MAKE SMARTER, MORE INFORMED CLINICAL DECISIONS.

PATIENT MONITORING

Whether you are monitoring patients remotely or at the bedside, you'll find the necessary patient monitoring devices and equipment here. Explore continuous monitoring, remote patient monitoring and vital signs monitoring solutions that you can implement in your hospital today.

Meet the Welch Allyn Connex[®] Spot Monitor

It's easy to use and supports comprehensive bedside monitoring-from routine vital signs acquisition to early warning scoring and interval monitoring. And we can integrate with your EMR, giving your care teams immediate access to critical information-when and where they need it.

DESIGNED WITH PATIENT OUTCOMES IN MIND.

- 1 Customized features help clinicians identify and respond to signs of patient deterioration sooner.
- 2 Vital signs and other patient health data points are sent directly to the EMR to help reduce errors and omissions.
- 3 Industry-leading technologies support and produce readings you can rely on.

Configurable design allows you to customise the monitor to the needs of your clinic.

Our guides and features allow you to customize and standardize your workflows.

- Select from six customizable Early Warning Score protocols (eg. MEWS, PEWS, NEWS2) to help detect patient deterioration.
- Large color touchscreen and single sign on capability simplifies training and operation
- Manually enter weight, height, respiration rate, pain level and document modifiers, like body position and O₂ therapy
- Spot-check respiration measurement with the Masimo[®] iRRp technology
- Our SureBP[®] technology captures BP readings on inflation in about 15-seconds
- Select Masimo[®], Nellcor[®] or Nonin[®] SpO₂
- Choose Braun ThermoScan PRO 6000 ear or SureTemp Plus oral/axillary/rectal thermometry
- Works with a wide range of cuffs to screen adult, pediatric and neonatal patients

VISUALLY ASSESSING RESPIRATION RATE? GO DIGITAL.

Digitally spot-check a patient's respiration rate without changing your workflow. Acquire accurate, connected readings at the fingertip helping your team reduce transcription errors and detect signs of deterioration.

Secure your network and patient health data

If data security is your top concern, we have you covered. When you equip your Connex Spot Monitor with Welch Allyn EMR connectivity solutions, we align with your network security protocols to help you protect your patients and infrastructure.

- FIPS-approved encryption of transmitted data with device and server authentication
- Digitally signed software images and configuration files protect devices from unauthorized changes
- Single sign-on compatibility, including Imprivata, supports quick, secure logins
- Screen lock feature protects idle devices from unauthorized access
- Patient data is automatically deleted after it's sent to the EMR and cleared from the device

DOD RMF  APPROVED 

Welch Allyn Green Series - 777 Integrated Wall Systems & Transformers

The diagnostic tools you need to maximize productivity as you capture patient in-take and vital signs — within arm's reach.

Welch Allyn Green Series 777 Integrated Wall Systems and Transformers can help you stay efficient during your examinations. Choose our wide-view PanOptic Plus Ophthalmoscope and MacroView Plus Otoscope, digital or manual blood pressure devices and integrated or stand-alone oral/axillary/rectal thermometry with a Welch Allyn SureTemp Plus Thermometer.

Choose wide-view, digitally-capable devices or standard heads.

Turns on automatically when handle is removed from cradle and turns off when you return it.

Minimize cross-contamination risk and dispense a new disposable ear tip with each exam.

Choose a stand-alone BP device and Thermometer or order a compatible Welch Allyn multi-parameter vital signs monitor.

- Easy to upgrade devices from the Welch Allyn 767-series to the 777 Integrated Wall System
- Automatic on/off sensors help conserve energy
- Handle-based rheostats for quick light intensity adjustments
- Modular coiled cords designed to withstand daily use

Otoscope

PANOPTIC PLUS OPHTHALMOSCOPE

- Re-designed with a familiar form factor
- Long-lasting LED illumination
- QuickEye™ alignment technology helps you direct the patient's gaze for better optic disc alignment

MACROVIEW PLUS OTOSCOPE

- Focus-free design
- Long-lasting LED illumination
- For brighter views, pair with new Welch Allyn LumiView™
- Clear Single-Use Ear Specula

SWITCH FROM OPTICAL TO DIGITAL

Our MacroView Plus otoscope lets you move from an optical exam to digital in a few clicks, expanding your capabilities. Through our free iExaminer Pro App, save and share ear images for tracking, trending and easy consultations with specialists.

