## Insights & Engagement from Recent TAPA APAC Activities

Dear Members,

It is with great enthusiasm to share some important updates and insights from recent events and polls within our TAPA APAC community. Firstly, we would like to announce that the confirmed dates for the TAPA APAC's annual conference - Supply Chain Resilience & Sustainability (SCRS) Conference & Awards and our 2024 Annual General Meeting (AGM) on June 25th and 26th.

**Please mark your calendars and register for these events!**

**More details regarding the agenda and venue will be announced soon.**

**ANNUAL GENERAL MEETING 2024**

25 June  
Shanghai, China / eAGM Live  
Telecast

I'm delighted to share the success of our recent TIS Webinar, which took place on March 28th. We had an engaging turnout of over 100 members who joined us to explore the key functionalities of TIS, including smart routing and much more. Furthermore, I'm excited to spotlight our recent membership interview with Century as part of our continuous efforts to build stronger connections within the TAPA APAC community.

Moving forward, I'd like to highlight the urgent need for TAPA TSR-certified partners, especially in light of recent incidents in China. It's crucial to prioritize the security and resilience of our supply chain, and working closely with trusted partners is essential for effectively mitigating risks.

Lastly, I'd like to share insights from the recent TAPA APAC polls conducted on February 6th and 21st, which shed light on the diverse perspectives and challenges within our industry, revealing the hurdles that lie ahead.

As we navigate the complexities of the supply chain landscape, let's stay vigilant and proactive in addressing challenges while seizing opportunities for growth and improvement. Your dedication and contributions to our shared goals are greatly appreciated. Together, let's overcome obstacles and drive positive change within our industry. Thank you for your continued commitment!

Best Regards,

**Matt Lee**

**Vice Chairman, TAPA APAC**

# TIS CARGO TAPA APAC INTELLIGENCE SYSTEM CRIME MONITOR

## APAC INCIDENT DATA FOR FEBRUARY 2024

## BIGGEST SINGLE LOSS IN FEB 2024

📍 Gujarat, India

Two trucks transporting a combined 64 tonnes of aluminum, valued at approximately \$180,900, disappeared during their journey from Renukoot to Mumbai, India. According to a report, both trucks diverted their route to Gujarat after reaching Nashik. Authorities have failed to establish contact with the drivers, noting their last known location as Ahmedabad in Gujarat, India, tracked via GPS.

TIS Webinar Replay

Supply chains are constantly under threat of losses by an array of incidents, ranging from pilferage and theft to the proliferation of counterfeit goods and other illicit activities. These threats pose significant risks to the integrity and efficiency of supply chain operations, jeopardizing not only the timely delivery of goods but also the reputation and financial stability of businesses across industries.

