Company history

IT ALL STARTED BACK IN 2024...

Our DJ Business began as a division of Pioneer Corporation in 1994 when it released the world's first commercially available flat-top DJ CD player, the CDJ-500. It was rated highly by top DJs, and as word spread throughout the dance music world, it received much media attention, glowing reviews, and prestigious awards. As part of the team involved in the design of the CDJ-500, I'm still hugely proud of how it was received.

The year 2024 will mark the 9th anniversary since our company became independent from Pioneer Corporation. This year, we're proud to announce we'll release new products, under the brand AlphaTheta, that will propel us into the future while maintaining the quality and innovation you've come to expect from us. These products will bear the AlphaTheta brand logo, which symbolizes diversity and growth, as well as the merging of different energies that resonate harmoniously.

Looking ahead, the AlphaTheta and Pioneer DJ brands will keep bringing you new experiences.

As a company, we'll continue to evolve, create innovative products and services, strive for the development of the music industry, its culture, and take on new challenges.

We look forward to another great year in music and hope our valued customers will continue to support AlphaTheta. As always, everyone at our company will work hard each day, to achieve our mission: One Through Music.

January 2024

euphonia

Professional 4-channel rotary mixer

Built-in Send FX to bring depth and breadth to your sound

Euphoric sound with digital clarity and analog richness from Rupert Neve Designs transformer

The Euphonia rotary mixer embodies a blend of tradition and innovation, showcasing a "two-tone, two-layer" design. Its channel strip integrates classic mixer components, accented by matte and gloss textures to delineate from the modern display section. This design fuses analog and digital elements, highlighted by the warm copper tones of the main knobs and sleek black wood side panels.

The mixer includes five built-in spatial effects—Delay, Tape Echo, Echo Verb, Reverb, Shimmer, along with a high-pass filter (HPF)—to enrich your music's depth and texture. Additionally, a Send/Return section allows for external effects integration. Each channel features a dedicated knob to adjust the send level for precise effect application.

