

**SEAC**

sea is calling

**COLLECTION**

seacsub.com 2024

- (IT)** Il tridente, icona di Nettuno ma anche simbolo della nascita di SEAC quando, nel 1971, era una piccola produzione di fiocine e arpioni. L'onda, emblema del mare sotto la quale si immerge la scritta SUB. Questo è il nostro bellissimo logo storico che abbiamo voluto far riemergere in tutto il suo splendore sulle livree di alcuni nostri prodotti dedicati alla pesca subacquea e al freediving. Un tuffo nel passato con lo sguardo sempre rivolto verso il futuro.
- (EN)** A trident, the icon of Neptune and also the symbol of the creation of SEAC in 1971, when it was a small producer of pronged heads and spear heads. A wave, emblem of the sea, below which the word SUB is submerging. This is our beautiful historic logo, which we wanted to revive in all its splendor on the livery of some of our underwater fishing and freediving products. A dive into the past with our gaze firmly fixed on the future.
- (ES)** Un tridente, icono de Neptuno y símbolo asimismo de la creación de SEAC en 1971, cuando era un pequeño productor de cabezales y cabezales de fusil. Una ola, emblema del mar, bajo la que se sumerge la palabra SUB. Este es nuestro hermoso logo histórico, que queremos recuperar en todo su esplendor como distintivo en algunos de nuestros productos de pesca submarina y apnea. Una inmersión en el pasado con nuestra mirada firmemente puesta en el futuro.
- (FR)** Un trident, icône de Neptune et symbole de la création de SEAC en 1971, alors qu'elle n'était qu'une petite productrice de têtes et de pointes de flèche. Une vague, emblème de la mer, sous laquelle le mot SUB est immergé. C'est notre magnifique logo historique, que nous voulions faire revivre dans toute sa splendeur sur certains de nos produits de pêche sous-marine et d'apnée. Une plongée dans le passé avec un regard tourné vers l'avenir.
- (DE)** Ein Dreizack, das Wahrzeichen des Neptun, ist auch das Symbol der Gründung von SEAC im Jahr 1971, als wir ein kleiner Produzent von Zinken- und Speerköpfen waren. Eine Welle, Emblem des Meeres, in das das Wort SUB eintaucht. Dies ist unser wunderschönes, historisches Firmenlogo, das wir in all seiner Pracht auf einigen unserer Unterwasser-Fischfang- und Freitauchprodukten wieder aufleben lassen wollten. Ein Eintauchen in die Vergangenheit, mit unserem Blick fest auf die Zukunft gerichtet.

