International Baccalaureate

Diploma Programme

W

“

Our IB Diploma Programme prepares students for elite academic success and it provides the specialist understanding needed to excel at the highest level”

Jonathan Barfield Moore, Deputy Head (Academic)

elcome

The International Baccalaureate Diploma (IB) is a two-year programme which provides an academically challenging and broad curriculum for well-motivated Sixth Form students. The IB requires the study of six subjects and the completion of core components: the 'Theory of Knowledge' course; an extended essay; and the 'Creativity, Action and Service' module. If you undertake the IB course, you will benefit from seeing what you learn from a global perspective in all your studies.

The IB Diploma is a distinguished qualification recognised by universities worldwide, and Brentwood School proudly sits among the top IB Schools in the UK.

In 2025, our IB Diploma students achieved an impressive 38-point average (with 45 being the maximum). Within the cohort, 28% scored 40 points or more, and 3 students scored the maximum 45 points – an achievement matched by only 0.3% of students worldwide.

One of our Mill Hill boarders, Sofia S, gained a place at the London School of Economics to study Law after achieving the maximum 45 points. Achinta K, another top scorer who served as Secretary General of the School's Model United Nations Society, is now reading Economics, Finance and Data Science at Imperial College.

Our students have also demonstrated great academic success while engaging with co-curricular activities. Chloe L, who achieved 41 points and a place to study Biomedical Science at the University of Bath, co-captained the School's Fencing Team alongside being a dedicated pianist, violinist and drummer. Additionally, Nicolás P, head of Hough boarding house, scored 36 points, and Cristina V-A, Deputy Head of School, scored 41 points and is now studying Politics, Psychology, Law and Economics in Amsterdam.

Further illustrating the international appeal of the IB Diploma, three of our boarding students are continuing their studies at prestigious universities overseas; Shuyi W earned a place at EHL Hospitality Business School in Lausanne, Switzerland, to study Hospitality Management; Irfan B is now at University in Sarajevo to study Medicine, and Joud E-W gained places at Melbourne and Hong Kong to study Mechanical Engineering.

We are incredibly proud of our students and pleased to see them take the diverse skills gained through the IB course into the world with them.

Hollie Carter
Director of IB

What makes us Brent

Brentwood School shines out as a beacon of excellence.

Academically, we sit comfortably alongside the best day and boarding schools in the country, and we enjoy an unparalleled local reputation. Our students are happy individuals who thrive on the high standards which are expected of them. They benefit from cutting-edge facilities set in the heart of Brentwood in Essex, and are surrounded by 75-acres of green playing fields and gardens. Our close proximity to London is especially appealing for international families looking to place their children in a safe UK location while remaining within easy reach of the capital.

We offer full and weekly boarding for 11 to 18-year-olds in a new state-of-the-art Boarding House, where experienced houseparents ensure the best possible care for all our boarders.

Founded in 1557, we take our heritage seriously. We are a Christian School with a chapel and a chaplain, and our School values, encapsulated in our motto "Virtue, Learning and Manners", have as much resonance today as they did when written in 1622. Our students are expected to have self-respect, to exhibit pride in their appearance, and to embrace values such as courtesy, consideration for others, kindness, looking after each other, honour, courage, sportsmanship, duty and selflessness.

Our vast and exciting co-curricular programme enjoys national prominence, and we focus on providing opportunities for all to participate, as well as the pursuit of excellence for the most able. Our Combined Cadet Force, which was established over 160 years ago, is one of the oldest and largest in the country. We also offer the Duke of Edinburgh's Award and Outdoor Learning to students who want to satisfy their taste for adventure, and a Voluntary Service in Action unit which raises tens of thousands of pounds every year to help specific charitable organisations.

akes twood

Our Sports Centre features a 25-metre swimming pool, glass-backed squash courts, a fencing salle, and a dance studio, with students achieving top sporting honours both nationally and internationally.

We are proud to be a Steinway School, enabling our students to learn on the very best-made pianos in the world, as well as some rare instruments otherwise unavailable to them. Our musicians have played in the National Youth Orchestra, and our actors have gained places in the National Youth Theatre, RADA and other top Drama schools.

Our students achieve excellent academic standards that rank among some of the best in the country. They work exceptionally hard and are supported by highly professional and inspiring teachers who offer dedicated Oxbridge mentoring.

In 2025, a strong set of A Level results saw 43.3% graded A* or A and a 100% pass rate. An impressive 82% of A Level results were graded A* – B, the School's best since the last major reform of A Levels a decade ago.

With a 2025 IB average of 38 points, including three students achieving the maximum 45 points, Brentwood remains one of the top IB Schools in the UK.

