INTRODUCTION

Welcome to our studios in Aartselaar: the perfect environment for any type of video production. From livestreams and webinars to talk shows, e-learning, product launches, or television recordings – at DB Video, you'll find a professional setting that adapts seamlessly to your content and ambitions.

Our studios are fully equipped with cameras, lighting, sound, control rooms, livestream facilities, and set design options. Choose between a compact studio for smaller shoots or a larger modular space for more complex productions with multiple setups or a live audience.

Prefer working with your own crew? You can also rent the studio as a dry-hire, with or without technical support.

Whether you arrive with a detailed script or are still shaping your concept, our experienced team is here to guide you from start to finish – technically, creatively, and logistically.

This brochure introduces you to all available setups, studio configurations, and additional services designed to bring your message to life on screen.

STUDIO 1

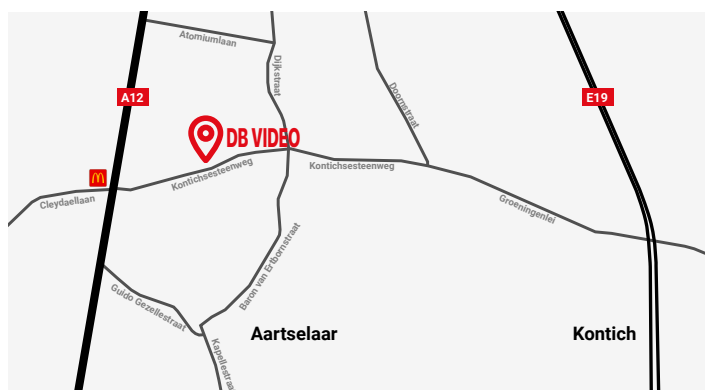

STUDIO 2

LOCATION

Our location offers convenience, comfort, and a warm welcome — right between Brussels and Antwerp. With generous on-site parking, including reserved spots right at the studio entrance, accessibility is never an issue, even for tight schedules or larger teams. Upon arrival, your guests are welcomed with care, ensuring a smooth and professional experience from the very first contact.

Need catering during your shoot? We've got you covered — from in-studio catering to delicious meals at our on-site restaurant, Foodconcept 42. For team briefings, client meetings, or production planning, we offer a variety of fully equipped meeting rooms that can be booked alongside your studio rental.

You'll also have access to a dedicated make-up and dressing room, reliable high-speed Wi-Fi, and printer facilities — everything you need to stay connected, comfortable, and in control throughout the day.

**7 YEARS
AND
25 BEYOND**

**MODULAR
STUDIO 1 - 120M²**

A STUDIO THAT ADAPTS TO YOUR STORY

LED WALL

In our 120m² modular studio, flexibility meets high-end production. Whether you're recording a talk show, keynote, product launch, e-learning, or branded video content — this space is designed to fit your concept, not the other way around.

One of the most impactful setups is our LED-wall configuration, offering a dynamic, high-resolution backdrop that brings your visuals to life in real time. Looking for something even more immersive? Our post-production team can build fully custom virtual environments, enabling virtual production that adds depth, movement, and branding — without the need for physical sets.

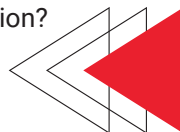

The studio is fully equipped with professional lighting, sound, multi-camera setups, and livestream capabilities. And we don't stop at the tech: we can also support you in set design, including the selection and setup of tables, chairs, stage layouts, and full spatial styling — tailored to the tone and message of your production.

From minimalistic to dynamic, from real to virtual — our studio scales with your story and brings it to life, in every detail.

