**OUR GLOBAL NETWORK
OF PACKAGING SUPPLIERS
AND SERVICE PROVIDERS**

 Countries that BodyPak supplies

COMPANY OVERVIEW

PASSIONATE ABOUT PACKAGING

A first-class customer service

Over the past 15 years BodyPak has grown successfully to establish itself as a world-class supplier of innovative and competitive plastic packaging. Since 2008 we have taken pride in cultivating successful, long-lasting business relationships and establishing a flourishing network of packaging partners around the globe. These connections, along with our wealth of sales and technical expertise have allowed us to grow a comprehensive product portfolio and service demand effectively within fast moving consumer goods markets.

- Extensive packaging portfolio
- ISO and Sedex accredited facilities
- Competitive new tooling costs
- Full in-house product development services
- Patented lines and design innovation
- Rapid quote turnarounds and flexible MOQs
- International distribution
- Ethical, friendly and professional

Who are BodyPak?

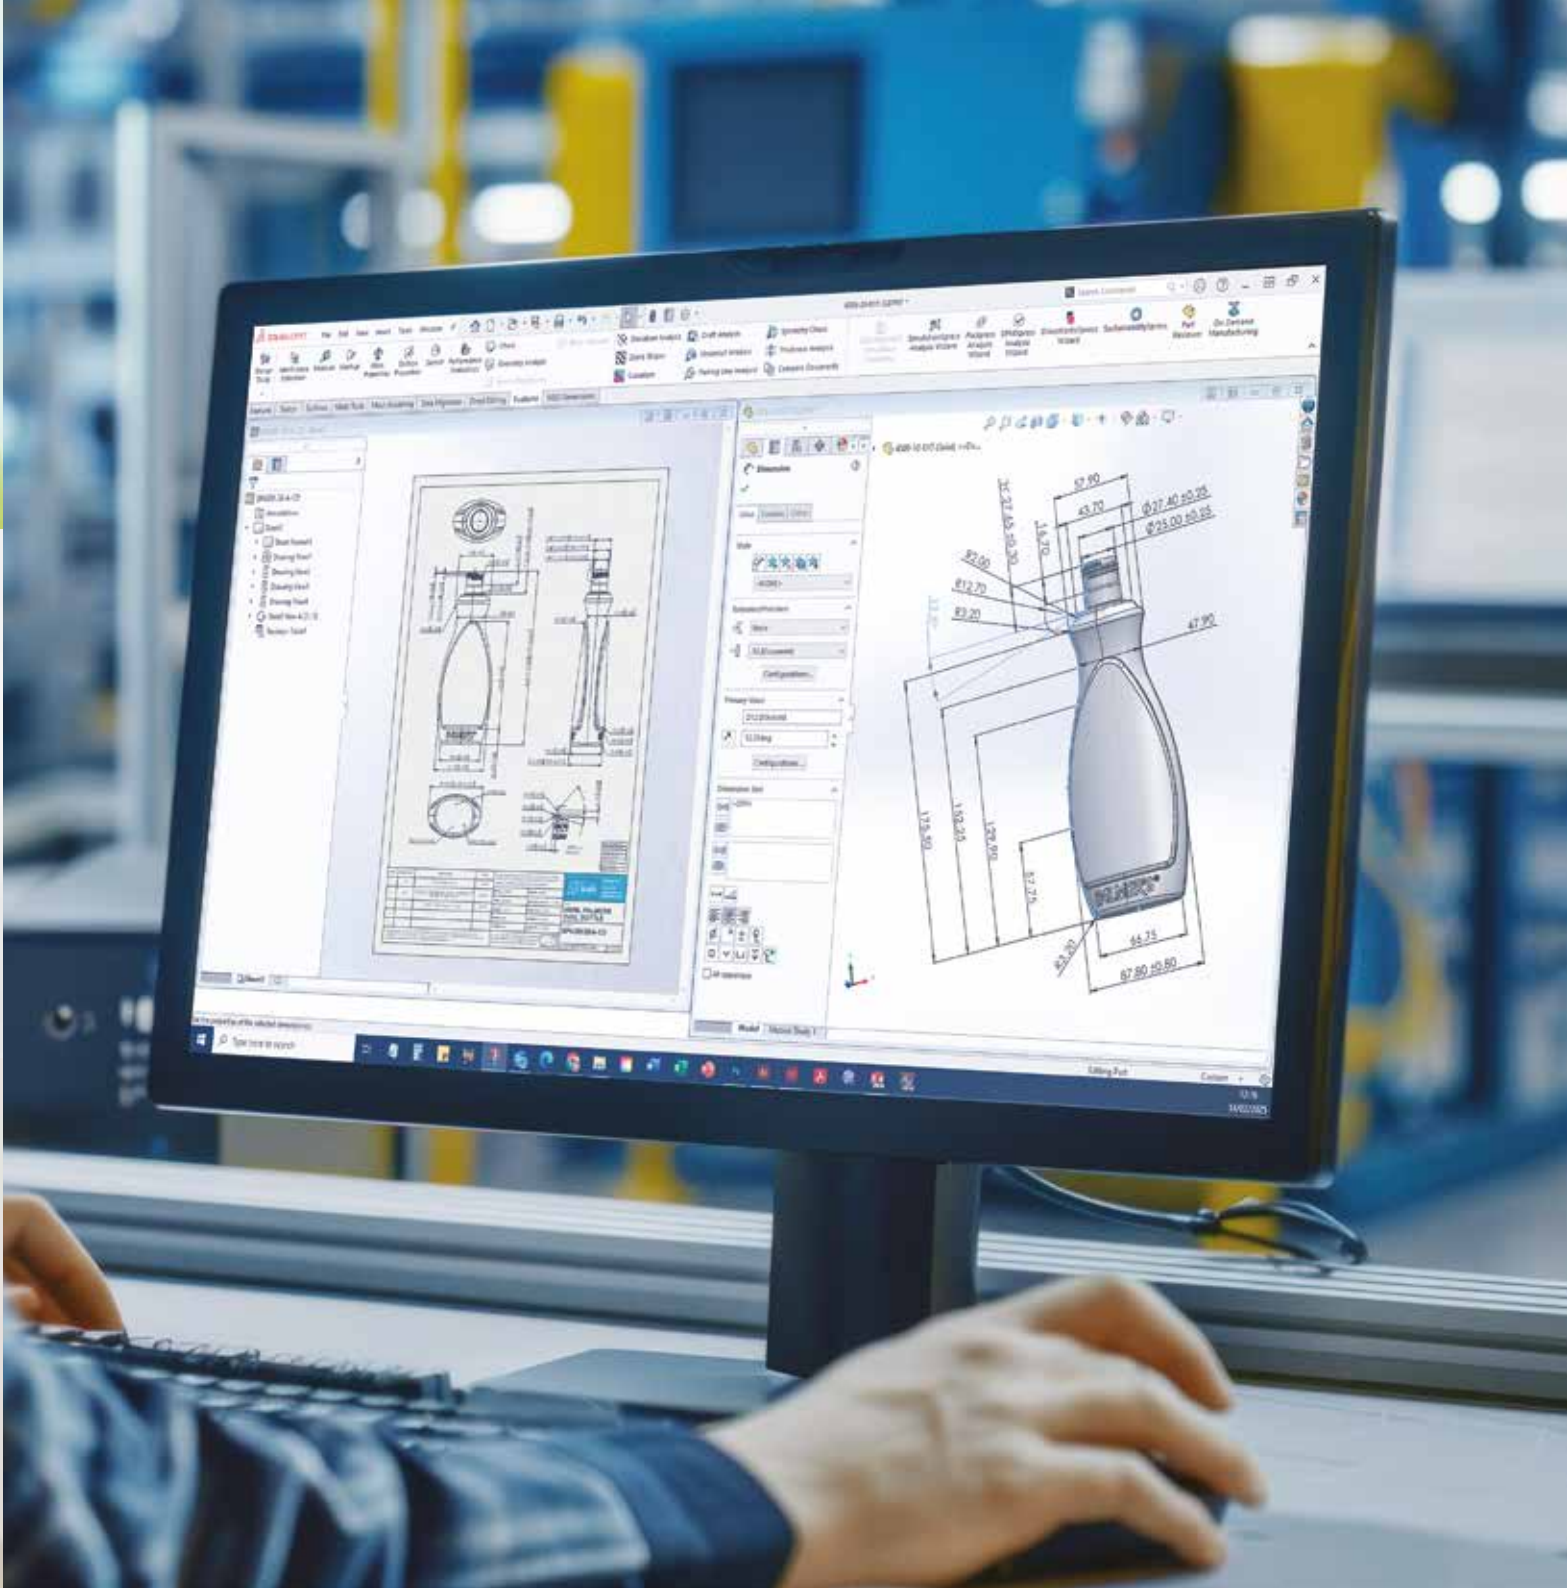

We're a dedicated team of packaging experts with offices and distribution centres across the UK, Europe and the USA. With a friendly and professional service our objective is to provide you with every aspect that you would need to make your next packaging project a success.

- A huge variety of standard products, patented flip top jars, dispensing closures, bottles, crystal PET, plastic pouches, tubes, glass and cartons
- Precision custom moulding
- Full decoration and colour matching
- Local warehousing and stock holding options
- Product concept rendering with 3D models

Let's work together!

Get in touch with our friendly, expert team today and discover how we can best assist you.

DESIGN & INNOVATION

WE LOVE CREATING NEW PRODUCTS!

BodyPak Ltd is focussed on delivering continual improvement in the products and services we offer.

Through striving to better understand consumer and brand wants and needs we aim to remain relevant and in-touch with contemporary packaging requirements.

As the focus on the responsible use of packaging becomes ever more important, BodyPak is committed to designing and developing new products with a focus on responsible materials choice and minimal use of materials in pack design. We pride ourselves on our:

- Freedom to collaborate and fully explore new packaging possibilities
- Flexible and competitive company structure
