## CBCT TRAINING PROGRAM SESSION IN GOVERNMENT BASE HOSPITAL- ALMORA (Uttarakhan)

29-03-26

Vatech conducted a CBCT Training Program Session at Government Base Hospital, Almora, empowering participants with practical exposure to advanced dental imaging technology and clinical applications.

## VATECH'S MOSTLY PREFERRED A9 - CBCT CDE PROGRAM CONDUCTED UNDER DR. AMIT AGRAWAL, RAIGARH (CG)

12-03-26

Vatech successfully conducted the "Mostly Preferred A9 - CBCT CDE Program" under the guidance of Dr. Amit Agrawal in Raigarh. The session witnessed active participation from dental professionals, focusing on advanced CBCT applications, clinical diagnosis, & modern imaging solutions

# Seminars

## SUCCESSFUL CBCT PROGRAM AT THE GRAND, VASANT KUNJ II

### Topic- Mastering CBCT:

A complete guide from interpretation to implementation

### Speaker- Dr. Mayank Das

M.D.S  
(Oral Medicine & Radiology)

02-05-26

Vatech India successfully organized an engaging and highly informative CBCT Masterclass at The Grand, bringing together a distinguished gathering of dental professionals, clinicians, academicians, and specialists from across multiple disciplines for an enriching educational experience. The event served as a dynamic platform for learning, collaboration, and professional interaction, reflecting the growing importance of advanced diagnostic imaging in modern dentistry.

The masterclass witnessed enthusiastic participation from dentists and clinicians representing various specialties, including oral medicine, oral surgery, implantology, orthodontics, endodontics, prosthodontics, and general dentistry.

The program was carefully designed to combine academic excellence with practical clinical relevance, enabling attendees to deepen their understanding of Cone Beam Computed Tomography (CBCT) and its evolving role in everyday dental practice.

The scientific session was led by Dr. Mayank Das, who delivered an insightful lecture on the topic, "Mastering CBCT: A Complete Guide from Interpretation to Implementation." Through an interactive and knowledge-driven presentation, Dr. Das shared comprehensive insights into CBCT imaging, interpretation protocols, diagnostic accuracy, and effective clinical applications. The session emphasized the importance of integrating CBCT into routine practice for enhanced diagnosis, precision-driven treatment planning, and improved patient outcomes.

Participants were guided through various aspects of CBCT technology, including image acquisition, anatomical interpretation, pathology detection, implant planning, endodontic evaluation, airway assessment, TMJ analysis, & radiographic troubleshooting. Real-world clinical case discussions and practical examples further enhanced the learning experience, allowing to understand how CBCT can significantly improve decision-making & treatment predictability across different specialties.

One of the key highlights of the event was the active interaction between the speaker and participants. The audience engaged in meaningful discussions, clinical case-based conversations, and question-and-answer sessions that encouraged deeper understanding and practical clarity. Alongside the academic sessions, the program also created valuable opportunities for networking and knowledge sharing among dental professionals, fostering professional connections and collaborative learning.

Overall, the CBCT Masterclass concluded on a highly successful note, leaving participants with enhanced clinical knowledge, practical insights, and a stronger understanding of the transformative role of CBCT in modern dentistry.

**Dr. Mayank Das**

## Congratulations to our Top Dealers of the Quarter (Jan – April 2026)

Your outstanding performance, dedication, and continuous hard work have truly set you apart. Achieving consistent growth and delivering excellence month after month is not easy, and your efforts deserve sincere recognition and appreciation.

We are incredibly grateful for the trust and confidence you continue to place in Vatech. Your commitment to supporting dentists with advanced imaging solutions, building strong customer relationships, and representing the brand with professionalism has played a vital role in this success.

This achievement reflects not only your sales performance, but also your passion, persistence, and belief in long-term growth. Your contribution inspires everyone around you and strengthens our journey together as partners.

Thank you for your continued support and dedication. We look forward to reaching even greater milestones together in the months ahead. Keep growing, keep inspiring, and keep leading the way toward new success!

