ONE LIBRARY PER VILLAGE

Empowering Tomorrow: Implementing NEP 2024 and the Role of Mini-Libraries

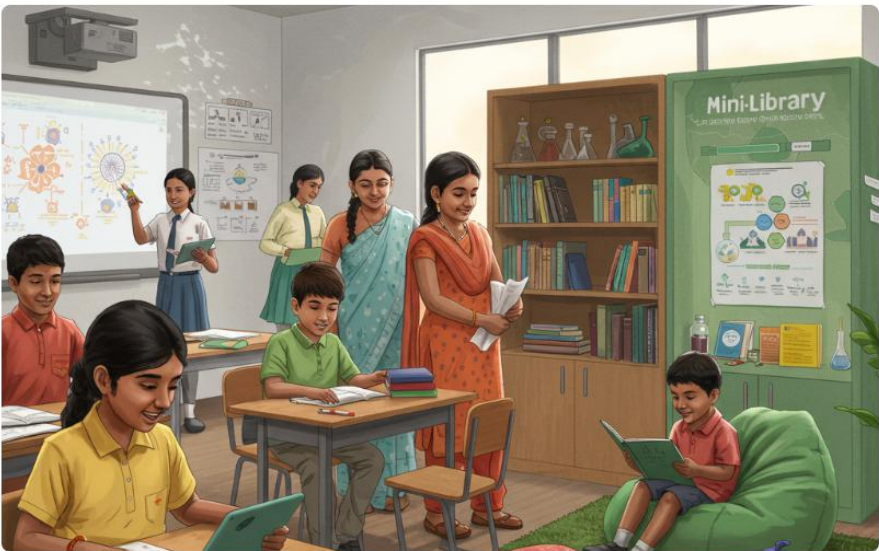

*A Practical Guide for Institutional Transformation and
Community Engagement through the National
Education Policies of 2020 and 2024*

Any institution that chooses to ignore NEP 2024 risks clinging to outdated methods that no longer serve today's learners. In contrast, those that embrace the policy position themselves at the forefront of educational innovation, relevance, and inclusivity.

By adopting NEP 2024, institutions become catalysts for shaping a future-ready, equitable, and vibrant learning ecosystem.

Appendix A: NEP 2020 and 2024 Key Milestones	167
Appendix B: Mini-Library Setup Checklist	169
Appendix C: Funding Resources	172
Appendix D: Training Modules for Staff	174
Glossary	179
Key Terms from NEP and the Mini-Library Ecosystem	179
Glossary of Terms	179
Next Steps: Taking Action to Transform Education	184

When institutions align with NEP, education stops being transactional and becomes transformational. It shifts the focus from rote memorization to real understanding, from marks to meaning. Students are no longer passive receivers of information but active participants in their own learning journey. In doing so, institutions begin to nurture not just students, but informed, responsible, and capable citizens prepared to contribute meaningfully to society.

Introduction

For teachers, NEP is not more work—it is more meaning. It returns the joy of teaching by focusing on curiosity, creativity, and connection over rote performance.

The National Education Policy — Vision and Relevance

The National Education Policies of 2020 and 2024 mark a transformative shift in India's approach to education, aiming to make it more inclusive, flexible, and future-ready. Rooted in equity, foundational literacy, and holistic development, NEP envisions a learner-centered system that empowers individuals and communities. This chapter explores the vision, goals, and critical relevance of NEP in shaping tomorrow's India.

“Education reform doesn’t begin in policy papers — it begins in the lived realities of classrooms, libraries, and communities. NEP 2024 gives us the framework, but it’s the local actions that bring it to life

India's education landscape is undergoing its most significant transformation since independence. The **National Education Policy (NEP) 2020**, followed by the updated **NEP 2024**, represent a visionary blueprint aimed at building a holistic, learner-centered, and future-ready education system. These policies shift the focus from rote learning to **critical thinking, creativity, and community engagement**, placing the learner at the core.

II

The Mini-Library Movement — Power at the Grassroots

The Mini-Library Movement, driven by the vision of “One Library Per Village,” empowers communities with accessible, inclusive learning spaces. Aligned with NEP 2020 & 2024, these libraries promote foundational literacy, digital access, and lifelong learning. This section explores how grassroots knowledge hubs can transform education, bridge equity gaps, and foster a culture of reading and curiosity.

A Mini-Library may be built with a few shelves and a handful of books — but what it offers is far greater: access, equity, and a space for imagination to take root in every corner of India.