- Positive and proactive approach to introducing new and fresh packaging designs
- Full in-house design service complete with highly experienced team and cutting-edge software
- Photo-realistic product renders available for new and existing projects
- Quick turnaround for new ideas and technical realisation (including fully detailed drawings)
- Rapid prototyping and 3D modelling service
- Extensive concept library, featuring a variety of challenging projects undertaken
- Active patents for innovative product design (Flip Top Jars & Non-Drip Valves)

Whilst it is rewarding to create new innovation that is successful in the market place it is equally as rewarding to meet a clients brief and deliver on a new packaging design. It is unusual for a packaging manufacturer to be able to offer the high level of design expertise and commercial advantages that BodyPak Ltd can.

CUSTOM MOULDING & TOOLING

LET'S CREATE YOUR UNIQUE
PACKAGING SOLUTION

With over 45 years of experience in custom tooling and new product development, we provide expert solutions for your bespoke packaging needs.

If you have a preliminary design, we can supply a 3D prototype drawing and a full quotation promptly. If you need a concept developed, our in-house design team will create tailored design ideas, followed by renders and prototype models to help refine your final product.

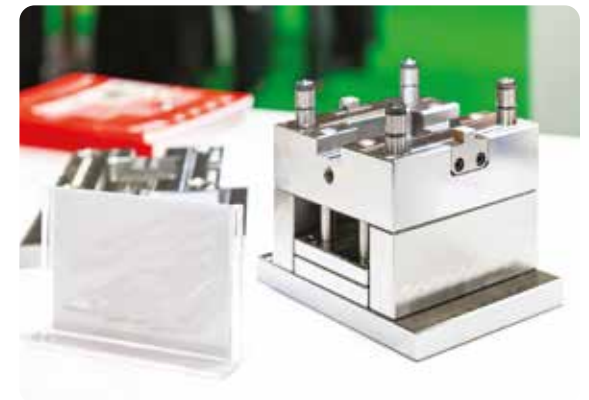

Our moulds are manufactured from high-quality industry-specific steels and alloys, ensuring durability and precision. Each mould comes with a full quality guarantee, giving you confidence in their performance and longevity.

We understand the need for fast turnaround times, which is why our in-house toolmaking facilities allow us to deliver efficient lead times on custom-designed moulds. From single-impession tools to high-cavity, high-output solutions, we offer tooling to suit all budgets and production requirements.

- 45+ years of expertise in product development
- Over 300 new moulds made since 2008
- Fast 3D prototyping and detailed quotations
- In-house design support for concept development
- High-quality materials for precision and durability
- Short lead times with in-house tooling capabilities
- Solutions for all production scales
- Full quality guarantee on all moulds

We pride ourselves on offering expert guidance, rapid turnaround times and tailored solutions that meet the unique demands of our clients.

