insulation, designed for colder temperatures.
- The **Dynamic Use**, which measures how suitable a garment is for intense physical activity: the further to the right you go, the lighter, more breathable and designed for freedom of movement the garment is.

This type of visualisation helps to understand the technical behaviour of the garments and facilitates the choice according to the activity and the environment in which they will be used.

TECNOLOGIE APPLICATE

ICONS SYSTEM

Rock Experience ha da sempre l'obiettivo di fornire i migliori prodotti per chi vive la montagna in ogni situazione. A ogni esigenza corrisponde un prodotto con caratteristiche tecniche specifiche. La seguente simbologia aiuta a identificare i principali plus di ogni capo della collezione.

Rock Experience has always aimed to provide the best products for those who experience the mountains in any situation. For every need corresponds a product with specific technical characteristics. The following symbology helps to identify the main pluses of each garment in the collection.

WATER REPELLENT

Il tessuto di questo capo ha un trattamento WATER REPELLENT, che permette all'acqua di scivolare sulla sua superficie senza penetrare.

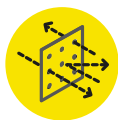

The fabric of this garment has a WATER REPELLENT treatment, which allows water to slide over its surface without penetrating.

4WAYS STRETCH

Questo capo è progettato con un tessuto elastico in quattro direzioni, con lo scopo di adattarsi alle forme del corpo e garantire la massima libertà di movimento.

This garment is designed with a four-way stretch fabric, with the aim of adapting to the shape of the body and guaranteeing maximum freedom of movement.

HOLESNET

Questo capo è realizzato con un'imbottitura che assicura un'equilibrio perfetto tra calore e traspirabilità. Una rete di piccoli fori permette una maggiore aerazione, aumentandone la traspirabilità senza diminuirne la capacità termica. Questa imbottitura conferisce al capo performance e comfort adatti a tutte le attività aerobiche, anche ad alta intensità.

This garment is made with a padding that ensures a perfect balance between warmth and breathability. A network of small holes allows greater ventilation, increasing breathability without decreasing the thermal capacity. This padding gives the garment performance and comfort suitable for all aerobic activities, even at high intensity.

OCTOPUS

La mesh OCTOPUS utilizzata in questo capo è realizzata con una fibra di poliestere con una sezione a croce con otto sporgenze attorno a una fibra cava. Il materiale risulta estremamente leggero, funzionale nell'assorbimento del sudore e con un'elevata capacità termica.

The OCTOPUS mesh used in this garment is made from a polyester fibre with a cross section with eight protrusions around a hollow fibre. The material is extremely light, functional in absorbing sweat and with a high thermal properties.

WOOL RICH BLEND

La lana merino è un materiale molto leggero e confortevole. Possiede tutte le caratteristiche positive della lana e protegge il corpo dalle basse temperature. Merino è anche un tessuto traspirante e morbido al tocco con elevate proprietà di termoregolazione. Il tessuto misto lana previene il restringimento mantenendo le stesse proprietà della pura lana.

Merino wool is a lightweight and comfortable material. It has all the benefits of wool and protects the body from low temperatures. Merino wool is also a breathable and soft touch fabric with high thermoregulation properties. The wool blend fabric prevents shrinking whilst maintaining the same properties of pure wool.

TECNOSTRETCH

Questo capo è realizzato con un tessuto Made in Italy prodotto da Pontetorto S.p.A. che coniuga una superficie esterna liscia e resistente ad una interna con grande capacità di isolamento termico. La fibra elastomerica che lo compone garantisce il massimo comfort.

This garment is made with a Made in Italy fabric produced by Pontetorto S.p.A. that combines a smooth and resistant outer side with an inner layer with great thermal insulation capacity. The elastic fibre that makes it up guarantees maximum comfort.

AIR FLAKE®

Air Flake® è un'imbottitura sostenibile leggera e calda come la piuma, ma realizzata completamente da materiali riciclati. Composta da un filamento continuo di fibre arricciate e tessute insieme, ha una struttura unica in grado di intrappolare grandi quantità d'aria per ottenere la combinazione perfetta tra morbidezza, volume e efficienza termica.

Air Flake® is a sustainable insulation, light and warm as natural down, but produced completely from recycled materials. Made by curled and intricately waved individual fibers, its continuous yarn has a unique structure that traps large quantities of air to obtain the perfect combination of softness, bulkiness and thermal efficiency.

SEAM TAPED

Capi impermeabili con cuciture sigillate mediante l'utilizzo di un nastro adesivo termosaldabile che, applicato con il calore, impedisce all'acqua di infiltrarsi attraverso le cuciture, garantendo una protezione completa senza compromettere traspirabilità e leggerezza.

Waterproof garments with taped seams using a heat-sealable adhesive tape that, when applied with heat, prevents water from infiltrating through the seams, ensuring complete protection without compromising breathability and lightness.

IMPERMEABILITÀ E TRASPIRABILITÀ WATERPROOFNESS AND BREATHABLE

I capi outdoor si valutano in base a due caratteristiche fondamentali: impermeabilità e traspirabilità.

