The Natural Skin Care Authority

Skin Care Trusted for GENERATIONS

Founded nearly five decades ago, Reviva Labs continues to be independently owned and operated as a close-knit family. Inside our walls, working side-by-side, you'll find extended families helping to craft our natural skin care.

Stephen and Judith Strassler wanted to create great natural skin care at affordable pricing – free from harmful ingredients and without testing on animals. We continue to adhere to their principles and traditions, and this is why natural skin care lovers and resellers alike respect and trust Reviva Labs.

NOTE: Due to natural origins of some ingredients used in our products the color, feel, and scent may vary. Also, because we're always improving our formulas, the product packaging you receive may contain additional details or may differ from what is shown in this catalog or on our website.

Skin Care to...

PREPARE
PREVENT
CORRECT
ENHANCE

Historically, Reviva's products were sold a la carte, and consumers mixed and matched.

But it took some savvy and experience to be able to navigate the breadth of Reviva's offerings. So, beginning in 2017, Reviva re-categorized its product offerings around eight primary skin concerns: Anti-Aging, Brightening, Defense, Firming, Hydrating, Restoring, Revitalizing, and Specialty.

Unexpectedly, the eight categories helped end the confusion of choosing from our fifty plus products but led instead to consumers corraling themselves within a category.

Hence, Reviva is again re-categorizing our products to align with basic core skin care tenets, accentuating our emphasis on functional treatment and efficacy.

Introducing skin care to: Prepare, Prevent, Correct, and Enhance.

Skin care spot treatments and easy routines at the ready

We're confident even those new to Reviva Labs' Natural Skin Care line will find it easier to craft a simple skin care regimen by selecting from our newest categories. But

don't worry, our old categories still remain accessible – alongside more traditional product type classifications (creams, serums, etc.) as well. So, no matter how you prefer to browse and build your skin care portfolio, Reviva will accommodate your desires and needs. And if you're still having trouble tailoring the best set of products, simply reach out to one of our skin care professionals for a quick bit of guidance. We're here to help your complexion look young, healthy, and beautiful.

Skin Care to PREPARE

Preparation is half the battle - so, get your skin ready to absorb the ultimate benefits every day...

Great skin care needs to absorb well to be effective. Remove dead skin cells and other debris to prepare your skin for better results. Reviva Labs has everything you need to prepare your skin to maximize the benefits of your follow-up treatments. It's why professionals and skin care enthusiasts have fallen in love with our products over the past five decades.

Delivering innovation for 5 decades

WE INTRODUCED EXFOLIATION TO U.S.A.

It seems to be common sense today, but back when Reviva began, exfoliation was a "favored practice" we imported from Europe when we introduced our Light Skin Peel. It wasn't until years later that cosmetic giants introduced similar products.

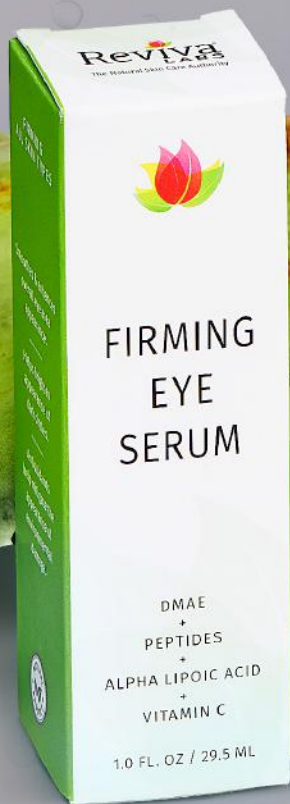

AMERICA DISCOVERED ELASTIN BECAUSE OF US

Through our skin care salons and health food stores – we introduced our unique, super refined elastin. It quickly became popular and again found its way into the industry – after we extolled its benefits.

WE ELIMINATED ANIMAL TESTING WAY BACK IN 1973

Long before anyone protested or thought about the poor animals being subjected to awful testing procedures – Reviva Labs devised alternative testing procedures. We opted to build relationships with salons and spas who provided real-world feedback.

Skin Care to ENHANCE

Enhance your natural beauty by adding a few selective products to your daily skin regimen...

Focus potent, targeted treatments on your most worrisome problem areas. Or enjoy a quick pick-me-up product for an evening enhancement. Reviva's effective natural skin care produces visible results to boost your already beautiful complexion.