Contact us today to discuss your specific requirements - we look forward to bringing your packaging vision to life!

A GREENER APPROACH

REDUCE, REUSE & RECYCLE

Sustainable Solutions

As the focus on the responsible use of packaging becomes ever more important, BodyPak is committed to designing and developing new products with a focus on responsible material choices. We continue to work with our manufacturing partners in offering new and exciting material options along with developing lightweight, reusable and fully recyclable packaging to our customers.

Our sustainable material options include:

PIR (Post Industrial Regrind)

Material waste recovered from industrial processes, particularly PP material which can be used in the manufacture of our closures through injection moulding.

PCR (Post Consumer Regrind)

Plastic materials that have been recycled after use by the consumer, particularly PP and PE materials. This material can be processed and reused in newly manufactured components.

Biopolymers

Materials derived from natural sources. For example we can offer extrusion blow moulded bottles and flexible tubes produced in a PE material derived from sugar cane. This material has similar properties to fossil fuel derived PE and is also recyclable.

Other Sustainable Solutions

We design all of our products to be appealing to the eye and capable of sustaining use for many years. The appeal of plastic is that it is so versatile, durable and inexpensive, so why dispose of perfectly usable packaging after its contents have been used?

We have a great team of people who can create exciting re-usable packaging designs, negating the need to recycle or dispose.

MANUFACTURING CAPABILITIES

SPECIALISTS IN SERVICE

BodyPak has partnered with manufacturers that share our high expectations for technical capabilities, quality of supply, service and ethics. A brief summary for each of our partners follows:

Injection Moulded Components

- On site design facility with full 3D design capabilities
- On site precision Tool room with latest high precision CNC machine tools
- On site metals heat treatment plant
- High quality calibrated Inspection equipment
- 45 Injection moulding machines (50 – 350 tons)
- Mould impression size from 1-impresion to 16-impresions typically
- Polypropylene, Polyethylenes, ABS, SAN, PCTG, PC, Nylons & Recyclates
- Decoration by periphery foil banding, heat transfer printing and pad printing
- ISO 9001 accredited facility for manufacture of mould tools and plastic components

Extrusion Blow Moulded Components

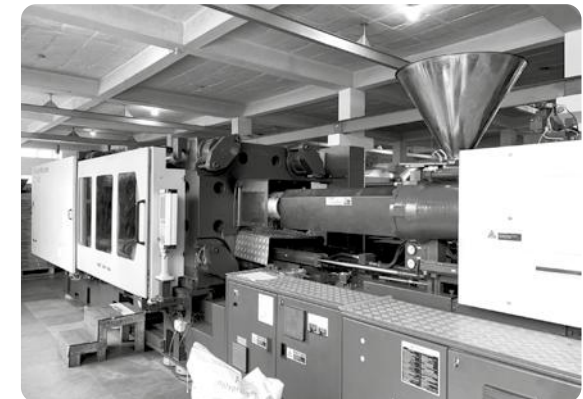

- On site design facility with full 3D design capabilities
- High quality calibrated inspection equipment
- 34 Extrusion blow moulding machines, larger machines with full vision inspection and automated end of line packing equipment
- Bottle size range of 10ml – 1500ml capacity
- Polypropylene, Polyethylenes, Sugar Cane derived PE
- Decoration by silk screen printing including soft touch lacquering and hot foil stamping
- ISO:9001 accredited facility for manufacture of plastic components and ISO:14001 for Environmental Management

Flexible Tube Components

- On site design facility with full pre-press facilities
- High quality calibrated Inspection equipment
- 14 tube manufacturing lines
- 40 injection moulding machines
- LDPE, LLDPE, HDPE, PCR PE & EVOH tube materials
- PP closure material
- Decoration by silk screen printing, dry offset printing, flexo printing and hot foil stamping
- ISO:9001 accredited facility for manufacture of plastic components and ISO:14001 for Environmental Management

Dispensing Pump Components

- On site design facility with full 3D design capabilities
- On site precision Tool room with latest high precision CNC machine tools
- High quality calibrated Inspection and test equipment
- 300 injection moulding machines
- 450 assembly machines
- 5 UV coating lines
- 7 Vacuum metallising chambers
- 2 aluminium anodising lines
- PP, PE, ABS, SAN, PC, PCTG, PS, POM materials
- ISO:9001 accredited facility for manufacture of plastic components and ISO:14001 for Environmental Management

REGULATION COMPLIANCE

WE'RE COMMITTED TO QUALITY, ETHICS & SUSTAINABILITY

At BodyPak, we uphold the highest standards of quality, environmental responsibility, and ethical business practices.

All of our packaging partners are ISO:9001 certified, ensuring rigorous quality control and full batch traceability for every component produced. They also comply with FDA and REACH regulations, guaranteeing that all materials meet strict product safety and environmental standards.

Ethical responsibility is fundamental to our supply chain. Every supplier adheres to the ETI Base Code, ensuring fair wages, safe working conditions, and staff development while promoting a responsible workplace culture.

BodyPak is fully compliant with the UK Plastic Packaging Tax, Packaging Waste and Extended Producer Responsibility (EPR) schemes, helping to drive responsible waste management and reduced environmental impact. Additionally, we are SEDEX-accredited, supporting transparency, sustainability, and ethical supply chain practices.

- ISO:9001 certified partners for quality assurance and traceability
- FDA approved polymers and masterbatch, safe for food contact
- REACH-compliant components ensuring material and product safety
- ETI Base Code compliance for ethical employment standards and fair treatment
- Full compliance with the UK Plastic Tax, Packaging Waste and EPR schemes
- SEDEX accreditation for responsible and sustainable supply chains

By maintaining these high standards, we ensure quality, integrity, and sustainability in every aspect of our business.