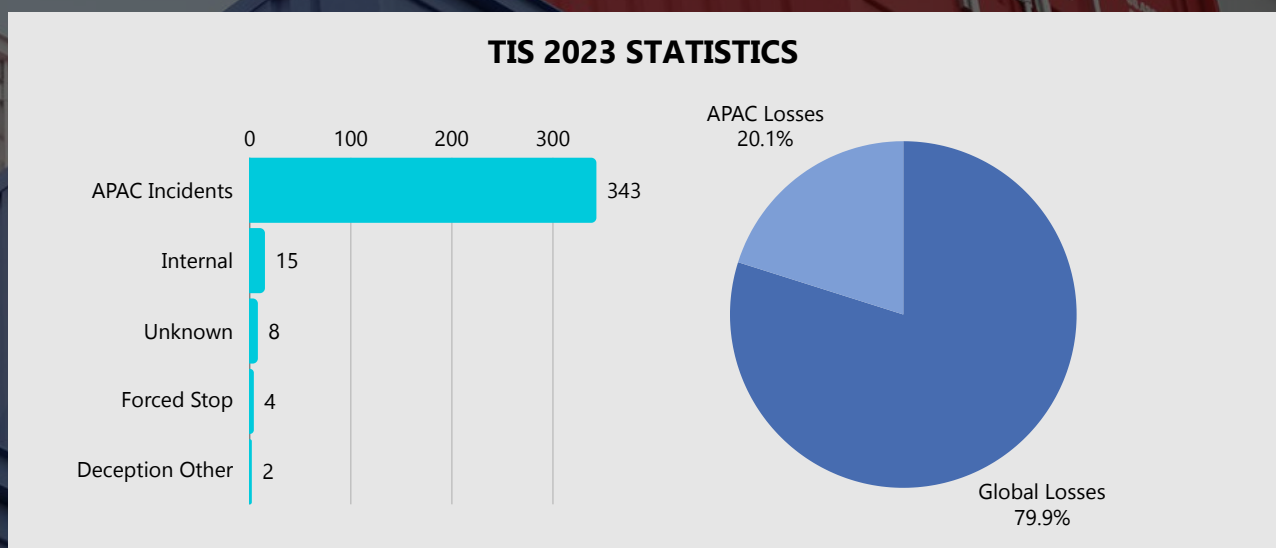

To help industry stakeholders and members stay ahead of criminal activity, TAPA APAC hosted the 'TAPA APAC Intelligence System (TIS) Webinar: Combatting Cargo Crime' on February 28th, 2024, offering a session for members to understand and utilize TIS to effectively combat cargo crime. With esteemed speakers and a robust agenda, the webinar engaged over 100 supply chain professionals and presented invaluable insights into leveraging data intelligence, mitigating risks, and fostering collaboration within the supply chain security ecosystem using TIS.

Host and moderator, Mr. Madu Lokan, Executive Director of TAPA APAC, sat the stage for the webinar by introducing the TIS platform and its mission. TIS is a tool which enhances the security and resilience of members' supply chain by providing insights of recorded cargo crime incidents globally, as well as information on facilities and operators which meet the TAPA Standards Certifications. TIS enables members to use the latest cargo crime intelligence and its route planning feature to avoid incident 'hotspots', suggesting resilient routes to take to protect their goods in transit.

To bolster the continuous development and refinement of TIS, TAPA APAC has established a dedicated TIS working group consisting of our member volunteers who are keen to drive greater resilience and are expert at their own fields. The working group serves as a catalyst for incident reporting and building partnerships with Law Enforcement Agencies (LEAs), ensuring its relevance and effectiveness in combating cargo crime. Led by Mr. Jason Le Busque, Global Head of Security of Toll Holdings, and Mr. Brett Marshall, Vice President Quality & HSSE of Zuellig Pharma, the working group currently has 22 member volunteers and supported by TAPA APAC TIS Expert, Mr. Kris Jason Arino.

Jason shared the key statistics provided by TIS – 2,539 total APAC cargo crime incidents with 815 TAPA Facility Security Requirements (FSR) and 128 Trucking Security Requirements (TSR) sites registered in APAC. With a global perspective on security challenges, Jason presented insights into operational strategies for leveraging TIS intelligence effectively. "TIS provides data for us to see what is going on in the region; helps us to gain insights about crime trends to support risk mitigation strategy; and supports collaboration between stakeholders like LEAs to further strengthen the supply chain", Jason mentioned.

Kris took attendees through a demonstration of TIS functionalities, showcasing key data insights and capabilities, including difference in features between member and public version of TIS, AI route recommendation avoiding crime, and anonymous incident reporting.

Attendees gain firsthand experience of TIS's potential in bolstering supply chain security efforts. He also shared the ongoing and upcoming TIS developments such as inclusion of TAPA Guarding Security Requirements (GSR) certified sites, USD currency display option and the APAC region filters for 'Cargo Crime Monitor' function.

Brett delved into the implementation of TIS within the pharmaceutical supply chain, shedding light on the unique challenges posed by cargo crime, counterfeit, illicit trade and product diversion. 'The TIS working group serves as a dual purpose in our ongoing commitment to security – being a structured platform for continuous reporting and documentation of incidents, and also dedicated to enhance the monitoring and surveillance of the supply chain industry by collaborating with LEA', Brett highlighted. He encouraged to leverage on TIS' threat intelligence to stay ahead of evolving risks that enables organisations to proactively adjust security measures and effectively mitigate potential threats to their supply chain.

### TIS IDENTIFIES 3 MAJOR CRIME TRENDS IN 2023

[Read the 2023 TIS Annual Report >](#)

Mr. Tony Lugg, Chairman of TAPA APAC, explained the purpose of TIS and TAPA Standards, "If we can get together to create a system and putting the processes in place, we can design out smuggling and choke the supply chain. What we need is data and intelligence. TIS is that intelligence platform that allows us to drive decisions, and influence the authorities in terms of addressing the issue of cargo crime." He urged members to join the working group to learn and contribute. TAPA APAC members are welcome to join the TIS working group for incident reporting, LEA collaboration and initiatives to enhance supply chain resilience.

The webinar concluded with an engaging Q&A session with questions regarding TIS utilization, benefits of TAPA certification, and effective collaboration strategies. By harnessing the power of TIS intelligence, collaboration, and innovation, stakeholders can unite in the fight against criminal activity, safeguarding global supply chains and fostering a resilient ecosystem for all.