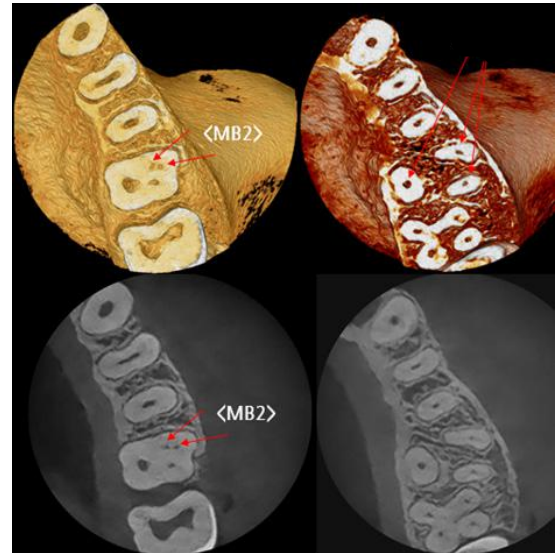

# The Art of Seeing the Invisible: Endodontic Analysis with Ez3D-i

In modern endodontics, success begins with visualization. Hidden canals, complex curvatures, calcifications, and fractured roots often remain undetected in conventional imaging. The ENDO Tab in Ez3D-i is designed to change that transforming CBCT data into a powerful diagnostic roadmap for clinicians.

Let's explore how each feature helps clinicians move from uncertainty to precision.

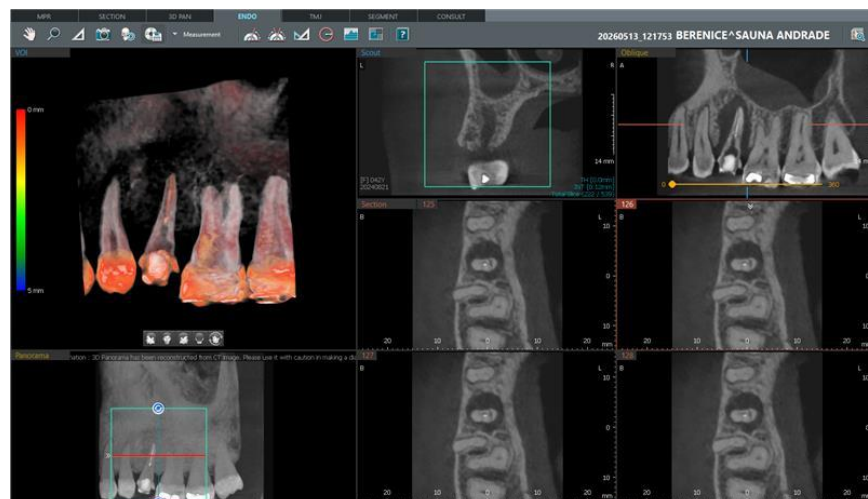

## Navigate the Anatomy with "Endo Navigator"

The journey begins with **Endo Navigator Mode** a dedicated workspace tailored specifically for endodontic evaluation. With an optimized viewing environment, clinicians can quickly focus on the tooth of interest and navigate through root anatomy effortlessly.

Why It Stands Out:

- Faster workflow
- Smooth anatomical navigation
- Enhanced focus on endodontic structures

