DOMAINLINK™
— ENTERPRISE —
A WORLD BLOCKCHAIN BANK INFRASTRUCTURE

WHY YOU ARE RECEIVING THIS

For more than thirty years the domain industry has competed to register domain names.

The next era belongs to organizations that **activate** them.

After four years of continuous development, **DomainLink™** has reached commercial readiness.

Rather than appointing multiple competing operators, we are evaluating the appointment of **one Global Commercial Steward**.

ONE ORGANIZATION.

ONE ECOSYSTEM.

ONE COMMERCIALIZATION STRATEGY.

DOMAINLINK™

— ENTERPRISE —

A WORLD BLOCKCHAIN BANK INFRASTRUCTURE

FOUR YEARS THEY DON'T HAVE

THE COMMERCIAL STEWARD DOES NOT LICENSE IDEAS.
THE COMMERCIAL STEWARD LICENSES TIME.

Since 2022...

Four years
of engineering

Four years
of testing

Four years
of refinement

Four years
of commercial
development

Executives don't
buy software.

Executives

OPEN LETTER TO EVERY REGISTRY OPERATOR

Dear Registry Operator,

The Internet is entering its next era.

For the first time, every domain can become a verifiable financial identity, an AI identity, a payment endpoint, and a programmable asset.

This is not a concept.

It is live. It is deployed. It is proven.

Through DomainLink™, WorldBankPay™, and our onchain registry infrastructure, we have built the systems required to support the next layer of Internet infrastructure—the Financial Identity Layer.

We are inviting a select group of registry operators to participate in the most important commercial stewardship appointment in Internet history.

This is not a partnership. This is not a vendor relationship.

This is a **confidential appointment** to commercialize a new layer of global infrastructure.

Why you were invited:

- You already operate trusted namespaces.
- You already understand scale.
- You already serve millions of customers.
- You already influence global digital commerce.
- Now, you have the chance to lead the next evolution of the Internet.

The appointment of the Global Commercial Steward will define who controls the financial identity layer for billions of users, millions of enterprises, and the entire AI economy.

This is your opportunity to lead—not follow.

If you choose to participate, our team will provide you with a private briefing and full access to the appointment process.

The future will be built.

The only question is who will lead it.

Respectfully,

Stephan Schurmann
