About Us

Crestwell Attire (A division of Infinity Innovation) is at the intersection of digital innovation and eco-centric fashion, where 50 years of collective expertise shapes the future of uniforms. Our AI-driven cutting technology ensures precision and a personalized touch, while our vertical integration makes the process cost-effective and supremely flexible, keeping your branding sharp and on point.

Rooted in our DNA is a commitment to ESG principles; every piece we craft is born from recycled, antimicrobial (C-Force) and sustainable materials, and making our collection not just a choice but a statement of environmental dedication. We don't just create uniforms; we're sculpting a movement of responsible luxury, where every fiber represents our ethos for a greener earth.

Crestwell's Commitment to Housekeeping Excellence

At Crestwell, we understand that the housekeeping uniform is more than just a piece of clothing - it's an essential tool that empowers your team to deliver exceptional service and elevate your brand. That's why we've conducted an **in-depth survey of hotel managerial teams** to deeply understand the **unique needs** and **pain points** of the housekeeping department. Our research revealed that over **90%** of respondents prioritize **improved ease of movement** in their uniform design. That's why our new Housekeeping Collection features a **tailored yet flexible fit**, with **adjustable waistbands** and **reinforced areas** for **maximum durability and freedom of motion**.

Breathability and **comfort** also emerged as top priorities, with **95%** of respondents seeking **fabrics that are soft, lightweight, and effective at managing moisture and odor**. We listened, and our uniforms are crafted from high-performance, **sustainable** blends that keep your team cool, dry, and fresh throughout their shift. But we didn't stop there. Our survey also highlighted the importance of aligning the housekeeping uniform with your hotel's **brand image and aesthetic**. That's why our design team worked closely with your peers to develop **a collection that seamlessly integrates your brand's unique style**, while still prioritizing the functional needs of your hardworking housekeeping staff. Experience the difference that thoughtful **design** and **in-depth industry research** can make. Discover the Crestwell Housekeeping Collection today.

Sustainable Fabric Options

BAMBOO

Soft, breathable, and moisture-wicking natural textile made from bamboo grass pulp. It's hypoallergenic, offers UV protection, and has antimicrobial properties. It's an eco-friendly choice, as bamboo is renewable, fast-growing, and requires fewer resources compared to other crops.

CORN (SORONA)

A renewable polymer derived from corn, offering eco-friendly production. It provides superior comfort, flexibility, and durability. With excellent shape retention and resistance to fading, pilling, and wrinkling, it's a sustainable and long-lasting choice for clothing.

WOOD (LYOCELL)

A soft, breathable fabric made from eucalyptus tree pulp. It's eco-friendly, with a closed-loop production system that recycles water and solvents. Biodegradable and compostable, lyocell is a sustainable choice for clothing and textiles.

PLASTIC BOTTLE

Recycled polyester fabric is an eco-friendly alternative to traditional polyester. Made from recycled plastic bottles and post-consumer waste, it reduces landfill and ocean plastic while decreasing reliance on petroleum-based materials. Cost-effective and sustainable.

Upcycling Fabric

FROM OLD GARMENT

The Billie System is an innovative solution that addresses the environmental impact of textile waste by utilizing a waterless recycling process. Unlike traditional methods, it does not consume water or produce chemical waste. The system collects old garments and upcycles them into yarn, which is then used to create new products. By repurposing textile waste, the Billie System promotes sustainability and reduces the need for virgin materials, contributing to a more environmentally friendly approach to textile recycling.

no water

no chemical

A woman in a white uniform stands in a laundry room, looking towards the right. The room is filled with shelves of white towels and a long table covered with white linens. The lighting is bright and even.
