Premium Audit

CopperPoint utilizes the following audit methods, depending on complexity of the business operations:

Voluntary Audit

Through CopperPoint's self-audit service, policyholders will receive a login to our secure Policy Web Interface (PWI). They can answer a few simple questions and upload the necessary information and documents. Alternatively, there is an option to use paper forms, which can be submitted by mail or fax.

For more complex policies or those with a higher Estimated Annual Premium (EAP), a phone audit may be required. A Premium Auditor or Vendor Partner will conduct a follow-up call to verify the information, request additional details if needed, and answer any questions.

Virtual/Physical Audit

This hybrid approach to auditing combines traditional methods with modern convenience. The Auditor reaches out via phone or email to request essential records, and the policyholder is then granted secure login credentials to our protected Policy Web Interface (PWI) for easy document uploads. For added flexibility, policyholders can also choose to send records through email, mail, or fax.

If required, your auditor may request a face-to-face meeting. During this visit, an experienced Field Premium Auditor or Vendor Partner will thoroughly examine all pertinent information, ensuring nothing is overlooked. This on-site review fosters clear communication and detailed understanding of the financial details involved.

Premium Audit

A CopperPoint staff audit or one of our audit vendor partners will contact policyholders within 15-20 days after the policy expires.

**For more information about an audit, contact
602.631.2300, 800.231.1363 or email
premiumaudit@copperpoint.com.**

Final audit disputes should be directed to