CAPS & CLOSURES

Disc Top Closures / Flip Top Closures / Screw Caps /
Nozzle Caps / Push/Pull Caps / Speciality Caps

DISC TOP CLOSURES

PRESS TO DISPENSE

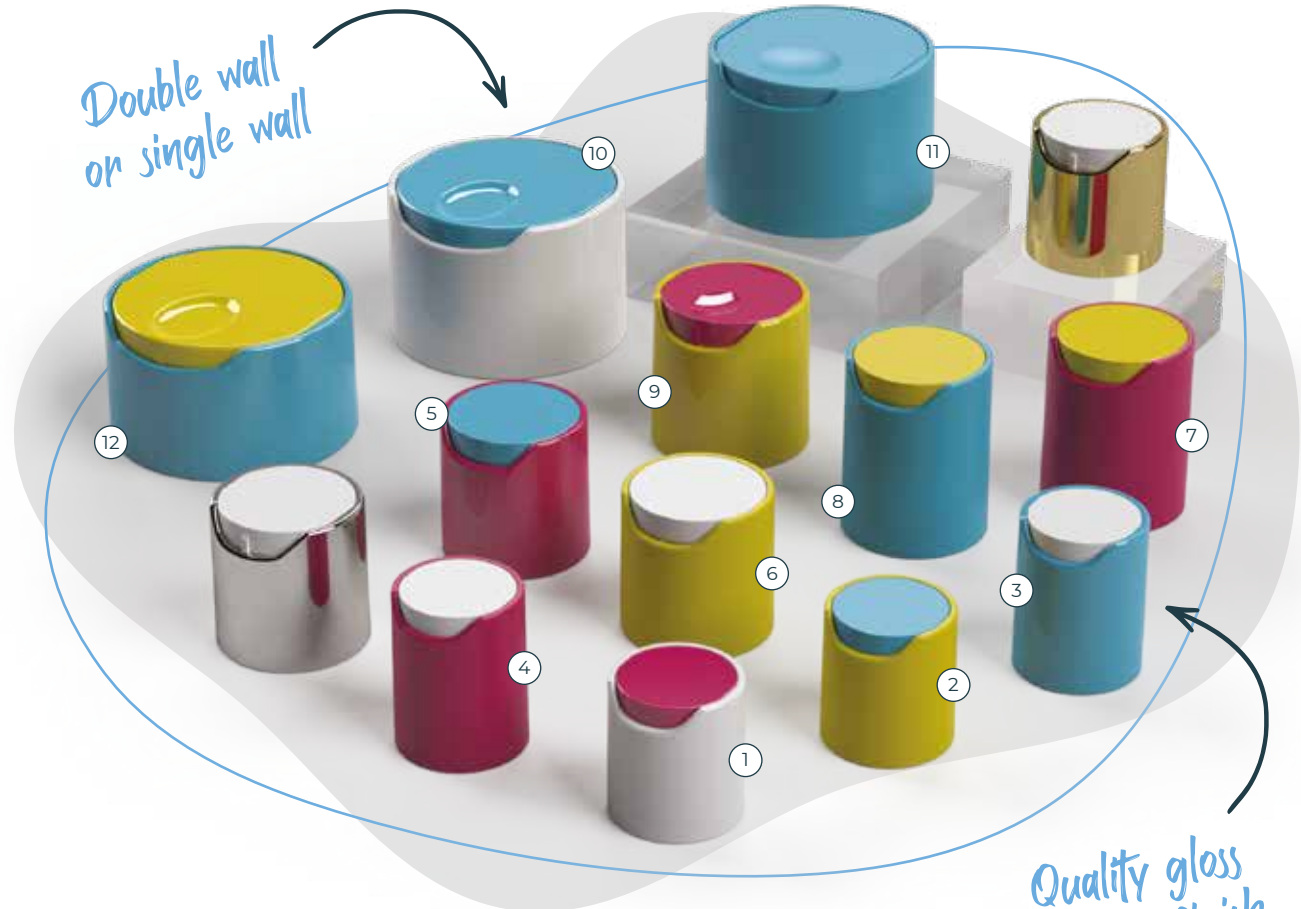

Disc top caps were amongst the first products made by BodyPak. The closures are designed with ease of use in mind, offering a convenient disc top mechanism that allows for controlled dispensing of lotions, shampoos and other personal care products.

BodyPak has spent considerable time designing durable precision tooling to create our classic disc tops which all undergo numerous checks to ensure they always conform to our tight specification. The sleek, flat top finish on our discs ensures a contemporary and durable dispensing closure.

Get that premium feel!

We can offer metallic and material effect collars for many of our disc caps. **Call us for more details!**

FLIP TOP CLOSURES

FLIPPIN' AWESOME

Flip top closures were also amongst the first products made by BodyPak and we love them. They are both supremely versatile and functional products that do a great job, hence their longevity. The active hinge design on our flip tops ensures a durable and reliable dispensing closure.

They combine the convenience of a cap that stays attached to the bottle with a flip-action opening that allows for controlled dispensing. This makes them ideal for liquid products, as well as certain powder or granulated formulations. Flip tops offer the perfect combination of functionality, convenience and style.

Make it your own!

TAMPER EVIDENT TWIST TOP CAP

CLOSURES

CLOSED

OPEN

INNOVATIVE DESIGN

This speciality 3 piece dispensing closure is a little work of engineering art. Once applied to the bottle neck the twist top design includes a unique tamper evidence feature that is broken upon first opening.

The closures are produced and decorated in house and the three separate moulds were all constructed and developed together in our on site tool room. This in-house set up is ideal when it comes to manufacturing and developing multi component products.

- Easy twist-to-open and twist-to-close
- Tamper-evident seal for on-the-shelf security
- Multiple colour options between components
- Additional decoration and aluminium foil banding

STANDARD RANGE

1. Tamper-Evident Twist Top Cap

WIDE MOUTH PUMP LIDS

CONVERT YOUR JAR

Our Wide Mouth Pump Lids provide a versatile solution for transforming standard jars into convenient lotion packs. Designed for seamless integration, these lids offer both functionality and ease of use, making them ideal for personal care, beauty, and wellness applications. With double thread options, users can either add their own pump or opt for an all-in-one dispensing system.

- Double thread options to add your own pump
- All-in-one alternative with built-in dispenser pump
- Centered or off-center orifice options
- Designed to fit standard 89/400 and 100/400 jar neck sizes
- More sizes and combinations available

TREATMENT PUMPS

SMALLER DOSAGE DISPENSING

Treatment pumps are similar in pump construction to lotion pumps, but offer smaller dosage amounts commonly required for products such as face and eye care serums. They are also more elegant in design with greater styling options.

