## 1.5" Tall- Framing Jigs

Used for stair and rafter layout, rip guides, angle guides, and more. Taller profile ensures a solid, accurate hold. Fits material up to 5/16" thick.

## 3" Tall- Framing Jigs

Ideal for stair and rafter layout, rip guides, framing, squaring round or square tubing, and more. Taller profile ensures a solid hold. Dual slots and barrels add flexibility. Fits material up to 5/16" thick.

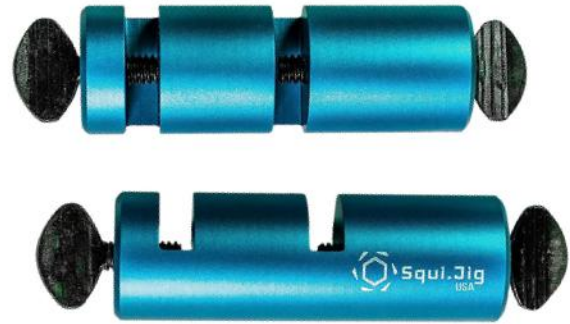

- Used for: stair gauges, stair layout, rafter layout, rip guide on your saw, angle guide on your speed square, and more!
- It gives an extremely solid and accurate hold on the workpiece.
- The taller profile extends down past any rounded edges for defects on your work piece, giving you a seriously accurate layout.
- Comes as a set, with 2 jigs and the screws. The slot is 5/16+" tall, fitting onto anything up to .32" (5/16") thick
- Made in the USA