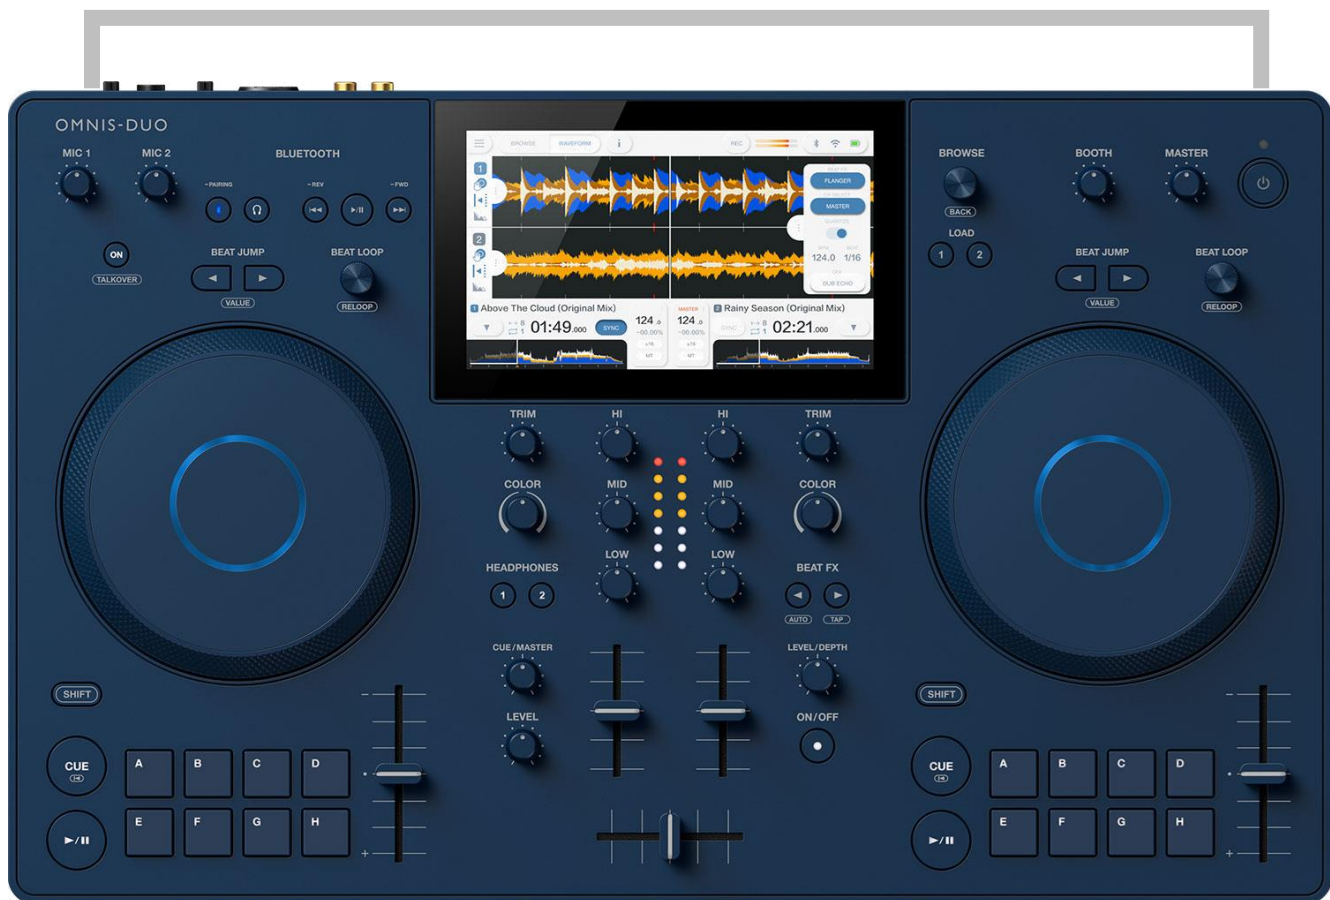

The unique time knob, designed specifically for the Euphonia, offers a clicking sensation that synchronizes with BPM for certain effects, while providing a smooth, click-free adjustment for others, enabling precise control over effect timing.

OMNIS-DUO

Portable all-in-one DJ system

Portability and playability:
turn any location into a party venue instantly

Introducing the AlphaTheta Omnis-Duo, a revolutionary all-in-one DJ system that blends cutting-edge technology with portability and style. Designed for DJs on the move, the Omnis-Duo offers a range of professional features packed into a sleek, compact unit that's as at home at a spontaneous beach party as it is in a professional club setting.

The AlphaTheta Omnis-Duo combines portability with powerful DJ functionalities. Its compact, lightweight design easily fits into a backpack, while the stylish indigo hue and minimalist top plate enhance its sophisticated look. The system boasts a 2-deck + mixer layout with touchscreen modes adaptable for any lighting condition, ensuring optimal usability.

It offers up to five hours of playtime on a single charge, with an optional Eco mode for extended battery life, and can also be powered through an AC adapter or USB Type-C. Unique in its class, the Omnis-Duo features Bluetooth audio output, allowing DJs to play music in various settings without conventional setup limits, and includes professional XLR and RCA outputs. It also supports Bluetooth audio Input, enabling seamless integration of music from external devices.

The system plays music from USB drives, SD cards, or directly via USB Type-C, and is compatible with rekordbox and Serato DJ Lite. Wi-Fi® capability expands access to music from multiple devices, removing the need for physical media. Additionally, the Omnis-Duo incorporates SonicLink technology for ultra-low-latency, wireless DJing, making it highly adaptable for performances in any venue, from outdoor settings to professional environments.

This makes the AlphaTheta Omnis-Duo a versatile tool for DJs seeking to enhance their performance capabilities.

The AlphaTheta Omnis-Duo is not just a DJ system; it's a statement of style and a testament to technological advancement in the world of mobile DJing.

DDJ-FLX2

Compact 2-channel DJ controller

Getting into DJing is super easy!

All you need is some gear and a love for music.
It's a fun and awesome way to really enjoy music.

The DDJ-FLX2 is all you need to kick off your DJing journey and enjoy music your way.

Getting into DJing is super easy! All you need is some gear and a love for music. It's a fun and awesome way to really enjoy music.

•**Versatile DJ Software Compatibility**

The DDJ-FLX2 works seamlessly with popular DJ applications like rekordbox and djay, making it perfect for both beginners and pros. Simply install your preferred app on your smartphone, tablet, or PC/Mac, connect to the controller, and start mixing. Ready for a challenge? Use advanced DJ software like Serato DJ Lite to take your skills to the next level.

