GU Secury Slam Shut Multi-Point Door Lock

for Modern or Classic style doors

The GU Secury range of slam shut front entrance door locks are a high-security and high-performance product, designed in the UK to German specification.

- 20mm Radius Faceplate (16mm straight through option also available)
- Dead bolts rather than hook bolts (which can cause misalignment issues)
- Tested and achieved PAS24
- Flush fully adjustable keeps, centred for 44 and 54mm doors
- Lever handle can be fitted internally for swift exit
- Simple $\frac{3}{4}$ turn of cylinder to fully dead lock door opposed to key winding 720 degrees
- 45mm Backset (55mm available, please ask for details)
- **55mm Backset for centering to handle on wider stiles (standard lock without night latch facility)**

Scan for more details on keeps

Inexpensive keeps with easy adjustment

Eccentric keep adjustment by screwdriver for alignment when required. The night/day latch facility is included in the lock rather than the keep. Keeps do not require a magnet to engage the lock (as with AV4) which has been known to require replacement, due to failure.

Technical drawings available online including routing details, please scan to download.

GU Security LogIQ Lock in detail

AUTO LOCK LATCHES/DEADBOLTS

Multipoint (slam shut) door locks with hook bolts, can cause misalignment issues. This can lead to difficulty turning the key or gaps between the door and the frame. With dead bolts rather than hook bolts, this is much less likely to happen.

These deadbolts also have a unique catch that auto engages the deadbolts once they catch on the keep (as shown to the right).

MODERN = 2 LOCKING POINTS
CLASSIC = 3 LOCKING POINTS