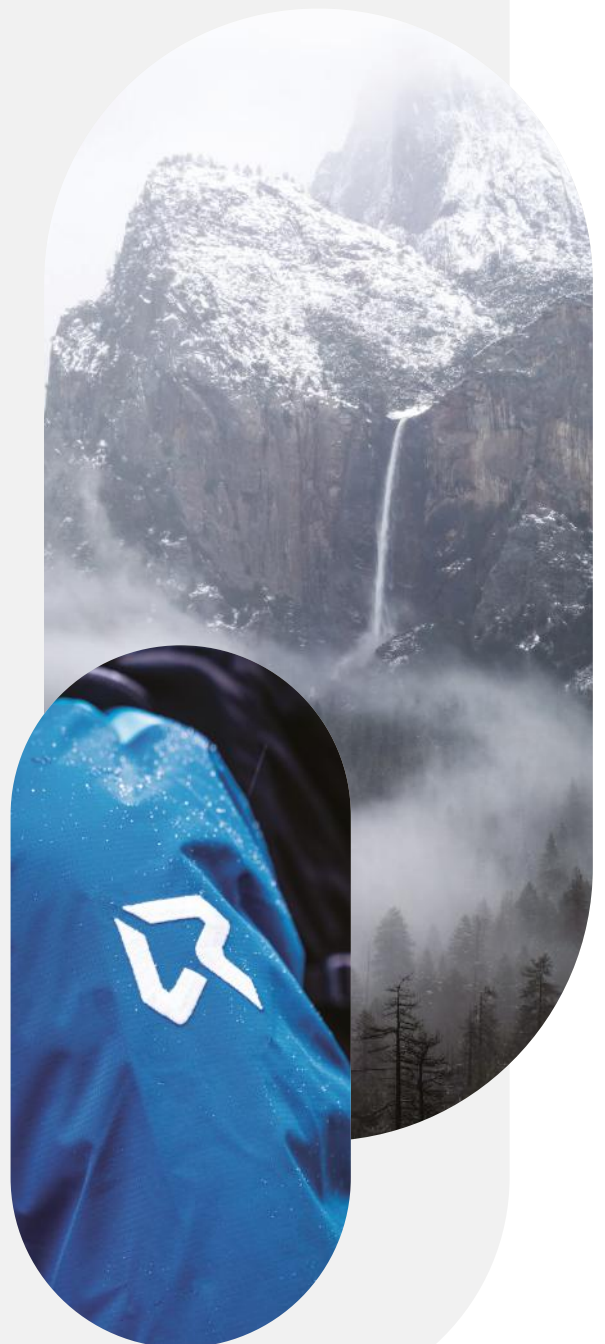

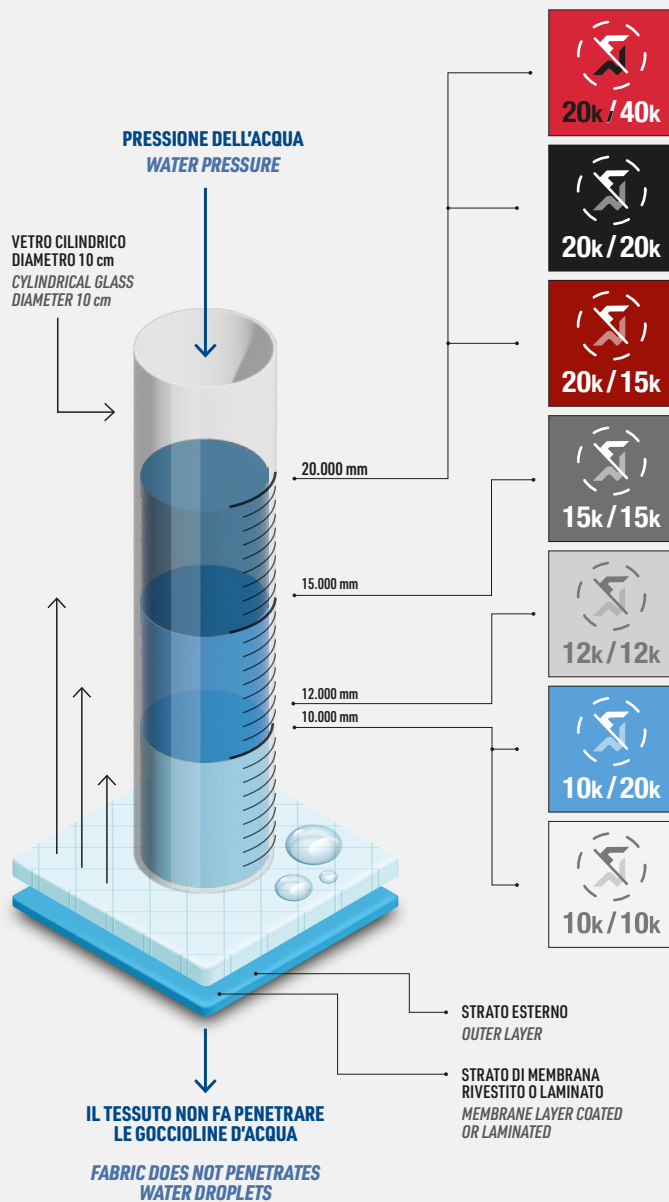

- **Impermeabilità:** si misura con il valore della colonna d'acqua (in mm), che indica la pressione d'acqua che il tessuto può sopportare prima di lasciarla passare. Un capo da 10.000 mm resiste a piogge abbondanti, mentre oltre i 20.000 mm si parla di protezione estrema anche in condizioni di temporali e neve intensa.
- **Traspirabilità:** indica la capacità del tessuto di far uscire l'umidità prodotta dal corpo, mantenendo asciutto l'interno. Si misura in g/m²/24h (MVTR) o con il valore RET: più è basso, maggiore è la traspirazione.

Il giusto equilibrio tra questi due valori garantisce comfort e prestazioni in ogni attività outdoor.

Outdoor garments are evaluated based on two fundamental features: waterproofness and breathability.

- **Waterproofness:** measured by the water column rating (in mm), which indicates the amount of water pressure the fabric can withstand before leaking. A garment with 10,000 mm resists heavy rain, while over 20,000 mm provides extreme protection even in severe storms and heavy snow.
- **Breathability:** refers to the fabric's ability to allow body moisture to escape, keeping the inside dry. It is measured in g/m²/24h (MVTR) or by the RET value: the lower the RET, the higher the breathability.

The right balance between these two values ensures comfort and performance during any outdoor activity.

CAPI IMBOTTITI CON PIUMA CERTIFICATA

PADDED WITH CERTIFIED DOWN

FILL POWER

Il fill power è un numero che misura la sofficità e la qualità di un prodotto in piuma. Il potere di riempimento misura la quantità di spazio occupata da un grammo di piumino in pollici cubi. Un potere di riempimento più elevato significa che la piuma ha una qualità migliore, un loft più elevato e mantiene la sua fermezza più a lungo. Questo perché un potere di riempimento più elevato significa che la piuma può intrappolare più aria, il che consente un maggiore isolamento.

Fill power is a number that measures the fluffiness and quality of a down product. Fill power measures the amount of space one ounce of down will occupy in cubic inches. Higher fill power means the down will have better quality, higher loft, and will retain its firmness longer. This is because higher fill power means the down can trap more air which allows for greater insulation.

TRATTAMENTO HYDRODOWN

Hydrodown è il nome del nuovo trattamento sviluppato da Molina per impermeabilizzare piumino e piuma. Piume e piumini sono per natura idrorepellenti perché gli animali (uccelli acquatici) secernono un particolare tipo di grasso che rende il piumaggio resistente all'acqua. Durante i processi di lavaggio e sterilizzazione industriale la piuma perde gran parte del suo contenuto di grasso e quindi viene a mancare la sua naturale caratteristica idrorepellente. Con questo trattamento recuperiamo l'originaria caratteristica di impermeabilità del piumino e della piuma, rendendoli ideali per l'imbottitura di giacche e sacchi a pelo.

Hydrodown is the name for the new treatment developed by Molina for waterproofing down and feathers. Feathers and down are hydrorepellent by nature because the animals (waterfowl) secrete a particular kind of fat that makes the plumage water-resistant. During the industrial washing and sterilization processes the feathers are going to lose most of their fat content and therefore its natural hydrorepellent feature is going to fail. With this treatment we recover the original waterproof characteristic of down and feathers, making them ideal for the filling of jackets and sleeping bags.