•**Stream Music Effortlessly**

Access millions of tracks through top music streaming services, including Beatport Streaming, Beatsource Streaming, SoundCloud Go+/DJ, and TIDAL. If you're using djay, you can even stream from Apple Music. Please note that availability depends on your chosen app and location.

•**Compatible with Your Favorite Devices**

Whether you prefer mixing on a smartphone, tablet, or PC/Mac, the DDJ-FLX2 lets you DJ without the need to buy new gear.

•**Lightweight & Portable Design**

Designed to be lightweight and compact, the DDJ-FLX2 is easy to carry and loaded with intuitive features that help you mix like a pro right from the start.

Mix support functions

It's easy to replicate the seamless song mixing of professional DJs thanks to the Smart CFX* and Smart Fader* features on the DDJ-FLX2.

DDJ-GRV6

4-channel performance DJ controller

FIND YOUR GROOVE

DDJ-GRV6 offers everything you need to elevate your DJ performance. Featuring large jog wheels, perfect for precise scratching, and 8 Performance Pads positioned just like on the flagship CDJ-3000 multi player, this controller is designed for professionals and enthusiasts alike.

With Beat FX from the DJM-A9 integrated into the mixer, you can seamlessly combine scratching with advanced pad and effect techniques, delivering dynamic performances that feel like you're working on club-standard equipment.

Take your sets to the next level with expressive control and versatility—perfect for crafting unforgettable moments in any club setting!

Unleash Your Creativity with the Groove Circuit

The DDJ-GRV6 strikes the perfect balance between functionality and simplicity. Its minimalistic display and intuitive indicators ensure seamless access to essential features, while the Groove Circuit sits conveniently above the Performance Pads. The innovative “step-up” design prevents accidental touches on the jog wheels, allowing you to stay focused on crafting intricate or straightforward performances with ease. Groove Circuit: Redefining Live Remixing The Groove Circuit lets you freely manipulate drum parts, making remixing tracks effortless. Replace drum loops on-the-fly with just a button press, transforming genres and creating unique live remixes. Add effects to drum parts to craft fills, build-ups, and breakdowns, taking your sets to new creative heights. Whether you’re exploring Amapiano, Deep House, or other genres, this sleek design empowers DJs in South Africa to deliver truly innovative performances.

 **rekordbox**

Multi-device compatibility
You can choose to use the DDJ-GRV6 with not only rekordbox for Mac/Windows but also rekordbox for iOS/Android.

XDJ-AZ

4-channel professional all-in-one DJ system

The XDJ-AZ brings the layout and feel of the flagship CDJ-3000 and DJM-A9 to your fingertips, offering an intuitive and seamless experience.

Whether you're mixing Amapiano, Deep House, or other genres, the XDJ-AZ ensures every performance is smooth, professional, and packed with possibilities.

Experience Club-Standard Performance with the XDJ-AZ

- Equipped with full-size jog wheels inspired by the CDJ-3000, the XDJ-AZ delivers an ultra-smooth experience for pitch bending and scratching.
- The mixer section adopts the intuitive layout of the DJM-A9, with strategically placed controls to maximize playability and user-friendly buttons for assigning Beat FX, allowing you to truly express your creativity.
- By mastering the XDJ-AZ, you'll feel right at home with professional club equipment, making transitions to club performances seamless and effortless.
- With 4-deck playback support, the XDJ-AZ offers unmatched versatility. Add layers to your mix, create live mashups, collaborate back-to-back with other DJs, or prepare multiple tracks to drop at just the right moment.
- The system is PRO DJ LINK™ compatible, enabling seamless integration with CDJs and syncing beat and on-air information across players, ensuring you stay in full control of your performance.
- Compared to its predecessor, the XDJ-XZ, the XDJ-AZ features noticeable upgrades, including a 32-bit D/A converter from ESS Technology. This enhancement significantly improves sound quality, delivering clear and dynamic audio that resonates powerfully in both large venues and intimate club settings.

Hardware Unlock

The XDJ-AZ is a Hardware Unlock device. Simply plug the XDJ-AZ into a PC / Mac running the rekordbox application and you can use the software.

HDJ-F10

Professional wireless DJ headphones

Unleash Your Creativity with the HDJ-F10 Headphone

Experience unparalleled freedom in the DJ booth or on stage with the revolutionary HDJ-F10 system, featuring SonicLink technology. This groundbreaking innovation allows you to move seamlessly as you perform, eliminating the restrictions of traditional headphone cables and giving you the flexibility to engage more dynamically with your audience.

