

Nitrile with TentaGrip™ DISPOSABLE GLOVES

6 MIL Industrial Grade Thickness

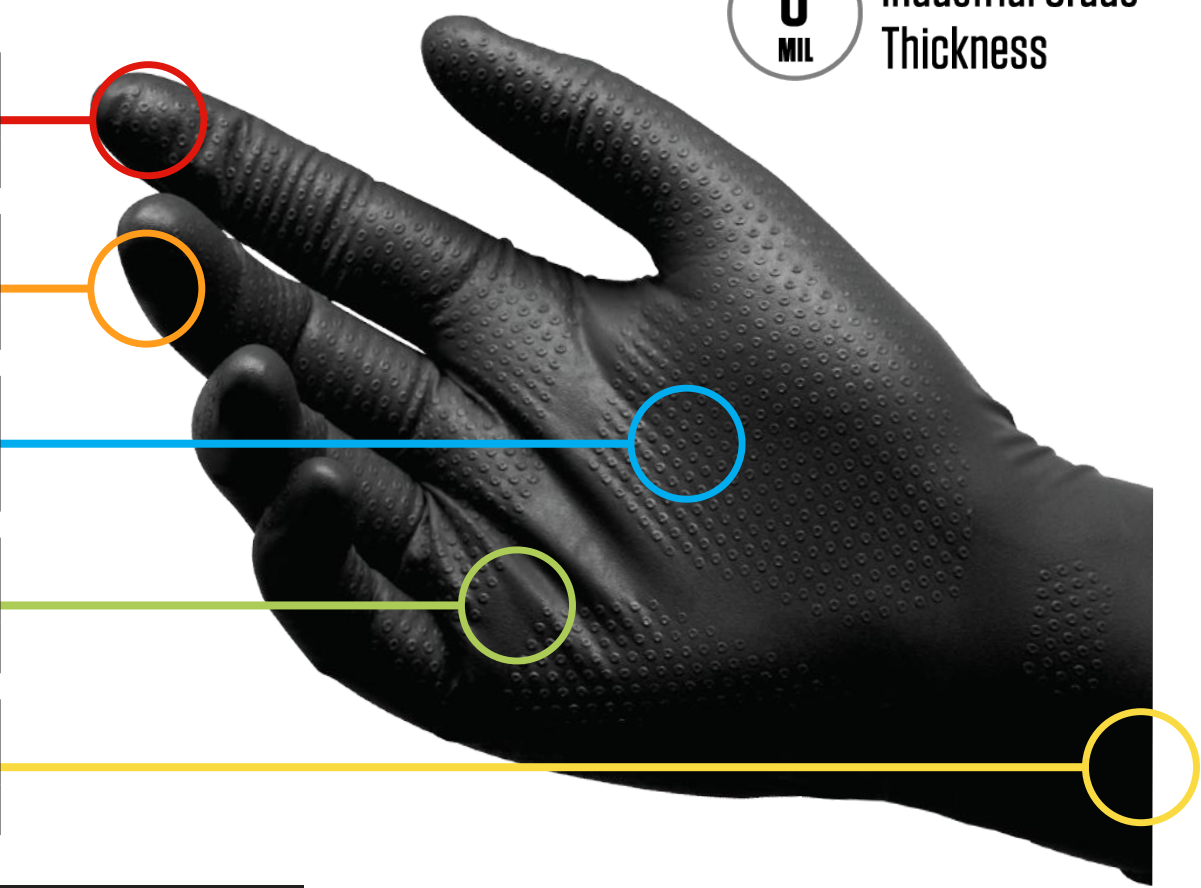

Finger Thickness on Texture
11.0 mils (0.28 mm)

Finger Thickness Flat Surface
7.5 mils (0.19 mm)

Palm Thickness on Texture
10.0 mils (0.25 mm)

Palm Thickness Flat Surface
6.0 mils (0.15 mm)

Cuff Thickness
5.0 mils (0.12 mm)

COMPETITOR COMPARISON

Glove thickness is typically measured in one of three areas:

- Fingertip
- Palm
- Cuff/wrist

Where supplier chooses to measure their gloves will reflect the mil thickness they advertise.

Great Stuff™ Nitrile with TentaGrip™ Disposable Gloves are measured at the palm without texture. The palm is the largest surface on the glove and most accurately captures its viability.