- Multiple neck sizes
- Multiple actuator designs
- Multiple cap designs
- Options with or without over caps
- Dosage ranges between 0.10 – 1.10ml
- Closure finishes include smooth, ribbed and aluminium

SPRAY PUMPS

FINE MIST SPRAYS

These pumps offer accurate dispensing of lower viscosity liquids with smaller dosage requirements per depression. As with lotion pumps they are available in a large range of common thread sizes to suit industry standard bottle necks.

- Multiple neck sizes plus clip-on options
- Multiple actuator designs
- Options with over caps
- Common dosage ranges between 0.12 – 0.8ml
- Closure finishes include smooth, ribbed and aluminium
- Metal free path option available

TRIGGER SPRAYS

A HOUSEHOLD FAVOURITE

Trigger pumps are commonly used on larger bottles for products such as household cleaning products and automotive products. The mini triggers are also popular on smaller bottles in personal care for products such as hair sprays and sun care.

- Multiple compatible neck sizes
- Tailored trigger design options
- Common dosage ranges between 0.2 – 1.4ml
- Smooth and ribbed closure design options
- Spray pattern options
- Multi-colour options
- All plastic construction model

MINI TRIGGERS

A POPULAR ALTERNATIVE

Our Mini Trigger Sprays offer a compact, ergonomic design that delivers precision dispensing for a wide range of applications. Whether used in personal care, household cleaning, or industrial products, these sprayers provide controlled and reliable performance. Designed to fit industry-standard bottle necks, they ensure compatibility across various packaging solutions.

With adjustable spray patterns, these triggers allow for fine misting or direct stream applications, making them adaptable for different product formulations. Their lockable nozzle feature enhances security during transport and storage, preventing leaks and spills. Additionally, the variety of colours and finishes available allows brands to maintain visual consistency and reinforce their identity.

- Available in a range of standard thread sizes
- Adjustable spray patterns
- Ergonomic trigger designs
- Lockable nozzle for secure transport and storage
- Multiple colours and finishes for your brand
- Smooth or aluminium sheathed finishes

PLASTIC JARS & CONTAINERS

Flip Top Jars & Lids / PP & HDPE Jars / Premium PP Jars /
PET Jars / Acrylic Jars / Crystal PET Range

FLIP TOP JARS

DEDICATED BY DESIGN

BodyPak's patented Flip Top Jars combine modern design with practical functionality. Made from single-wall PP, they use less plastic than traditional double-wall jars.

The snap-lock, flip top lid enhances sealing for liquid products while offering easy access to creams, scrubs, and more. The hygienic design prevents bacteria transfer and eliminates lost lids.

An optional IHS aluminium foil ensures tamper evidence for added security.

- Active hinge flip top for easy product access
- Patented sealing system for a range of liquids
- PP single wall construction for easier recycling
- Tamper-evident, air-tight seals
- Perfect for cosmetic pads!
- Customise by embossing your logo
- More hygienic than conventional jars

FLIP TOP JAR LIDS

ADDED CONVENIENCE

An exciting addition to our range of components are flip top lids to suit jars with industry standard 70/400 and 89/400 neck finishes. These great lids are a direct replacement option to conventional screw-on lids, offering the improved convenience of flip lid opening.

Both versions of lid have a PE liner in the flip, and platform seal to the jar with options to have customised foil sealing. The tooling has been designed so that the top face of lid can incorporate product branding if required.

STANDARD RANGE

1. 70/400 Flip Top Jar Lid

Add a custom foil seal with your own design!

All of our flip top jars and accompanying lids can be decorated with a custom IHS liner featuring your logo or design. Available in a limited range of colours and finishes.

Get in touch with us today for further details.

STRAIGHT SIDED PREMIUM JARS

HEAVYWEIGHT & PREMIUM

This is a classy and classical line of premium quality jars. Its straight sided gloss finish is appealing and unassuming, a blank canvas that is very versatile. This line is equally appropriate for housing luxurious moisturising creams, balms or styling products.

Colours and decoration make all the difference so please talk to us about your chosen design to help perfect this high-quality package.

- Suitable for a broad spectrum of products
- Numerous customisation options
- Air tight seals
- Customise by embossing your logo
- More hygienic than conventional jars

DOUBLE WALL PET JARS

ADAPTIVE & STYLISH

This range of Double Wall PET Jars combines sleek aesthetics with customisable functionality. Available in three sizes, the reusable PP inserts allow for adjustable capacities while creating a unique layered look. The interplay of transparent PET exteriors with a colourful insert offers multiple possibilities for elegant branding.

- Double Wall PET with a premium, polished appearance
- Interchangeable PP inserts for flexible capacity options
- Transparent outer wall enhances branding opportunities
- Durable and lightweight materials for easy handling
- Inserts can be removed, replaced and sold separately to promote a refillable jar range

PLASTIC BOTTLES

REFILL ROLL-ON

PLANET CONSCIOUS PACKAGING

A novel and reusable alternative to conventional roll-on packaging. Designed to reduce plastic consumption and lessen CO2 footprint.

The Refill Roll-On is a **mono-material** product that comprises of a PP bottle, a unique PP flip-top housing, a PP roller-ball and a PP screw thread overcap.

At the centre of the design for the Refill Roll-On is the flip-top housing which features an innovative aperture design and an integral bore seal, coupled with a simple latch and hinge mechanism which allows users to easily open and refill the product when required.

STANDARD RANGE

- | | |
|--------------------------------------|--|

| ♻️ PP | ♻️ PP & TPE |

The pack can be fully decorated and even customised further with bespoke designs for the bottle and overcap depending on brand requirements. We can also provide a soft-touch version for a more premium feel.

- Refillable and reusable
- Reduces plastic waste and CO2 footprint
- Fully recyclable polypropylene design
- Easy refill with latch, hinge, and integral bore seal
- Customisable branding options for bottle and overcap
- Soft-touch option for a premium feel and longevity
- Designed for minimal environmental impact

ABOUT THE REFILL ROLL-ON

BEHIND THE DESIGN

Roll-on deodorant packs are daily-use products sold in their billions every year around the globe.

A conventional roll-on comprises of four separate components (overcap, ball, housing, bottle) that each require significant energy to produce. Each part is manufactured individually and then assembled before the pack enters the consumer goods market.

