EJARQUE

The place where art meets function.

Pablo Ejarque González presents a distinctive perspective on contemporary design, where technical rigor meets artistic exploration. Designing is as much about shaping objects as it is about shaping perspectives – challenging conventions, finding meaning in process, and embracing the unexpected.

All Burnt Table

ART. FUSION. FUNCTION.

ABOUT ME

Pablo Ejarque-González is a Spanish designer based in Brooklyn, crafting pieces that explore the intersection of art and function through materials, craft, and form. With a foundation in Industrial Design Engineering from the Polytechnic University of Valencia (UPV) and an MFA in Furniture Design from the Rhode Island School of Design (RISD), he seamlessly blends technical precision with artistic experimentation.

As a self-proclaimed “mad-scientist,” he looks at every material with curiosity, letting his exploration and experimentations lead his design process, all in the pursuit of pushing boundaries between materials and ideas, utility and beauty.

Leaky Lamp II

DESIGNER PICK: Leaky Lamp I

Using the graphite-based biomaterial Pablo developed in 2024, this Leaky Lamp captures the unsettling image of an oil spill frozen in time. Pablo leans into the irony of this lighting piece, critiquing unsustainable practices while presenting a sustainable material. "Through this piece, the Leaky Lamp challenges us to confront the urgent need for sustainable material alternatives, reflecting the harsh realities of environmental degradation."

“YOU CANNOT FIND
NEW OR INTERESTING
RESULTS IF YOU ARE
NOT EXPLORING.”

- Pablo Ejarque González
