What is AMAU?

A new virtual hub providing easy access to classical Islamic knowledge.

With over 500 hours of free Islamic content already published, Al Madrasatu Al Umariyyah (AMAU) is one of the world's leading online Islamic knowledge hubs.

Spearheaded by household names such as Ustadh Abdulrahman Hassan & Ustadh Muhammad Tim Humble, AMAU is making detailed Islamic knowledge more accessible for thousands of gifted and ambitious students across the globe.

Now, AMAU is finally launching its online academy, an online portal to both Islamic knowledge and tarbiyyah for English-speaking students around the world. This is your opportunity to study Islam in a structured, progressive and detailed manner.

Start your journey now and become an official AMAU Student of Knowledge.

“The dilution of Islamic scholarship in the 21st Century is a painful yet undisputed reality. Today’s graduate would struggle to sit in the same classroom as yesterday’s student”.

Why is there a need for AMAU Academy?

To pave a pathway for thousands of aspiring seekers of knowledge to join the ranks of scholars in Islam.

Opportunities for a formal Islamic education in a recognised institution which produces students of knowledge, grounded in the principles of following The Qur’an and Sunnah, are few and far between. Traditional institutes have a high barrier to entry, with only a few students being selected. Thousands of potential scholars and students of knowledge miss out, often because they cannot commit to spending several years in a foreign country, or because they do not fit a very narrow set of criteria for acceptance.

Even for the few who manage to overcome these obstacles, the dilution of Islamic scholarship in the 21st Century is a painful yet undisputed reality. Feedback gathered from formally-educated students of knowledge is increasingly alarming; Islamic knowledge is being watered down and we are no longer producing the calibre of students dictated by the high standards of Islam. Today’s graduate would struggle to sit in the same classroom as yesterday’s student. The result? Our students of knowledge are unable to serve their communities in an effective manner.

These problems have had a knock-on impact on millions of Muslims across the world and have directly contributed to the weakening of the Ummah. Something needs to change.

Queue, AMAU Academy.

“We have structured our syllabus in a progressive and intelligent manner, but we refuse to develop yet another curriculum.”

What makes AMAU Special?

We cater to modern-day Muslims while retaining a classical approach in teaching Islamic knowledge.

As an online academy, we are able to open the doors to seeking knowledge for thousands of gifted students who would otherwise miss out. Our Unique Selling Point (USP) primarily revolves around two important features:

Our entire syllabus consists of teaching and explaining classical books, word for word, beginning to end. We have structured our syllabus in a progressive and intelligent manner, but we refuse to develop yet another curriculum. Instead, we are taking the pure unfiltered knowledge contained in the books written by the early generations of Muslims, and are connecting our students to studying Islam the traditional way. It's a tried and tested approach that has produced some of the best scholars in the world.

A different approach will naturally result in a different outcome, and that's the second thing that makes us unique. Many of the existing online institutes are doing an excellent job at educating the average Muslim who wants to seek a little bit of knowledge on the side. However, there is a huge gap in the online market for a serious student of knowledge who wants to become the next scholar of his country. This requires an additional investment of our time and resources, but the rewards are exponentially greater. By equipping our students with enough knowledge to change their entire community, we're setting up a system of long-term education with every student that Allah allows us to produce.

AMAU Faculty

With a line of highly qualified teachers, we seek to uphold the pure teachings of the Qur'an and Sunnah as taught and learnt upon the understanding of the earliest generations of Islam.

Ustadh Abdulrahman Hassan

United Kingdom

Ustadh Abdulrahman is uniquely positioned as an individual who combines the experience of traditional Islamic scholarship from the East, as well as the knowledge and understanding of the West.

By the tender age of 10, Allah allowed him to memorise The Qur'an and Buloogh Al Maraam – a book that contains more than 1,300 hadith. He then went on to formally study Islam in Saudi Arabia, Egypt and Somalia, before returning to the UK as an Imaam and a da'ee. He has delivered hundreds of hours of Islamic content on YouTube and has fast become a popular name amongst the English-speaking Muslim audience.

Known for his ability to conduct detailed research across various different Islamic issues, Ustadh Abdulrahman Hassan has the ability to push aspiring students of knowledge to their limits and maximise their academic ambitions.

Ustadh Muhammad Tim Humble

United Kingdom

As a revert to Islam, Ustadh Muhammad Tim Humble completed all of his formal Islamic studies as an adult, providing him with the necessary experience to support new students who may have limited time available. With Allah's permission, he excelled in his pursuit of knowledge, most notably graduating from the University of Madinah in Hadith and Islamic Studies.

He is passionate about teaching the Arabic language – and has developed his own courses and material for doing so – after having worked as a professional translator for a number of major publishing companies.

He has also completed several hundred hours of TV recording for well-known Islamic channels, and regularly delivers lectures in different parts of the world.

AMAU Syllabus

Discover an in-depth curriculum designed for those who are interested to venture into the world of serious Islamic scholarship.