RESPONSIBLE DOWN STANDARD

Il Responsible Down Standard è promosso da Textile Exchange, una delle più importanti organizzazioni non-profit internazionali per lo sviluppo responsabile e sostenibile nel settore tessile. RDS prevede il rilascio di una dichiarazione ambientale verificata da parte terza che assicura che piumino e piume impiegate per elementi di imbottitura siano ottenute da uccelli acquatici (oca e anatra) o terrestri (es. pollo e tacchino) che non siano stati oggetto di trattamenti che procurino dolore, sofferenza o stress e che sia applicato, il mantenimento della tracciabilità lungo l'intero processo produttivo.

The Responsible Down Standard is promoted by Textile Exchange, one of the leading international non-profit organisations for responsible and sustainable development in the textile industry. RDS provides for the issuance of a third-party verified environmental statement that ensures that down and feathers used for down filling elements are obtained from waterfowl (e.g. goose and duck) or land birds (e.g. chicken and turkey) that have not been subjected to treatment that causes pain, suffering or stress, and that traceability is maintained throughout the production process.

RE.VOLUTION PROJECT

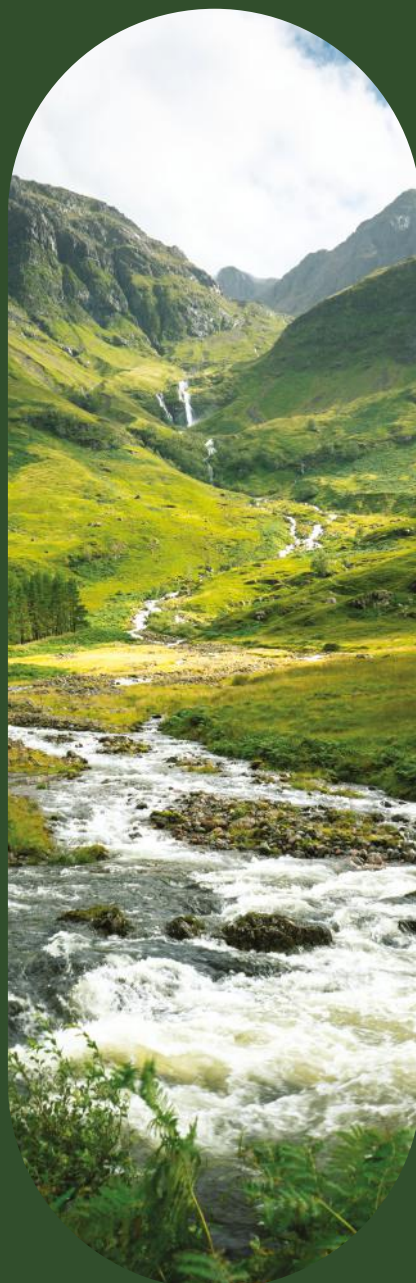

TESSUTI E FINITURE SOSTENIBILI SUSTAINABLE FABRICS & FINISHES

Rock Experience, con il progetto **RE.VOLUTION PROJECT**, si allinea agli Obiettivi di Sviluppo Sostenibile dell'ONU seguendo l'Agenda 2030 come guida. L'azienda punta a ridurre l'impatto ambientale utilizzando filati riciclati, packaging sostenibili e sistemi di trasporto ottimizzati. Collabora con partner certificati e adotta processi a basso impatto per unire innovazione, performance e rispetto dell'ambiente. Ogni prodotto viene comunicato in modo trasparente, evidenziando le sue caratteristiche ecologiche, con l'obiettivo di contribuire a un futuro più sostenibile.

I tessuti e i processi di finitura sostenibili vengono indicati con le diciture:

Rock Experience, through the RE.volution Project, aligns with the United Nations Sustainable Development Goals, using the 2030 Agenda as its guide. The company is committed to reducing environmental impact by using recycled yarns, sustainable packaging, and optimized transportation systems. It collaborates with certified partners and adopts low-impact processes to combine innovation, performance, and respect for the environment. Each product is communicated with transparency, highlighting its ecological features, with the goal of contributing to a more sustainable future.

Sustainable fabrics and finishing processes are indicated with the labels:

99% ECO

Capo realizzato al 99% con materiali riciclati.
Garment made from 99% recycled materials.

ECOBIT

Una o più parti di questo capo sono state progettate con tessuti o imbottiture realizzate con fibre provenienti da materiali riciclati.
One or more parts of this garment have been designed with fabrics or padding made with fibres from recycled materials.

ORGANIC COTTON

Capo in cotone organico, rispetta gli standard in merito alla sua coltivazione e lavorazione. La sua produzione sostiene la salute dell'ambiente, dell'ecosistema e delle persone, favorendo l'uso di processi e sostanze naturali piuttosto che artificiali, chimiche e tossiche.
This garment is made with organic cotton, it respects its cultivation and processing. Its production supports the health of our planet, of ecosystems and people, by promoting the use of natural substances instead of artificial, chemical and toxic.

PFC FREE

Capo realizzato con un tessuto PFC FREE, trattato senza l'utilizzo di sostanze chimiche inquinanti contenenti fluoro, dannose per l'ambiente e pericolose per la salute di uomini e animali.
This garment is made from a PFC FREE fabric, treated without the use of chemical pollutants containing fluorine, which are harmful to the environment and dangerous to human and animal health.

RE.INSULATION

Capo che utilizza un'imbottitura RE.INSULATION realizzata con poliestere 100% riciclato da bottiglie PET, senza l'utilizzo di microfibre altamente inquinanti. È estremamente soffice e ha un eccellente potere isolante.
This garment uses RE.INSULATION padding made from 100% recycled polyester from PET bottles, without the use of highly polluting microfibres. It is extremely soft and has excellent insulating properties.

SKI TOURING

La linea SKI TOURING è pensata per chi affronta la montagna con passione e cerca capi che offrano il massimo del comfort e della performance.

Grazie a tessuti leggeri, performanti e funzionali, ogni capo è ideale per lo sci alpinismo e per tutte le attività aerobiche sulla neve.

La ricchezza di dettagli tecnici con cui è stata progettata la linea assicura massima traspirabilità, protezione costante e una libertà di movimento totale, anche durante lo sforzo più intenso.

Con SKI TOURING, performance e comfort diventano un tutt'uno: capi che ti accompagnano dalle salite più impegnative alle discese più veloci, sempre con la massima protezione.

The SKI TOURING line is designed for those who take on the mountains with passion and seek garments that deliver the highest level of comfort and performance. Made with lightweight, functional, and high-performing fabrics, each piece is ideal for ski touring and all aerobic activities on snow.

The abundance of technical details with which the line has been developed ensures maximum breathability, constant protection, and total freedom of movement, even during the most intense efforts.

With SKI TOURING, performance and comfort become one: garments that support you from the toughest ascents to the fastest descents, always with maximum protection.

ELIM 2.0

PADDED MAN JACKET

CODE:
MAN - REMJ14871
WOMAN - REWJ08401

Pensata per gli atleti più esigenti, la giacca ELIM 2.0 è l'alleato ideale per le attività aerobiche a ritmo sostenuto come lo scialpinismo.

