

# INTRAORAL IMAGING

INTRAORAL SENSOR

---

DENTAL X-RAY

## The World's First Photon-Counting Intraoral Sensor

### Cutting Edge Technology and Strict Tests Deliver Unrivaled Durability

The Xpectvision intraoral sensor uses silicon-based chips instead of the traditional material, cesium iodide (CsI), avoiding image blurring or performance deterioration.

**High-Strength,  
Durable Cable**

**Water Resistance  
Tested to IEC IP68**

Technical Specifications	
Technology Used	Photon Counting Detection (PCD)
Waterproof	Yes
RVG Size	1.5
Effective Imaging Area	25mm x 30mm
Image Resolution	14lp/mm
Pixel Size	-
Sensor Ready for image capture	Manually
License Required	Yes
Cable Quality	Reinforced
Cable Length	3 meters*
Gray Scale	>=16 bit

\*Approx. 3 Meters

## ***Xpectvision's Direct Imaging Innovation***

Provides Unparalleled Clinical Image Quality

Of its high technical requirements and costs, photon-counting is an emerging technology in clinical CT. Xpectvision is the world's first to apply the latest photon-counting technology to dentistry, enabling direct imaging, avoiding the interference of light scattering from conventional indirect imaging, and ensuring image acquisition stability.

The broad dynamic range eliminates time-consuming fine-tuning of exposure to produce a clinical image. Adjust contrast and brightness to meet different clinical requirements.

# PORT-X III

Slimmer | Smarter | Superior

### STEADY SELLER

With excellent quality & economy, PORT-X III has been loved steadily by our customers since its launch.

### EXCELLENT SHIELDING

0.5T lead shielding protects users and patients from X-RAY scattering.

### EASY TO USE

The preset exposure time allows you to easily acquire the image in just three operations.

Technical Specifications		
<b>X-Ray Generator</b>	Type	High Frequency Inverter
	Power Output	180W
<b>X-Ray Installations</b>	Tube Voltage	60 kV
	Tube Current	2mA
	Heat Capacity	8.5 KHU
<b>X-Ray Tube</b>	Anode Type	Stationary
	Anode Angle	20°
	Focal Spot	0.8mm
<b>X-Ray Control</b>	Exposure Time Set	46 Steps (0.01 ~ 2.0 sec)
<b>Power Requirement</b>		22.2 VDC
<b>Weight</b>	Main Body	2.35 kg
	Accessory	0.6 kg
<b>Dimension</b>	Main Body	197 x 147 x 145 (mm)
	Charger	100 x 65 x 35 (mm)

# PORT-X II

## PERFECT COMBINATION OF RELIABILITY & POWERFUL INNOVATION

- ✦ Portable, compact & wireless DC X-Ray
- ✦ 60kV/2mA Toshiba Tube
- ✦ Electrical Voltage 220 V
- ✦ Focal Spot 0.8 mm
- ✦ Exposure Time (0.01-2.0 sec)
- ✦ Graphic LCD display
- ✦ IOPA film & Radiovisiography sensor compatible
- ✦ Round type beam limiting device
- ✦ Total filtration 1.8 mmAl
- ✦ Weight approx. 2.8 Kg
- ✦ Internally LEAD coated to prevent excessive exposure & dispersion of radiation
- ✦ Rechargeable Lithium-Polymer battery
- ✦ Patient & tooth selection mode
- ✦ Very useful for multi-chair clinics

### Compact Outside - Smart Inside

Digital Sensor 0.15 sec  
Chemical Film 0.3 sec

Canine

Digital Sensor 0.15 sec  
Chemical Film 0.3 sec

Incisor

Digital Sensor 0.25 sec  
Chemical Film 0.35 sec

Molar

CR

**India's Highest selling  
Portable X-Ray with  
10,000+ Installations**

## RVG 5200

The RVG 5200 is the perfect choice for those looking to take a first step into digital dental radiography. An ideal solution for intraoral imaging needs, the easy-to-use sensor allows users to capture exceptional images quickly and easily. The image quality of the RVG 5200 sensor is the same or higher than other intraoral sensors in its class - so there is no need to sacrifice image quality for affordability.

### Easy to install, so you can use it immediately

The RVG 5200's user-optimized quick install & user guides help through the installations process, while the post-installation tool verifies the system is working properly to eliminate downtime.

### Technology you can count on

The RVG 5200 sensor is backed by Carestream Dental's decades of experience in digital radiography systems and engineering. To protect your investment, all of the connection points along the sensor cable have been reinforced for added durability, ensuring the sensor can withstand hard pulls and torsions.

