

# THE TIPSIAN BIWEEKLY

# PRINCIPAL'S DESK

The TIPS KG environment is a carefully planned space designed for kindergarteners. Both classroom and outdoor areas are meticulously organised to promote calmness, stimulate creativity, and support better behavioural regulation. Every material is thoughtfully chosen and arranged to enhance play quality, allowing children to concentrate on one toy or material at a time, thereby building concentration skills and fostering more creative play.

## Pretend Play:

Pretend play is crucial in a child's development as it allows them to experiment with different roles in life, whether individually or cooperatively. For Doctors' Day this year, our kindergarteners participated in pretend play, making their own rules and engaging in imaginative scenarios. Through this activity, they learned to take turns, share responsibilities, and solve problems creatively. They also gained an understanding of the importance of doctors, with the experience likely inspiring future aspirations in the medical field.

Moving forward, you will continue to see different types of play that we have planned for our kindergarteners. This type of play will help them learn about the world they live in, providing valuable opportunities for growth and development.

Best wishes

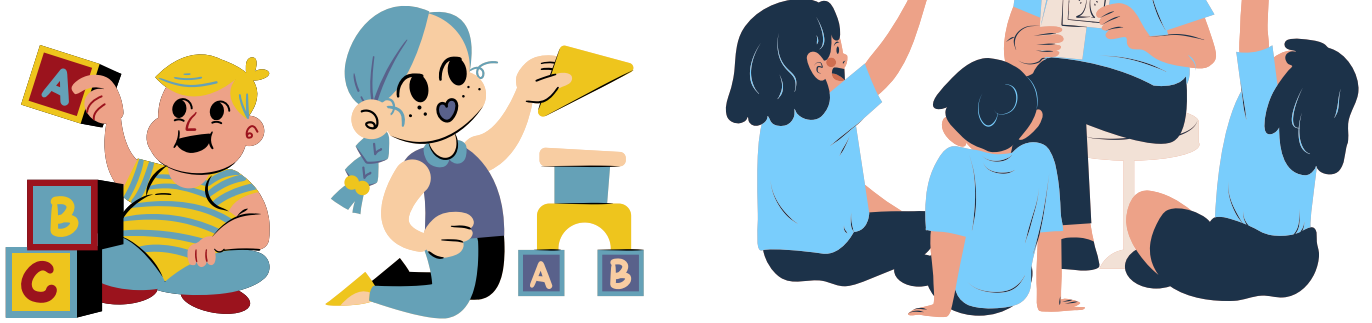

**Ms. Aruna Maheswari**

Principal

The Indian Public School , Salem.

# KG COORDINATOR DESK

We are happy to see our little ones settling into their new classrooms. They have started following classroom routines and adapting to their new learning environment. It is heartwarming to see them forming new friendships and their eagerness to learn each day.

Our little TIPSians are getting involved in various activities like Music and Movement, Sensory Play, Outdoor Play, Free Play, Storytelling, Creative Arts and other skill-enhancement activities, which help them develop their social, emotional and cognitive skills. Our focus remains on providing a nurturing and stimulating environment where each child feels safe and valued.

We started to emphasise the Core value – Respect for June and July through various activities and strategies. Inculcating core values into a kindergarten child's life is essential for holistic development. It is an ongoing process that requires time, patience, and dedication. These values provide a strong foundation for their moral, social, emotional and intellectual growth.

# IMPORTANT DATES

**1st OPEN FORUM**

13th JULY 2024

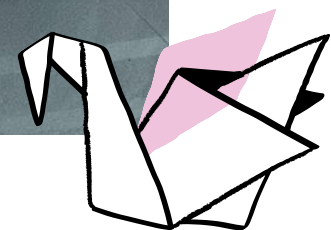

**Muharram Holiday**

17th JULY 2024

# Congratulations!

Meenakshi C. Nair of KG 1C has participated in the "NOBLE BOOK OF WORLD RECORDS", to create awareness of the importance of calculation and statistics among students, by performing statistics on paper folding in 20 minutes on the topic "KAGIDHAMUM KANIDHAMUM", conducted on 30th June 2024.

