

Ultra-fast

Charging times below 15 minutes. The RADOX® HPC allows the power-throughput of a charging system to be multiplied and puts super-fast charging within reach even with big battery packs of new electric vehicles and trucks.

CCS1 & CCS2

Available with Combined Charging System (CCS) type-1 (USA, Canada) or type-2 (Europe)

Flexible & lightweight

Thin, highly flexible and easy to use. Due to the integrated cooling system the system offers a much smaller cable cross section than the traditional option. The cables are thin, highly flexible, lightweight and easy to handle.

Safe & secure

Secure and hygienic application. The technology provides a leakage control system, bend protection grommets and an integrated stress relief.

RADOX® HPC - High power charging system

Guaranteed fast, convenient and safe charging.