È un capo altamente funzionale perché combina un tessuto principale waterproof ed estremamente traspirante con un tessuto secondario 4-way stretch leggermente garzato sul rovescio. Il bilanciamento dei pesi delle imbottiture e degli inserti non imbottiti garantisce un'ottimale termicità in tutte le parti della giacca, assicurando costante protezione, traspirabilità dove più necessario e comfort, con un ingombro ridotto.

The ELIM 2.0 jacket is the perfect companion for high-intensity aerobic activities such as ski touring.

Engineered for performance, it combines a waterproof and highly breathable main fabric with a secondary 4-way stretch material, lightly brushed on the backside for added comfort.

The strategic balance between insulated zones and non-padded inserts guarantees optimal thermal regulation across the entire garment, ensuring reliable protection, targeted breathability, and maximum freedom of movement – all with minimal bulk.

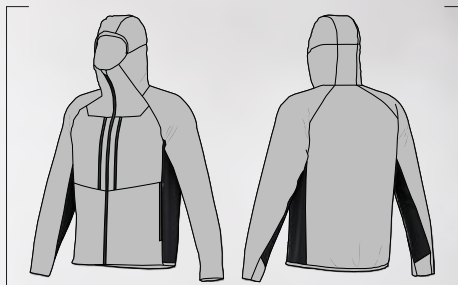

BODY MAPPING TECHNOLOGY

SHELL

Shell disposition combines two different fabrics: 2.0 layers fabric with waterproof and high breathable 20K/40K membrane and 4 ways stretch fabric with light brushing on backside.

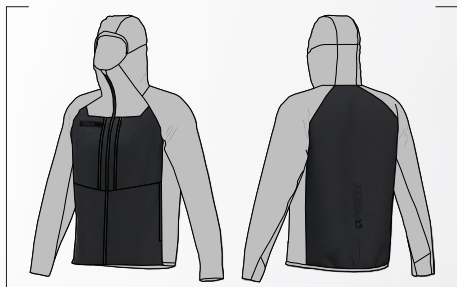

Shell 1: 2L recycled poly pongee with PU milky membrane 20K/40K PFC FREE 100% recycled PL 82 gsm

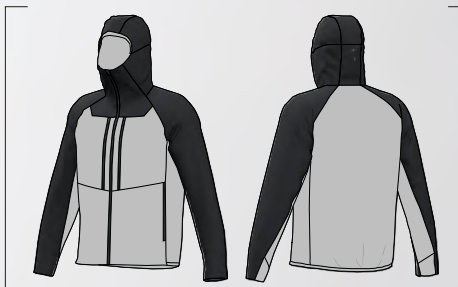

Shell 2: Stretch mixed nylon/poly with light brushing on backside WR PFC FREE 75% PA 15% PL 10% EA 268 gsm

INSULATION

Recycled synthetic insulation with different weights to balance warmth and protection.

Insulation 1: Recycled polyester sheet 120 gsm

Insulation 2: Recycled polyester sheet 100 gsm

Un progetto con personalità per wild souls che vogliono sfidare montagne di polvere immacolata e senza tracce. L'avventura prende forma dalla sensazione di libertà senza costrizioni, dalla voglia di uscire dagli schemi disegnando le proprie linee sulla neve. ROCKRIDE è pronto a vestire gli sportivi che vogliono seguire i propri istinti e i percorsi della propria immaginazione per un divertimento puro, cavalcando la tavola o con gli sci per godersi curve in back side o discese mozzafiato in free ride. Una collezione di abbigliamento ski che grazie alla ricerca di tessuti tecnici, funzionali e resistenti garantisce elevate performances. Colori ricercati e design moderno vi faranno notare anche quando su distese innevate vi lascerete alle spalle una nuvola di powder impalpabile viaggiando alla massima velocità.

A strongly characterised project dedicated to the wild souls ready to challenge immaculate traceless powder snow covered mountains. The adventure takes shape from a sensation of freedom without constrictions, from the desire to think out of the box, drawing your own lines on the snow. ROCKRIDE is for ready to wear sports lovers who want to follow their instincts on the paths of their imagination for pure fun, surfing the board or wearing their skis to enjoy back side curves or free ride breath-taking slopes. A ski clothing collection ensuring high level performances thanks to a detailed research of technical functional and resistant materials. Sophisticated colours and a modern design will make you get noticed even while leaving an impalpable cloud of powder snow behind your back skiing at high speed.

COLOUR BOARD

La colour board della collezione esplora l'equilibrio tra performance ed estetica, riflettendo la doppia anima dello sci, tra pista e fuori pista. La palette alterna contrasti intensi a toni ispirati alla natura, creando un linguaggio visivo raffinato. Le cromie profonde e sature richiamano le rocce e i paesaggi in ombra dell'alta quota, mentre le nuance più chiare e neutre evocano la neve, la luce e la purezza degli ambienti alpini. Il risultato è un sistema cromatico coerente e funzionale, che rafforza l'identità della collezione valorizzandone al tempo stesso l'aspetto tecnico.

The colour board of the collection explores the balance between performance and aesthetics, reflecting the dual identity of skiing, both on and off-piste. The palette alternates intense contrasts with nature-inspired shades, creating a refined visual language. Deep, saturated colours recall the rock formations and shaded landscapes of high altitudes, while lighter, neutral tones evoke snow, light, and the purity of alpine environments. The result is a coherent and functional colour system that strengthens the identity of the collection while enhancing its technical appeal.

CARVER

PADDED MAN JACKET

CODE:
REMJI5001

Pag. 54

Pensata per affrontare le piste e progettata per le intemperie, **CARVER** è una giacca da sci imbottita che combina un tessuto ripstop lucido con rinforzi strategici su cappuccio, spalle e gomiti per garantire massima durata. I dettagli funzionali – come la tasca skipass sulla manica, le regolazioni con coulisse su cappuccio e fondo, l'imbottitura high-loft e le capienti tasche antivento – offrono comfort e prestazioni durante tutta la giornata. I polsini interni in lycra, il gancio metallico porta-guanti e i bottoni automatici personalizzati completano un capo che unisce stile, protezione e praticità.

*Engineered for the slopes and built for the elements, **CARVER** is an heavy padded ski jacket that combines a shiny ripstop main fabric with reinforcement on hood, shoulders and elbows for enhanced durability. Smart features like the skipass pocket on the sleeve, adjustable drawstrings on hood and hem, high-loft padding, windproof waist pockets ensure all-day performance. Inner lycra cuffs, a metal hook to hang gloves and signature snap buttons elevate both function and style, while the internal mesh pocket keeps your essentials in check. Designed to perform. Made to stand out.*

STORMRIDE BIB è la nostra salopette tecnica pensata per il freeride in neve fresca: massima performance, massimo comfort.