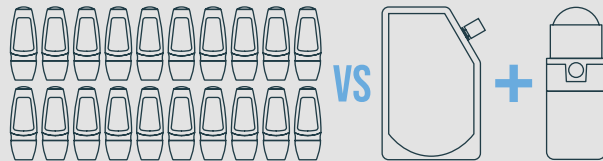

We estimate that an average user will apply a deodorant daily or twice daily and will use and dispose of between 6-12 50ml roll-ons per year, that's over 48 plastic components per person per year!

We decided to develop the Refill Roll-On as a way to tackle this unnecessary waste, reduce CO2 and promote a more sustainable ethos by encouraging refilling and re-use.

The Refill Roll-On is the culmination of 3-years development, driven by the desire to create a contemporary deodorant pack that will significantly reduce plastic usage and streamline the conventional manufacturing process. It's a new and unique 50ml pack that when coupled with a 1L Refill Pouch can reduce plastic consumption by over 90% over 24 months of regular use.

By using our Refill Roll-On system, we will use significantly less plastic and reduce CO2 output through minimising additional transportation and manufacturing processes. Users can still apply their favourite formula and use just 7 plastic components compared with up to 96 for a standard roll-on.

As the usage volumes of these items are so significant, if we can persuade just 10% of users to switch to a Refill Roll-On, the CO2 and plastic reductions will be amazing!

20 Standard Roll-Ons

80x Components
634g of Plastic

50ml Refill Roll-On + 1L Refill Pouch

7x Components
67g of Plastic

THAT'S OVER 90% REDUCTION ON PLASTIC COMPONENTS, WEIGHT AND A HUGE SAVING ON OUR CARBON FOOTPRINT!

PLASTIC BOTTLES

SHOWER GEL BOTTLES

FUNCTIONAL & STREAMLINED

Our Shower Gel bottle range features oval-based PE & PP bottles of various shapes and sizes. Designed for liquid personal care products, these bottles provide a clean, modern look while maintaining durability and strength for use in the bathroom and beyond. Their shape ensures a comfortable grip and easy usage.

- Oval shape for an attractive, ergonomic design
- Multiple shapes and sizes
- Durable PE or PP material with excellent 'squeezability'

TIMELESS & VERSATILE

The Tubular PET range offers a classic cylindrical design that is both functional and reliable. With a wide range of sizes, these bottles are perfect for everyday products like shampoos, conditioners, and cleaning solutions. Their smooth, even shape ensures easy filling and labelling, making them a popular choice for various industries looking for a cost-effective, standard packaging solution.

- Traditional cylindrical design for a wide range of applications and market sectors
- Available in a large range sizes, capacities and additional neck finishes
- Made from high-quality, durable PET
- Smooth, flat surface ideal for branding and labelling

EASY REFILL TUBULAR

*New Sizes
Coming Soon!*

EFFORTLESS REFILLING

Why sacrifice design for functionality? With the Easy Refill range from BodyPak you won't have to!

Our Easy Refill range improves on a standard tubular design with a wider neck orifice, making filling and refilling even easier for customers and filling companies.

Our introduction to the Easy Refill range includes two popular volumes (250ml & 300ml) of the universal tubular shape in a high clarity PET material, designed with a wider 40mm orifice to accommodate for convenient refilling and re-use.

STANDARD RANGE

1. 250ml E.R. Tubular

BPB467-PR

⚙️ 40/400

⚙️ 40/400

↓ 181.0

⊙ Ø49.4

♻️ PET

The conventional bottle shape along with our newly developed low-profile disc top cap creates a sleek and stylish pack perfectly suited to everyday cosmetics, hygiene and skincare products.

- A larger orifice size enables quicker and easier refilling, minimising spills and mess
- Accommodates for a broader range of liquids, including thicker substances like creams, gels and lotions
- Further promotes re-use in the consumer market which reduces single-use plastic consumption and our carbon footprint
- Part of our expanding range of refillable components
- Also compatible with 40mm neck foamer pumps and other caps with a 40/400 SPI standard thread profile

OVAL

SIMPLE, PRACTICAL & ADAPTABLE

The PET Oval range combines a classic oval shape with a clean, straightforward design, making it a versatile choice for a wide variety of products.

With sizes spanning 30ml to 500ml, this range provides practical solutions for personal care, household, and healthcare markets. Its balanced design ensures ease of use and reliable performance across applications.

- Clean, oval shape for universal appeal and versatility
- Ergonomic design for convenience and usability
- Made from PET for a recyclable packaging solution
- Ideal for personal/healthcare and household markets

ADDITIONAL SERVICES

Flexible Tubes / Laminate Pouches / Boxes & Cartons /
Aluminium Packaging / Designer Fragrances / Printing & Decoration

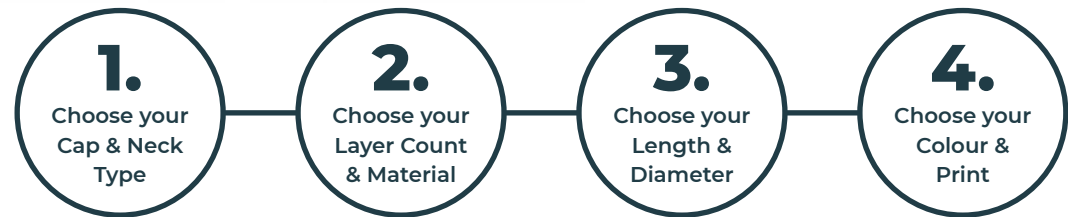

FLEXIBLE TUBES

LIGHTWEIGHT & STURDY

Our flexible plastic tubes are the perfect solution for packaging creams, gels, and other semi-liquid products. Lightweight yet sturdy, they offer excellent protection and easy dispensing. Fully customisable with high-quality printing, various sizes, and closure options, these tubes combine practicality with premium aesthetics to elevate your brand's packaging.

- Multiple cap options including screw-on caps, discs and flip tops
- Tube diameters ranging from 15mm to 60mm
- Produced in mono or multi-layer (5-layer) construction
- Commonly produced in PE blends (high and low density) for varying levels of flexibility
- Optional EVOH internal layer for higher barrier resistance
- High quality printing options

TUBE PRINTING & DECORATION

TAILORED TO YOUR REQUIREMENTS

Printing & Decoration

Our flexible tubes can be decorated by a number of processes, providing traditional effects to photo-realistic imaging:

- Silk screen printing - up to 7 colours
- Dry offset printing - up to 9 colours in either a premium matte or high gloss varnish
- Flexo printing - up to 11 colours
- Hot foil stamping - using either silver or gold foil (other colours available upon request)

Optional Additions

- Foil membrane option over the orifice
- Shrink sleeving - including over caps
- Metallised and foil banded caps

LAMINATE POUCHES

A LIGHTWEIGHT PACKAGING SOLUTION

Laminate pouches are a modern, versatile, and cost-effective packaging solution, perfect for industries like food, beverage, personal care, and household goods. They offer durability, convenience, and customisation to enhance your brand.

