

A life-time of Replicating the ART of NATURE

Natureworks

Creating Natural Magic

Artificial Trees & Habitats

Tree Sculptures

Natureworks has built over 1,000 artificial trees and palms in the last 4 decades.

It has developed a reputation for building the most sculptural and largest artificial trees in the world (see the tree of life in Seoul Korea).

Our artificial trees can be designed in different materials to fulfil many different designs requirements.

In this ever increasing concrete jungle we live in do you wonder how to bring the outside in.

When you visit your local aged-care facility seeing a relative, or at the local kindergarten dropping off your children, maybe ask yourself the question:

"Can I change this space for the better?"

Yes Natureworks can provide a beautiful themed area that everyone can enjoy! Whilst also raising the profile of a business, and making a big impact for potential clients. - Get passionate about nature!

ENVIRONMENTAL CENTRES

Habitat Tree display -
Natures Boarding House

Osprey House - Brisbane

This habitat tree is a showcase for educating the public about the value of forests, woodlands, and the bush to provide a place for many species of wildlife to thrive. The valued natural structure may offer a place for foraging, temperature regulation, protection from predators, nesting and a place to raise young.

ENVIRONMENTAL CENTRES

Eucalypt, Sclerophyll, Bloodwood & Tea Trees - Ipswich City Council Environmental Centre

4 Various Artificial Trees, animals and mural backdrop

From the outset we wanted to highlight the four main habitats surrounding the Ipswich area, and individually present the wildlife that most commonly occurs in each of the four habitats, which included Eucalypt, Sclerophyll, bloodwoods and Tea tree.

The trees were manufactured with a foam core encapsulated with fibre-glass, texturing was done with mats and the final look achieved with painted undercoats and dry brush finishes. The first being the Blue Gum forests, these forest tend towards drying out, with mixed understory from green pick to dry grasses and

leaf litter, the trees were dressed out using artificial foliage suggestive of the species and the foreground was a mix of real rocks, artificial rocks, and dry and green artificial foliage.

Second is the She Oak- wet sclerophyll section, similar in construction to the Blue Gum area but with a greater concentration of greenery typical of light rainforests, the Turkey mound was mounded to shape and amassed with leaf litter. Next is the Bloodwood forest, as a much more heavily wooded area more logs and rocks were introduced in this section, included were the native grass tree and cycads.

The final habitat is the Wetland Tea tree swamp, a continuation of the reeds in the mural extended forward into the 3D foreground with rocks forming the border, the paper bark (Tea tree) was unique in so much as the texture was achieved with the use of real paper bark preserved and fixed to replicate a real trunk.

Each of the habitats were modelled into a cement sub-straight designed to make unauthorised removal quite difficult.

EXHIBITS

Wellington Te Papa Museum New Zealand -
Coconut Palm Trees

Artificial Palms

Natureworks makes a range of artificial palm trees for use in situations where maintaining living palms is not an option.

In shopping centres, Office foyers and public spaces. Natureworks palms have provided architects and interior designers with the ability to create a forest without the maintenance issues associated with live planted trees.

Natureworks animals can compliment various outdoor and indoor settings.

Tree & Rock Work - Custom Designed for Bankstown Sports Club

“It is its own whole world inside the sports club; there is a rain forest with brooks and streams and ferns and moss, and a Tuscan village, complete with cobblestones and drying washing from the high verandah window. In the cafe, while having breakfast, an elephant can be heard trumpeting”.

The traditional “fake” sandstone was all built in hard coated foam and sand finished as the entry to a Victorian Railway Station restaurant.

RESTAURANTS

Smorgys Restaurant - Melbourne

Smorgys at Plenty Rd Dundoora as one of for themed restaurants in Victoria.

View from inside looking out

Tropical Landscape Life size Moais & Exploding Volcano

Natureworks was commissioned in 1996 to theme 4 separate Smorgys restaurants. They are in Ringwood, Burwood, Plenty Rd, Dundoora and Geelong for the Schwaiger family who later sold all four restaurants for \$120 million dollars.

The family commissioned Natureworks to design and build the 1 Million exploding volcano entry feature at Dundoora. Every half hour the volcano erupted as part of an animated show which blew the socks off diners within the restaurants seated over 1,000 people.

"Each restaurant has its own spectacular special effects show, there is the active volcano at Bundoora (the spectacular erupting volcano lights the night sky against the backdrop of the city skyline), the water garden at Ringwood, the musical fountain and, the waterwheel at East Burwood and of course the superb Salty the Seal and King Neptune shows as well as the giant marine aquarium at Cunningham Pier, Geelong." Large waterfalls and rainforests with creeks and pools enrich the dining experience."

SHOPPING CENTRES

Tree of Life - Sopoong, Seoul, Sth Korea

This tree was built at a cost of 1.7 million dollars in 2008 by a team from Natureworks. The trunk was built on site, but the branches were prefabricated at the Highvale studios in Samford, Australia and shipped in 10 x 40ft containers to site.

The clients' intent was to lay claim to building the largest artificial tree in the world. It is over 11 metres in diameter at the base, through which the public can walk and the diameter where it "breaks through" the ceiling is still 6 metres wide.

This tree rises through 6 levels of a shopping mall in Sopoong in Seoul, South Korea.

Custom Made TREES

Unique and natural-looking artificial trees

Natureworks natural-looking specimen trees are our speciality. Our attention to detail - replicating even the smallest facet and imitating nature's complex wonders add to the final extraordinarily real appearance. We select from a variety of real woods to create unique finish that will last for years.

Our skilled designers and architects can create your dream

environment. our creative services go far beyond artificial trees to whole exhibits and habitats.

We are continually servicing the market for custom trees inside childcare centres and public spaces.

This catalogue shows a selection of trees we have developed over 40 years. The trees vary

enormously in their complexity and size as shown in this catalogue.

Our team can provide guidance and sketches that will look great and be practical in the space required.

Send us a photo or sketch of a style of tree you are interested in, and we can custom construct it per your specifications.

Theming for indoor and outdoor

Turn your kids on to the magic of the Natural World!

In a world of concrete and electronics, many children are being "protected" from the smell of the bush, and the beauty of the natural world and grow up with little connection or interest in the wildlife which surrounds us.

At Natureworks we are constantly producing child friendly animal art as climb on and decorative elements to create and enhance magical spaces for backyards, childcare and shopping centres, schools and council playgrounds.

Apart from the cute and realistic life-size and larger than life animal characters, Natureworks has a "library" of 3D nature-based furniture items, including, rocks,

logs, mushrooms, trees and tree slides, giant flowers, dinosaur bones, fossil digs, dinotopia characters, giant turtle and snail shells and friendly frogs.

We have a spectacular mushroom cubby house and we are in the process of building a series of large magical fairy houses big enough for small groups of children.

We are also just completing a series of Australian bird and mammal saddled creatures, including emu, koala, kangaroo, echidna wombat and sea-lion which will be a great addition to children's play areas.