HDJ-F10: Built for Precision and Durability

Crystal-Clear Monitoring in Any Environment

With the SonicLink wireless connection, the HDJ-F10 headphones let you hear your music loud and clear, even in the most chaotic DJ booths or on stage.

Designed for high-quality sound reproduction at high volumes, they ensure accurate monitoring when it matters most. Featuring newly developed earpads and housing structures, these headphones offer exceptional sound insulation, surpassing even the industry-leading HDJ-X10 model, so you can focus entirely on your performance. Engineered for Professional Use.

SonicLink
Ultra Low Latency Technology

Long battery life for
extended DJ sets

Feel confident that your headphones will go the distance, even if you're playing a long DJ set. A full battery gives you 9 hours' use with SonicLink.

AlphaTheta

HDJ-F10TX

Professional wireless DJ headphones *Incl Transmitter

Enjoy total freedom in the DJ booth or on stage with the HDJ-F10 system, which includes the uniquely developed SonicLink technology that enables you to move around as you DJ, without the constraints of headphone cables.

The HDJ-X10TX Includes the dedicated transmitter which enables SonicLink connection.

Superior Sound and Unmatched Durability
Impeccable audio, even in noisy environments, with the HDJ-F10 headphones and their SonicLink wireless technology.

Designed for high-volume playback and accurate monitoring, these headphones ensure your music is delivered with precision. Their newly developed earpads and housing structures provide superior sound insulation, surpassing the performance of Pioneer DJ's flagship HDJ-X10 model, so you can focus entirely on your mix.

Built for the Demands of Professionals The HDJ-F10 headphones are engineered to withstand the rigors of professional use. Tested to meet the US Military Standard MIL-STD-810H Shock test, they offer unparalleled durability and reliability, ensuring they're ready to perform wherever your gigs take you.

Perfect for the intense demands of DJs and live performers, these headphones are built to last.

SonicLink 9hours

Bluetooth® 30hours

Dedicated transmitter which enables SonicLink connection

The dedicated transmitter HP-TX01 instantly transfers sound to the HDJ-F10 via ultra-low latency wireless communication with simply connecting to DJ mixer. Any DJ mixer equipped with a PHONE or 3.5 mm stereo mini jack monitor output can be used with the HDJ-F10. It is compact, lightweight, and easy to carry with your gear.

AlphaTheta

WAVE-EIGHT

8" portable DJ speaker with SonicLink

Introducing the AlphaTheta WAVE-EIGHT, the ultimate speaker system crafted for the modern DJ who values both mobility and superior sound performance.

This state-of-the-art speaker offers a seamless DJing experience thanks to its SonicLink technology, an ultra-low-latency wireless feature that transmits audio much faster than traditional Bluetooth. This ensures that sound plays almost instantly after pressing play, allowing for flawless live mixing.

The WAVE-EIGHT is not just about connectivity; it also excels in sound quality. Powered by a highly efficient Class D amplifier and equipped with a newly developed 8-inch driver, the speaker delivers clear and powerful audio. It also features a Vortex Bass Accelerator, which pumps out clear and impactful bass, perfect for keeping the energy high at any event, even outdoors.

Designed for versatility, the WAVE-EIGHT offers multiple sound modes including Mono, Stereo, and Subwoofer settings that can be changed with a single switch to suit different types of events or spaces. For larger venues or events, it's easy to expand your setup by connecting additional WAVE-EIGHT units using the SonicLink connection. This allows for configurations like two speakers in stereo or adding a third as a dedicated subwoofer to enhance the bass further.

Durability and portability are also key features of the WAVE-EIGHT. The speaker's battery can last up to 8 hours on a full charge, allowing you to keep the music going all night long. It's also waterproof with an IPX4 rating, making it ideal for outdoor use. The design includes an extendable handle, casters, and additional grab handles for easy transportation. Plus, there's a built-in pole socket for mounting the speaker on a stand to optimize sound projection.

Additional practical features include a USB Type-C port for charging devices such as smartphones, ensuring you never run out of battery during an event. The speaker also has a dedicated compartment for storing the wireless transmitter, simplifying the setup and connectivity process.

The AlphaTheta WAVE-EIGHT is designed to meet the rigorous demands of DJs who require freedom from cables and desire robust sound and flexible performance capabilities.