Why Choose Laminate Pouches?

Designed to meet the needs of both businesses and consumers alike, pouches offer a range of benefits:

- Shields products from moisture, air and contamination
- Flexible design minimises storage and transport costs
- Zip locks, spouts, and tear notches improve convenience
- Refill packs reduce waste and support sustainability
- Available in various styles, sizes and finishes (min. 100ml)

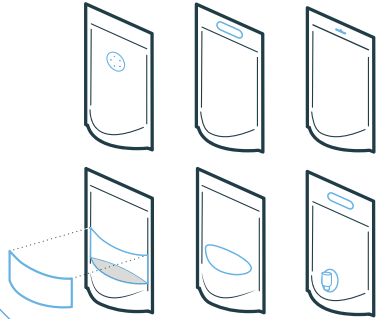

Laminate pouches do more than just package products - they showcase your brand, improve efficiency, and align with growing consumer demand for sustainable solutions.

Get in touch today and let us help you find the perfect pouch for your next project!

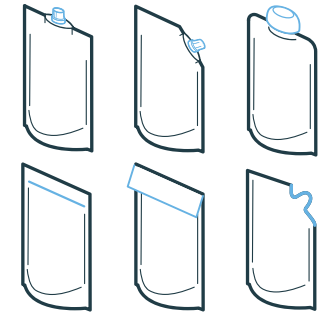

Feature/Accessories:

Degassing valves, breathing valves, carrying handles, hanging hooks, viewing windows, dispenser taps

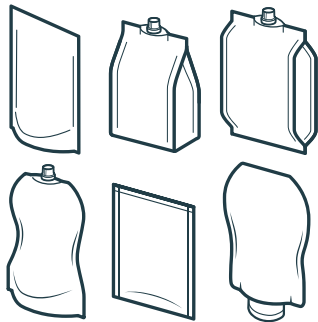

Sealing Options:

Top or side spouts, tamper-evident caps, screw caps, resealable zippers, sealed flaps, tear-off strips, straws

COSMETIC ALUMINIUM RANGE

LIGHTWEIGHT & RECYCLABLE

Our cosmetic aluminium range offers practical, durable and sustainable packaging solutions across a wide variety of product types. With a focus on versatility and clean design, this collection includes bottles, jars and caps made from high-quality aluminium, ideal for both everyday and premium cosmetic products.

The **aluminium bottles**, available in sizes from 30ml to 300ml, are suitable for liquids such as perfumes and aerosols, essential oils, serums and even beverages or chemical formulas. Their lightweight and non-reactive properties make them especially popular in the personal care and wellness sectors.

Our **aluminium jars** range from 5g to 500g and are commonly used for skincare applications including eye creams, face creams, balms and clay or gel-based masks. The jars provide excellent protection against light and air, helping preserve the integrity of active ingredients.

To complete the packaging we offer a variety of **caps and closures** including screw caps, droppers, atomisers and spray pumps. These are designed to fit seamlessly with our bottles and jars, offering functionality and a consistent look across your product line.

Additional Features:

- Fully recyclable and refillable
- Lightweight, corrosion-resistant and leak-proof
- Suitable for hot or cold filling
- Effective barrier against UV, air and moisture
- Convenient for travel
- Custom sizes and shapes available on request

Decoration Options:

- Colour coating
- Anodised finishes
- Frosted effect
- Silk-screen printing
- Hot stamping
- Embossing

Whether you're launching a new skincare range or refining an existing product line, this aluminium collection offers reliable performance with a clean, modern aesthetic to match.

For more details on our aluminium range please contact one of our experienced team members on the email or phone number below. We look forward to handling your enquiry.

DESIGNER FRAGRANCES

EXCLUSIVE GLASS RANGE & SCENTS

Discover the perfect blend of luxury and presentation with our expertly crafted fragrances and premium packaging solutions. As an added extra from BodyPak we offer a complete, one-stop shop for beautifully designed fragrances and the striking packaging that enhances them.

Our collection features a diverse range of high-quality fragrances, carefully developed to capture elegance, sophistication and individuality. Whether you're seeking a bold, confident scent or something more subtle and refined, we offer long-lasting, expertly blended fragrances at a competitive price.

To complement our fragrances, we also offer a selection of packaging solutions to help present and protect each product. From stylish bottles to beautifully designed boxes, we provide options that enhance the overall experience, ensuring every scent is as visually appealing as it is aromatic.

We work with brands to provide a seamless fragrance and packaging solution, helping to create products that stand out in a competitive market. Whether you're launching a new scent or refreshing an existing line, our expertise ensures your products are beautifully crafted and ready for retail.

Explore our range today and experience the seamless combination of scent and style.

PRINTING & DECORATION

THE FINISHING TOUCHES

BodyPak offers an extensive range of high quality decoration services that will enable you to create the perfect livery for your packaging. Depending on component and production method, a variety of processes are available.

Periphery Foil Banding

This process has been expertly developed in house giving us the ability to decorate right to the edge of the closure or jar. Quality foil banding can really elevate the elegance levels of a plain closure.

Hot Foil Stamping

This process offers either silver or gold foil decoration to bottles and flexible tubes, providing a quality appearance and enhanced branding.

Shrink Sleeving

Creating full wrap around decoration of bottles, jars and tubs by the use of a printed film that is shrunk over the component. This is an option when components are of irregular shape or have limited flat areas.

Silk Screen Printing

Silk screen printing offers bespoke artwork decoration directly onto the component. Bottles of round and non-round shape can be supplied with up to 4-pass decoration, and flexible tubes up to 7 colours.

Flexo Printing

Flexo printing offers enhanced decoration on flexible tubes with the option of up to 11 colours, providing almost photo-realistic imaging.

Dry Offset Printing

Dry offset printing offers bespoke artwork decoration directly onto flexible tubes. Tubes can be supplied with up to 9 colours and include a protective gloss or matte lacquer.