**Waterproof & fully submersible for optional infection control**

## PROVEN RVG TECHNOLOGY ESTABLISHED RELIABILITY

High Image Quality

Convenient quickstart

Maximum durability

Technical Specifications	
Technology	CMOS
True Image Resolution	16 lp/mm
Connection	USB 2.0 - High Speed
Size 1	All Purpose sensor providing the best compromise between ease of use and active area
Outside Dimensions	27.6 x 37.7 mm
Dimensions of Active Area	22.2 x 29.6 mm
Sensor Plate Thickness	7.3 mm

## Portable High-Frequency X-Ray Unit

CE / EC EN ISO 13485:2016

- ✦ Portable, Compact & Wireless DC X-Ray
- ✦ Useful for multiple chair Clinical Set-up
- ✦ Very Light in weight device, easy for single handed operation with the weight of 1.7 Kg
- ✦ Superior Image Quality with less radiation to both patient & the operator
- ✦ Imported micro-focus CANON tube from Japan ensures clearer image.
- ✦ Wide digital display for easy operation
- ✦ Imported circuits from South Korea, ensures high-quality image even during low battery power
- ✦ 150 shots of X-ray can be taken once the unit is fully charged
- ✦ Various exposure modes for different parameters

**Concise and clear digital display**

### Technical Specifications:

- ✦ Focal Spot: 0.4 mm
- ✦ Tube: CANON D-045
- ✦ Tube Current: 2mA  $\pm$  20%
- ✦ Voltage: 70 kV  $\pm$  10%
- ✦ Frequency: 50 -60Hz
- ✦ Total Filtration: 1.5mm Al
- ✦ Exposure Time Range: 0.04 Sec – 2.0Sec

**Available for hand-held shooting separately**

## TIMEX 70E X-RAY

### The first X-Ray equipment that respects your nature

Gnatus, after several years of research, capture from nature, more precisely from the flight of hummingbirds, all attributes that professionals like you expect from an X-Ray machine.

The X-Ray joints allow a rotation of 180 degrees. Seem to have no limits and defy gravity with daring maneuvers.

CE / EC ISO 13485:2016 / EN ISO 13485:2016

#### Key Features:

- ✦ Exclusive Technology Green 95% less lead
- ✦ Ergonomic digital control
- ✦ Scale of the head angling 300° rotation
- ✦ Thermal protection of the head
- ✦ Rectangular Collimator
- ✦ Head with compensation chamber
- ✦ Arms and column made of steel

#### Technical Specification:

- ✦ Power: 1200VA
- ✦ Frequency: 50/60Hz
- ✦ Max Current of the tube: 7mA
- ✦ Time of exposure: 60ms, 3.2sec
- ✦ Equivalent filter of Aluminum: 1.5mm
- ✦ Nominal Focal point value: 0.8 x 0.8mm

**WHERE TRUST COMES FIRST**

## In House Manufacturing

**G**enoray is a Medical & Dental equipment manufacturer that offers in-house manufacturing of its products. This means that the company has complete control over the production process, from design to assembly, allowing for strict quality control. Genoray's in-house manufacturing capabilities include injection molding, PCB assembly, cable assembly, and final product assembly. By keeping manufacturing in-house, Genoray ensures that its products meet high standards of quality and reliability while also allowing for faster turnaround times and the ability to make modifications quickly. This approach enables Genoray to maintain a competitive edge in the market and provide its customers with top-quality medical & dental equipment.

### Continuous R&D Investment

- ▲ 8-10% Investment in Annual Sales
- ▲ 30% of all Researchers have Masters & Doctorates
- ▲ R&D Performance - 72 Cases (Government, External & Self)
- ▲ Intellectual Property - 47 Patents, 27 Trademarks
- ▲ Certification Status - 85 Cases (Domestic & International)

### R&D through cross-over by Different Sectors

- ▲ Integrated Management of Medical & Dental Research
- ▲ Specialized Technology by Sector - R&D

### Internalization of Core Technology

- ▲ Manufacturing Technology of X-Ray Generators
- ▲ Inhouse development of Flat Panel Detectors
- ▲ 3D Image Processing with Correction Algorithm
- ▲ Dedicated Software Development - THEIA, TRIANNA

## Ultimate Panoramic Imaging

High Resolution X-Ray Imaging System

PAPAYA uses the advanced CMOS sensor, which improves image quality while keeping radiation exposure to a minimum, Genoray has shown that it puts patient's safety first.

