Elumen website

INTRODUCTION

Elumen stands as a leading Australian manufacturer and distributor of high quality emergency lighting. Our commitment to innovation begins with our modular emergency pack system, allowing our batten lights to be serviced in under a minute. Streamline emergency lighting systems with our advanced dual function exit signs and our cutting-edge wireless networking range.

Established in 2011, Elumen embodies core values of excellence, innovation, affordability, and sustainability. Explore our Self-Test and Networking product lines to discover the potential of our ever-evolving technology, significantly reducing maintenance costs and complexity.

Every Elumen product is meticulously certified to meet the rigorous AS2293.3 standards. Our in-house engineering team consistently pushes the boundaries of innovation, striving to create safer and more efficient products that are both cost-effective to install and maintain. By tightly integrating our engineering team with our dedicated manufacturing facility, we are able to uphold the highest quality control standards. With energy-efficient LEDs and dynamic dimming occupancy sensors, our solutions can achieve up to 82% energy savings, fostering greener and more sustainable buildings.

Ready to change the way you test? Our Self-Test range offers a comprehensive suite of automated software tests for your fittings. Since the testing facilities are self contained, Self-Test is the perfect solution for retrofitting emergency lights and exit signs, eliminating the need for additional cabling and test switches.

Upgrade to our Networking range to unlock the potential of 24/7 cloud monitoring. In collaboration with Plexus, Elumen proudly introduces a comprehensive range that leverages Plexus' advanced mesh network.

BATTENS

Elumen's comprehensive batten range is designed to be durable and energy efficient. The modular design of the Bondi batten allows it to be serviced in case of battery failure in under 60 seconds by exchanging its Kwicky Emergency Module.

Available in multiple sizes and enclosure styles, find the perfect batten for your application.

ACCESSORIES

Elumen's range of IoT accessories combines Elumen's reliable hardware with Plexus' cutting-edge software.

01 Kelvin Dot

Wireless Temperature and Humidity sensor

Monitor comfort levels and commercial fridge temperatures with the Kelvin Dot. Configure temperature threshold warnings and keep track of historical temperature data.

02 Saturn

Wireless interlinking smoke alarm

The Saturn combines a robust smoke alarm with a 10 year design life with the remote monitoring capabilities of Plexus. Trace the source of the alarm with our alarm trigger monitoring to troubleshoot and prevent unwanted alarms.

03 Occupancy Sensors

Energy saving
occupancy sensor

Stay in control of your energy expenses with the Beacon occupancy sensor. The Beacon offers a versatile three-stage dimming configuration, enabling the perfect balance between energy savings and comfortable lighting levels.

PHOTO BY PIXABAY @ PEXELS

PLEXUS

Plexus is a wireless mesh network that connects Plexus compatible devices together. Connected devices can easily be monitored from the cloud, simplifying fault detection and building management. Plexus nodes automatically form a self-healing mesh with the gateway, delivering a secure, dynamic indoor network with extensive range. Create bespoke monitoring systems by integrating with our network using the Tether.

Building a Plexus network is simple. All Plexus products are entirely plug and play, forming a self-healing mesh as soon as they're powered on.