For any queries related to TIS or to join the TIS working group please email to [tis@tapa-apac.org](mailto:tis@tapa-apac.org).

# Manufacturers Experience Less Losses with TAPA TSR-Certified Partners!

---

China relies on 17.3 million truckers as the vital part of its local transportation infrastructure to keep the economy growing, accounting for 75% of total freight, according to the Ministry of Transport in China. In conjunction with China's Belt and Road Initiative (BRI) and the New Silk Road project, the Chinese government has also rolled out policies that emphasize the need to ensure supply chain stability. For criminal actors, these new and emerging routes will present opportunities for more thefts and exploitation with easier access to source regions and consumer markets.

## Gaining a Competitive Advantage with TAPA TSR in the Face of Growing Risks

With APAC countries investing their land infrastructure and network, trucking resilience is no longer an issue within the company or between facilities. Upstream and downstream road freight risks can affect business performance and reputation. Companies are seeking to work with TSR-certified partners or achieve TSR certification to gain a competitive edge in the market.

## Benefits of TSR certification and/or working with a TSR-certified partner:

- Achieve globally recognized certificate, standing out from competition as a reliable and resilient player
- Reduce risk of liability and protect both products and employees
- Increases end-to-end supply chain resilience against thefts and pilferages
- Demonstrate the use of security protocol and practices that exceed industry requirements and position as industry leader
- Gain access to TAPA APAC's incident data for resilient route planning to avoid crime 'hot spot' areas
- Fulfill local legal and government regulations as compliant company

## Lack of Incident Information for Prevention

Companies often remained silent even after experiencing an attack on their trucking operations to avoid repercussions on brand image and in turn their business sales. The lack of crime data has caused trucking crime to proliferate further and companies are unable to improve their trucking routes. Hence, it is imperative for companies to only work with TAPA TSR-certified partners with a robust trucking operations and security measures in place.

## **Insider Thefts of Existing and Past Employees**

Supply chain corruption has also been a major concern for trucking thefts in China. Corrupt employees steal valuable goods or materials that they are transporting or keep access keys after leaving the firm to pilfer afterwards, having the knowledge of transport routes. Hence, it is critical that companies and partners attain TAPA TSR Standard that specifies the procedures for key management, proof of collection and delivery records, and managing unscheduled breaks for drivers.

Cargo trucks will continue to face a range of diverse ongoing and emerging risks in the years ahead. Members should remain vigilant and take the necessary steps to ensure their end-to-end supply chains remain resilient enough to adapt to the changing security landscape.

**Below is the list of TAPA TSR certified companies to complement your end-to-end supply chain trucking resilience.**

[\*\*Download the List of TSR-certified Companies >\*\*](#)

For more information about TSR, please email to [info@tapa-apac.org](mailto:info@tapa-apac.org).

# Century Reaffirms Commitment in Supply Chain Resilience with 6th Year of TAPA APAC Membership in 2024

As a longstanding member of TAPA APAC, Century Supply Chain Solutions continues to exemplify a steadfast commitment to supply chain resilience in 2024. With six years of dedicated membership, Century has established itself as a beacon of security and reliability within the industry. Through a network of certified warehouses and cutting-edge technology, they empower their clients with resilient and secure logistic solutions, ensuring operational efficiency and risk reduction. In a recent interview conducted by TAPA APAC, Century shared insights into their innovative approaches through the TAPA Standards and industry expertise, highlighting their role as a global leader in logistics services. As we embark on another year of collaboration, Century's unwavering dedication to excellence sets the standard for supply chain security in the Asia Pacific region and beyond.

## An Interview with Century's COO, Mr. Ian Menear

**Q: How have TAPA Standards bolstered Century's supply chain resilience and security?**

Century's expansion of their owned office network in Asia boosts connectivity and cost-savings for global clients. TAPA compliance ensures trusted warehousing and secure transit services. Comprehensive guidance enhances operations and fosters collaboration with industry peers. Adherence to TAPA standards instills customer confidence and drives continuous improvement.

**Q: How has adherence to TAPA Standards positively impacted Century's relationships with its clients and partners?**

Century enhances supply chains through adaptable technology and operational excellence. Amid pandemic-induced shifts, TAPA's real-time intelligence bolsters security measures. Certification underscores operational excellence, giving clients a competitive edge.