## Multi-Focus Function

Improves Image Analysis & avoids the need of re-exposure.

The Multi-focus function overcomes patient mis-positioning. The user is therefore able to find the most optimally-focused choice from a selection of images.

**5 panoramas**  
**OPTIMAL IMAGE**

## Protection From Unwanted Radiation

Segmental selection 2D scan saves from unwanted radiation.

## User Friendly

PAPAYA increases user friendliness while maximizing efficiency

**Face-to-face positioning**

**Multi-role remote with emergency stop switch**

Machine's and hand switch's LED display shows the current status of machine

**9 different jaw shapes**

Fit each individual's jaw shape

**Voice support system**

Machine's operation status is guided by voice support system

**Wheelchair accessible**

**Dental Crop**

Provides full mouth IOS images

**According to exposure mode, LED color changes.**

## 20 Different Exposure Modes

Different 2D images for various diagnosis purpose

PAPAYA supports various exposure programs, fulfilling all diagnostic needs.

Standard panoramic, orthogonal panoramic, bitewing panoramic, child panoramic, TMJ lateral double, horizontal & vertical X-ray segmentation, TMJ PA double, TMJ LAT-PA, TMJ LAT-PA double, sinus lateral, sinus PA and CUST are supported.

<b>Panoramic</b>	Standard	Orthogonal	Bitewing	<b>TMJ</b>	Lateral	PA	Double Lat-PA
<b>Sinus</b>	Lateral	Lateral Mid	PA	<b>CUST</b>	Cross Section		
<b>Cephalometric</b>	Lateral	AP	PA	Water's View	SMV	Carpus	

## Smart & compact design!

Papaya: This smart design will allow for easy and fast setting installation.

Not only that, its compact design requires minimum space & is easily accessible for your patients.

Fast, HD & Normal Scan Mode

User friendly LED indication

4 different patient selection

Even more, Tomography! (optional)

## Tomography Imaging

### Cubical Semi-Tomography Technology (CUST)

PAPAYA CUST is a 3D imaging function that provides cross-sectional information for **implant planning**.

**Dental Cross Sectional View**

- ▲ Complements the panoramic image and provides a tomographic image required for implant planning
- ▲ When planning the implant, CUST images help the patient understand the procedure
- ▲ PAPAYA with CUST function is economical compared to CBCT

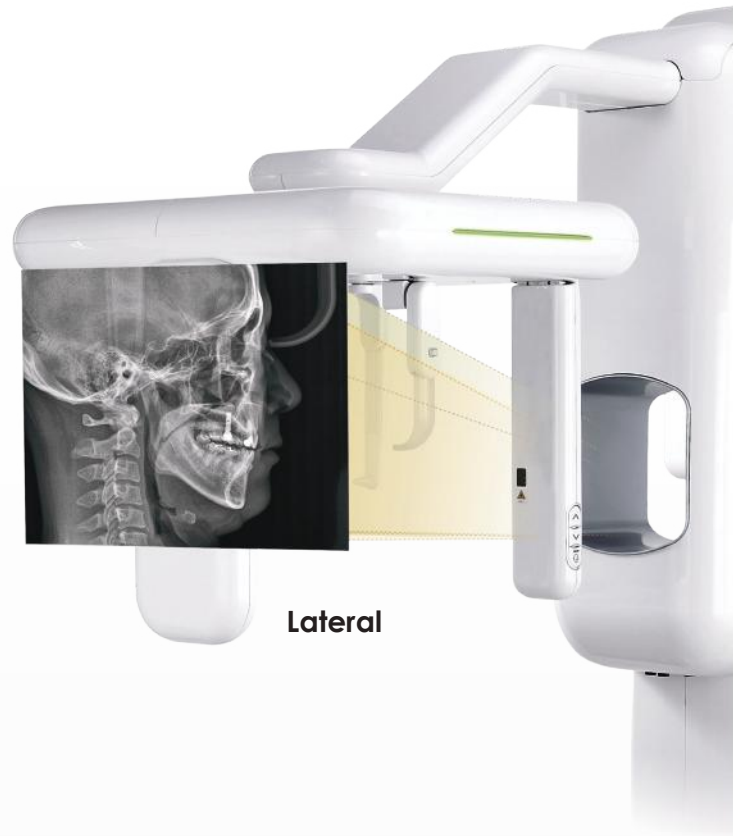

## Exposure Programs

## Cephalometric

Advanced Solution For Orthodontic Diagnosis

- ▲ The optimized mechanical structure is designed for symmetrical balance, enhanced safety and durability
- ▲ To optimise result, the sensor automatically positions for each exposure mode
- ▲ Only 4 seconds for scanning, a cephalo image in fast mode reduces motion artifacts

## PAPAYA Operational Software

PAPAYA exposure modes are prepared and initiated using clear step by step pictorial software.

