CARTON 7/7

REF			MENGE	TEILE	BESCHREIBUNG
L1			1		Tür
L2			1		Türrahmen Links 50X32 L=1875
L3			1		Türrahmen Rechts 50X32 L=1875
L4			1		Türrahmen Oberseite 50X32 L=1398
K1			3		Ziegel 900X2200 L=2200mm

Das Gartenhaus sollte auf einem festen Untergrund wie einem Betonfundament installiert werden. Die Bodenfläche sollte eben sein, und die Größe sollte den Abmessungen der Zeichnung entsprechen.

- Installieren Sie den Aluminium-Unterrahmen gemäß der Abbildung.
- Verwenden Sie den M8-Bohrer, um Löcher in den Aluminium-Unterrahmen zu bohren.
- Überprüfen Sie vor der Befestigung mit einer Wasserwaage die Ebenheit des Aluminium-Unterrahmens gemäß der Abbildung.
- Befestigen Sie den Aluminium-Unterrahmen mit den Dehnschrauben.

Installieren Sie zuerst eine Seite des Rahmens und das WPC-Board. Befestigen Sie jedes installierte WPC-Board mit zwei Schrauben an den Verbindungsstellen am Rahmen.

Installieren Sie zuerst eine Seite des Rahmens und das WPC-Board. Befestigen Sie jedes installierte WPC-Board an den Verbindungsstellen mit zwei Schrauben am Rahmen.

Stecken Sie die Seitenleiste in die Nut des Rahms. Befestigen Sie sie mit Schrauben miteinander.

Installieren Sie den Türrahmen gemäß der Abbildung und stellen Sie sicher, dass er ausgerichtet ist und fest befestigt wird.

Türrahmen und Schwelle einbauen. Der Türrahmen wird während der Montage sowohl mit Schrauben als auch mit WPC-Platten gesichert.

Installieren Sie die restlichen Acrylplatten und befestigen Sie sie nach der Installation mit Schrauben. Nachdem die restlichen Acrylplatten installiert sind, verwenden Sie Schrauben, um sie fest zu fixieren.

Installieren Sie den Türrahmen gemäß der Abbildung und stellen Sie sicher, dass er ausgerichtet ist und fest befestigt wird.

Installieren Sie die Verbunddrinnen mit korrosionsbeständigen Befestigungselementen und lassen Sie die Dehnungsfugen gemäß den Herstellerangaben.

Installieren Sie die Dachziegel.

Verwenden Sie für die Rahmenverbindungen Q8-Schrauben. Befestigen Sie die erhöhten Bereiche der Metalldachplatte mit Q9-Schrauben und die Enden mit Q10-Schrauben. Befestigen Sie den Rahmen mit Q8-Schrauben. Fixieren Sie die hervorgehobenen Teile der Wellblechplatte mit Q9-Schrauben und die Enden mit Q10-Schrauben.

Installieren Sie den Aluminium-Keilrahmen gemäß der Abbildung.

Setzen Sie die 2 Kunststoffkappen zusammen.

Schließen Sie das Abflussrohr an den vorgesehenen Auslass an und sichern Sie es, wobei Sie auf die richtige Ausrichtung achten. Installieren Sie das Abflussrohr und dichten Sie die Verbindungen bei Bedarf mit wasserdichtem Klebeband oder Kleber ab.

Bauen Sie die Tür und das Türschloss gemäß der Abbildung zusammen.

Garden shed should be installed on the hard ground like concrete foundation, the surface of ground should be flat and the size should follow the dimension of drawing

- Install the aluminium bottom frame as the diagram shows.
- Use the M8 screw bit to drill holes in the aluminium bottom frame.
- Before fixation, use the spirit level to check the levelling of the aluminium bottom frame as the diagram shows.
- Fix the aluminium bottom frame with the expansion bolts.

Please install one side of the frame and the WPC board first. For each WPC board installed, secure it to the frame with two screws at the connecting points.

Please install one side of the frame and the WPC board first. For each WPC board installed, secure it to the frame with two screws at the connecting points.

Snap the side rail into the groove of the frame.Fasten them together with screws.

Install the door frame as indicated in the diagram, ensuring alignment and secure fastening.

Install door frame and threshold. The door frame is secured during installation using both screws and WPC boards.

Install the remaining acrylic sheets and fasten them with screws once installed. After installing the remaining acrylic panels, use screws to firmly fix them in place.

Install the top beam and secure it with rivets.

Install composite gutters using corrosion-resistant fasteners and leave expansion gaps as per manufacturer guidelines.

Install the color steel tile

For frame connections, use Q8 screws. Secure the raised areas of the metal roofing sheet with Q9 screws and the tail ends with Q10 screws. Attach to the frame using Q8 screws. Fix the corrugated sheet's protruding parts with Q9 screws and the ends with Q10 screws.

Install the aluminum verge frame as the diagram shows.

Assemble the 2 plastic caps.

Connect and secure the drainage pipe to the designated outlet, ensuring proper alignment.
Install the drain pipe and seal joints with waterproof tape or adhesive if required.

Assemble the door and door lock as the diagram shows.
