Science Fair 2025

by: Chase Jones

The best part of my 5th grade year was the school science fair. I remember spending weeks preparing my project on volcanoes, complete with a homemade papier-mâché model that erupted with a fizzing mixture of baking soda and vinegar. My classmates gathered around, eyes wide with excitement, as the "lava" flowed down the sides. Not only did I learn a lot about geology and chemical reactions, but I also discovered a newfound passion for science that would stay with me for years to come. The thrill of sharing my project and seeing the amazement on everyone's faces made it an unforgettable experience.

I was awarded a small ribbon for my efforts, a symbol of accomplishment that I cherished greatly. That day sparked a curiosity in me that continued to grow, leading me to explore more science projects in the following years. Each new experiment was a journey of discovery, and I found myself fascinated by the endless possibilities that science offered. From experimenting with magnetism to exploring the mysteries of outer space, my love for understanding how the world works only deepened.

This early passion eventually guided me toward participating in science clubs and competitions, where I met like-minded peers who shared my enthusiasm. Together, we formed study groups, conducted experiments, and even visited science museums to broaden our knowledge. These experiences not only enriched my understanding but also forged friendships that lasted well beyond our school years.

Looking back, I realize that the science fair was more than just a school event; it was a pivotal moment that helped shape my academic interests and, ultimately, my career path. It taught me the importance of curiosity, perseverance, and the joy of learning—lessons that I carry with me to this day.

Ashley Johnson

To Our Amazing Daughter,
We are so proud of everything you've achieved this year. Watching you grow, learn, and shine in middle school has been a joy. You're on your way to even greater things—keep being your incredible self! We can't wait to see all the amazing adventures middle school will bring.

With all our love,

Mom and Dad