Realizzata in tessuto stretch a 3 strati altamente resistente con membrana 20K/15K, offre protezione totale anche nelle condizioni più estreme. Il fit ampio garantisce libertà di movimento, mentre le cuciture nastrate, le zip impermeabili e le lunghe zip di ventilazione laterali YKK a doppio cursore assicurano una gestione ottimale della temperatura corporea. Dettagli funzionali come le ginocchia preformate, i rinforzi sul fondo gamba, le ghettoni integrate e le tasche capienti con costruzione a soffietto offrono la massima praticità. Bretelle regolabili personalizzate e passanti in vita assicurano una vestibilità personalizzata, in pista e fuori. Montagna estrema? Stormride è all'altezza.

***STORMRIDE BIB** is our functional gear for freeriding on deep powder, built for performance and designed for comfort. This 3-layer bib is made from a heavy-duty stretch fabric with 20K/15K membrane ready to handle demanding conditions on the slopes. The loose fit ensures full freedom of movement, while taped seams, waterproof zippers and long YKK 2-way side vents offer excellent climate control. Functional details like anatomically shaped knees, reinforced bottom legs, integrated gaiters, and spacious pockets with pleated construction deliver maximum utility. Adjustable custom suspenders and belt loops provide a secure, personalized fit – whether you're on-piste or off.*

Serious gear for serious days on the mountain.

SWAY

PADDED WOMAN JACKET

CODE:
REWJ08521

Pag. 57

Le giacche **SWAY** e **BRIGHT** sono le ultime novità pensate per farti brillare come un diamante. Design innovativo, dettagli tecnici e uno stile che non passa inosservato, per vivere lo sport dentro e fuori le piste. Create per farsi notare, queste nuove proposte uniscono un taglio leggermente corto a una vestibilità femminile e donante, con tessuti effetto specchio o vinile – perfette per distinguersi in ogni occasione. Ma non si tratta solo di stile.

Queste giacche sono progettate anche per la performance, con dettagli tecnici pensati per la neve: mentoniera alta con bottoni a pressione sul collo per una protezione extra, imbottitura high-loft per un calore avvolgente e coulisse regolabili su cappuccio e fondo per una vestibilità personalizzata e massimo comfort anche nelle giornate più fredde. Quando lo stile incontra la funzionalità – per brillare, ovunque ti porti l'avventura.

SWAY and **BRIGHT** jackets are the newest styles to shine bright like a diamond on and off the mountain.

Designed to turn heads, these fresh styles combine a slightly cropped silhouette with a flattering feminine fit and high-gloss mirror or vinyl-effect fabrics — made to make you stand out in any setting.

But it's not just about looks.

These jackets are built for performance, featuring slope-ready details like a high protective collar flap, warm high-loft insulation, and adjustable drawcords on hood and hem for a customized fit and maximum comfort in cold conditions.

Style meets function — so you can shine, wherever the adventure takes you.

GROUND UP

GROUND UP nasce dalla passione per l'arrampicata e da un lavoro sul campo con alpinisti esperti. Testata e approvata da chi conosce davvero la montagna, introduce un'idea di abbigliamento ad alta tecnica: progettazione ergonomica che segue il movimento, elasticità multidirezionale e gestione termica evoluta per mantenere il corpo efficiente nei cambi di intensità. L'uso di tessuti e membrane di ultima generazione combina protezione dagli elementi, traspirabilità avanzata e resistenza all'abrasione. Il risultato è un comfort continuo e prestazioni affidabili anche quando il ritmo aumenta.

GROUND UP was born from a passion for climbing and fieldwork with expert mountaineers. Tested and approved by those who truly know the mountains, it introduces a concept of highly technical clothing: ergonomic design that follows movement, multidirectional elasticity, and advanced thermal management to keep the body efficient during changes in intensity. The use of latest-generation fabrics and membranes combines protection from the elements, advanced breathability, and abrasion resistance. The result is continuous comfort and reliable performance even when the pace picks up.

Pensata per chi affronta la montagna con la stessa intensità con cui si cerca "il tentativo perfetto", la **MIDNIGHT SENDER** è una giacca in piuma multifunzione che unisce performance alpinistiche e stile essenziale. Il taglio a "T" le conferisce una vestibilità over e un look pulito, facile da indossare anche in contesti urbani. Il tessuto in nylon 30D microripstop con trattamento DWR assicura resistenza e protezione dagli agenti atmosferici, mentre la fodera in nylon 20D microripstop con finitura interna priva di bordature regala la sensazione di essere avvolti in un caldo sacco a pelo. L'imbottitura in piuma 90/10 – 600 fill power (250 gr) con costruzione a trapunto passante garantisce calore e leggerezza anche nelle giornate più fredde e secche, quelle amate dai boulderisti in cerca di aderenza perfetta.

Dettagli funzionali come le due ampie tasche vita, la tasca di sicurezza interna e la zip principale con doppio cursore che la rende compatibile con l'imbrago, completano una giacca pensata per l'alpinismo e l'arrampicata, ma pronta ad accompagnarti ovunque. Con i suoi 590 gr in taglia L uomo, è un concentrato di calore, leggerezza e praticità.

*Designed for those who approach the mountains with the same intensity they seek "the perfect send," the **MIDNIGHT SENDER** is a multifunction down jacket that combines alpine performance with a clean and essential design. Its T-shaped construction provides an overfit silhouette and a sleek look, making it easy to wear even in urban settings.*

The 30D microripstop nylon shell fabric with DWR treatment ensures durability and protection, while the 20D microripstop lining without inner binding gives the sensation of being wrapped in a warm sleeping bag. The 90/10 down insulation – 600 fill power (250 gr) with stitch-through quilting provides warmth and lightness even on the coldest, driest days—the ones boulderers love for perfect friction.

Functional details such as two large hand pockets, an internal security pocket, and a two-way harness-compatible main zip complete a jacket designed for mountaineering and climbing, but ready to accompany you anywhere. Weighing 590 gr in men's size L, it is a concentrate of warmth, lightness, and practicality.

TRACKER

MAN/WOMAN FLEECE

CODE:

MAN - **REMC03371**

WOMAN - **REWC03341**

Pag. 80/81

Il nostro nuovo modello **TRACKER** ridefinisce il concetto di fleece: minimalista nel design ma estremamente performante, è costruito con la tecnologia Double Wave, che combina traspirabilità e isolamento. La fodera in mesh garzata su entrambi i lati a trama ampia (100 g/m²) intrappola molta aria, garantendo calore e leggerezza, mentre il tessuto esterno a maglia con trattamento DWR (100 g/m²) resiste al vento senza compromettere la traspirabilità.

Versatile e tecnico, il Tracker si muove tra la funzione di fleece e quella di active insulation, perfetto per attività ad alta intensità o come strato intermedio. Le bordature elasticizzate su fondo, polsini e cappuccio completano un capo che unisce estetica pulita e massime prestazioni. Con 410 g in taglia L uomo, rientra nella categoria dei power fleece, leggero ma incredibilmente performante.

