# Terms and Conditions

## Prices

Listed prices supersede all previous lists in circulation. Prices are listed for the wholesale trade only as we sell strictly to professionals involved in the green industry. Prices are subject to change without notice and are F.O.B. Fenwick, Ontario.

## Terms

All pick-up and delivery orders are prepared on a cash basis, 30 day term is granted to those with established credit. Credit applications are available upon request and must be filled out at least one month prior to delivery or pick-up. A 2% per month (24% per annum) interest charge is applied to overdue accounts. Harmonized Sales Tax (HST) is charged on all orders except Quebec where GST will be charged. There will be a \$20.00 service charge for any cheques returned by the bank. Credit cards may be used if the payment is received within fifteen (15) days of delivery or pickup; we accept Visa & Mastercard.

## Pick-Up Orders

It is advised that you place your order in advance so that it may be processed and ready upon your arrival. We pride ourselves on timely and accurate service for our customers; please allow us the opportunity to do so. Our shipping yard is closed daily from 12:00 pm to 12:45 pm. No minimum order required.

## Delivery Orders & Packing

All prices are F.O.B. our nursery. Instead of angle stocking nursery product in trailers from floor to ceiling, we use a rolling cart system to prevent damage. For long distance loads we use wooden shelved racks specifically designed for one way trips. Plants are loaded on shelves and shrink wrapped to maintain quality in transit. This provides a quick and efficient way to unload product. Skids can be reused in the garden centre or returned to our nursery. Metal carts are to be returned to our nursery upon the completion of delivery. Lost carts will be charged to your account. Freight rates vary depending on the distance and the size of the order.

Please check with your sales rep to confirm delivery charges. You will be billed extra should the driver be at your dock longer than the time allotted. Freight companies customarily allow 1-1.5 hours free unloading time on part load trailers but charge \$50.00 per hour for additional time thereafter. When delivery is scheduled please have adequate staff ready to unload your order. All stock should be watered immediately upon receipt; plants can dry out/overheat during shipping.

## Guarantee and Return Policy

We guarantee stock to be in good condition upon leaving our yard. We hold ourselves responsible, on proper proof, to replace returned nursery stock or refund the original amount paid. We shall in no instance be liable for any sum greater than the amount paid or quantity received at the time of shipping.

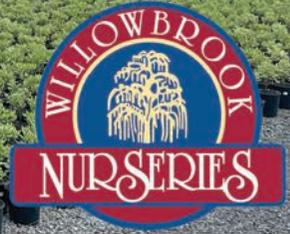

**All claims for shortages, overages, damage in transit, etc. must be clearly marked on the driver's copy of the delivery receipt and reported to Willowbrook Nurseries Inc. within 5 days from receipt of shipment. Claims that occur after shipment has been received (e.g. stock failing to grow) must be reported by email or phone as soon as the problem arise, but not later that 30 days after the shipment is received.**

## Order & Order Acknowledgments

Spring orders are processed on a first completed, first reserved basis. We retain the right to pro-rate items that are of short supply or special interest. It is our intent to benefit as many customers as possible. Please review your acknowledgments carefully to approve any changes that may have been made. Mail or fax a signed copy with any revisions indicated or call your sales rep to discuss necessary changes. Crops are subject to growing conditions, inventory changes, crop failures and seasonal sales activity. We acknowledge all orders upon receipt and do our best to notify you of any changes.

## Labels

Plants are shipped with a computer printed sticker, slip lock label and/or a price tag. Pre-pricing labels are offered at a nominal price.

Dear Friends and Customers:

I always seem to start my letters with “another year has passed and here we are”. And after a wild and unpredictable year, “here we are”. President Trump imposed tariffs on Canada this past year and it’s been a roller coaster. The impact has hit hard in some communities and not so much in other areas. That being said, the level of uncertainty is everywhere, and on everyone heading into the new year. We wiggled our way through the tariff hassles and found workable solutions that allowed us to buy and sell on both sides of the border.

On top of that, the weather in March, April and early May was terrible. Garden centre sales were dismal, and we had never seen such a long stretch of bad weather. Add on top of that the tariff situation and the atmosphere was quite moody. Garden centre sales were at an all-time low, and orders were being cut back.