# TRIANA

TRIANA is able to manage all images from all devices. (panoramic, cephalometric, intraoral sensor, CBCT, Intraoral camera and digital camera)

Image viewing	Zoom, Panning, Comparing, Window leveling
Measurement	Distance, Angle
Annotations	Line, Arrow, Text, Stamp
Implant simulation, DICOM 3.0 compatibility	Storage (DICOM send), film printer, worklist etc
Image enhancement, Printing	Paper, Film printer, WYSWYG
Image import/export	bmp, jpg, gif, png, dcm etc

### Technical Specification - PAPAYA

Exposure Time	4-17 sec
Focal Spot	0.5mm
Target Angle	5°
Sensor Tehnology	CMOS
Maximum Tube Voltage	90kV
Minimum Tube Voltage	60kV
X-Ray Tube	Canon

### Sensor

	PAPAYA	PAPAYA Plus
Pixel Pitch	75x75 µm	75x75 µm
Active Area	152x6.5 mm	228x6.5 mm

### CUST Specification

X-ray beam	Fan Beam
Volumetric image size	50X50X103 mm
Number of slices	256
Slice thickness	0.195 mm
Measurement error	<1 mm

## In House Manufacturing

**G**enoray is a Medical & Dental equipment manufacturer that offers in-house manufacturing of its products. This means that the company has complete control over the production process, from design to assembly, allowing for strict quality control. Genoray's in-house manufacturing capabilities include injection molding, PCB assembly, cable assembly, and final product assembly. By keeping manufacturing in-house, Genoray ensures that its products meet high standards of quality and reliability while also allowing for faster turnaround times and the ability to make modifications quickly. This approach enables Genoray to maintain a competitive edge in the market and provide its customers with top-quality medical & dental equipment.

### Continuous R&D Investment

- 8-10% Investment in Annual Sales
- 30% of all Researchers have Masters & Doctorates
- R&D Performance - 72 Cases (Government, External & Self)
- Intellectual Property - 47 Patents, 27 Trademarks
- Certification Status - 85 Cases (Domestic & International)

### R&D Through Cross-Over By Different Sectors

- Integrated Management of Medical & Dental Research
- Specialized Technology by Sector - R&D

### Internalization Of Core Technology

- Manufacturing Technology of X-Ray Generators
- Inhouse development of Flat Panel Detectors
- 3D Image Processing with Correction Algorithm
- Dedicated Software Development - THEIA, TRIANNA

### 3 Dedicated Detectors

The Genoray Papaya 3D is equipped with three dedicated detectors that enhance its imaging capabilities. These dedicated detectors of the Genoray Papaya 3D work in synergy, enabling clinicians to obtain high-quality, detailed images for accurate diagnoses and effective treatment interventions.

### 1 Scan 3 Images

The Genoray Papaya 3D imaging system revolutionizes dental diagnostics with its advanced capabilities. One scan with this cutting-edge device captures three highly detailed images, providing clinicians with a comprehensive view of the patient's condition.

### All Axis Motorized Movement

(Up/Down/Left/Right)

CBCT

Panoramic

## Multi-FOV Selection

Multi-F.O.V. selection enables accurate scanning whilst keeping dose levels to a minimum.

**φ 4X5**

### Endo

Endodontic

75 μm

Endo mode shows high definition images

**φ 7X7**

### Teeth

High Resolution | High Definition

100 μm | 150 μm

High contrast images of upper / lower jaw enable accurate diagnosis

**φ 8X8**

### Jaw

Normal Resolution

200 μm

Provides an image of the full arch

**φ 16X8**

### Face

Normal Resolution

400 μm

Full arch including relevant bone areas

**φ 16X14**

# High Resolution Computed Tomography Technology

Clearly defined images in three dimensions provide users with accurate diagnostic information

## 3 in 1 CBCT

**CBCT**

**PANORAMIC**

**CEPHALOMETRIC**

### Automated Sensor Switching

#### Auto -Swing

### Fast Scanning Mode

Scanning times as low as 7.7 seconds reduces dose, motion artifacts and image distortion.