Our new style **TRACKER** redefines the concept of fleece: minimalist in design yet highly performance-oriented. It is engineered with Double Wave technology, which combines breathability and insulation. The mesh lining, brushed on both sides with a wide weave (100 g/m²), traps a lot of air, ensuring warmth and lightness, while the outer knit fabric with DWR treatment (100 g/m²) resists wind without compromising breathability.

Versatile and technical, the Tracker can be used both as a fleece and as active insulation, perfect for high-intensity activities or as a mid-layer. Elastic binding on hem, cuffs, and hood completes a garment that blends clean aesthetics with maximum performance. Weighing 410 g in men's size L, it falls into the power fleece category—lightweight yet incredibly functional.

AIR MESH PADDED MAN JACKET

AIR MESH 3D

REGULAR FIT

- Revolutionary jacket engineered with an active padding, extremely breathable that ensures isolation even when it is completely wet.
- The special 3D AIR MESH padding retains memory and prevents the formation of thermal bridges to the outside. It is 2 way stretch and it is combined with mechanical stretch lining and outer shell. The result is a remarkable flexibility due to the sync action between shell, lining and insulation
- Breathability and comfortable fit is due also to the padding body mapping. HolesNet, poly padding with perforations, used on sleeves, side panels and hood side panels allow air circulation.
- This jacket is a middle weight suitable both as belay jacket or to be worn under hard shell
- Helmet compatible and integrated hood with drawstring on front and back
- Preshaped sleeves
- Bottom garment drawstring

REGULAR FIT

- Style designed to be warm, soft and breathable thanks to its innovative DOUBLE WEAVE construction. An all-round fleece jacket that combines technical performance and comfort. It's the ideal companion both for the outdoors and for everyday use
- It combines an inner brushed polyester mesh with an open structure and lightweight outer polyester fabric. The two detached layers create an air chamber that increases insulation and comfort. The result is a style which guarantees technical performance, soft handfeel, setting a new standard for comfort and breathability
- Full front zip with integrated hood
- Elastic binding on cuffs, hem and hood edge
- Two hand pockets at waist

FLOW
system

ATHLETIC FIT

- Hybrid jacket made with fleece back side brushed grid and ripstop woven.
- On hood, shoulders and front body, the fleece is used with the brushed pattern as front side and the ripstop woven is directly applied above the fleece. This solution helps to improve breathability, trap heat and wick moisture
- Integrated hood with lycra tape on hood hole
- Waist pockets
- Logo prints

CORE

CORE è la base del tuo equipaggiamento: essenziale, affidabile e progettata per l'outdoor di tutti i giorni. Nata sul terreno, accompagna chi si muove tra sentieri, pareti e città senza rinunciare a tecnica e comfort. La collezione segue la logica del layering (base, mid, shell) per garantire termoregolazione efficace, libertà di movimento e protezione dagli elementi in ogni stagione. Materiali performanti e dettagli intelligenti assicurano performance costanti e un design pulito capace di passare dalla montagna al quotidiano con naturalezza.

CORE is the basis of your kit: essential, reliable, and built for everyday outdoor use. Born in the field, it supports those moving between trails, crags, and the city without compromising on technical performance or comfort. The collection follows a layering logic (base, mid, shell) to ensure effective thermoregulation, freedom of movement, and protection from the elements in every season. High-performance materials and smart details deliver consistent performance and a clean design that transitions naturally from the mountains to everyday life.

ROCKBOUND

HOODIE MAN/WOMAN FLEECE

CODE:

MAN - **REMC03441**

WOMAN - **REWC03421**

Il nostro fleece **ROCKBOUND** è progettato per garantire performance elevate e comfort termico in ogni situazione. Questo modello è realizzato in pile tecnico con superficie esterna liscia e resistente, abbinata a un interno caldo e morbido per un'ottimale gestione del calore. Le tasche petto e vita sono dotate di zip autobloccanti, ideali per un utilizzo sicuro anche durante l'attività intensa. I bordi rifiniti in lycra su cappuccio, fondo e polsini assicurano una vestibilità stabile e aderente. Perfetto come strato intermedio o come capo singolo per utilizzi outdoor attivi.

Massimo comfort termico. Libertà di movimento. Prestazioni ovunque.

ROCKBOUND fleece is designed for active performance and everyday comfort. This style is crafted from technical fleece with a smooth, durable outer face and a warm, soft backside. Chest and waist pockets feature autolock zippers for secure storage during movement, while lycra binding on the hood, hem and cuffs ensures a snug, stay-in-place fit. Ideal as a mid-layer or standalone piece for dynamic outdoor use.

*Stay warm. Move free.
Perform anywhere.*

ALPITUDE

ALPITUDE è la nuova capsule che porta l'energia della montagna fuori dai sentieri, tra materiali caldi, texture avvolgenti e dettagli ispirati al mondo alpine. ALPITUDE non è pensata per le prestazioni estreme, ma per accompagnare chi sceglie di vivere la montagna con stile e per portare un tocco di outdoor nella vita di tutti i giorni. Il calore giusto per chi ama spazi aperti e pensieri leggeri.

ALPITUDE is the new capsule collection that brings mountain energy beyond the trails — with warm materials, cozy textures, and alpine-inspired details.

Not designed for extreme performance, but to accompany those who live the mountain with style, and bring a touch of the outdoors into everyday life.

The right kind of warmth for those who love open spaces and a lighter state of mind.

URBAN STYLE, OUTDOOR SOUL.

La linea di capi termici intimi è pensata per accompagnarti in ogni attività outdoor, garantendo protezione e comfort in qualsiasi condizione climatica. I tessuti tecnici utilizzati offrono isolamento termico, traspirabilità e libertà di movimento, mantenendo il corpo caldo e asciutto anche nelle giornate più fredde. Accanto alle fibre sintetiche ad alte prestazioni, la collezione include anche modelli in lana merino, apprezzata per le sue naturali proprietà termoregolanti, antibatteriche e di gestione dell'umidità. Indossati come primo strato a contatto con la pelle, questi capi sono l'alleato ideale per trekking, alpinismo, sci e ogni avventura all'aria aperta.

The line of thermal base layers is designed to support you in every outdoor activity, ensuring protection and comfort in all weather conditions. The technical fabrics provide thermal insulation, breathability, and freedom of movement, keeping the body warm and dry even on the coldest days. Alongside high-performance synthetic fibers, the collection also includes garments made of merino wool, valued for its natural thermoregulating, antibacterial, and moisture-management properties. Worn as the first layer in direct contact with the skin, these garments are the ideal companion for trekking, mountaineering, skiing, and every outdoor adventure.

AUMENTA IL COMFORT NELLE NOTTI PIÙ FREDDHE

Aggiungi fino a 5°C di calore extra durante le notti più fredde con il nostro sacco lenzuolo Rock Boost Liner. Realizzato in poliestere ad alte prestazioni, migliora sensibilmente l'isolamento termico, portando il comfort a un livello superiore. Perfetto per chi cerca una soluzione leggera ma efficace per affrontare temperature più rigide, sia in tenda che in rifugio.