In mid-April the weather finally broke and sales and shipping took off like a rocket. We put in a number of long shipping days as customers were needing their orders to be shipped as soon as possible. The May long weekend was perfect, and garden centres were reporting record sales. By mid-June, garden centres were catching up and even passing last years’ sales. That was incredible!

By July 1st the rain was shut off and we had one of the driest summers on record. It was a difficult challenge to keep our crops healthy and growing to keep production on schedule. It was a relief when the rains started again in the fall. The rains gave our nursery stock a tremendous boost and by the end of the growing season our crops were the best ever.

In September, Chris and I purchased a nearby 28-acre property with 8.5 acres of greenhouses. We are busy now making some essential upgrades to the greenhouse facility and outdoor container production. This addition will be a game changer for our perennial and flowering hydrangea programs. The increased production will be available this coming spring, meeting increased demand from our customers.

We continue to seek out the newest and greatest plant introductions to thrill our customers and provide them with a competitive edge in the market place.

The world seems to be crazy with wars in every part of the world and a society that appears to be falling apart. We take comfort in these words.....

For it is by grace you have been saved, through faith, and this is not from yourselves, it is the gift of God, not by works, so that no one can boast. Ephesians 2: 8-9

# Groundcover

# Guide

Groundcovers will spread about an inch per month; plant 6 inches apart and an area should be carpeted in 6 months.

## Spacing of Plants (Centre to centre)

Garden Space (Length X width)	4"	6"	8"	10"	12"	15"	18"	24"
25	225	100	57	36	25	16	11	6
50	450	200	114	72	50	32	22	12
75	675	300	170	108	75	48	33	19
100	900	400	227	143	100	64	44	25

An  
Example

Spacing the plants 6" apart on 50 square feet, meet at their intersecting points, 200 plants are needed for the space.

## To do your own math:

Figure out the area of space (length x width)

How many inches apart do you plant to plant?

Multiply the square footage by the multiplier (chart below) that coincides with the spacing.

An  
Example

8 foot by 8 foot garden space ( $8 \times 8 = 64$ )  
plant at 9" apart  
 $64 \times 1.8 = 115.2$  (115 plants are needed for the space)

Spacing Multiplier	9"	12"	15"	18"	24"	30"	36"
	1.8	1	0.64	0.44	0.25	0.16	0.11

# CLEMATIS CARE

IF YOU HAVE A SUNNY OR PART-SUNNY LOCATION, THEN YOU HAVE A PERFECT SPOT TO GROW ANY VARIETY OF CLEMATIS. BUT, IF YOU HAVE A SHADY LOCATION, CONSIDER A SPRING-BLOOMING VARIETY FOR BETTER BLOOMING. CLEMATIS' ROOTS SHOULD BE SHADED AND COOL WHILE ITS TOP GROWTH IS IN FULL SUN. YOU CAN DO THIS BY PLANTING IT BEHIND OTHER SHRUBS OR BY PLANTING BEDDING PLANTS IN FRONT OF YOUR CLEMATIS.

## GROUP 1 OR

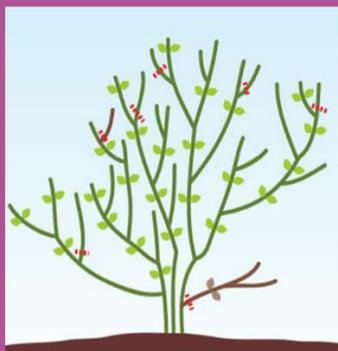

**A** REMOVE ALL DRIED UP BLOOMS AND DEAD, DAMAGED STEMS WHEN THE PLANT IS DONE FLOWERING FOR THE SEASON (SUMMER)

## GROUP 2 OR

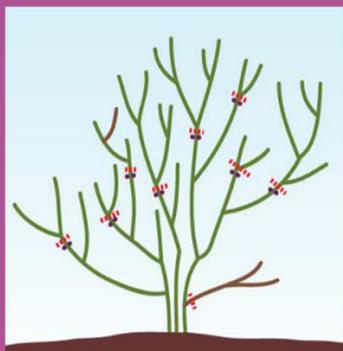

**B** A LIGHT PRUNE IN SPRING REMOVING DEAD OR DAMAGED STEMS BEFORE THE NEW GROWTH BEGINS AND TO HELP STRENGTHEN BUDS (FALL/WINTER)

