ABOUT US

Green Land Agro, established in 2020, is a trusted provider of organic agricultural products including cow dung items, jaggery, ghee, and dehydrated vegetables. We focus on delivering natural, chemical-free products that support sustainable farming and healthy living.

With a strong commitment to quality, hygiene, and customer satisfaction, we ensure that every product meets the highest standards. Our goal is to bring nature's purity directly to our customers while supporting traditional farming practices.

In addition to our core offerings, we continuously strive to expand our product range by incorporating innovative processing methods while preserving traditional values. Our dehydrated vegetables are carefully processed to retain their natural taste, color, and nutritional value, making them ideal for both domestic and commercial use. We source our raw materials directly from reliable farmers who follow ethical and eco-friendly farming practices.

At Green Land Agro, we believe in building long-term relationships with our customers by maintaining transparency, consistency, and trust.

PRODUCTS

Jaggery

Jaggery Powder

Jaggery Powder is a natural, unrefined sweetener made from pure sugarcane juice. Rich in minerals like iron and calcium, it supports digestion and boosts energy. It is widely used in traditional sweets, beverages, and healthy recipes, offering a rich caramel-like taste and a healthier alternative to refined sugar.

Jaggery Cubes

Jaggery Cubes are natural sweeteners made from concentrated sugarcane juice without chemicals. Rich in minerals like iron and calcium, they support digestion and boost energy. Commonly used in traditional sweets, tea, and desserts, jaggery cubes offer a healthy alternative to refined sugar with a rich, caramel-like taste.

PRODUCTS

Cow Dung

Cow Dung Powder

Cow Dung Powder is an eco-friendly, organic product widely used in agriculture, gardening, and traditional practices. It enriches soil fertility, promotes healthy plant growth, and acts as a natural pest repellent. Also used in rituals and eco-products, it is valued for its antibacterial properties and sustainable, chemical-free benefits.

Wet Cow Dung

Wet Cow Dung is a natural and eco-friendly material widely used in agriculture, organic farming, and rural applications. It acts as a rich organic fertilizer, improves soil fertility, and supports microbial activity. Commonly used for biogas production and traditional flooring, it is sustainable, biodegradable.
