

Quick and Reliable

We provide fast and reliable
AdBlue® supply with our
commercial distribution fleet.

ABOUT COMPANY

Wellmax Commodities Import Export Trade Limited Company is a company established in 2017. Its areas of operation include the supply and production of AdBlue, car care products, windshield washer fluid, antifreeze, and electronic products.

Our company serves as an authorized dealer for İGSAŞ (Istanbul Fertilizer Industry Inc.), Turkey's leading AdBlue producer. Aiming for the highest quality, our company does not engage in its own production; instead, it aims to deliver the most reliable and high-quality products available on the market to its customers. This ensures that our customers use the correct products in their vehicles without experiencing any issues.

By exporting to various countries around the world, our company represents Turkey on an international level. Through its agreements, our company operates primarily in the Marmara Region but extends its activities across all of Turkey. With its technology, it aims to create a more livable environment with eco-friendly products. Starting in Turkey, it continues its efforts to contribute to environmental sustainability worldwide.

MISSION & VISSION

MISSION

Our company has adopted the principle of providing you with more reliable service by staying updated on current events, focusing on quality, prioritizing customer satisfaction, offering the right products, and ensuring timely delivery. With our commitment to continuously following industry trends and adapting to current developments in the business world, we aim to establish long-term relationships with our customers and maintain the highest standards in every aspect of our operations, adhering to the principle of excellence.

VISSION

Our company's vision is to expand first in Turkey and then globally by utilizing emerging technologies. We aim to contribute to a more livable environment and aspire for our innovative practices and commitment to sustainability to have a positive global impact. With strategies of continuous adaptation and forward-thinking, we strive to be pioneers of positive change, setting new standards in environmental responsibility and corporate excellence.

AddBlue

WELLBLUE 1000 LT (IBCLI)

The Wellmax WellBlue 1000 liter IBC tank provides a durable solution for the safe and efficient storage and distribution of AdBlue fluid. Made from high-quality HDPE (High-Density Polyethylene) material that is highly resistant to chemicals, this tank offers a generous capacity suitable for industrial needs. Its standard IBC dimensions make it compatible with forklifts and pallet handling equipment for easy transport. The integrated valve and safety cap ensure secure filling and dispensing, while its leak-proof and reusable design makes it an environmentally friendly solution. Ideal for service centers with large AdBlue storage needs, including truck fleets, distribution points, and industrial facilities, this tank maintains the quality of AdBlue fluid while providing reliable storage and distribution.

WELLBLUE 200 LT. BARREL

The Wellmax WellBlue 200 liter AdBlue barrel provides a high-quality solution for transporting and storing AdBlue fluid. Made from durable, chemical-resistant HDPE (High-Density Polyethylene) material, this barrel ensures reliable containment that maintains the quality of AdBlue fluid. Its integrated cap system allows for secure, leak-proof storage, and the ergonomic design makes handling and transport convenient. With a medium-sized capacity, it's ideal for service centers, fleets, and distribution points. The Wellmax WellBlue 200 liter AdBlue barrel delivers a safe and efficient storage and transport solution while preserving the high quality of AdBlue.

Wellmax Wellblue Adblue Emissions Reducer - Diesel

WellBlue is an environmentally friendly solution designed to reduce nitrogen oxide emissions in diesel engines of passenger and commercial vehicles. It is completely derived from natural sources, making it environmentally friendly and harmless to nature. Mandated across European Union countries, WellBlue aims to reduce nitrogen oxides in exhaust gases by 67% and also effectively reduces emissions caused by nitrogen oxides and particulates. Wellmax WellBlue, with IGSAŞ assurance, is a special synthetic urea solution used to reduce NOx emissions and is compatible with all vehicle models equipped with SCR systems meeting EURO 4, EURO 5, and EURO 6 standards, including specific trucks, tractors, buses, and trailers in Europe. It is not mixed with diesel or other fuels and is used with the SCR Selective Catalytic Reduction System. The product ensures effective and clean combustion of diesel engine fuel while providing IGSAŞ assurance for compatibility across all vehicles.

Blue Antifreeze -40°C

Wellmax's -40°C blue antifreeze is designed to provide effective protection for engine cooling systems in both passenger and commercial vehicles. Available in 1.5 and 3 liter capacities, this antifreeze ensures maximum protection against freezing even in extreme cold weather conditions. Its special formula protects the engine from rust, corrosion, and scaling, extending the lifespan of the cooling system. By preventing overheating, it supports efficient engine operation and offers consistent performance in both summer and winter.

Wellmax -40°C blue antifreeze is compatible with all cooling systems and radiator types. Its advanced formula is gentle on metal components like aluminum, steel, and copper. This product ensures reliable driving by protecting your vehicle's engine throughout the seasons.

Red Antifreeze -40°C

Wellmax's -40°C red antifreeze is designed to provide effective protection for engine cooling systems in both passenger and commercial vehicles. Available in 1.5 and 3 liter capacities, this antifreeze ensures maximum protection against freezing even in extreme cold weather conditions. Its special formula protects the engine from rust, corrosion, and scaling, extending the lifespan of the cooling system. By preventing overheating, it supports efficient engine operation and offers consistent performance in both summer and winter.