MODULAR STUDIO

BLACKBOX

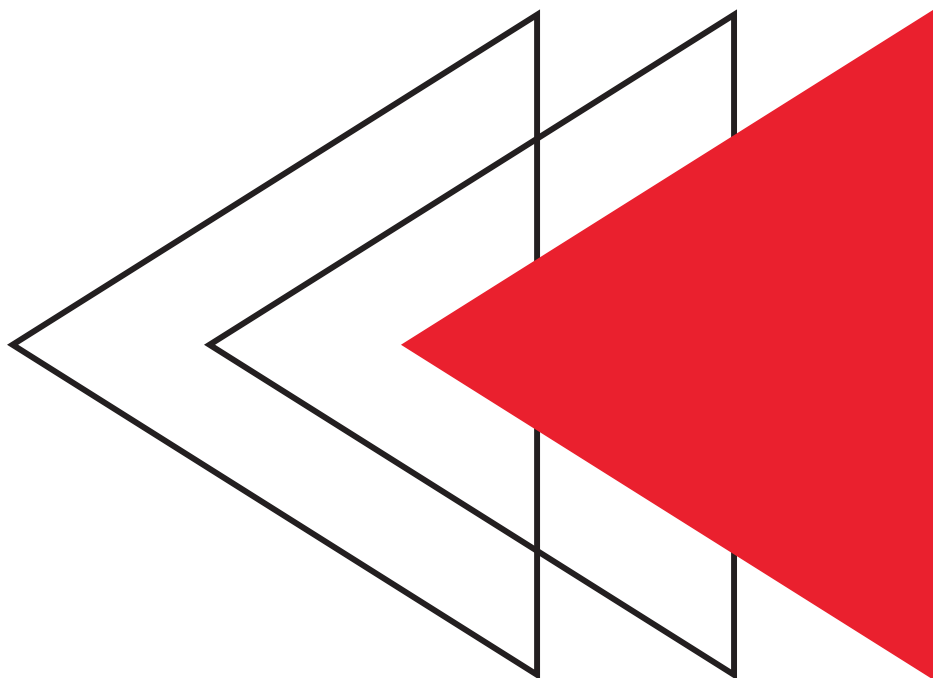

For productions that require total freedom, the space can be transformed into a full black box, with 360° black draping — allowing you to start from scratch and build your set entirely according to your concept. Whether you're going for sleek and corporate, bold and branded, or something highly stylized, the space adapts to the visual tone you want to create. Our team can also support you in curating the full look and feel of your shoot — from stage layout and furniture to overall set styling.

GREENKEY

Another versatile option within the studio is the greenkey setup, ideal for productions that require keying techniques or full virtual integration. Whether you're replacing the background in post-production or using it as a base for live virtual production, the greenkey offers maximum creative flexibility. It's perfectly suited for presentations, e-learning content, corporate explainers, and also widely used for music videos – where stylized effects and animated environments can take the visuals to the next level. Combined with motion graphics, 3D elements, or interactive overlays, this setup allows your content to break free from physical limitations and stand out visually.

MODULAR STUDIO 2 - 40M²

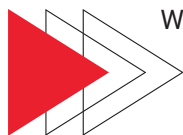

COMPACT, VERSATILE AND PRODUCTION-READY

Looking for a smaller-scale studio with the same professional capabilities? Our 40m² modular studio offers all the core functionalities of our larger space — including high-end lighting, audio, multi-camera setup and livestream options — but in a more intimate setting that's ideal for focused productions.

The space can be configured in several ways. As a black box, it offers a clean slate for set design and controlled lighting. While there's no LED wall in this studio, we offer a clever visual alternative: custom-printed backdrops, mounted in LED-lit frames, which create the illusion of a vivid, high-resolution background. Choose from pre-designed prints — like office spaces, skylines or library walls — or provide your own branded visuals for a tailored look.

The studio is also available as a greenkey setup, ideal for keying in virtual elements or animated environments. While this space isn't suitable for full-body chroma keying, it works perfectly for seated or waist-up framing — making it a great fit for e-learning, interviews, corporate messages or content creators.

Compact in size, big on possibilities — the Modular Studio 40m² gives you all the tools to create polished, professional content in a flexible and efficient environment.

STUDIO SERVICES

STUDIO SERVICES

PARKING

Each studio building has a spacious parking area. For each production, we reserve 4 parking spaces at the entrance with logo signs. Your guests or colleagues will see where they can park upon arrival.

MAKE-UP & LOGES

Each studio has a space where your guests can relax, prepare, or wait in peace. A professional makeup mirror is provided. A completely separate dressing room, further away from the production area, can be arranged upon request.