CLEARING THE PATH TO BRIGHTER VIEWS

Our new LumiView™ clear ear speculum is one of a kind, with 4X brightness through an adult speculum when compared to a black speculum. Plus, it's backwards compatible to work universally on all Welch Allyn otoscopes.

MORE ACCURACY WITH NEW QUICKKEY ALIGNMENT FEATURE

The PanOptic Plus Ophthalmoscope features two lights on the patient side. These help you direct and guide the patient's gaze, for faster, easier exams from better alignment with the optic disc.

CP 150™ Electrocardiograph with Optional Spirometry

Simple. Fast. Connected.

Help your practice run more efficiently with the Welch Allyn CP 150 Resting ECG—now with optional wireless capability. **Simple, streamlined ECG testing designed to help you improve workflows and get more from your investments.** The CP 150 combines the best traditional box ECG features (e.g., full-size printouts and clinical decision support with MEANS interpretation) with connectivity enhancements designed especially for today's primary care practices.

CONNECTIVITY OPTIONS TAILORED TO ENHANCE YOUR PRACTICE'S WORKFLOW EFFICIENCY

Wireless connectivity increases device mobility and utilization

- Wireless connectivity through an integrated 802.11 radio
- Share results immediately to put the data where you need it—in your EMR/CVIS/PACS—right away
- Meets globally accepted data encryption standards for enhanced patient information security

Send ECG results to:

NETWORK

(For import into EMR)

DICOM® image server
(EMR, CVIS, PACS)

Wireless PDF transfer to network folders

DICOM® conformance enhances interoperability with multiple DICOM-compatible platforms

- Bidirectional workflow with your EMR/CVIS¹ or PACS² without the middleware
- Reduce patient data re-entry by importing the DICOM modality workload
- Upgrade your existing CP 150 to make it DICOM compatible

DICOM is the registered trademark of the National Electrical Manufacturers Association for its standards publications relating to digital communications of medical information.

¹ Cardiovascular information system

² Picture archiving and communication system

SPIROMETRY OPTION

- Perform FVC and pre- and post-BD testing with automatic interpretation and reversibility analysis.
- Customize report formats and screen displays to fit your needs and workflow.
- Integrated ambient sensors can eliminate the need for the user to find and enter values temperature, pressure and humidity.
- Manage patients with COPD to help you maximize HEDIS scores.

WelchAllyn®

Welch Allyn-Green Series Medical Lighting™

Whiter, Brighter & Greener.

Exam and Procedure Lights designed to fit any medical environment.

Welch Allyn Green Series Medical Lights provide a brighter, whiter light and consume less energy than traditional halogen lights. See true tissue color within a well-defined lit field during an exam or procedure while also reducing your cost of ownership.

Whiter and Brighter, to improve patient exams.

- 5,500° K white light-emitting diodes (LEDs) as opposed to halogen, for a superior whiter, brighter light.
- Truer tissue color rendition and uniform spot—no dark or hot spots.
- Industry-leading lumen performance with up to 50,000 hours of life.
- Minimal heat dissipation for greater patient comfort and safety.

LED VS. HALOGEN

Greener, for a lower cost of ownership.

- No bulb replacement for cost savings and less waste.
- Lower energy consumption.
- Intensity controls for the GS 600 and GS 900 allow you to adjust light output based on your needs.

Designed to aid in infection control to help keep your patients safer.

- Touchless on/off controls to reduce your contact with the light.
- New ergonomic design that is easy to wipe clean.
- Reduce the chance of spreading nosocomial and zoonotic infections by using an optional sheath with each patient.

Touchless controls

WelchAllyn®

GS 300 General Exam Light

- Perfect combination of intense light output and cool operation
- Compact, rugged design
- Affordable price and exceptional performance
- Ideal for any in-office exam

GS 600 Minor Procedure Light

- Three LEDs
- Wider head, with a handle designed specifically for demanding conditions
- Delivers brilliant color and enhanced performance and accuracy
- Ideal for minor procedures and exams in any setting

GS 900 Procedure Light

- Six LEDs, combines outstanding durability, extraordinary maneuverability, and unparalleled spot quality
- Ceiling and wall mount options give the ability to maximize floor space and provide direct light—right where you need it
- Top-performing light for nearly every application, whether you are a neighborhood clinic or specialty practice