Add up to 5°C of extra warmth during the coldest nights with our Rock Boost Liner. Made of high-performance polyester, it significantly improves thermal insulation, taking comfort to the next level. Perfect for those looking for a lightweight yet effective solution for dealing with colder temperatures, whether in a tent or shelter.

ALCHEMIST

L'Alchemist EVO è uno zaino da sci alpinismo progettato per garantire stabilità, comfort e funzionalità in area alpina. Realizzato in poliestere ripstop spalmato con fodera in nylon microripstop, è dotato di uno schienale a celle chiuse per il supporto durante lo sci. Lo zaino include spallacci imbottiti con tasca di sicurezza e tasca portaborraccia, due tasche lombari con cerniera, uno scomparto principale compatibile con la sacca di idratazione e uno scomparto dedicato per pala e sonda. Una tasca superiore morbida e foderata può contenere in sicurezza la maschera.

Gli sci possono essere trasportati tramite gli attacchi diagonali o laterali, il pannello frontale è dotato di passanti e cinghie per ciaspole o snowboard, due porta piccozza e quattro punti di ancoraggio per il casco completano il design.

The Alchemist EVO is a ski touring backpack designed for stability, comfort, and alpine functionality. Featuring a shorter back panel for a more compact fit, it is constructed from durable coated ripstop polyester with a nylon microripstop lining. Padded shoulder straps, a lumbar zippered pockets, and a closed-cell back panel provide support and comfort during intense alpine activity.

The backpack includes a main compartment with hydration bladder compatibility, a dedicated shovel and probe compartment, and a soft-lined top pocket for goggles. Ski can be carried via diagonal or lateral, with rear loops for snowshoes or snowboard, dual ice axe holders, and four rear attachment points for a helmet.

ESPLORARE, VALORIZZARE E COSTRUIRE COMUNITÀ

Il **Discovery Tour**, sostenuto da Rock Experience, è un progetto intrapreso 3 anni fa **con l'obiettivo di esplorare e valorizzare nuove pareti e comunità** di arrampicatori.

La sua essenza in collaborazione con il gruppo alpinistico lombardo Ragni e i Bobo's dalla Sicilia, sta nella scoperta non solo di territori inesplorati, ma anche nell'incontro con nuove comunità e nell'arricchimento di territori con lo sviluppo di nuove falesie e comunità attraverso l'arrampicata.

I progetti più autentici non nascono da schemi rigidi, ma da intuizioni istintive. Proprio come un'opera d'arte che prende forma da sovrapposizioni spontanee, anche il **Rock Experience Discovery Tour** è nato così: da un'idea che ha trovato direzione nel tempo.

La prima tappa è stata a Stilo, in Calabria, dove fin da subito è emersa la volontà di collaborare con la comunità locale per lasciare qualcosa di concreto: una nuova falesia per le future generazioni.

Un intento che ha preso vita anche in Bulgaria, insieme ai Ragni di Lecco e all'Istituto Italiano di Cultura di Sofia, con Rock Experience al fianco del progetto come sponsor e sostenitore.

Il passo successivo è arrivato in Sicilia, con un approccio più libero e collaborativo. Per 30 giorni, gruppi come i **Bobo's**, i **Ragni** e i climber locali hanno lavorato fianco a fianco alla chiodatura di nuove pareti, in uno spirito che ricordava l'arrampicata degli anni '80. Un'esperienza ancora viva, che ha spinto Rock Experience a intervenire in modo più diretto e consapevole. Lo stesso spirito ha guidato la creazione della nuova falesia del Ferro, in Val di Mello: un progetto vicino, ma con una visione ampia.

Oggi, il Rock Experience Discovery Tour guarda al futuro con una visione più ampia. Non si tratta più solo di aprire nuove falesie, ma di **valorizzare i luoghi** in cui nascono. Attraverso azioni di comunicazione mirate e il **coinvolgimento diretto delle comunità locali**, il progetto punta a creare un impatto duraturo, sia dal punto di vista sportivo che turistico.

Grazie alla collaborazione tra i gruppi Ragni e Bobo's e alle realtà di scalatori locali, **Rock Experience vuole continuare a costruire un'eredità**: falesie attrezzate, territori valorizzati, comunità unite. **Un modello di sviluppo sostenibile e condiviso**, dove l'arrampicata diventa strumento di connessione, inclusione e crescita per tutti.

Falesia :

Aracnobobo's, Grotta Regina, Grotta degli Svizzeri Palermo, Italia

Falesia:

Il mulino Lakatnik, Bulgaria

Progetto:

È stata una collaborazione tra Ragni e l'istituto di cultura italiano di Sofia, alla base del progetto c'era la cultura del alpinismo (riconoscimento come patrimonio dell'UNESCO) come mezzo di aggregazione e possibilità turistica, la creazione di una nuova falesia ha avuto anche una collaborazione attiva con gli scalatori del posto, la struttura aveva anche alcune caratteristiche importanti è immersa in una zona dove ci sono altre falesie già frequentate a uno stile differente rispetto alle precedenti più "moderno" un'esposizione differente così da aumentare la frequentazione della zona e è raggiungibile da Sofia con mezzi pubblici quindi anche i ragazzi possono utilizzarla con un approccio Green.

Durata progetto:

18 giorni

Tiri chiodati:

50 tiri

Difficoltà:

dal 6A al 8A+

Spit messi:

700 golfari

Partecipanti:

Squadra chiodatura Giovanni Ongaro, Maurizio Tasca, Paolo Marazzi, Serafino Ripamonti, Simone Pedefferri, poi raggiunti da Luca Schiera e Luca Passini

Video e foto:

Michele Caminati

Progetto:

È stato il progetto di svolta a tutti i livelli sia di collaborazione di vivere in un luogo e dare un impulso alla scalata del posto è stata un'idea spontanea che ha creato una sinergia fantastica che poi è stata riportata nelle altre esperienze è stata appoggiata dal gruppo Ragni e poi compresa da Rock e ha voluto comunicarla con 4 filmati "L'Isola Verticale" e una serie di foto e articoli.

Durata del progetto:

30 giorni

Tiri chiodati:

50 tiri suddivisi in 3 falesie più qualche tiro in altri settori e una via lunga

Difficoltà:

dal 6B al 8B+ più alcuni progetti

Spit usati:

600 circa

Partecipanti:

Una dozzina di persone hanno contribuito provenienti da diversi gruppi, Ragni, Bobo's, comunità di Palermo e amici.