## NEW CASE INCLUDED

## DIN 300 BAR

## INT 230 BAR

- IT**
1. Manopola ergonomica integrata da leva dive / pre dive per regolazione sforzo respiratorio ed Effetto Venturi.
  2. Sistema OWS: scudo frontale e pulsante in morbido PU che ottimizzano sia l'azionamento sia il passaggio dell'acqua, riducendo lo sforzo respiratorio ed evitando, data la sinergia fra le aperture frontali e laterali, possibili auto erogazioni dovute a correnti frontali.
  3. Particolare geometria del condotto di scarico che evita infiltrazioni di acqua nel secondo stadio anche in presenza di forti correnti laterali e convoglia le bolle espulse ai lati del viso evitando fastidiosi passaggi davanti al campo visivo.
  4. Nuovo salva frusta studiato nel diametro e lunghezza per evitare qualsiasi strozzatura. Curvatura ottimizzata ed ergonomica per l'utilizzatore.
  5. Primo stadio forgiato a caldo per ridurlo al massimo il peso e avere tutte le uscite sia HP che LP ergonomicamente pre-orientate. Cromatura sabbata. Bilanciato a membrana ad alte prestazioni. Numero 2 Porte HP. Numero 4 Porte LP.
- EN**
1. Ergonomic integrated dive/pre-dive lever for adjusting breathing effort with the Venturi Effect.
  2. OWS System: front shield and button in soft polyurethane to optimize the action as well as the passage of water, reducing breathing effort, and thanks to the synergy between the front and side openings, it avoids the chance of free-flows in head-on currents.
  3. The special geometry of the exhaust tee prevents water from seeping into the second stage even when in powerful side currents, and also directs expelled bubbles to the sides of face, eliminating annoying obstructions in your field of view.
  4. New hose retainer features a carefully researched length and diameter to avoid any pinch points. Optimized curvature, ergonomic for users.
  5. Hot-forged first stage to reduce weight as much as possible, with both HP and LP ports arranged ergonomically. Sandblasted chrome. High-performance balanced diaphragm. 2 HP ports. 4 LP ports.
- ES**
1. Pomo ergonómico integrado con palanca de inmersión/pre-inmersión para regular el esfuerzo respiratorio y el efecto Venturi.
  2. Sistema OWS: escudo frontal y botón en suave PU que optimizan tanto el accionamiento como el pasaje del agua, reduciendo el esfuerzo respiratorio y evitando posibles fugas de aire debido a corrientes frontales dada la sinergia entre las aperturas frontales y laterales.
  3. Geometría especial del conducto de descarga que evita filtraciones de agua en la segunda etapa, incluso en presencia de fuertes corrientes laterales, y dirige las burbujas expulsadas a los lados del rostro, evitando que pasen frente al campo visual.
  4. Nueva protección del latiguillo estudiada en su diámetro y longitud para evitar cualquier estrangulamiento. Curvatura optimizada y ergonómica para el usuario.
  5. Primera etapa forjada en caliente para reducir al máximo el peso y disponer de todos los puertos, tanto de alta como de baja presión, preorientados ergonómicamente. Cromado arenado. Equilibrada con membrana de altas prestaciones. 2 puertos de alta presión. 4 puertos de baja presión.
- FR**
1. Bouton ergonomique intégré par levier de plongée/pré-plongée pour le réglage de l'effort respiratoire et l'effet Venturi.
  2. Système OWS : calotte frontale et bouton en PU souple qui optimisent à la fois l'actionnement et le passage de l'eau, réduisant l'effort respiratoire et évitant, compte tenu de la synergie entre les ouvertures frontales et latérales, une éventuelle autodistribution due aux courants frontaux.
  3. Géométrie particulière du conduit d'évacuation qui évite les infiltrations d'eau dans le deuxième étage même en présence de forts courants latéraux et transporte les bulles expulsées sur les côtés du visage en évitant les passages gênants devant le champ visuel.
  4. Nouvelle protection de flexible étudiée en diamètre et en longueur pour éviter tout étranglement. Courbure optimisée et ergonomique pour l'utilisateur.
  5. Premier étage forgé à chaud pour minimiser le poids et avoir toutes les sorties HP et BP ergonomiquement pré-orientées. Chromage sablé. Équilibré à membrane à haut rendement. 2 ports HP. 4 ports BP.
- DE**
1. Integrierter, ergonomischer Dive/Pre-Dive-Hebel zur Einstellung des Atemaufwandes und des Venturi-Effektes.
  2. OWS-System: Frontdeckel und Knopf aus weichem Polyurethan zur Optimierung der Wirkung sowie des Durchgangs des Wassers, was zu einer Verminderung des Atemaufwandes führt, und dank der Synergie zwischen den Front- und Seitenöffnungen, wird die Wahrscheinlichkeit eines ungewollten Abblasens des Atemreglers in frontalen Strömungen verhindert.
  3. Die spezielle Geometrie des Blasenabweisers leitet die ausgetmete Luft zu den Seiten des Gesichtes ab, damit eine lästige Beeinträchtigung Ihres Sichtfeldes durch Luftblasen vermieden und zugleich auch verhindert wird, dass selbst bei starken seitlichen Strömungen kein Wasser in die zweite Stufe eindringt.
  4. Die Länge und der Durchmesser des neuen Schlauchschutzes wurden sorgfältig studiert, um jegliche Knickpunkte zu vermeiden. Optimierte Biegung, ergonomisch für die Benutzer.
  5. Warmgeschmiedete erste Stufe, um ihr Gewicht so viel wie möglich zu reduzieren. Ergonomisch angeordnete Hoch- und Niederdruck-Anschlüsse. Sandgestrahltes Chrom. Balancierte Hochleistungsmembran. 2 Hochdruck-Anschlüsse. 4 Niederdruck-Anschlüsse.

A scuba diver in a black wetsuit and fins swims horizontally in clear blue water, positioned above a large sea turtle. The turtle is swimming in the same direction, its head and front flippers visible. The water is bright blue with some light reflections on the surface.

**SEAC**  
sea is calling

**SNORKELING & SWIM**  
seacsub.com 2024

## Security controls on the SEAC full-face masks

SEAC abides by two fundamental principles in designing its full-face snorkeling masks:

- the user should need to employ the least possible **breathing effort, comparable to natural breathing**, out of the water and in a relaxing situation;
- and the level of residual **carbon dioxide CO2** inside the skirt while inhaling must be **well below the safety limits**.

Even **though there is no specific European regulation governing the manufacture of full-face snorkeling masks**, SEAC has developed a series of **specific tests** that comply with the values set forth by the following European regulations:

- EN 1972:2015 establishes the requirements for the design and manufacture of snorkel tubes, limited to breathing effort;
- EN 16805:2015 establishes the requirements for the design and manufacture of dive masks;
- EN 136:2000 establishes the minimum requirements for the manufacture of full-face respiratory protection masks, limited to tests checking the CO2 in inhaled air;
- EN 250:2014 regarding open-circuit compressed-air self-contained breathing apparatus and its components, limited to tests checking the CO2 in inhaled air, related to the full face masks or oro-nasal half masks for SCUBA diving.

### The ITALCERT test report on the residual CO2 content

SEAC had its full-face masks also tested by a third-party laboratory. Please see the results below:

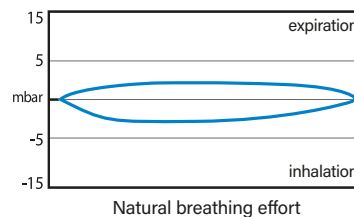

CO2 content limit values on full-face SEAC (test results with 25 RPM / 2.5 l)

CO2-IR	CH1
5,00	%VOL
CO2-IR	CH2
0,6	%VOL

CO2-IR	CH1
5,00	%VOL
CO2-IR	CH2
0,7	%VOL

In the **SEAC labs**, batches of full-face masks are tested with **Ansti machines**, specifically to measure the **dynamic performance of human breathing**, and with **specific SEAC equipment** to **check levels of CO2** in the air inhaled through the masks.