True transformation in education comes when learning is no longer limited to classrooms. When a child reads under a tree, or a farmer learns from a book at the Panchayat library, the spirit of NEP is realized

SETTING UP A MINI-LIBRARY IN YOUR INSTITUTION OR VILLAGE

Books alone don't change lives — but access to books does. A Mini-Library in every village is not just a resource; it's a right, a responsibility, and a revolution waiting to unfold.

III

Aligning Your Institution with NEP 2020 & 2024

This section guides schools, colleges, and learning centers to integrate NEP reforms into everyday practice. From curriculum flexibility and multilingual learning to faculty development and community involvement, it offers actionable steps for institutions to transform into inclusive, future-ready ecosystems aligned with national education goals.

National Education Policy 2020 & 2024

IV

NEP Goals in Action — How Mini-Libraries Support the Agenda

Mini-Libraries are grassroots tools that turn NEP's vision into real, community-powered change. From promoting foundational literacy to encouraging lifelong learning, they foster inclusion, multilingualism, and experiential education. This section explores how Mini-Libraries directly support NEP 2020 & 2024 goals, bridging classrooms and communities through accessible knowledge.

Mini-Libraries are not about quantity, but about quality of access. They remind us that even the most powerful education movements begin with something small, local, and deeply human

V

Strengthening the Movement — Leadership, Innovation & Community Empowerment

This part explores how lasting educational change is powered by local leadership, creative problem-solving, and collective ownership. It highlights how institutions and communities can champion NEP values, scale impact through collaboration, and sustain the learning revolution by building resilient networks rooted in trust, innovation, and grassroots participation.

NEP 2024 isn't just an academic reform — it's a social mission. And every institution that opens its gates to the community becomes a lighthouse for lifelong learning

VI

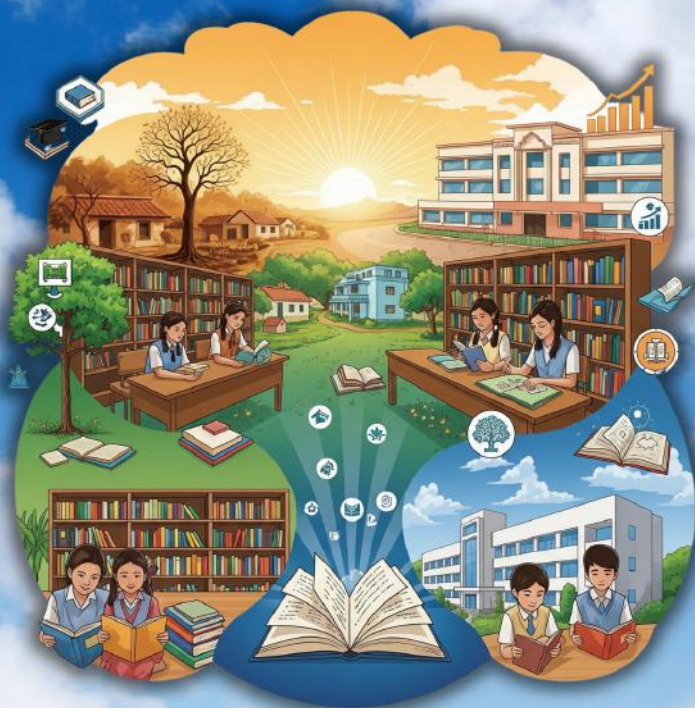

Looking Ahead

As India advances toward a learner-centric, inclusive, and future-ready education system under NEP 2020 and 2024, the focus shifts to collaboration, innovation, and continuous improvement. This section explores how institutions, educators, and communities can align efforts to realize the NEP vision. It's a call to action to reimagine education as a shared responsibility that empowers every learner and enriches society.

If we are to truly empower tomorrow, we must democratize knowledge today. And the first step is placing learning within reach of every learner — not just in cities, but in every village, every home

EMPOWERING TOMORROW: IMPLEMENTING NEP 2024 AND THE ROLE OF
MINI-LIBRARIES

The journey to transform education starts with a single step. By starting a mini-library, you can empower your community, bridge educational gaps, and contribute to India's vision of becoming a global knowledge super-power. Take action today—your efforts can shape a brighter tomorrow for generations to come.

When institutions align with NEP, education stops being transactional and becomes transformational. It nurtures citizens, not just students