Video e foto:

Michele Caminati (effettuate successivamente al progetto con l'appoggio di Rock Experience)

Falesia:

Ferro Val di Mello, Italia

Progetto:

L'idea era di utilizzare il processo creativo usato a la Sicilia anche in una falesia nella zona proprio per lasciare un concetto fruibile vicino, il Ferro è una struttura in quota immersa nelle montagne con un accesso di tutto rispetto, per 2 anni una serie di persone si sono susseguite con me per creare la falesia, molte volte si trascorrevano più giorni tra chiodare e scalare dormendo sotto un enorme masso sotto la falesia, il tutto è creato in un posto magico dove la scalata è solo un aspetto di quello che vivi lassù è sicuramente il Ferro è una falesia particolare nel mondo della scalata.

Durata del progetto:

circa 30 giornate divise in 2 anni

Tiri chiodati:

40 tiri

Difficoltà:

dal 6A al 8C+ più alcuni progetti

Spit usati:

400

Partecipanti:

Davide Spini, Luca Schiera, Marco Giorgio, Nicolo Bartoli, Max Piazza, Simone Pedefferri

Video e foto:

Michele Caminati

Falesie:

Guri Radanis, Koli Gramshija, Qafe Priske Tirana, Albania

Progetto:

Ultimo progetto realizzato completamente appoggiato da Rock è stata l'evoluzione massima delle idee precedenti, racchiudere i 3 gruppi sponsorizzati dal azienda Ragni, Bobo's, Gamma per un viaggio dove l'esplorazione e l'avventura sono alla base, la scoperta della gente, la collaborazione con gli scalatori del posto la chiodatura di 3 settori di grande qualità che daranno la possibilità di migliorare la scalata in Albania e un ritorno turistico possibile, è stata un'avventura unica e un grande risultato.

Durata del progetto:

20 giorni

Tiri chiodati:

50 divisi in 3 settori

Difficoltà:

dal 6A al 8A+ B più alcuni progetti

Spit messi:

650 circa

Partecipanti:

Ragni, Gamma, Bobo's

Video e foto:

Michele Caminati

Falesie:

La Cattedrale, San Giuseppe Jato, Sicilia, Italia Sicilia, Italia

Progetto:

Questa magnifica falesia immersa nella piana degli Albanesi nel cuore della Sicilia era da anni che la si osservava ma le sue gigantesche dimensioni non davano grandi possibilità per essere chiodata, troppo grande, troppo difficile! Con il progetto Discovery Tour di Rock Experience i 3 gruppi: Ragni, Gamma e Bobo's hanno deciso di intraprendere questa nuova avventura, e così è stato! Fra tutte le sfide di chiodatura questa è stata in assoluto la più tecnica per la complessità della falesia, con tiri impressionati fino a 60 metri, contornati da canne giganti in una struttura che ricorda una gigantesca cattedrale gotica immersi in un paesaggio spettacolare.

Durata del progetto:

14 giorni

Tiri chiodati:

30 tiri alcuni fino a 65 m + una via lunga di 5 tiri fino al 6A+

Difficoltà:

Dal 6A al 8B+ più alcuni progetti

Spit messi:

550 circa

Partecipanti:

Gruppo Ragni, Gamma, Bobo's, Climbing Sicily, Graffiti Climbing.

Video e foto:

Michele Caminati

Falesie:

Iron Feet e La Quercia nel canyon del fiume Una Bihac, Bosnia

Progetto:

In questo viaggio non vi è stato solo l'aspetto sportivo ma anche quello sociale, ovvero far crescere una comunità verticale ancora giovane, un aspetto che è stato al centro della spedizione. Obiettivo il proseguimento di un progetto iniziato anni fa grazie a Francesco e Open Medditeran, che avevano creato una palestra indoor, fino ad allargarsi all'aperto con la chiodatura di una falesia con alcuni scalatori italiani, i Ragni la piccola comunità del posto era entusiasta di tutti questi stimoli, quindi abbiamo pensato che il Discovery Tour potesse allacciarsi a questi valori e dare un enorme contributo e così è stato. Abbiamo continuato a valorizzare il territorio con due falesie e svolto corsi di formazione nella palestra Dalkja, con tracciature, allenamenti, manovre.

Durata del progetto:

10 giorni

Tiri chiodati:

30 tiri in due falesie Iron Feet e La Quercia

Difficoltà:

Dal 6A al 8B+ più alcuni progetti

Spit messi:

300 circa

Partecipanti:

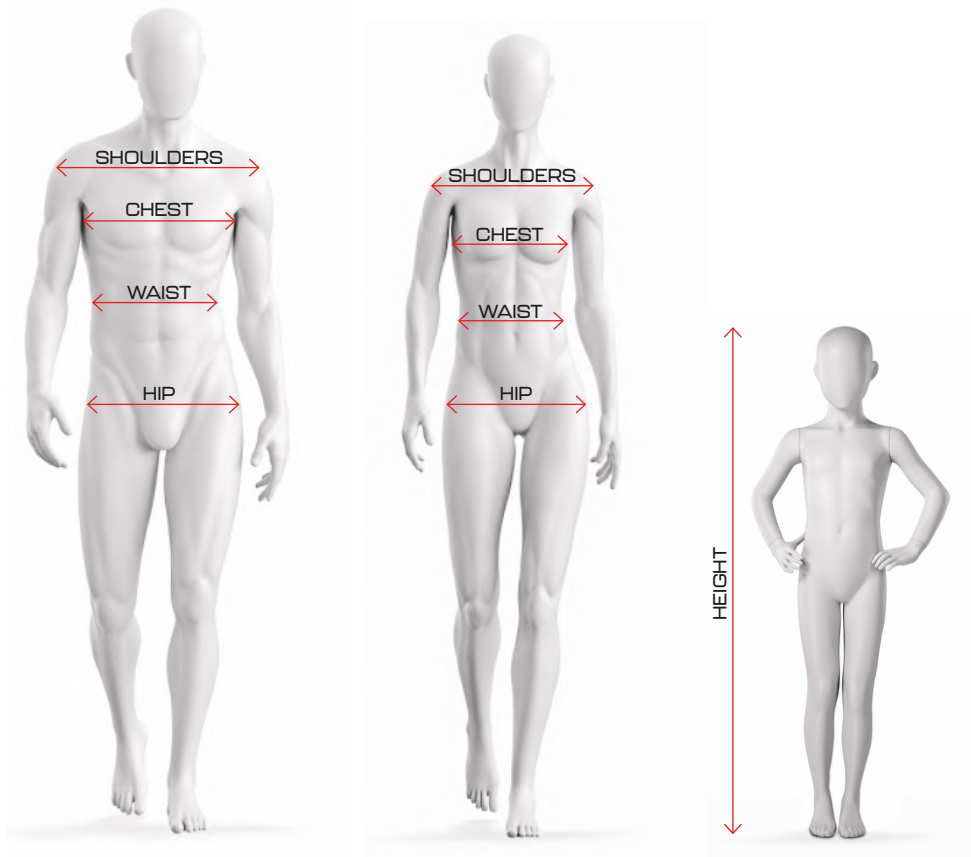

Gruppo Ragni, Gamma

Video e foto:

Michele Caminati
