YOUR PARTNER FOR COATINGS, PLASTICS & POLYMERS

INTRODUCTION

Our partner **DL Group (DAELIM)** is offering products from several companies within their group of subsidiaries.

UlsanPP Co. Ltd. which is covering the area of Polypropylene and a yearly production capacity of around 400.000 tons per year based on 1 line with the well known LyondellBasell Spheripol process, based in Ulsan, Korea. The commercial operation started already in April 2021. This production is a joint venture of DL Chemicals and LyondellBasell. The feedstock is based on LPG (PDH).

PolyMirae Co., Ltd. is also covering the Polypropylene market with a yearly production capacity of around 700.000 tons based on 4 lines and is also using the LyondellBasell Spheripol process. This plant is located in Yeosu, Korea and became fully operational in September 2000. The feedstock is based on Naphtha.

DL Chemical has achieved a leading position in the industry by developing metallocene polyethylene manufacturing techniques for the first time in Korea. This plant has four plants with two types of process Chevron Phillips Process and LyondellBasell Sherlene Process with 700.000 tons capacity of PE.

POLYOLEFIN ELASTOMER (POE)

For the first time in Korea, DL Chemical developed its Metallocene catalyst technology independently and commercialized Metallocene polyethylene products.

The VL series – Metallocene POE (PolyOlefin Elastomer) is a high performance polyolefin elastomer suitable for a wide range of applications, such as films, plastic modification, foaming, etc. The VL series is having a uniform comonomer distribution and narrow molecular weight distribution, making them different from general polyethylene products in terms of their mechanical and optical properties.

DL Chemical recently developed POE grades used for a Photovoltaic Encapsulant film. This product is supplied to large global Encapsulant end users, ensuring excellent quality.

Item	Contents
Characteristics	Excellent balance of toughness and stiffness Low TVOC and odor
Application	PP Compound for Automotive Wire & Cable Compound Foam for shoe sole
Processing condition	Processing Temperature ~250 °C
Specification	Complies with FDA 21 CFR 177.1520

Basic Properties	Unit	Test Method	VL8801	VL8803	VL8805
Density	g/cm ³	ASTM D1505	0.885	0.885	0.885

POLYOLEFIN ELASTOMER (POE)

PHOTOVOLTAIC
ENCAPSULANT

DESCRIPTION

Characteristics	Excellent Crosslinking Rate
	Excellent Volume Resistivity and WVTR
	Good Weatherability and Glass Adhesion
	Good Transmittance
Application	Photovoltaic Module Encapsulant
Specification	FDA 21 CFR 177.1520

PROPERTIES

Basic Properties	Unit	Test Method	PK0588	PK1088
Density	g/cm ³	ASTM D1505	0.885	0.885
Melt Index (190 °C, 2.16 kg)	g/10min	ASTM D1238	5.0	10.0
Vicat Softening Temperature	°C	ASTM D1525	52	49
Molecular Weight (MW)	g/mol	DL Method	68	82

Additives ¹	-	-	AO	AO

Sheet Properties ²	Unit	Test Method	PK0588	PK1088
Tensile Strength at Break	MPa	ASTM D638	15	8
Elongation at Break	%	ASTM D638	>800	>800
Flexural Modulus	MPa	ASTM D790	29	31
Hardness (Shore A)	-	ASTM D2240	80	80

2) Compression Molding Sheet Data. These are typical properties only and are not to be construed as specifications.

PK0588 – WELL-BALANCED MATERIAL

Excellent Crosslinking Rate

PK1088 shows a better crosslinking rate than counterparts of competitors.

- Improvement of PV module productivity compared to other POE

Excellent Volume Resistivity

PK10588 has an excellent volume resistivity.

- Increase in PV efficiency by low PID (Potential-Induced Degradation)

Good Weatherability/Glass Adhesion/WVTR

PK10588 has good weatherability, glass adhesion and WVTR characteristics for PV encapsulant.

Properties			Reference (C4 POE)	PK0588
Crosslinking Rate (Gel Content)		%	15	8
Basic Properties	Transmittance (380 ~ 1,100 nm)	%	>800	>800
	WVTR	g/m ² 24h	29	31
	Volume Resistivity	Ω·cm	29	29
Glass Adhesion (Initial)		N/cm	29	29
Weatherability (85 °C/85% Rh/40days)		ΔYI	80	80

PK1088 – BEST SOLUTION FOR EPE FILM

Excellent WVTR

PK10588 has excellent WVTR characteristics for PV encapsulant.

- Reduce Thickness of POE layer over 20%

Excellent Crosslinking Rate

PK1088 shows a better crosslinking rate than counterparts of competitors.

- Improvement of PV module productivity compared to other POE

Excellent Volume Resistivity

PK10588 has an excellent volume resistivity.

- Increase in PV efficiency by low PID (Potential-Induced Degradation)

Good Weatherability/Glass Adhesion

PK10588 has good weatherability and glass adhesion for PV encapsulant.