The AMAU Syllabus

“We’ve been working on a comprehensive, well-structured syllabus, relying on the decades of experience held by our Head of Islamic Studies”

The AMAU syllabus is thorough, making it the ultimate solution for serious students of knowledge looking to get closer to Allah. Get ready to learn subjects that have never been taught before in the English language.

This is not a 1-year program, or a 5-year program, or a 10-year program. This is a life-long journey where we want to develop our students into the next generation of scholars, with Allah’s permission.

We aim to take our students from an introduction into each of the different Islamic sciences, all the way to the tafseer of every ayah in The Qur’an, and an explanation of every hadith in the six mother books of hadith. A complete journey from beginning to end, with the permission of Allah.

Course Name	AMAU Student of Knowledge Program
Number of Study Pathways	7
Duration	Until you meet Allah [life-long program]

This program is for anybody who wants to start their journey of seeking knowledge with the intention of becoming a well-grounded student of knowledge or scholar in Islam.

Structure of the Program

This is an online program for serious students of knowledge who strive for excellence in each and every branch of Islamic knowledge. It doesn't require any prior study experience, but it does require dedication and commitment. There are no specific limitations with regard to age, however the student should be mature enough to be serious about their study and have a sufficient level of understanding. It's a long-term commitment for someone who wants to seek knowledge from the cradle to the grave.

How Does it Work?

Videos become available throughout the week in each of the various study pathways. You can watch them at a time that suits you. There are regular live Q&A sessions, in which you can ask your teacher any questions, regardless of where you are in the curriculum.

Each pathway also has an optional memorisation program. While some memorisation is required to pass exams, this programme is an optional programme and it provides multiple options, according to ability and time, to memorise classical texts, in addition to memorising the Qur'ān.

How Much Time Does it Require?

Each pathway, along with the Arabic language course, will offer around 2 teaching hours per week. When you add revision and memorisation, this is likely to take 4-5 hours of your time each week.

If you take all pathways at the same time, this is 12 hours of teaching time per week, and in the region of 30-35 hours of your time each week. However, you are free to choose how many pathways you want to study, according to your time and commitment. You can choose to study only one or two pathways if you wish, and then adjust to your own time and speed of study. The only condition we mandate is that you must begin with the 'Aqeedah pathway.

We want to take an active role in ensuring our students are progressing in the correct manner. Our Student Support Team will be in regular contact with students who may be falling behind in the program, in order to provide the required assistance.

Additionally, one of the advantages from learning via an online academy - as opposed to self-learning via YouTube - is that we will be able to regularly check whether our students are understanding the knowledge properly. At the end of each module, students will be required to pass a multiple choice exam before moving on to the next module.

Exams and Assessments

A progressive evaluation to guarantee intellectual growth of each student.

How will I learn Arabic?

With the deliberate yet constant use of Arabic in our lessons, development of fluency can be ensured.

