Good for your pocket, good for the planet.

Good for your *pocket*, good for the *planet*.

Welcome to tier1, your trusted partner
We provide sustainable and cost-effec
to access high-quality, affordable equi
carbon footprint.

Entirely UK based, we specialise in sourcing, refurbishing, and
top-quality IT equipment to meet your unique needs. Our wid
refurbished products includes laptops, desktops, monitors a
servers, networking equipment and peripherals. Choosing ref
equipment extends technology resources' lifecycle and signif
reduces environmental impact.

Our meticulous testing and refurbishment processes ensure optimal performance and reliability. Skilled technicians follow strict quality control standards, exceeding industry requirements. This commitment to quality allows you to achieve cost savings without compromising functionality.

Partner with **tier1** for a seamless procurement experience tailored

to your requirements. Whether a small business, nonprofit, or large enterprise, our dedicated team provides expert advice, support, and after-sales service.

Join us in revolutionising IT equipment procurement, reducing e-waste, conserving resources, and building a sustainable future. Experience the benefits of refurbished IT equipment with **tier1.**

tier1 - A circular app

proach.

Refurbished IT is the catalyst for a sustainable future, and at tier1, we are proud to offer you a solution that not only aligns with your Environmental, Social, and Governance (ESG) goals but also drives your organisation's success.

By choosing refurbished IT equipment, you make a tangible impact on the environment. Through our rigorous refurbishment process, we extend the life cycle of technology resources, diverting them from landfills and reducing electronic waste. With each purchase, you actively contribute to the reduction of carbon emissions, resource consumption, and the preservation of our planet for future generations.

But it doesn't end there. Refurbished IT equipment also supports your social and governance objectives. By embracing sustainable solutions, you demonstrate your commitment to corporate responsibility and inclusivity.

At **tier1**, we provide you with top-quality refurbished IT equipment that undergoes thorough testing to ensure optimal performance and reliability. With our expertise and personalised service, we will guide you through the procurement process, helping you select the right solutions tailored to your specific needs.

tier1 have completed a lifecycle analysis study on one of our best selling models demonstrating that the impact of a refurbished device has 4 times less the Co2 emissions than that of a new device.

Good for your *pocket*, good for the *planet*.

When **tier1** refurbish
highest standard.

Switching to sustainable IT does not mean compromising on quality. Our universally clear asset grading system will remove ambiguity in hardware quality and provide confidence in decision making.

Our enterprise grade hardware ensures you maintain operational levels whilst preserving the planet's natural resources.

All grades are fully tested, cleaned, refurbished and quality checked in-house to ensure each product matches our high standards of quality, sustainability and reliability.

All our devices are manufactured or refurbished in the UK either at our facilities in Manchester or with a UK partner, saving the carbon impact versus international manufacture.