We offer an enviable range of subjects, including Dance, Film, Theatre, Chinese and Global Politics, alongside more traditional subjects such as Physics, History, English, Mathematics, Psychology and Economics.

The IB at B

The IB Diploma is a holistic qualification, combining specialist depth for university entry and the wider portfolio of skills valued so much by employers.

Brentwood is an IB World School. We believe education is about individual transformation, developing character, and cultivating human flourishing. We believe in the importance of being outward-looking and internationally-minded, encouraging students to think more widely, and preparing our young people for a global workplace. When students leave here, we hope they not only achieve excellent academic results, but also gain a deeper understanding of others, develop the ability to work effectively with those around them, and take principled action to make the world a better place. The IB Diploma is underpinned by an aspirational idealistic vision, and an educational ethos that we at Brentwood School share.

The IB Diploma is for students who are curious, open-minded, interested, resilient, and adaptable. The programme helps develop communication skills as well as self-management and academic rigour, which are fundamental traits valued by universities and employers.

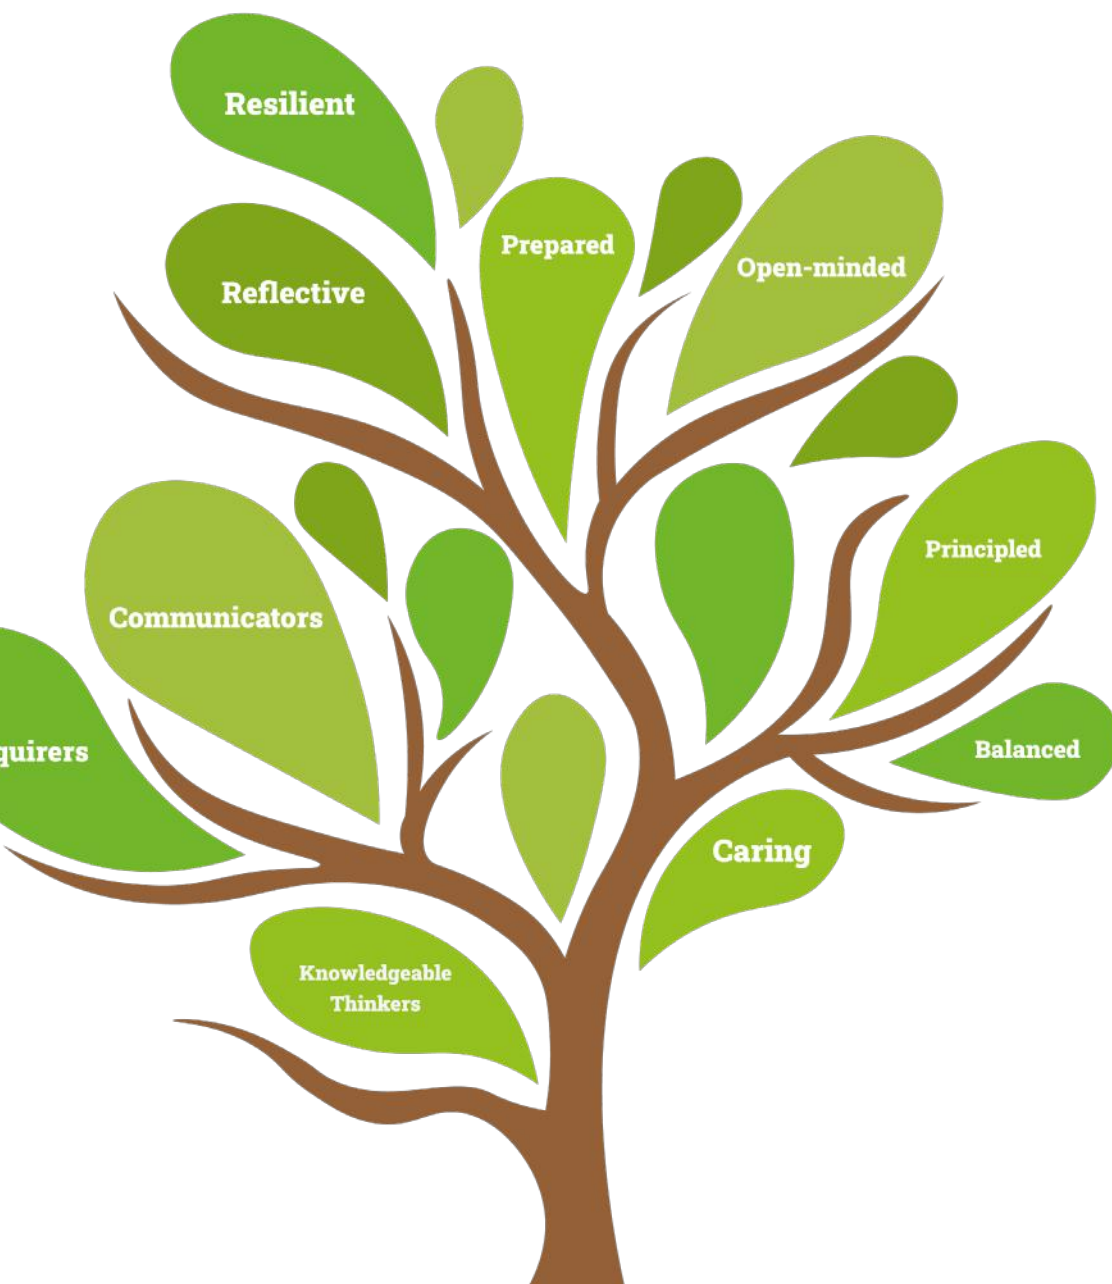

The IB Diploma is well-suited to students who enjoy a wide range of subjects and have a genuine love of learning, and who therefore wish to continue studying more than three subjects. This leads to an interesting and varied timetable. Students considering the IB often wish to keep their future options open, whether that includes progressing to a top university or even studying abroad. In such cases, the IB may be the perfect choice.

Our Brentwood Learner Profile aims to develop students who are:

- Reflective learners – they set clear goals and devise strategies for personal growth, evaluate their experiences and monitor their performance;
- Open-minded to new situations, creative adaptable flexible thinkers;
- Resilient, determined and resourceful when approaching unfamiliar situations;
- Communicators and leaders – active participants in sustained, collaborative projects; they have confidence in their contribution and adapt their behaviour to suit different roles and situations;
- Prepared and organised, managing themselves and their time effectively;

Brentwood

- Principled, caring, responsible citizens – they appreciate their own culture and identity, while being open to the perspectives, values and traditions of others; they take principled action to improve the lives of others and their environment;
- Balanced, achieving intellectual, physical and emotional balance through a range of experiences both in and outside school.

Pre-IB Pathway

We offer a Pre-IB pathway for high-achieving, ambitious students who would like to join us in Year 11. Our Pre-IB pathway is part of a 3-year educational programme, rather than a stand-alone entity.

