About Roltex

2024 has entered our lives with excitement! August Lundh, known for its expertise in the catering for over 100 years, joins forces with Roltex, born in 1965, and known as market leader in serving trays and unbreakable drinkware. Together under the brand name of Roltex, we are here to be your trustful partner in food service products for many years.

We have forged a strong team with international manufacturing partners offering a product portfolio to cover all your needs, matched with a high level of service and quality. We offer a comprehensive range of product categories, from best value to premium products for the inflight, rail and travel catering sectors. We produce our products in Eskilstuna, **Sweden**, and Aalst, **Belgium** and proud of our continued heritage of offering quality products manufactured in Europe.

Are you aiming for a greener future just like us? Welcome onboard!. We now have our **Green Loop System** that recycles our own end of life products and re-manufactures them into new food contact safe ones. We launched this initiative to the public sector in 2022, a project our chairman, Peter Wall, has been working on since 2018. We are now ready for take off with this concept to the travel industry. With a worldwide customer base, we aim to be a market leader within this field.

Curious to know more about our products and how we can make your company greener with our help? Don't hesitate to contact our team in Sweden or Belgium.

HINTS FOR ERGONOMIC SERVING

Service onboard is often fast paced, and with the addition of a tight space and limited time there is a high risk of work related injuries. Our serving pots have ergonomic qualities that improves the work environment. Use these hints to make the most out of your pots!

- ✓ Hold the pot close to your body when serving
- ✓ The distance between the pot's centre of gravity and your wrist is important in reducing strain on the forearm muscles
- ✓ Change your grip on the handle downwards during the serving and minimise strain on your wrist
- ✓ Use the backrest of the seat for support

Green Loop System

Introducing the revolutionary Green Loop System – a shift in sustainability and business efficiency! Say goodbye to the traditional cycle of purchase, use, and discard. With our circular model, your business flourishes while leading the charge in environmental responsibility like never before.

Experience the difference with our industry-unique approach, using the power of bioplastics to achieve environmental benefits. Unlike conventional products, our Green Loop System ensures that every resource is utilised to its fullest potential, delivering not just products but a complete sustainable solution.

We're not just offering products; we're offering a transformational journey towards a greener future. Backed by facts and certifications, our system is the fastest route to CO₂ savings, making every decision a step towards a cleaner planet.

Join us in creating the world we want to live in and leave behind. From plates to canteens, chopping boards, and beyond, our system redefines the possibilities of recycling and reuse. Unlike fragile alternatives, our plastic products are engineered for durability, ensuring quality remains uncompromised through countless cycles of use.

And the benefits don't stop there. With lower energy consumption at every stage of production and reduced weight for transportation, our system minimizes CO₂ emissions, making every product not just environmentally friendly, but economically too.

Elevate your business, empower the planet – embrace the Green Loop System today!