**Q: Have you noticed any improvements in risk management strategies after implementing TAPA Standards?**

Century, through TAPA collaboration, mitigates cargo theft risks effectively, maintaining a zero-record of incidents. Leveraging TAPA's real-time intelligence empowers proactive threat identification and mitigation, ensuring robust security measures. TAPA's insights enable staying ahead of evolving risks and implementing timely preventive measures.

**Q: Could you elaborate on any cost-saving measures or efficiencies that Century has experienced by aligning with TAPA standards?**

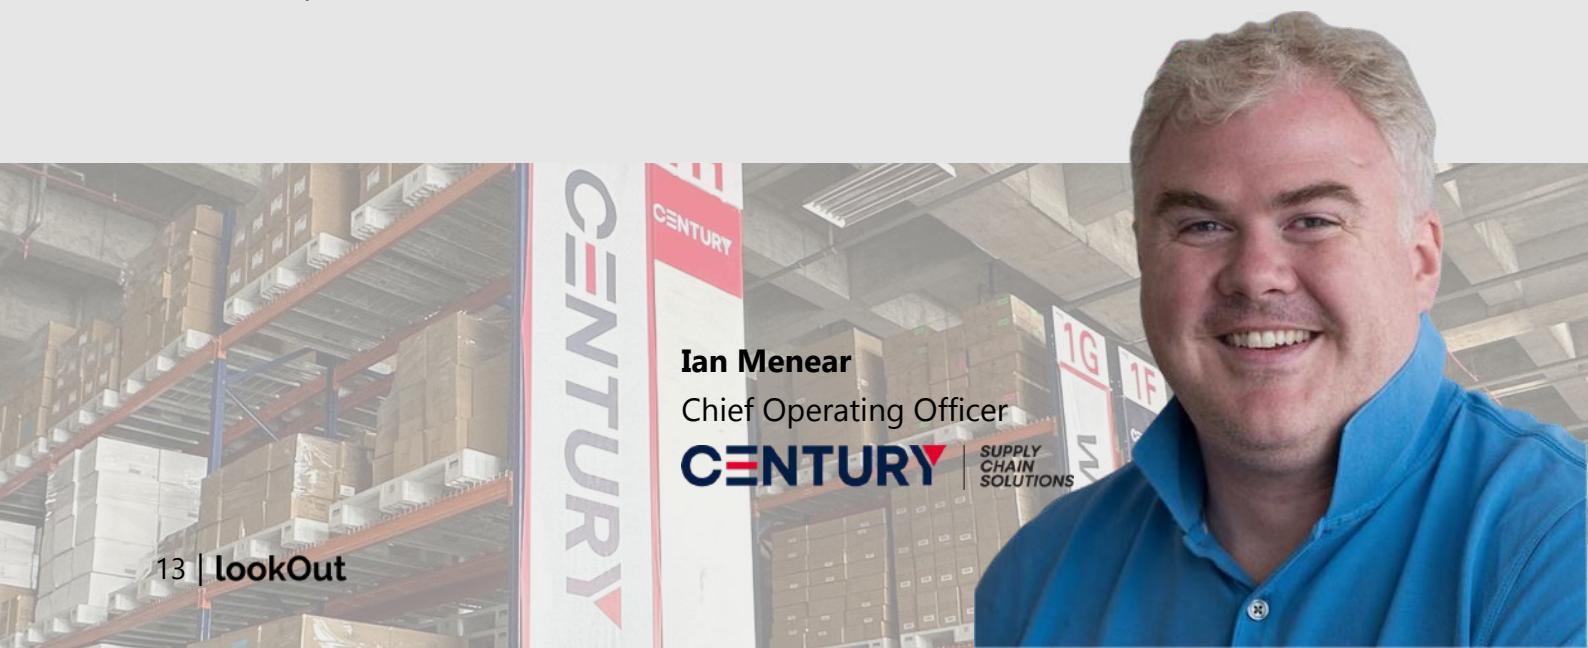

Century prioritizes supply chain risk management, ensuring operational continuity and security. Through regular security training and TAPA guidelines adherence, warehouses demonstrate commitment to excellence. TAPA's comprehensive programs enhance security measures and mitigate risks effectively, ensuring supply chain integrity.

**Q: Can you share any success stories or notable achievements directly attributable to Century's commitment to TAPA Standards?**

We ensure security and reliability in our global operations through TAPA certification, fostering trust and enduring customer relationships. TAPA's real-time intelligence and training programs help us stay ahead of risks and respond swiftly to challenges, enhancing our customers' confidence. By adhering to TAPA's standards, we demonstrate our commitment to excellence and solidify our position as leaders in secure logistics solutions.

