# MSc International *Accounting & Analytics*

# For **General Business Graduates** who wish to specialise in *Accounting & Analytics*

Advance your accounting career with the MSc International Accounting and Analytics. Develop insights, and technical knowledge of tools and techniques for driving organisational performance, and understanding of corporate finance theory and practice. Gain an understanding of and expertise in accounting and business analytics through taught modules and our practitioner led Summer School.

Our programme responds to the recent 22nd Annual Global CEO Survey compiled by PwC which notes that 'A lack of analytical talent is impeding data adequacy.' The ICAS and FRC report on Auditor Skills in a Changing Business World (in 2016) also notes the importance of analytics skills for accountants and calls for educators to include practical courses on data interrogation and analytics. **Our MSc International Accounting and Analytics was the first programme of its kind in UK and Irish Universities to offer practical hands-on modules in audit analytics tools for accountants.**

# International Accounting & Analytics Pathway A (*Autumn Intake*)

This is an intensive 10 –11 month degree programme for high calibre business related/commerce graduates who have not specialised in accounting and who now wish to pursue a professional career in Accounting and Analytics.

Students taking the year-long programme starting in September secure substantial exemptions from the examinations of the ACCA. As a graduate of this MSc in International Accounting and Analytics you will be exempt from papers F1, F2, F3, F5, F7, F8 and F9 of the ACCA.

\*Please note: exemptions from the examinations of the professional accounting bodies are subject to change of syllabus/content.

ACCA Accelerate  
Programme

KPMG led Summer School

# International Accounting & Analytics Pathway B (Spring Intake)

## Recognised Memberships

This is an ideal master's programme if **you are already a qualified associate member with an IFAC member professional accountancy body** (e.g. ICAI, ACCA, CIMA, Institute of Chartered Accountants India (ICA India), CPA Australia (Certified Practising Accountants Australia), the Institute of Cost and Management Accountants of Pakistan (ICMA Pakistan), CIPFA or other body deemed equivalent by the Programme Director) and looking to build your professional qualifications.

This unique programme offers, through **Recognition of Prior Learning (RPL)**, exemption from 50% (45 credits) of the 90 credits for this taught master's course to fully exam-qualified accountants who have been admitted to full associate membership of the recognised professional accountancy bodies above.

# For early-mid career accountants

In collaboration with our industry advisory group we developed a new module Analytical and Communication Skills Development to enhance students' skill set. This includes an even greater **focus on analytics skills development through Excel for Analytics and Tableau for Analytics**. Both of these focus on manipulation of data sets to extract greater value from existing organizational data.

Quality data visualisation is critical to enhancing visual communication which facilitates improved organisational strategy formulation leading to competitive advantage. This new module teaches students how to create various visualisations of data allowing trends and patterns to be revealed thus allowing organisations to extract greater value from their data.

## Host Company Examples for MSc Accounting & Analytics

# Why choose *this course.*

- **Fast-Track Your Career:** Achieve significant exemptions from ACCA and Chartered Accountants Ireland exams, accelerating your path to becoming a certified professional. The course's design and content have been meticulously aligned with professional requirements, making you exam-ready.
- **Enhance Your Professional Skills:** Develop critical analytical and communication skills through our newly developed modules. Master tools like Excel for Analytics and Tableau, and learn to create impactful data visualisations that drive strategic decision-making in organizations.
- **Stand Out in a Competitive Market:** Be at the forefront of accounting and analytics with the first MSc programme in the UK and Ireland to offer hands-on audit analytics tools. Gain expertise that employers are actively seeking, filling a critical skills gap in the market.
- **Learn from the Best:** Benefit from the insights and guidance of top-tier academics and industry practitioners. Our curriculum is shaped by industry leaders like KPMG, PWC, and EY, ensuring you receive cutting-edge knowledge and skills that are directly applicable in the workplace.

## Global Opportunities

Open doors to a wide range of careers in Accounting Practice, Industry, Management Consultancy, and Financial Services. Your technical and strategic expertise will make you a valuable asset to any organisation, anywhere in the world.

## Real-World Experience

Participate in the KPMG-led Summer School on Audit and Accounting Analytics and engage with disruptive technologies in accounting and finance. Gain practical, hands-on experience with Robotic Process Automation (RPA) and Artificial Intelligence (AI), ensuring you're equipped for the future of the industry.

## Thrive in Galway City

## Testimonial

*" The M.Sc. in International Accounting and Analytics course offers a perfect blend between accounting and digital-oriented modules such as R programming, SQL, Python, Tableau and more. This course is well designed to equip students with the required accounting and IT skills, crucial to stand out in today's fast-paced environment. With no doubt, University of Galway provides an exceptional learning experience both on and off campus such as through industrial visits. Moreover, Galway is a great city to live, explore and enjoy during leisure times thus making one feel at home. For students who are interested in an accounting and analytical career, I would highly recommend this course to you. "*

## Testimonial

*" This is an innovative programme that provided me with excellent understanding of both advanced accounting concepts and practical knowledge of analytical tools used in accounting and finance. The modules were very relevant and delivered by faculty who are top-notch academics and practitioners in their respective fields. The data analytics modules such as Big Data and SAP BW certification prepared me for the transformation that the accounting profession is witnessing right now. The level of support from lecturers both in the class and outside was unparalleled. The core modules were supplemented by the Big Four practitioner led summer schools and guest lectures from industry, providing us with the latest industry insights. Studying in the scenic campus of a top ranked university combined with the vibrant and lively culture of Galway city has been one of the best experiences of my life. "*
