COLORBOND® FENCING

A fencing solution that's tough, good-looking, and built to last

Designed with a sleek, modern look and built from durable, weather-resistant steel, this fencing solution offers strength, security, and low maintenance—all without compromising on style. Available in a variety of colours, it's the perfect blend of function and aesthetics. Our expert team ensures precise, hassle-free installation, so you get a fence that's built to last and installed right the first time.

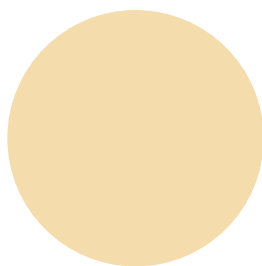

UNDER-FENCE PLINTHS

Under-fence plinths range from 100mm to 400mm high using 50mm thick standard sleepers for 100-300mm high, which can be smooth on both sides (which is aesthetic for both neighbours); 65mm thick heavy duty under-fence plinths for 400mm high in-fence retaining.

RETAINING WALLS

Designed for managing sloped landscapes, creating garden beds, or adding usable space

Perfect for subdivisions, cut-and-fill sites and large earthworks, our walls help manage elevation and define boundaries. Using reinforced concrete sleepers, we build strong, stable walls that stand the test of time, without compromising on timelines, safety or quality.

RETAINING WALL STEEL

Available in sizes from 120UB to 310UB, our galvanised steel beams are compliant with engineering standards for retaining fence applications.

SPECIFICATIONS

2m Sleepers	2.4m Sleepers	Cribs
Standard (STD) 2m 2000 x 200mm x 75mm Build up to 2m high	Standard (STD) 2.4m 2400 x 200mm x 80mm Build up to 1.6m high	2m Crib 2000 x 100mm x 100mm 1 x N10 Reinforcement Bars

PRESSED SPEAR SECURITY FENCING

Tough, stylish security for schools and commercial sites

Pressed spear fencing is a great-looking, hard-wearing option for securing schools, commercial properties, and public spaces. Available in either face-welded (where spears are welded directly to the rails) or punched rail styles (more common, with pickets sliding through pre-punched holes in the rail), this fencing combines durability with versatility. We also offer matching gates—manual or automated—to make access easy and secure.

SPECIFICATIONS

40x40mm SHS rail and 25x25mm SHS pickets, with 140mm centres

BLADE FENCING

Offering a high level of security and privacy without feeling heavy or closed off, blade fencing is ideal for modern residential and commercial properties. Its durable construction and powder-coated finish ensure it stands up to the elements while maintaining its appearance.

ALUMINIUM BATTEN FENCING

Aluminium batten fencing offers a sleek, modern look that's both low-maintenance and durable. Ideal for homes and commercial spaces, it provides privacy without compromising on style. Aluminium battens are resistant to rust, warping, and termites, making them a smart, long-lasting choice.

GATES

Aesthetic and functional entry, privacy & security

We offer a range of gate solutions in every style of fence that we build. We can pour strip footings for sliding gates as well as install letterboxes and prepare and arrange intercom installation. Colorbond Good Neighbour gates come with standard inclusions (see specs table) with the option to upgrade. Custom gate solutions include gate upgrades. We also partner closely with Adelaide-based ACE Automation to automate sliding and swing gates of any size.

SPECIFICATIONS

Standard Inclusions

Butterfly hinges, galv post & pad-lockable D-latch

Gate Upgrade

Powdercoated posts and frame, D&D Tru-Close self-closing hinges & D&D Deluxe Lokk Latch
