Explore Our

Gold Range High Storage Units

Our Gold Range units are constructed using high-quality insulated composite panels, featuring a minimum of 40mm insulation in both the roof and walls. These panels are built to withstand a variety of weather conditions, thanks to their durable PVC-coated exterior, providing long-lasting climate protection. Inside, the walls and roof are finished with a smooth, white metal surface that is easy to clean. These units are highly effective at retaining heat once heated. **For optimal dry storage conditions, we recommend heating all Gold Range units.**

Key FEATURES

- Choose from **40mm** or **80mm** insulated composite panels in both roof and wall structures.
- White metal interior wall finish.
- 100mm Heavy duty fully galvanised CE certified steel framework.
- Pre-fabricated roof & wall panels for easy site installation.

2 AVAILABLE OPTIONS

- 40mm or 80mm Horizontal Flat Panel Cladding.
- From 40mm up to 120mm Vertical Box Profile Cladding.