Pre-IB students are integrated into existing mainstream 2-year GCSE classes with UK day students. As such, students joining our programme need to be committed, resilient and ambitious.

We have had many students go through this programme successfully, attaining strong results and providing a great preparation for the IB Diploma in Sixth Form.

Students receive support and guidance about their academic programme from the Director of IB, as well as pastoral oversight from their Head of Year, form tutor and boarding houseparents.

Students have classes in GCSE Mathematics, GCSE English Language (First Language), GCSE English Literature, IGCSE Biology, IGCSE Chemistry, IGCSE Physics, then a choice of 3 GCSE subjects from: History, Geography, Religious Studies, Latin, Classical Greek, French, Spanish, Computer Science, Art, Music, Drama, Dance, Physical Education, Classical Civilisation.

Of these 9 GCSEs, students will take final GCSE examinations in between 6 and 9 of their subjects, depending on their progress and in discussion with the Director of IB.

Students will also have timetabled private study time in the Library where they can work independently on Year 10 work, alongside a small number of lessons over the year to prepare for IGCSE German or Russian (First Language).

There is also an opportunity for additional EAL lessons to support English language skills, though students joining the Pre-IB pathway need to have certificated B2 CEFR-level English for admission.

In the IB Diploma, students take six subjects. Most students take three subjects at Higher Level and three at Standard Level, but we also have a number of students taking four at Higher Level and two at Standard Level.

The Higher Level subjects are the things you are specialising in and the things you might take on to university – so if you want to focus on Science, you might study Physics, Chemistry and Maths at Higher Level. Humanities specialists might study English, Spanish and History at Higher Level.

The Standard Level subjects allow you to keep up some of your other interests and keep your academic experience varied, while developing complementary skills e.g. presentation and essay skills for Science specialists; conceptual and systematic thinking for Humanities specialists.

We have shaped our timetable so that students can keep their options open by studying one subject from each of the six timetable groups shown in the diagram. Alternatively, most students choose to specialise more by taking two Sciences, two Humanities, two foreign languages or two Creative Arts subjects. You can do this by maintaining breadth in the first five choices but then “doubling up” by using the sixth choice to do a second subject at Higher Level from your chosen specialist area. You can see the combinations available in the IB Diploma Lower Sixth Choices Form. The different pathways and flexibility in the IB Diploma make it truly accessible to all our students.