**Q: Looking ahead, how does Century envision further leveraging its partnership with TAPA APAC to continue enhancing its supply chain security and operational excellence?**

At Century, we are unwavering in our dedication to empower our customers with a reliable and trustworthy supply chain. To accomplish this objective, we forge strong partnerships with esteemed members of TAPA. By collaborating with TAPA's professionals, we foster a platform for sharing insights, experiences, and best practices. Together, we engineer and elevate our supply chain risk management practices, reinforcing the resilience of our supply chain management to the advantage of our esteemed customers. Through this collaborative approach, we strive to deliver exceptional value and peace of mind to our valued customers.

# Insights from TAPA APAC LinkedIn Polls: Supply Chain Outlook Opportunities & Challenges

Resilience and security of supply chains are of paramount importance, especially in the Asia Pacific region where trade volumes are soaring, and logistical complexities abound from risks of disruptions, geopolitical tensions, and regulatory complexities. Recently, Transported Asset Protection Association Asia Pacific (TAPA APAC) conducted two polls on its LinkedIn page and group, shedding light on the sentiments and concerns of supply chain leaders in the region.

The results underscored a mix of optimism, caution, and apprehension, with cargo crime and theft, supply chain disruptions and Business Continuity Planning (BCP) emerging as primary areas of concern. These polls provide valuable insights into the pressing issues facing APAC supply chains and underscore the importance of adopting TAPA Standards to mitigate risks and unlock opportunities for growth.

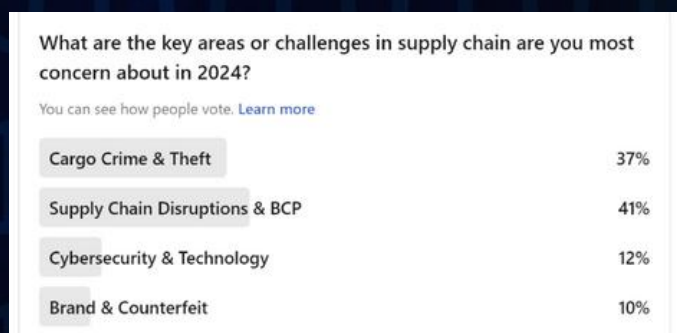

## Mixed Opinions: Varying Dynamics

The first poll, conducted on 6th February, solicited opinions on the overall outlook on the supply chain for 2024. The poll results revealed a spectrum of opinions among APAC supply chain leaders – 36% are optimistic about growth, 29% are cautiously optimistic, 32% feel that there will be challenges ahead, and the remaining 4% are neutral. This reflects a balanced perspective amidst the varying dynamics shaping the APAC supply chain landscape.

## Delving Deeper: Challenges or Opportunities

Building upon these insights, TAPA APAC launched the second poll on 21st February, delving deeper into specific areas of concern within the supply chain landscape. Among the respondents, supply chain disruptions and Business Continuity Planning (BCP) emerged as a top concern by 41% of the votes.

Following closely, cargo crime and theft garnered significant attention of 37%, reflecting the pervasive threat posed by organized crime networks targeting supply chain assets. This reveals the need for robust strategies to mitigate the impact of unforeseen events on business operations. These poll results highlight the multifaceted challenges facing APAC supply chains and the imperative for proactive measures to enhance resilience and security.

## **Forging Ahead: TAPA Standards for Resilience and Security**

Against the backdrop of these poll findings, the adoption of TAPA Standards is a strategic imperative for APAC supply chain stakeholders seeking to enhance resilience and security. TAPA Standards provide a comprehensive framework encompassing industry best practices and strategies for security across the end-to-end supply chain, tailored to address the unique challenges faced by organizations operating in the region.

By adhering to TAPA Standards, organizations can implement robust measures to deter cargo crime and theft, including secure facilities, tamper-evident packaging, and GPS tracking systems. Moreover, TAPA Standards emphasize the importance of proactive risk assessment through its Risk Assessment Standard (RAS); risk management through its popular Standards like Facility Security Requirements (FSR), Trucking Security Requirements (TSR); and Business Continuity Planning (BCP) which TAPA APAC plans to launch a new BCP Standard by this year. As the region continues to drive economic growth and innovation, adherence to TAPA Standards serves as a strategic roadmap for building secure, resilient, and future-ready supply chains that thrive amidst uncertainty and change.

For more information about TAPA Standards, please email to [info@tapa-apac.org](mailto:info@tapa-apac.org) or visit [www.tapa-apac.org](http://www.tapa-apac.org).