# Congratulations!

Meenakshi C. Nair of KG 1C has received a participation certificate in “ECOHUNT 2024” – National Level Art & Craft competition organized by Creator’s Academy & Myki Educational Institution conducted on 05.06.2024.

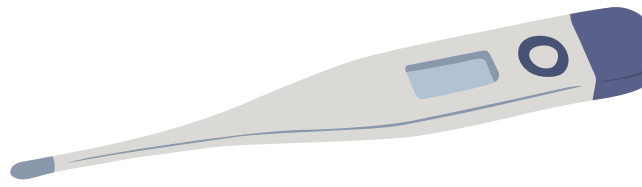

# National Doctor's Day

National Doctor's Day is celebrated on July 1st in India to honor the birth and death anniversary of the renowned physician Dr. Bidhan Chandra Roy. This day provides an opportunity to recognize the sacrifices, dedication, and tireless efforts of medical professionals who work to save lives and improve healthcare quality. Our children participated in Hospital Dramatic Play, which was a fun and engaging activity and an invaluable learning experience for our little ones.

# Value of the Month - Respect

Learning about the core value of 'Respect' supports the social-emotional development of children. It serves as a foundation for enhancing skills such as acceptance, understanding, following instructions, and listening to others.

Respecting the Classroom Materials

Respecting the Peers

Respecting the Teacher

Respect Oath

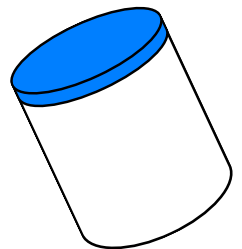

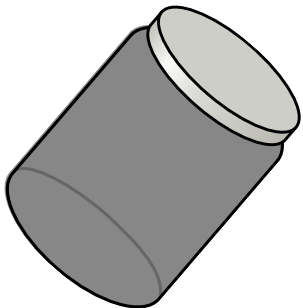

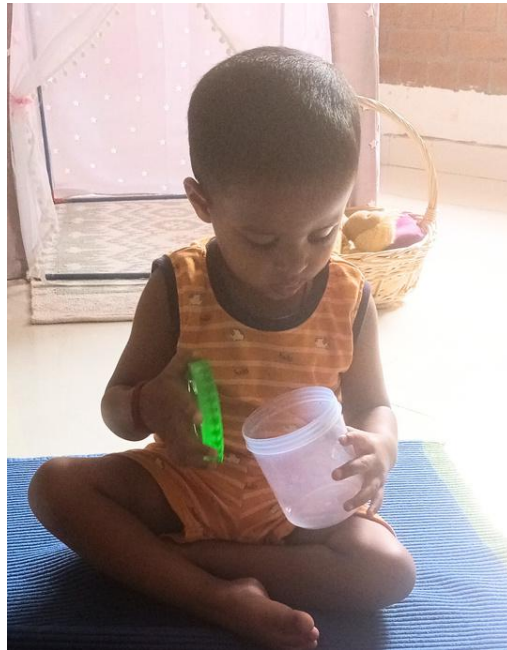

"I will respect myself by eating healthy food."

Respect - Song

# Fine Motor Activity: Open and Close the Lid

Incorporating a variety of fine motor activities into the kindergarten curriculum not only supports children's physical development but also enhances their cognitive, social, and emotional growth, preparing them for future academic success and lifelong learning.

# Nature Based Engagement

Nature-based engagement provides ample opportunities for young children to explore and inquire about the world around them as curious learners. Moreover, it enriches the diversity of children's sensory play experiences, contributing to healthy childhood development.

# Circle Time

Circle time is when the whole class gathers in a circle to discover and practice new concepts or skills. This can involve singing songs, playing games, or listening to stories. It helps children interact with their peers in a structured manner. Moreover, during circle time, our children have the opportunity to practice important skills such as taking turns and sharing their ideas. It also teaches them the value of listening to and respecting the thoughts of others.

# UOI: Who we are - Provocation table

A provocation table sparks interest, stimulates thoughts and ideas, and encourages questioning. It also supports children in understanding, learning, and delving deeper into concepts. Our children were asked to observe the items arranged on the provocation table and encouraged to think about and discuss the sense organs related to each object.
