

WORLD BLOCKCHAIN BANK™
INSTITUTIONAL INFRASTRUCTURE READINESS SUMMARY

Built. Deployed. Ready to Scale.

World Blockchain Bank™ is not raising capital to develop an idea.

The financing is intended to accelerate revenue generation, enterprise adoption, and international commercialization of an already operational infrastructure platform.

The platform has already been architected, built, deployed, and tested over multiple years using founder capital. The current financing round is intended to accelerate commercialization, enterprise licensing, strategic partnerships, regulatory expansion, and international deployment.

Infrastructure Status

- ✓ Financial Identity Infrastructure™ deployed
 - ✓ DomainLink™ digital identity infrastructure operational
 - ✓ WorldBankPay™ payment infrastructure operational
 - ✓ Enterprise licensing framework established
 - ✓ Commercial Stewardship™ deployment model developed
 - ✓ AI-ready financial identity architecture completed
 - ✓ Blockchain Trust™ registration infrastructure operational
-

Technology & Infrastructure Assets

Verifiable onchain at Polygon, BNB, OpenSea, Ethereum

- 162 blockchain-registered patents
 - Proprietary Financial Identity Infrastructure™
 - Proprietary Commercial Stewardship™ licensing model
 - Proprietary Enterprise Infrastructure Licensing™ framework
 - Proprietary DomainLink™ architecture
 - Proprietary WorldBankPay™ payment infrastructure
 - Financial identity registry encompassing more than **8,000,000 blockchain entities**
 - Registry architecture supporting **7,500+ blockchain root namespaces** with unlimited hierarchical sub-Financial Identities
-

Evidence of Execution

- Multi-year platform development completed
- Live operational infrastructure
- Enterprise licensing framework established
- Global commercialization strategy defined
- Intellectual property portfolio established
- Scalable deployment architecture completed

Regulatory & Compliance Foundation

- Four FinCEN Money Services Business registrations
 - Compliance-oriented infrastructure architecture
 - Cross-border deployment framework
 - Enterprise governance model
-

Commercial Readiness

The platform has progressed beyond research and development.

Current priorities include:

- Enterprise customer acquisition
 - Commercial Steward appointments
 - International licensing
 - Strategic partnerships
 - Banking and payment integrations
 - AI infrastructure deployments
-

Capital Deployment

The current capital raise is intended to accelerate commercial expansion through:

- Global sales
 - Enterprise partnerships
 - Regulatory expansion
 - Product commercialization
 - Strategic acquisitions
 - International market development
-

Investment Thesis

The objective is not to build another fintech application.

World Blockchain Bank™ has developed foundational financial identity infrastructure designed to support enterprises, financial institutions, governments, AI agents, and programmable commerce.

The investment focus is therefore on accelerating global adoption of existing infrastructure rather than funding initial technology development.

World Blockchain Bank™

Foundational Infrastructure for the Next Generation of Financial Identity.