Properties			Reference (C4 POE)	PK1588
Crosslinking Rate (Gel Content)		%	75	77
Basic Properties	Transmittance (380 ~ 1,100 nm)	%	91	91
	WVTR	g/m ² 24h	<5	<4
	Volume Resistivity	Ω·cm	9*10 ¹⁶	2*10 ¹⁷
Glass Adhesion (Initial)		N/cm	>200	>200
Weatherability (85 °C/85% Rh/40days)		ΔYI	<3	<3

ULTRA-HIGH MOLECULAR WEIGHT POLYETHYLENE (UHMW-PE)

Our **Ultra-High Molecular Weight PE** is available in the range of 2 ~ 9 million g/mol and is composed of ultra-long linear molecule chains which are enhancing intermolecular interactions. It is used due to its unique properties in various applications such as Industrial machinery, food processing, material handling, automotive industry and medical devices. Another application is the electrical industry, where it is used in insulating components and wiring due to its dielectric properties and resistance to electrical breakdown. In the Construction area UHMW-PE is used for construction equipment components like dump truck liners, crane outrigger pads, and formwork due to its durability and resistance to impact.

These properties are offering:

- Excellent wear resistance and durability
- Low friction coefficient (Good sliding)
- Good impact strength (Non break)
- Excellent chemical resistance
- Wide usable temperature range (-270 °C ~ 80 °C)
- Tiny water absorption (Almost "0")
- Excellent electrical insulation
- Shock and noise absorption

Compliance with international standards:

- EU RoHS (Restriction of hazardous substances) directive
- U.S. Food Contact Substances regulations

CYCLO-PENTANE (CP)

Cyclo-Pentane is a hydrocarbon with 5 carbon atoms and is a colorless volatile liquid with strong flammability. This is a Polyurethane foaming agent used in insulation materials for refrigerators, refrigeration facilities, and construction materials. We provide a stable supply of Cyclo-Pentane produced by Yeochun NCC (YNCC), a joint venture of DAELIM Group and Asia's No. 1 Naphtha Cracker.

AMORPHOUS POLY ALPHA OLEFIN (APAO)

D-REX Polymer is a JV company between DL Chemical and REXtac, capable of satisfying a wide range of applications and adhesive needs in the market. D-REX Polymer's plant, with a capacity of 40,000 MTA, manufactures APAO products from Yeosu petrochemical Complex in South Korea, equipped with state-of-the-art Rextac technology.

Benefits for Adhesives:

- Excellent adhesion and hot tack properties
- Bonding to various substrates
- Fiber & nonwovens (personal hygiene)
- PE&PP
- Polyurethane foam
- Paper & corrugated cardboard

Good Chemical & Physical Properties:

- Low odor and low VOCs APAO
- Both high and low heat resistance
- Good thermal properties & oxidation stability
- Compatibility with other substrates
- Excellent electrical insulating properties

OUR COMMITMENT TO SUSTAINABILITY

We take responsibility for our actions as part of our promise to care for both people and the environment. Our sustainability targets focus on crucial issues such as safety, health and environmental protection, resource efficiency and legal compliance. We are proud on the passion of our employees for the topic of sustainability and provide full management support. As a consequence, a dedicated sustainability task force was put in place with the goal to define yearly targets incl. corresponding assessment tool, to build a comprehensive report and to transfer it into the daily HARKE business processes, company culture and interfaces with our partners. Let's further grow sustainability together!

Compliance

Legal compliance is a foundation for our activities. In order to meet the requirements of relevant legislation, we have established a long-standing team of experts in various fields (e.g. REACH, GHS/CLP, Dangerous Good Transport, regulations related to Biocidal, Detergent, Cosmetic, Pharmaceutical and Food products). Through intensive training of our employees, we ensure careful, safe and responsible handling of our products to protect people and the environment. We support both our customers and suppliers in implementing these regulations to ensure safe and compliant handling of our products along the entire supply chain.

Quality

The continuous improvement of the quality of our products, services and processes is an essential part of our corporate policy. We aim to not only meet but also exceed the expectations of our partners. We have implemented and certified quality management systems in all relevant areas:

DIN EN ISO 9001
Basic of our
quality management

**DE-ÖKO-039
(EU/non-EU Agriculture)**
Raw materials from
organic farming

Responsible Care
Responsible handling of chemicals
beyond legal requirements

IFS-HPC2-Certification
High quality requirements
in production mean safe
products for the consumer

HARKE Chemicals GmbH

Responsibility

We take responsibility for our actions as part of our promise to care for both people and the environment. For more than 20 years we have been actively participating in the Responsible Care Initiative supported by VCH, FECC and ICTA in the areas of product responsibility, plant safety, occupational health and safety, environmental protection, transport safety and dialogue with the public. Furthermore we are committed to the FECC Ethical and Business Principals.