### Auto Dual Scanning CT Technology

The wide high definition images can be enhanced by auto dual scanning technology.

## Improved Image Processing

**SMARF™ (Smart Metal Artifact Reduction Function)** minimizes the effect of metal artifacts caused by prosthetics to prevent image degradation.

**Without SMARF**

**With SMARF**

## Cephalometric

Advanced Solution For Orthodontic Diagnosis

**AP**

**SMV**

**Water View**

**Carpus**

- The optimized mechanical structure is designed for symmetrical balance, enhanced safety and durability
- To optimise result, the sensor automatically positions for each exposure mode
- Only 4 seconds for scanning, a cephalo image in fast mode reduces motion artifacts

## In House Manufacturing

**G**enoray is a Medical & Dental equipment manufacturer that offers in-house manufacturing of its products. This means that the company has complete control over the production process, from design to assembly, allowing for strict quality control. Genoray's in-house manufacturing capabilities include injection molding, PCB assembly, cable assembly, and final product assembly. By keeping manufacturing in-house, Genoray ensures that its products meet high standards of quality and reliability while also allowing for faster turnaround times and the ability to make modifications quickly. This approach enables Genoray to maintain a competitive edge in the market and provide its customers with top-quality medical & dental equipment.

### Continuous R&D Investment

- ▲ 8-10% Investment in Annual Sales
- ▲ 30% of all Researchers have Masters & Doctorates
- ▲ R&D Performance - 72 Cases (Government, External & Self)
- ▲ Intellectual Property - 47 Patents, 27 Trademarks
- ▲ Certification Status - 85 Cases (Domestic & International)

### R&D through cross-over by Different Sectors

- ▲ Integrated Management of Medical & Dental Research
- ▲ Specialized Technology by Sector - R&D