## GROUP 3 OR

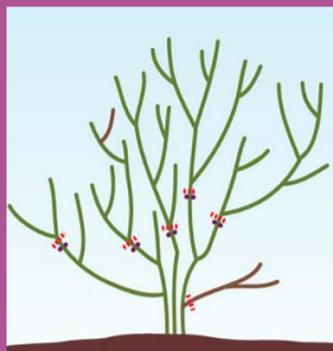

**C** A HARDY PRUNE IN SPRING REMOVING ALL THE PREVIOUS YEAR'S STEMS, CUT BACK TO 30" BEFORE NEW GROWTH BEGINS (WINTER/SPRING)

Variety Pollinated

# Fruit Bushes

Fruit bushes are perennials. Pick a spot with good soil and add organic material. Prune them back yearly, by cutting off old branches that no longer produce fruit and leave young growth to provide fresh fruit next season.

Most fruit bushes have the male and female parts for self pollination (except blueberry and honeyberry bushes, see chart below). Planting more fruit bushes for cross pollination is beneficial and may increase the size of the crop, even if they are self pollinators.

## NORTH POLE®

*Thuja occidentalis* 'Art Boe' PP#22,174; CBR#3912

Native species | Fast-growing | Narrow

	 Evergreen	USDA 3-8
	10-15' tall + 3-5' wide	

Bring structure and year-round color with North Pole® arborvitae, a fast-growing, narrow evergreen. Its dark green foliage and slim, dense form make it ideal for privacy screens and landscape accents, offering a more compact profile than 'Emerald Green.'

Available from Proven Winners® ColorChoice® growers - [www.provenwinners-shrubs.com](http://www.provenwinners-shrubs.com)

**Better Blooming  
Better Performance  
Better Availability**

### LAVENDER 'SUPERBLUE'

is better than Lavender 'Hidcote' because of bigger blooms and a better habit in the landscape.

### NEPETA JUNIOR WALKER™

is better than Nepeta 'Walker's Low' because of earlier blooming in the landscape and a better habit that won't lodge open.

### SALVIA 'BLUE BY YOU'

is better than Salvia May Night because of earlier blooming, better habit and more refushes throughout the season.

## "The Root Inoculate Landscape Professionals Rely On"

### What is Root Rescue Transplanter?

- A wettable powder providing essential root-stabilizing microbes to all transplants.
- Contains 18 species of Mycorrhizal Fungi and Biostimulants. CFIA Registered.
- Highly effective with 95% of landscape plants - including all Conifers and Trees.
- Peer-reviewed University of Guelph Field Trials show that Transplanter reduces Transplant Shock.
- The benefits last for the life of the plant - Once and Done - Tremendous Value!

### Who is using Transplanter Now?

#### LANDSCAPE CONTRACTORS:

- Easily applied as a Root Drench to control Transplant Shock - and the costs of replacing failed plants
- Costs less than 1% of the installed value of the plants to apply

#### LANDSCAPE ARCHITECTS:

- Include Root Rescue application in the Planting Spec. (NMS Planting Specs available on request)

#### ARBORISTS:

- Used in Vertical Mulching Backfill Media
- Applied to Mature Tree Roots damaged during Construction and Trenching
- Applied to the Roots exposed when Air-Spading Compacted Soils

#### TREE SPADE OPERATORS:

- The Wettable Powder is applied to the Cutline and then watered in after installation

#### MUNICIPALITIES AND OTHER LAND MANAGERS:

- A growing list of municipalities now Specify that Root Rescue be applied with all Street Tree Plantings

#### GROWERS:

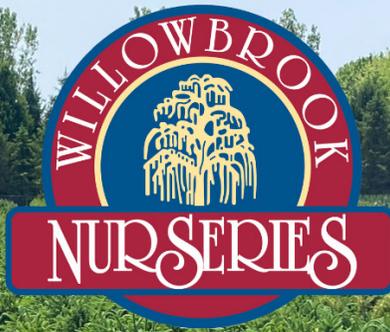

- Bare-Root trees or plugs are dipped while lining-out stock.
