

Showcase your expertise with the Moodle Administrator Qualification program

Are you an experienced Moodle LMS™ or Moodle Workplace™ site administrator?

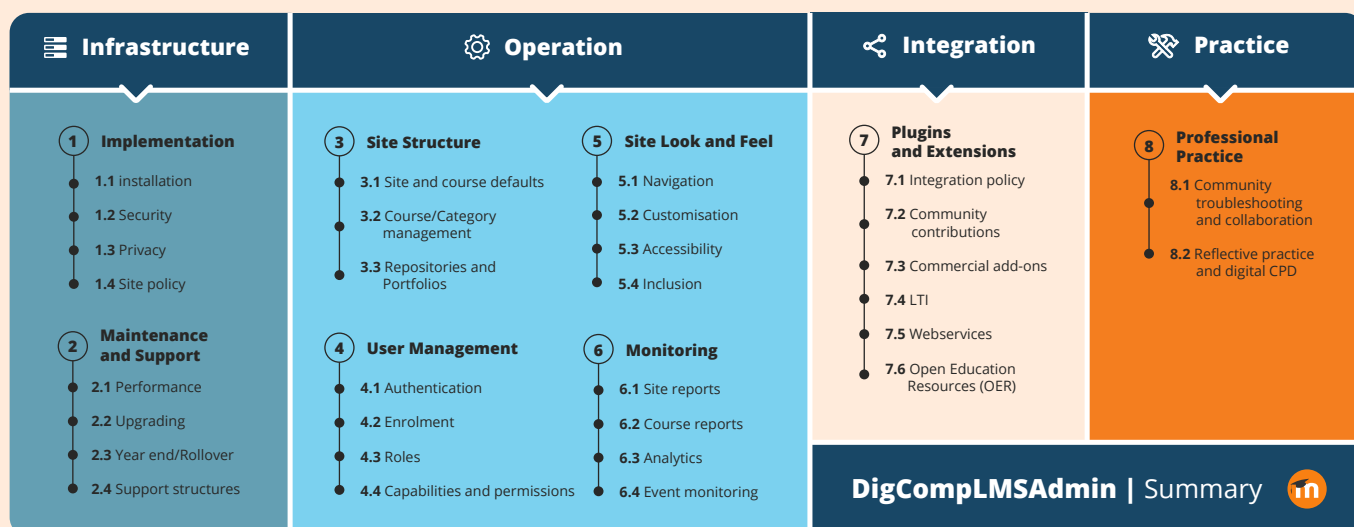

Have you spent at least a year managing a Moodle LMS or Moodle Workplace site?

Have you completed administrator programs on Moodle Academy, or training with a Moodle Certified Partner or Service Provider?

If so, it's time to validate your advanced skills with the Moodle Administrator Qualification (MAQ).

What is the MAQ?

The MAQ is a qualification program, not a training program, specifically for Moodle LMS or Moodle Workplace administrators. It validates your skills and expertise in managing, optimising, and maintaining a Moodle™ platform. Built on the DigCompLMSAdmin framework, which focuses on digital competences essential for administrators, this eight-course program equips you with the tools to enhance your site's performance, usability, and impact.

Each of the eight courses includes formative and summative assessments, culminating in a digital badge that can be shared across professional networking platforms to showcase your expertise. Completing all eight courses grants you the Moodle Administrator Qualification certificate.

Why get the MAQ?

Advance your career by demonstrating your expertise in Moodle platform administration.

Widen your practical skills in Moodle platform administration and improve site performance, security, and user experience.

Stay up-to-date with a qualification program that reflects the latest advancements in Moodle platform.

Are you ready for the MAQ?

Take the pre-qualification quiz in Moodle Academy to ensure you're ready. If you need to upskill first, consider self-paced training offered through Moodle Academy or facilitated training offered through Moodle Certified Partners and Service Providers.

Keep your admin skills sharp

Stay ahead in the ever-evolving world of a Moodle platform, by taking a Requalification course every two years, starting January 2027. With updated content, aligned to the latest Moodle LMS long-term support (LTS) releases and newest admin features, you'll stay at the forefront of Moodle expertise. Successful completion renews your MAQ certificate and badges for another two years, ensuring you remain a recognised expert of Moodle platforms.