Pad Printing

Especially useful for closures and jars that have heavily contoured surfaces.

Labelling

High precision wrap-around, spot and base labels are perfectly suited for bottles and jars, often offering a more cost effective solution for smaller quantities.

Thermo Image Labelling

Perfect for complex multi coloured images that can also include foils. This is a popular method for the decoration of high volume jar lines. More suited to complex multi coloured designs than conventional silk screen printing.

Foil Induction Heat Seals

Available with a one pass print these aluminium seals are specially pre applied to our unique flip top jar closures. They create a tamper evident and air tight seal when used on our flip top jars.

HELPING OUR CUSTOMERS GROW

Here at BodyPak we enjoy helping our customers and find it rewarding to work with them as a business partner, actively taking an interest in their brand development and growth. Supplying a great packaging service is our core focus, however we have also helped our customers and suppliers in some amazing ways over the years, such as:

- Introducing the UK's number one skincare brand into the US market place and helping manage their brand development state-side. This resulted in an eventual sale to Unilever.
- Designing, manufacturing and supplying bespoke automated closing equipment for a customer's filling line to help them improve line speeds with our patented Flip Top Jar system.
- Moving bottle and print production for a full range of packaging from Europe to the USA to reduce our client's lead times, carbon footprint and be closer to their core market.
- Helping a US customer launch their Nielsen No. 1 Acne device into Boots stores in the UK.
- During the Covid pandemic we bought and supplied portable Oxygen machines to our partner factory in India as they could not acquire these domestically.
- Creating new skincare products with our clients using patented INCI from our business partner and master Dermatologist Dr. Raymond Park.

This reflects our culture at BodyPak: we don't like to say "no." We prefer to be helpful, supportive, and solution-focused. Our instinct is to find ways to say "yes," to collaborate, and to make things happen - always aiming to be a positive, reliable presence for both our team and customers.

We have had several customers start with orders for 5,000 units then - with time, effort and skill - they have come back to us to order millions of units. Every business measures success differently but for me personally, sharing this journey with our customers and playing a small part in their successful growth is really satisfying.

I am extremely proud of the people we have at BodyPak and we will always do our best to provide you with the packaging guidance and support you need to help your business grow. Maintaining our flexibility will always be key to help our customers navigate any challenges ahead.

We are passionate about packaging and look forward to the opportunity of helping you with your future requirements.

As the founder and CEO of a fast-growing business, we were always looking for suppliers who could work with us as part of our extended team, so when Childs Farm had a surge in sales following a viral Facebook post we looked to all of our suppliers to help. And help they did, with BodyPak supplying lids - even different colours when we were desperate! - round the clock to keep our order flow going. Their willingness to put on extra shifts and work crazy hours to support our overnight success embedded our two-way loyalty, and both businesses grew together over the years. And remain together.

 **Joanna Jensen**
Founder, Childs Farm

BodyPak has been a trusted supplier to E.T. Browne for over 15 years. Sam Oliver and his team do not merely sell high quality packaging components; they solve our packaging challenges with unique, timely, and innovative solutions. Be it a simple disc top cap or an entire new package design, BodyPak is always up to the challenge, delivering what we need, when we need it with the quality that our products demand.

 **Bruce Corini**
Vice President - Purchasing, E.T. Browne

Over the past two years, we have had the pleasure of working with BodyPak and they have exceeded our expectations on every level. Their costs are competitive without ever compromising on quality. Lead times are consistently reliable, ensuring we always meet our deadlines. The quality of their packaging is outstanding and their team provides excellent service, going above and beyond to accommodate our needs. On top of that, they are incredibly friendly and approachable, making every interaction a breeze. We couldn't recommend BodyPak highly enough for anyone in need of a dependable and professional packaging partner!

 **Timothy Bishop**
Managing Director, TNI Consulting Ltd.

We have been working with BodyPak for the past 3 years, and we couldn't be happier with their exceptional service and the quality of products we have launched together. From the very beginning they understood my brand's vision and ensured that everything aligned perfectly with my expectations. They are incredibly reliable and have consistently met targets, even when faced with tight deadlines so I've always felt confident knowing that my packaging orders are in capable hands. When it comes to the quality of the packaging itself, materials and design have been flawless, and our final products have always looked and performed exactly as designed: polished and premium. If you're looking for a packaging supplier who combines excellent customer service, superior quality and a commitment, BodyPak truly is a standout in the industry!

Fiona Toomey
Founder & CEO, Nadaya

We have used BodyPak as a core packaging supplier for over 15 years, they are easy to deal with and offer a lot of flexibility on stock holding and call-offs which is very helpful to us as a manufacturer.

Christian Cain
CEO, Inline Health & Beauty Ltd.

I have enjoyed working with the team at BodyPak in recent years and we appreciate their positive attitude towards new product development. They have supported us really well on several custom projects recently and they just make it very easy to do business together.

Colin Okell
Technical Manager Packaging, SLG Brands

Working with BodyPak on our recent packaging projects has been a genuinely positive experience from start to finish. Their team brought a high level of expertise and attention to detail, helping us develop a custom 250ml tubular bottle that perfectly complemented our customer's brand. The design was tailored in-house to suit our preferred double wall disc top cap, with new tooling managed smoothly and efficiently. BodyPak also coordinated precise colour matching and print to meet our customer's exact brand requirements. The final result is a standout pack that has been well received by consumers and stands out on the shelf. We look forward to continuing our partnership with BodyPak and collaborating on future packaging projects.

Mark Sutherland
Purchasing Manager, Cosmarida

I have enjoyed working with BodyPak for the last 15 years and during this time they have developed and grown into one of our go-to packaging suppliers. They offer us an extensive range of components and their team has a lot of expertise in the area of business that we operate in. They are easy to deal with and continue to offer us a flexible and competitive service that we remain very happy with. I would comfortably recommend BodyPak to manufacturers and brands looking for a professional and approachable partner for their next packaging project.

Rob Forster
Supply Chain Director, P&M Innovations Ltd.

DCS Manufacturing Ltd have had the pleasure of working with BodyPak over recent years. Their team is professional, responsive, and proactive, and we have been able to work together bringing new, custom designed products to market with collaboration on new tooling costs and BodyPak's expertise. We look forward to continuing our partnership.

Nicola Norbury