Wellmax -40°C red antifreeze is compatible with all cooling systems and radiator types. Its advanced formula is gentle on metal components like aluminum, steel, and copper. This product ensures reliable driving by protecting your vehicle's engine throughout the seasons.

Wellmax Rust Remover Spray

Wellmax rust remover spray is a high-performance product designed to tackle tough rust. This advanced formula quickly dissolves stubborn rust stains on metal surfaces and provides protection. The easy-to-use spray form allows application even in tight and hard-to-reach areas. It extends the lifespan of metal surfaces, protecting them from damage caused by rust and oxidation. Wellmax rust remover spray is ideal for any household, workshop, or industrial use, suitable for cars, motorcycles, bicycles, gardening tools, and many other metal surfaces. This fast-acting formula provides long-lasting protection and restoration against rust and corrosion, helping metal surfaces regain their original shine and functionality.

Wellmax Brake Cleaner Spray

Wellmax brake cleaner spray is a high-quality product designed to quickly and effectively clean dirt, grease, and brake dust from the brake system and other metal components. This powerful formula easily dissolves residues that accumulate on brake pads, which could otherwise negatively affect braking performance. It leaves no residue while thoroughly cleaning the parts. The convenient spray form allows it to reach even tight areas and effectively clean greasy and dirty surfaces in the brake system.

Wellmax brake cleaner spray is designed for use on all types of brake pads, disc, and drum brake systems. It is also ideal for workshops and garages where fast cleaning of grease, oil, and grime from metal surfaces is required. Regular cleaning prolongs the life of brake pads and systems, ensuring safe and effective brake performance.

Brake Cleaner

Wellmax Gasoline Injector Cleaner

Wellmax gasoline injector cleaner is a high-performance product designed to clean accumulated dirt and deposits from gasoline vehicle engines. Its special formula quickly dissolves deposits in the fuel system that can impair engine efficiency. This improves the performance of injectors, fuel injector nozzles, and valves, and supports fuel efficiency. Wellmax gasoline injector cleaner optimizes fuel consumption by cleaning the engine, ensuring better overall engine performance.

This product ensures proper functioning of the fuel injectors while eliminating carbon, residue, and other contaminants that accumulate in the fuel system. Regular use extends engine life, provides easier cold starts, and reduces emission levels. Wellmax gasoline injector cleaner is a reliable solution for better fuel economy and performance.

Wellmax Diesel Injector Cleaner

Wellmax diesel injector cleaner is a high-performance product designed to effectively clean accumulated dirt and deposits in diesel engines. Its special formula rapidly dissolves residues in the fuel system injectors, improving the performance of injectors and valves. It ensures proper functioning of fuel injectors, supports fuel efficiency, and contributes to the engine running smoothly.

This product removes carbon, deposits, and other contaminants from the fuel system, preventing injector clogging and improving fuel spray patterns. Regular use extends the engine's lifespan, facilitates cold starts, and reduces emissions. Wellmax diesel injector cleaner is a reliable solution for enhancing diesel engine performance and supporting fuel economy.

Wellmax Liquid Grease Spray

Wellmax liquid grease spray is a high-performance product designed to provide superior lubrication across a wide range of applications. This liquid grease in spray form reduces friction and prevents equipment wear by providing excellent adhesion to metal surfaces. Its special formula shows high resistance to water, heat, and salt, ensuring long-term protection even in machinery used in outdoor environments.

Wellmax liquid grease spray is ideal for components working under challenging conditions, such as bearings, chains, gears, hinges, pulley systems, and other moving parts. Its thin spray form penetrates even the narrowest and hardest-to-reach areas, providing lubrication. This product is highly pressure-resistant, extending equipment life, reducing maintenance frequency, and preventing failures, thus enhancing operational efficiency.

Wellmax microfiber cloth series

Wellmax Microfiber Chamois Cloth

Wellmax Microfiber Cleaning Cloth

Economical Package

Double

40x40

The Wellmax microfiber cloth series is a collection of high-performance cleaning products designed to meet various cleaning needs. These cloths are known for their superior absorbency and durability. Available in single, double, and quad sets, the microfiber cloths easily remove dust, dirt, and stains from surfaces without scratching, even on delicate surfaces. The towel and glass drying cloths offer fast, streak-free cleaning on large surfaces.

Wellmax Microfiber Cleaning Cloth

Microfiber Cloth Series

Wellmax microfiber cloth series

Wellmax Microfiber Tea Cloth

The fine texture of Wellmax microfiber cloths distributes cleaning agents like water and detergents evenly for more effective cleaning. Their long-lasting structure makes them suitable for washing and reuse. Ideal for homes, offices, cars, or industrial areas, these cloths provide efficient and quick cleaning solutions.

Never leaves dirt and dust on the surface.

No odor.

Does not scratch surfaces.

Can be used on both sides.

Does not pilling.

Does not leave water stains.