It's like having a GPS system for  
root canal anatomy

# Reveal Hidden Details with Canal Cross-Section View

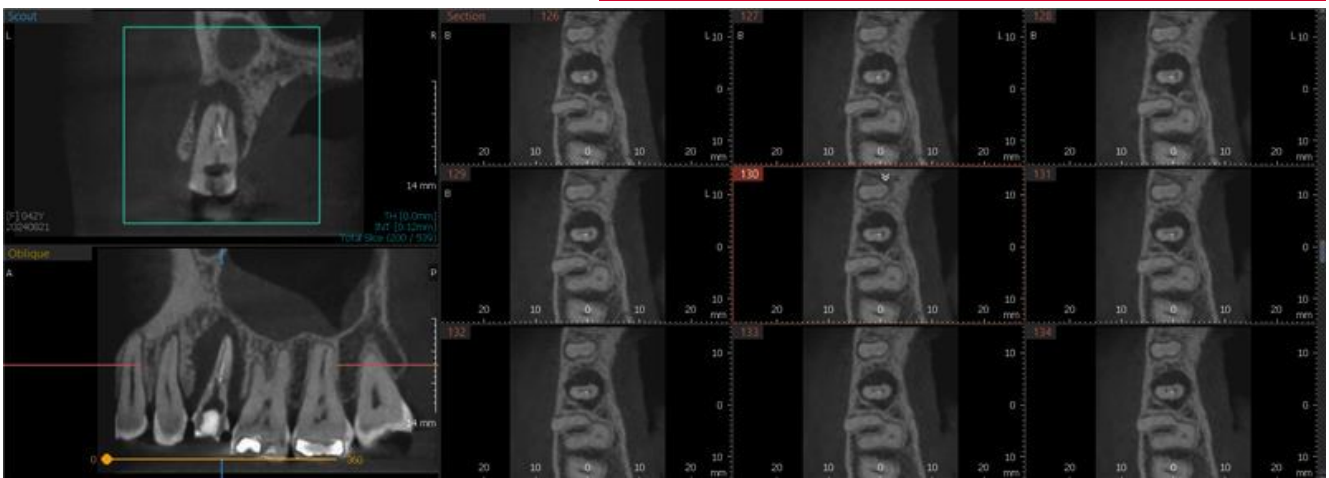

Vol. 5

The Canal Cross-Section feature opens a completely new dimension of diagnosis by displaying detailed sectional slices of the canal system.

Clinicians Can Easily Detect:

- Extra canals
- MB2 canals
- Canal bifurcations
- Hidden anatomical variations
- Complex root morphology

This level of detail significantly improves diagnostic confidence before treatment even begins

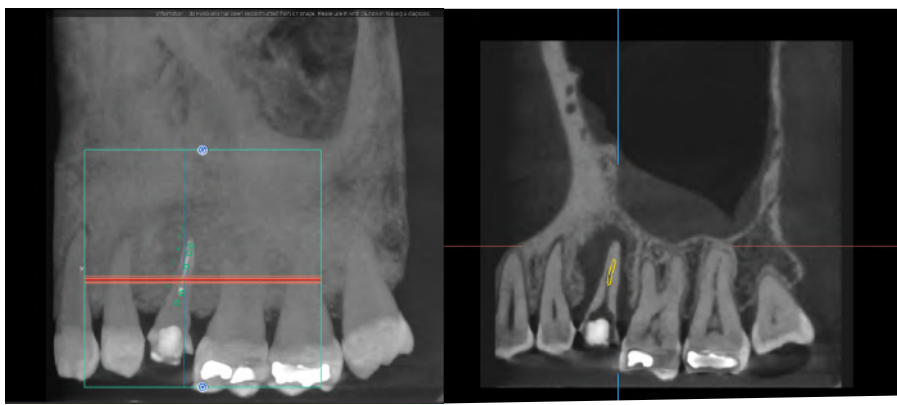

# Trace Anatomy Intelligently with "Draw Root Canal"

Using the Draw Root Canal function, clinicians can map the exact path of the canal from chamber to apex.

Clinical Advantages:

- Better understanding of canal trajectory
- Improved instrumentation planning
- Reduced risk of procedural errors
- Enhanced pre-operative assessment

Instead of estimating canal anatomy, clinicians can now visualize it precisely.

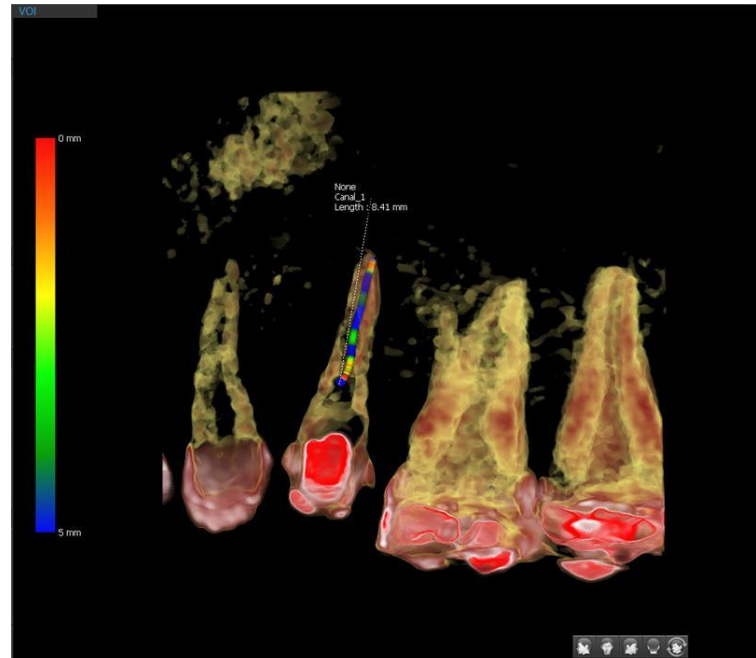

## Color-Coded Canal Analysis for Better Clarity

Each canal can be displayed individually using color differentiation, making complex anatomy easier to interpret.