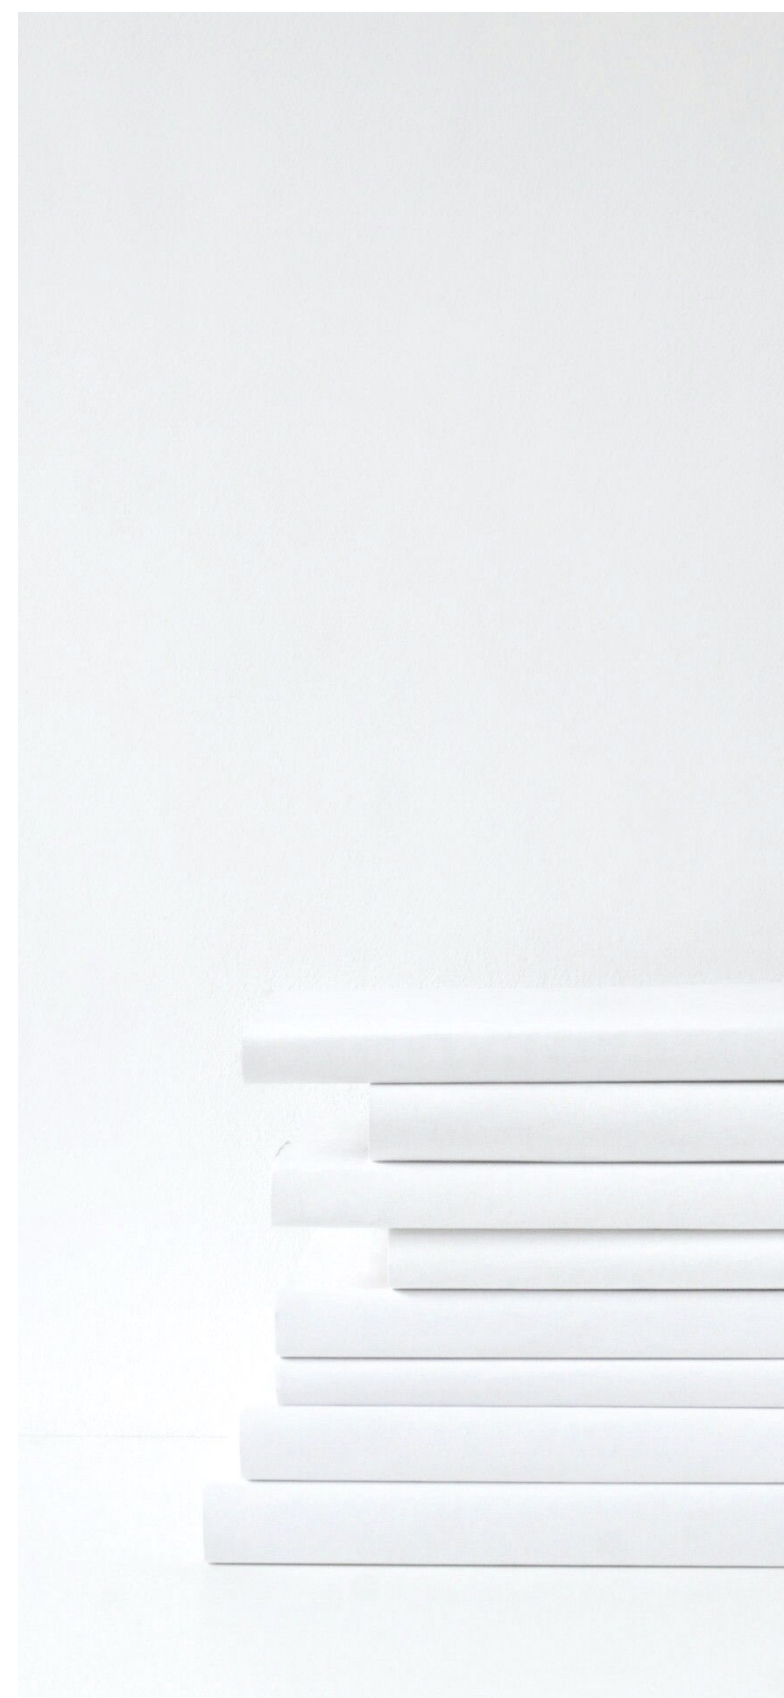

English is widely recognised as one of the most popular languages in the world, and it is imperative for us to make Islamic knowledge as accessible as possible. Therefore, all of our lessons will be delivered in English. However, we also recognise the necessity of the Arabic language for any serious student of knowledge.

All of our students will therefore have access to a dedicated Arabic language course, separate from the 7 pathways that make up our core curriculum. This comprehensive course includes vocabulary, language lessons, corpus material and tools & tests, offering a complete Arabic language program, with an emphasis on making the language as easy as possible to learn.

Furthermore, the use of Arabic in our lessons will also slowly increase as the student progresses through their studies. We also ensure that all of the evidences and key quotes are mentioned in Arabic, whilst simultaneously being translated and explained in English. This kind of hybrid approach will ensure the student slowly gains confidence in the Arabic language, priming himself to use it more and more as he progresses to the more advanced stages of our comprehensive curriculum.

Who is this program for?

It's actually the perfect fit for you.

- 1** Anyone who wants to seek knowledge in a structured manner.
- 2** Anyone who wants to become a student of knowledge, teacher or scholar.
- 3** Anyone who wants to study Islam online.
- 4** Anyone who wants to improve their connection with Allah by studying His religion in detail.

المدخل إلى علم العقيدة

2

An Introduction to Sects and Sectarianism
المدخل إلى الفرق والافتراق

3

Final Exam: Introductory Level 'Aqeedah
الاختبار النهائي

Introductory Level

المدخل

At this level, you gain a basic understanding of the sciences that make up 'Aqeedah and the Foundations of the Religion. These introductory courses provide essential background to the sciences, so that once you begin studying a text, you already have a grasp of the basics. Each introduction has an exam, as well as a final exam for this introductory level.

The only requirement for this level is that you have successfully completed your introduction to studying at AMAU exam.

There is no specific text to memorise at this level.

After successfully completing your final exam, you go on to the beginner's level texts.

Introductory Level

المدخل

At this level, you gain a basic understanding of Tafseer and the Sciences of the Qur'ān. These introductory courses provide essential background to the sciences, so that once you begin studying a text, you already have a grasp of the basics. Each introduction has an exam, as well as a final exam for this introductory level.

The requirements for this level are that you have successfully completed your introduction to studying at AMAU exam and that you have at least started studying the pathway of 'Aqeedah and the Foundations of the Religion.

There is no specific text to memorise at this level.

After successfully completing your final exam, you go on to the beginner's level texts.

Introductory Level

المدخل

At this level, you gain a basic understanding of the sciences that make up the Sciences of Language & Logic. These introductory courses provide essential background to the sciences, so that once you begin studying a text, you already have a grasp of the basics. Each introduction has an exam, as well as a final exam for this introductory level.

The requirements for this level are that you have successfully completed your introduction to studying at AMAU exam and that you have at least started studying the pathway of 'Aqeedah and the Foundations of the Religion.

There is no specific text to memorise at this level.

After successfully completing your final exam, you go on to the beginner's level texts.