CATERING

Throughout the building, drinking fountains are available. Each studio location is equipped with a kitchen that includes coffee and tea. For each production, we provide chilled soft drinks and small snacks. If you would like sandwiches, breakfast, or a full meal, this can be arranged upon request.

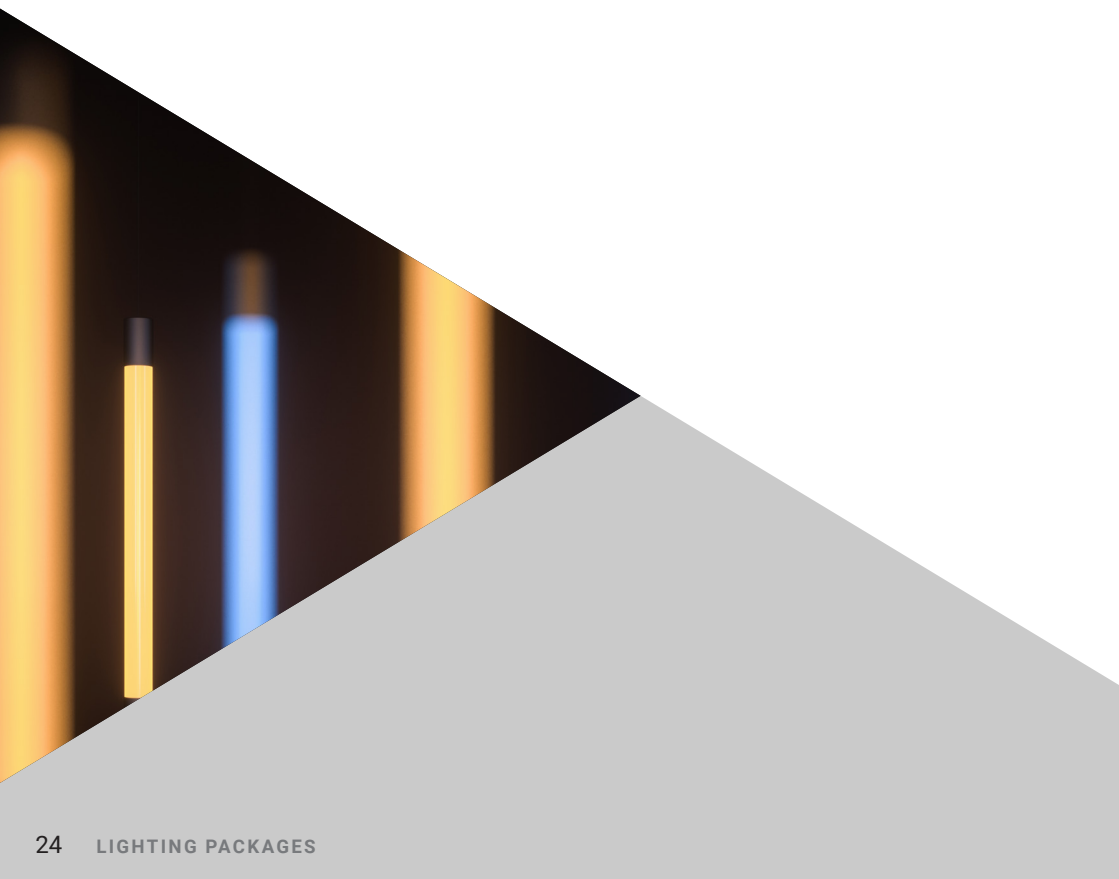

FOODCONCEPT 42

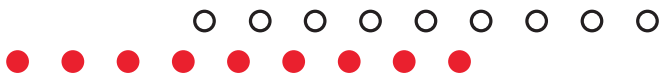

At Foodconcept 42, our company restaurant, you can enjoy a relaxing lunch between recordings. With its inviting atmosphere, it's the perfect place to unwind and recharge. Whether you prefer a quick bite or a leisurely meal, Foodconcept 42 offers a variety of delicious options to suit every taste. Join us for a break from the action and experience a culinary retreat right on-site.