Especially Useful In:

- Multi-rooted teeth
- Retreatment cases
- Fused roots
- Calcified canals

The result is cleaner visualization  
& improved diagnostic accuracy

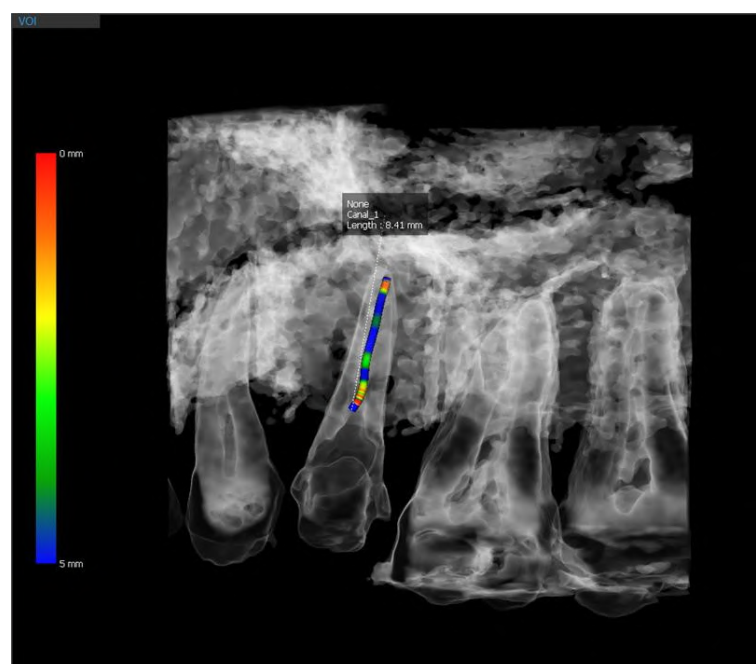

## Enhance Canal Visibility with Pulp Level Offset

The Pulp Level Offset adjustment helps optimize pulp chamber and canal visibility by fine-tuning image density.

Ideal For Detecting:

- Calcified canals
- Pulp chamber morphology
- Internal resorption
- Canal continuity

Small adjustments can uncover details  
that may otherwise remain hidden

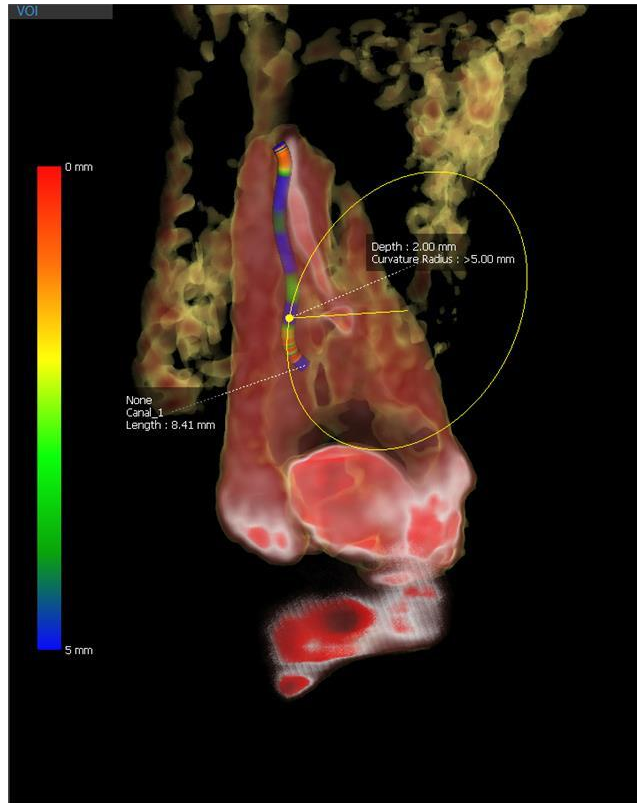

# Understand Canal Complexity with Curvature Display

One of the most valuable tools in the ENDO Tab is the Display Curvature function.

Helps Clinicians:

- Assess canal difficulty
- Plan instrumentation safely
- Reduce file separation risk
- Minimize procedural complications

Understanding canal curvature before treatment can significantly improve treatment predictability

# The Future of Endodontic Diagnosis

The ENDO Tab in Ez3D-i is more than just a viewing tool — it is a complete diagnostic companion for modern endodontics. By combining intelligent navigation, precise canal mapping, and advanced visualization, clinicians can diagnose with greater confidence and treat with greater precision.