The IB Diploma is out of a total of 45 points: up to 7 points in each of your six subjects, plus up to 3 points for the “Core” of Theory of Knowledge and Extended Essay. As a rough comparison with A Levels, each IB subject is graded out of 7: a 7 is equivalent to an A*, a 6 an A etc. The final total out of 45 compares to A Levels like this: 42 is equivalent to 3 A* grades. Our 5-year average score is 37.9 points (equal to A*AA at A Level),

As with A Levels, all IB Diploma examinations are taken at the end of the Upper Sixth year. This allows plenty of time for teaching, and for students to grow and mature. If things go wrong, though of course we hope that they don’t, subjects can be re-taken in November after the end of the Upper Sixth.

There is a significant internal coursework element, whether in the form of assessed essays, presentations or practicals – approximately 20–30% in each subject.

Students also take a course in Theory of Knowledge: a fun course where students examine and reflect on questions underpinning the nature of knowledge in their other academic subjects. Students complete an Extended Essay in one of their subjects, involving planning, researching and writing a long project (4000 words): a great preparation for university and something we can really celebrate in their UCAS application. There is also a co-curricular component called CAS, which involves them logging their co-curricular activities.

T

A Shaped Unimetable

All of these components combine to create students who are well-rounded, interesting individuals, who flourish in later life, in addition to having the specialist knowledge and skills needed for university.

British universities, European universities, and American universities all want more than students who have merely passed exams. They are looking for students who can manage their time effectively, who are open-minded, who are curious and independent, who are effective communicators, able to cope well under pressure and who have strong global awareness.

University offers for IB Diploma students usually involve an overall points total plus sometimes stipulations at Higher Level. Oxford University make offers of 39 points out of 45; King's College London make offers of 35 points. These compare very favourably. In fact, it is probably slightly easier to get into Oxford or King's College London currently with the IB Diploma than A Levels. We have also found that on average our IB Diploma students are made more university offers than A Level students.

Some students will choose to pursue one of their IB Diploma subjects at degree level whilst many others will proceed to university courses in disciplines which they will not have previously studied in Sixth Form such as Law, Sociology, Anthropology, International Relations, Medicine, Engineering, Management or Arabic.

Increasingly, students embark upon programmes of intensive professional training that enable them to enter professions which are not directly related to their undergraduate degree courses. Consequently, we would advise that students do not allow their Sixth Form choices to be entirely governed by their future career aspirations.

For a comprehensive list of our current subject offerings, please refer to our Sixth Form Curriculum Guide. Should you wish to study a subject not mentioned in these documents, please reach out to Mr Barfield Moore (Deputy Head Academic), Mrs Carter (Director of IB), or Mrs Monk (Head of Careers) for further advice.

Boarding

“

**Brentwood Boarding, where I have
found the best version of myself”**

Nicolò, Lower Sixth

Brentwood School has a long history of boarding and our boarders are an important part of the whole School community.

Students benefit from having more time to join in after-school activities without the worries of a long journey home. Dedicated time for homework with support from house tutors helps students keep on top of their work and there is plenty of time to make friends.

In Autumn 2025, we transformed our boarding facilities by opening a new state-of-the-art Boarding House. The building is subdivided into a girls' and boys' wing, each with single en-suite bedrooms, and a central shared facility including new dining and communal areas and Sixth Form Café. Staffed by dedicated Houseparents and boarding house tutors, it offers warmth and a family atmosphere to students from different backgrounds, both near and far. Friendships made by our boarders often last a lifetime.

We offer full, weekly, and flexi boarding, and we feel very fortunate to have a wide mix of nationalities from Asia, Europe, and the Middle and Far East.

In addition to the wide range of co-curricular activities on offer at the School, boarders have their own programme of social activities. Houseparents make sure there is a plethora of activities on offer in the evenings and at weekends. These include trips to the cinema, theatre, paintballing, bowling and weekends away.

The School offers an exceptional programme of co-curricular and enrichment activities with a wide and diverse selection of clubs, societies and trips available. Some aim to stimulate and extend students with a particular subject passion whereas others are less subject-driven and more focused on broadening interests and knowledge.

Students may elect to take part in competitive and recreational sport, musical activities, drama groups and productions, public speaking, art, technology and many others.

Our co-curricular provision is inclusive in nature and we encourage all students to take part in activities and societies that they might find interesting.

There is something for everyone.

Co-cur

A young male athlete with short brown hair is running on a grassy field. He is wearing a blue zip-up track jacket with white stripes on the sleeves and a crest on the chest that says "Brentwood School". He is also wearing dark blue shorts. The background is a blurred brick building and a goalpost. In the top right corner, there is a pink circle containing the text "Find out more". At the bottom, the word "Particular" is written in large blue letters, with only "ricular" being visible.