### Internalization of Core Technology

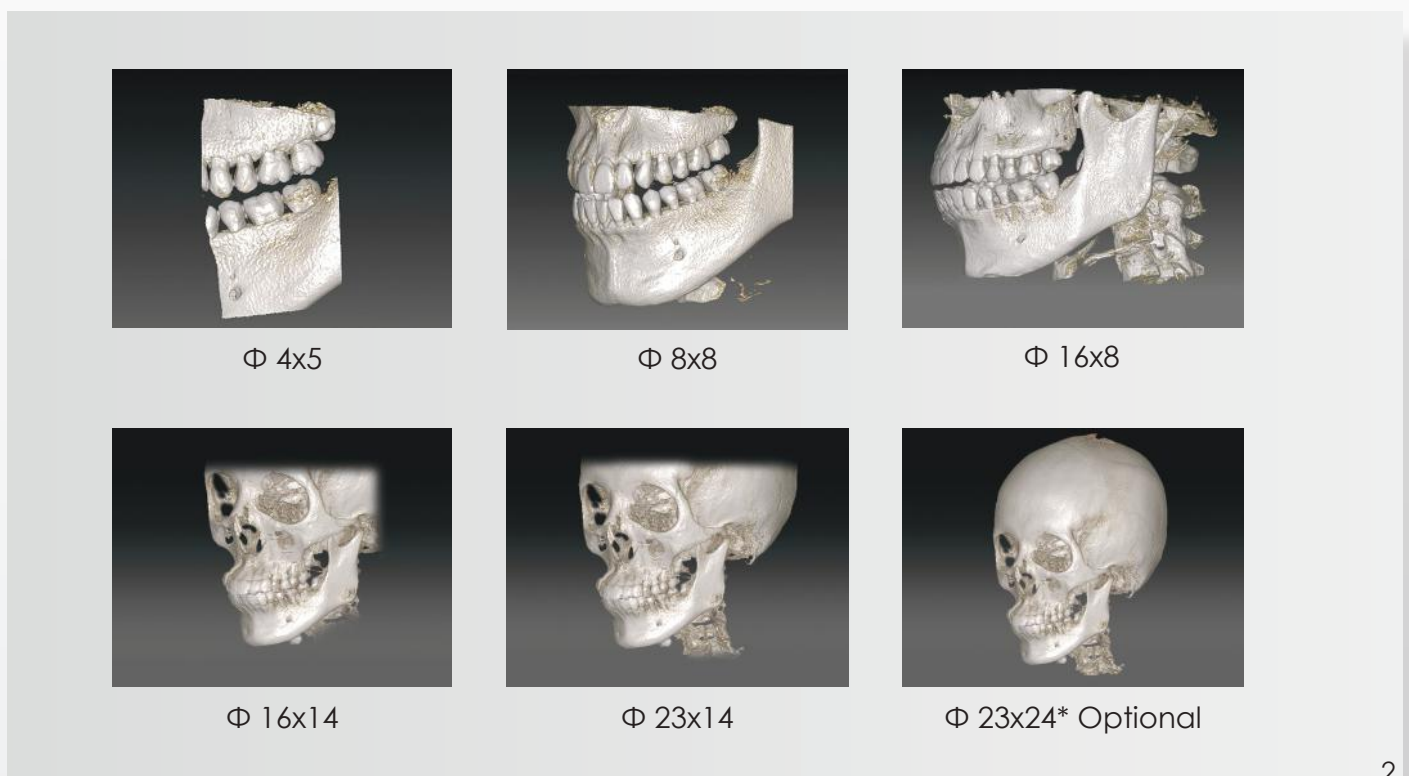

- ▲ Manufacturing Technology of X-Ray Generators
- ▲ Inhouse development of Flat Panel Detectors
- ▲ 3D Image Processing with Correction Algorithm
- ▲ Dedicated Software Development - THEIA, TRIANNA

## CBCT

### Free F.O.V & Dose Reduction:

Provides various F.O.V sizes and resolutions for all diagnostic needs.

Produces optimized images with minimal radiation exposure.

# Panoramic

## Multi Focus

Helps acquire the best optimized image from the multiple panoramic images acquired.

The multi-focus function overcomes patient mis-positioning. The user is therefore able to find the most optimally-focused choice from a selection of images.

Standard Panoramic  
Orthogonal Panoramic  
Bitewing Panoramic  
TMJ PA Double  
TMJ LAT-PA Double

TMJ Lateral Double  
TMJ LAT-PA  
Sinus Lateral & Sinus PA  
Child Panoramic  
Segmented View

# Ceph

Ultra fast mode (2 sec)

Normal mode (8 sec)

## Various Radiation Exposures

**HD**

**Normal**

**Fast**

**Ultra fast**

## Multiple Exposure Modes For Cephalometric

Lateral, AP, PA, Water's view, Submento vertex and Carpus

## Foldable Chinrest System

Convenient patient positioning while saving room space

Easy access for disabled patients

One-Shot Cephalometric system provides distortion-free images with minimal motion artifacts

**One-Shot Type \*Optional**  
**0.5 sec Fast Scanning**

## Chair \*Optional

Minimizes the patient's movements to help reduce patient's motion artifacts

### 3D Volume Rendering

Various volume rendering options such as, X-Ray, MIP etc provide 3D image visualization

### MPR (Multi-Planar Formatting)

MPR mode provides three plain view (axial, coronal and sagittal) on one screen for focused area diagnosis

### Curved MPR

Possible to reconstruct the sectional images which is via any curves from Panoramic, Cross-sectional, Longitudinal

### Dental Reformatting

Using panoramic, cross-sectional and longitudinal 2D view, you can plan your 'perfect' implant positioning

### Improved image processing

SMARF™ (Smart Metal Artifact Reduction Function) minimizes the effect of metal artifacts caused by prosthetics to prevent image degradation.

### Image Color-mapping

Color mapping increases the visibility of lesions

### Measuring tools

Distance, Angle, Profile and arrow provides easy to use measuring tools.

### Implant planning

Multiple layout support and nerve implementation enables accurate implant planning

### Complete Implant Library

### Support for DICOM 3.0

### STL Export

Enables 3D printer and CAD/CAM to be used by converting 3D images to STL data.

Patient Scan

Stone Model Scan

Impression Model Scan

## General Specifications

Items	Option	FOV/ROI (max, mm)	Voxel ( $\mu\text{m}$ )	Detector		Exp. Time sec
				Pitch ( $\mu\text{m}$ )	Size (mm)	
CT	NV	40X50~ 160 X 140	75~400	100 X 100	130 X 130	7.7/14.5
	LV	40X50~ 230 X 245	75~400	179 X 179	229X229	7.7/14.5
Cephalometric	SC	300X225	-	75X75	228X6.5	2~12
	OS	317X254	-	124X124	310X250	0.5~3.0
Panoramic	PX	-	-	75x75	152x6.5	9~17
NV (Normal Volume), LV (Large Volume), SC (Scan Ceph), OS (One-Shot Ceph)						
Focal Spot	0.5 mm					
Target Angle	5°					
Tube Voltage	60~90kV					
Tube Current	4~12 mA