From Hidden Anatomy to Clear Diagnosis — Every Detail Matters.

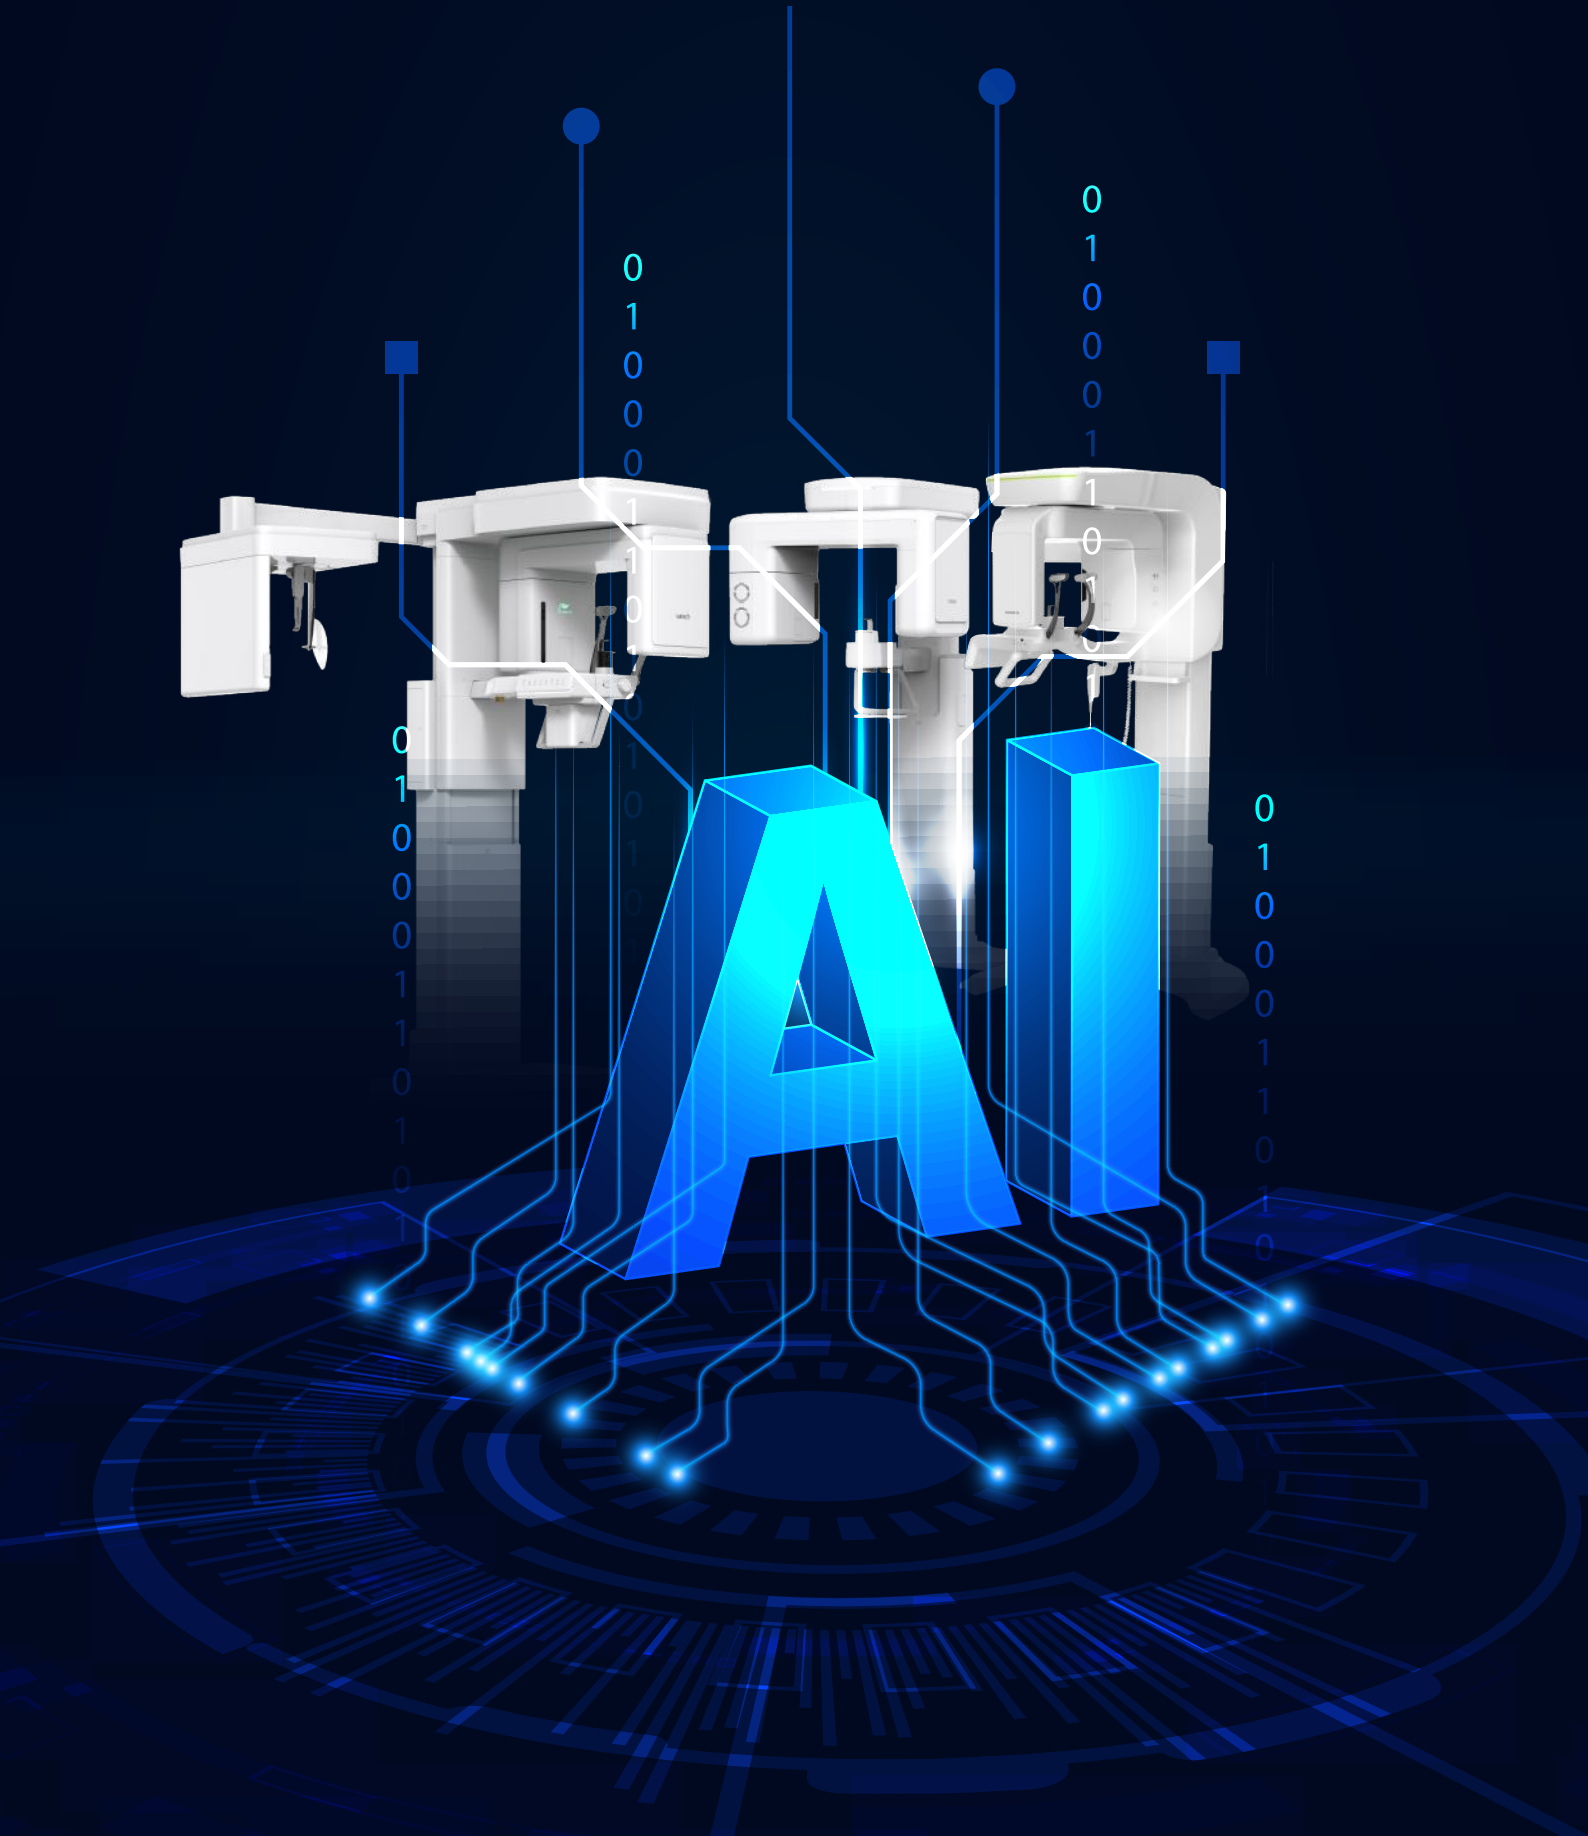

“When clinicians can see more, they can treat better.”

AS WE STEP INTO THE FUTURE OF DIAGNOSIS,  
let us introduce you to:

The next evolution in smarter diagnosis

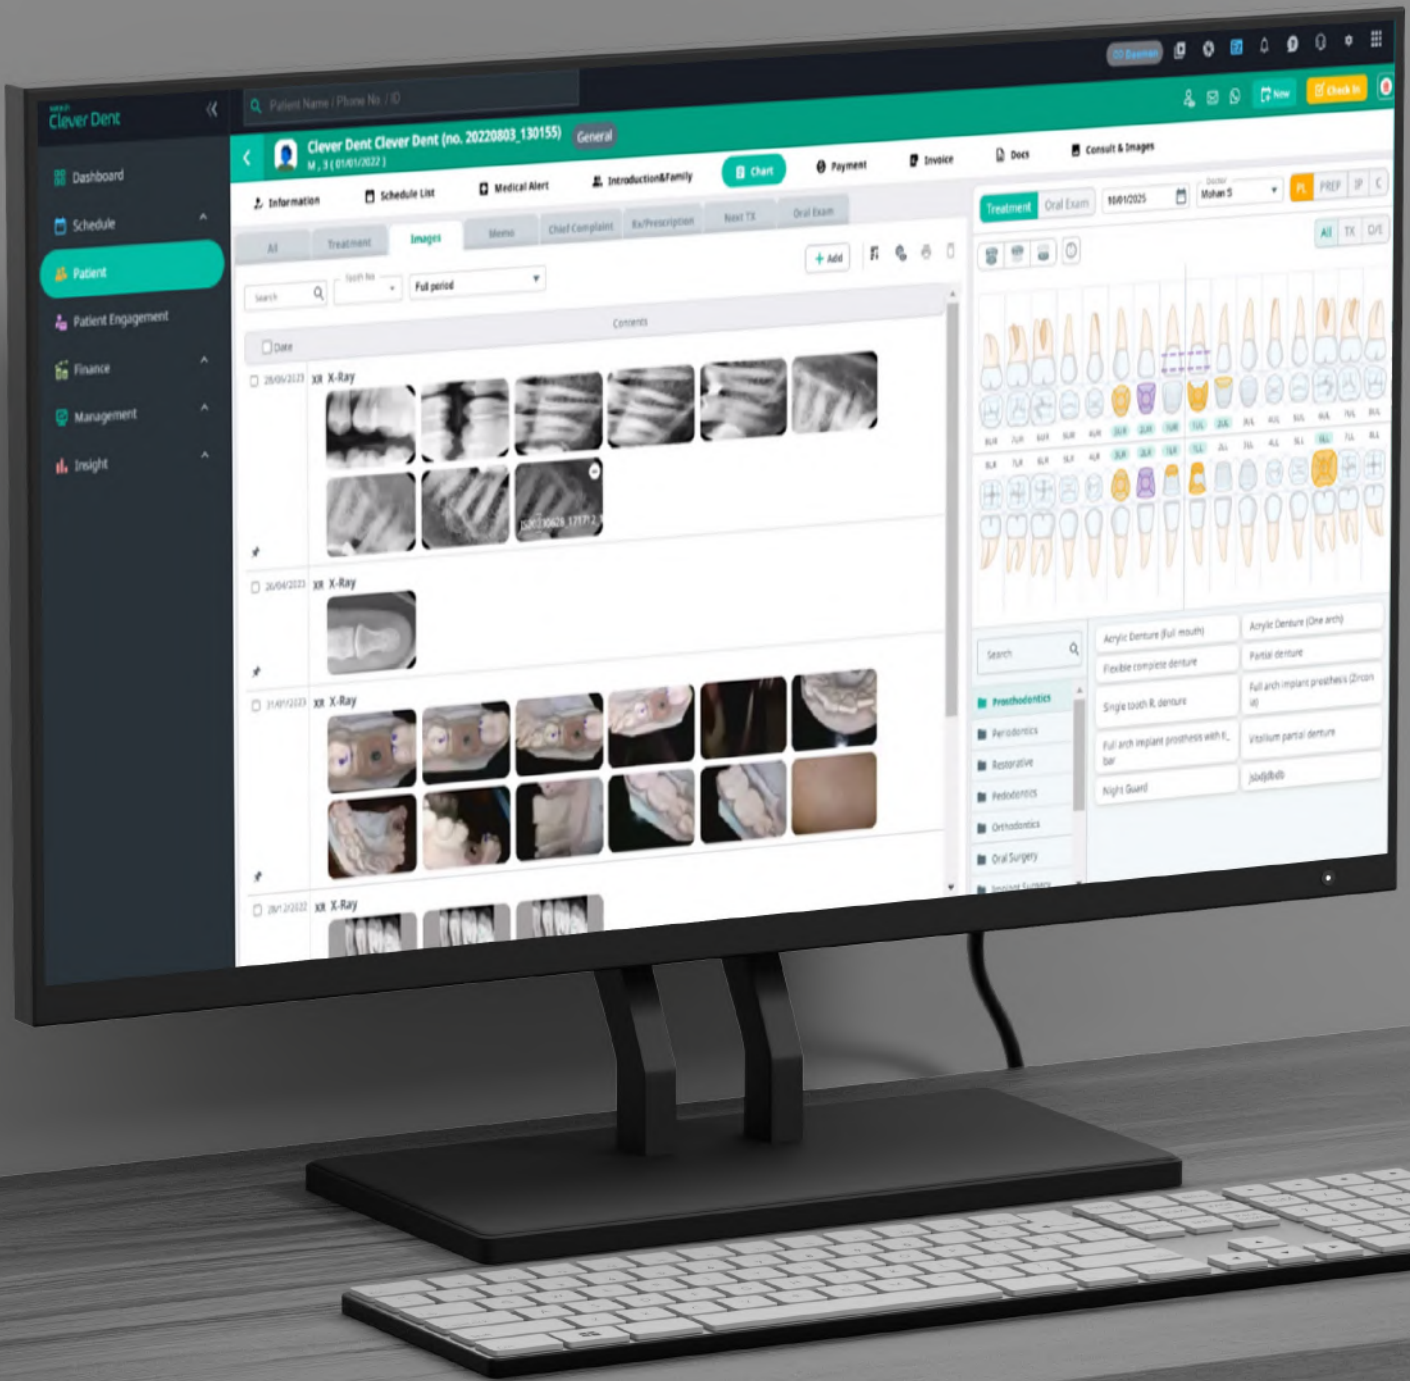

vatech

# The Future Begins Here

Davis Ai is not just an advancement in imaging —  
it is a step toward the future of intelligent diagnosis.  
Smarter Imaging. Sharper Insights. Confident Decisions.

Stay Tuned because  
The next breakthrough in CBCT analysis is here!

# Clever Dent

Practice Management Software

# Have You Tried WhatsApp Integration in Clever Dent?

Managing patient communication just became faster, easier, and more efficient. With the new WhatsApp Integration feature in Clever Dent, clinics can now stay connected with patients instantly — directly from the software. From appointment confirmations to reminders and quick updates, communication is now seamless and professional.

## What You Can Do with WhatsApp Integration?

- Send appointment confirmations instantly
- Share reminders automatically
- Reduce missed appointments
- Communicate directly with patients
- Save staff calling time
- Improve patient response and engagement

## Why Clinic loves it?

### Instant Appointment Updates

Patients receive real-time appointment confirmations & reminders directly on WhatsApp

### Reduce No-Shows

Automated reminders help patients stay informed, prepared, and always on time

### Faster Patient Communication

Connect instantly with patients without long calls or manual follow-ups

### Better Practice Management

Keep all patient communication organized in one streamlined system

Stay Connected with your patients always
