FUTURE OF IMAGING

In House Manufacturing

Genoray is a Medical & Dental equipment manufacturer that offers in-house manufacturing of its products. This means that the company has complete control over the production process, from design to assembly, allowing for strict quality control. Genoray's in-house manufacturing capabilities include injection molding, PCB assembly, cable assembly, and final product assembly. By keeping manufacturing in-house, Genoray ensures that its products meet high standards of quality and reliability while also allowing for faster turnaround times and the ability to make modifications quickly. This approach enables Genoray to maintain a competitive edge in the market and provide its customers with top-quality medical & dental equipment.

Continuous R&D Investment

- 8-10% Investment in Annual Sales
- 30% of all Researchers have Masters & Doctorates
- R&D Performance - 72 Cases (Government, External & Self)
- Intellectual Property - 47 Patents, 27 Trademarks
- Certification Status - 85 Cases (Domestic & International)

R&D Through Cross-Over By Different Sectors

- Integrated Management of Medical & Dental Research
- Specialized Technology by Sector - R&D

Internalization Of Core Technology

- Manufacturing Technology of X-Ray Generators
- Inhouse development of Flat Panel Detectors
- 3D Image Processing with Correction Algorithm
- Dedicated Software Development - THEIA, TRIANNA

3 Dedicated Detectors

The Genoray Papaya 3D is equipped with three dedicated detectors that enhance its imaging capabilities. These dedicated detectors of the Genoray Papaya 3D work in synergy, enabling clinicians to obtain high-quality, detailed images for accurate diagnoses and effective treatment interventions.

1 Scan 3 Images

The Genoray Papaya 3D imaging system revolutionizes dental diagnostics with its advanced capabilities. One scan with this cutting-edge device captures three highly detailed images, providing clinicians with a comprehensive view of the patient's condition.

All Axis Motorized Movement

CBCT

Free F.O.V & Dose Reduction:

Provides various F.O.V sizes and resolutions for all diagnostic needs.

Produces optimized images with minimal radiation exposure.

Panoramic

Multi Focus

Helps acquire the best optimized image from the multiple panoramic images acquired. The multi-focus function overcomes patient mis-positioning. The user is therefore able to find the most optimally-focused choice from a selection of images.

Standard Panoramic
Orthogonal Panoramic
Bitewing Panoramic

Fast

Ultra fast

Multiple Exposure Modes For Cephalometric

Lateral, AP, PA, Water's view, Submento vertex and Carpus

Foldable Chinrest System

Convenient patient positioning while saving room space

Easy access for disabled patients

One-Shot Cephalometric system provides distortion-free images with minimal motion artifacts

One-Shot Type *Optional
0.5 sec Fast Scanning

Chair *Optional

Minimizes the patient's movements to help reduce patient's motion artifacts

3D Volume Rendering

Various volume rendering options such as, X-Ray, MIP etc provide 3D image visualization

MPR (Multi-Planar Formatting)

MPR mode provides three plain view (axial, coronal and sagittal) on one screen for focused area diagnosis

Curved MPR

Possible to reconstruct the sectional images which is via any curves from Panoramic, Cross-sectional, Longitudinal

Dental Reformatting

Using panoramic, cross-sectional and longitudinal 2D view, you can plan your 'perfect' implant positioning

Improved image processing

SMARF™ (Smart Metal Artifact Reduction Function) minimizes the effect of metal artifacts caused by prosthetics to prevent image degradation.

Image Color-mapping

Color mapping increases the visibility of lesions

Measuring tools

Distance, Angle, Profile and arrow provides easy to use measuring tools.

Implant planning

Multiple layout support and nerve implementation enables accurate implant planning

Complete Implant Library

Support for DICOM 3.0

STL Export

Enables 3D printer and CAD/CAM to be used by converting 3D images to STL data.

Patient Scan

Stone Model Scan

Impression Model Scan
