LOW IN CHEMICALS

ORGANIC

RECYCLED

FAIR

EASILY RECOGNISE SUSTAINABLE ARTICLES

In this catalogue, all items meet at least two sustainability criteria for various aspects of their supply chains.

MATERIAL

1. LOW IN CHEMICALS: Reduced pollutant production

Pollutant-reduced production

The prerequisite for the award of this symbol is an existing OEKO-TEX 100 certification. The EU REACH regulation is mandatory by law and is therefore not explicitly displayed on the article.

2. ORGANIC – RECYCLED – FAIR

Organic cotton

All items the organic cotton symbol are certified according to one of the recognized organic cotton standards. These include GOTS, OCS 100, OCS Blended and EU Ecolabel, as well as OEKO-TEX ORGANIC COTTON. Certified organic cotton in conversion also falls under this symbol.

(Partly of) recycled materials

The (Proportionate) Recycled Materials symbol is given to all items that are certified to a recognized recycling standard, such as RCS 100, RCS Blended and GRS.

Fairtrade

Articles made from FAIRTRADE certified cotton are marked with the official FAIRTRADE COTTON seal. This standard aims to improve social and environmental conditions in cotton cultivation. Fairtrade is one of the best known sustainability seals in the world. Correspondingly certified articles are marked with the seal.

BIO-BAUMWOLLE

Organic cotton has gained a lot of importance in the textile industry in recent years, as more and more consumers inside and outside want to make environmentally conscious choices. Unlike conventional cotton, organic cotton is grown without the use of harmful chemicals and pesticides. This helps protect the environment and human health.

RECYCLED MATERIALS

Whether recycled materials are sustainable (more) than newly produced ones is often discussed. By recycling e.g. plastic waste and cotton products/-scraps, a new product life cycle starts for existing materials. Of course the recycling process also requires resources and causes CO2 emissions; nevertheless, circular economy is an aspect to more sustainability in textile supply chains.

cultivation

harvest

spinnery

knitting

dyeing

sewing

labelling

Fairtrade-certified cotton is separated from conventional cotton along the entire supply chain. Checks are carried out according to an independent and globally consistent certification system.

MANUFACTURE

Faire Arbeitsbedingungen in der Textilherstellung

All articles bearing the Fair Labor Conditions symbol are certified according to a standard for compliance with or improvement of social conditions in the supply chain. This includes factory certificates according to the Fair Wear and amfori BSCI code of conduct, complied standards according to SA 8000, Wrap, the Fair Labor Association and OEKO-TEX STeP / OEKO-TEX MADE IN GREEN. Information on request.

In the chapter starting on p. 174 you will find articles from brands that are committed to making conventional cotton farming more sustainable.

The articles of the following brands are presented in the catalog:

A STANDARD FOR CONVENTIONAL COTTON - WITH A BROAD IMPACT IN GROWING REGIONS WORLDWIDE

On the following pages we present brands that source cotton from the Better Cotton Programme for some of their articles/collections. What exactly does Better Cotton mean?

BETTER COTTON INITIATIVE (BCI)

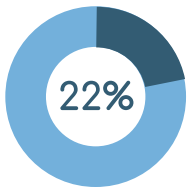

(as of 2023)

Every year, around 25 million tons of cotton are harvested worldwide. Only just under 1.5% of this is organic cotton. More than 98% of the world's cotton is thus grown conventionally, i.e. without an underlying environmental standard. Better Cotton Initiative (BCI) is a program with the goal of making global production of conventional cotton more sustainable: Environmental and working conditions in cotton cultivation are to be improved. Specifically, this includes soil health of cultivated areas, empowerment of women, reduced use of pesticides and efficient irrigation. Growers must meet entry criteria and then demonstrate improvements. BCI supports cotton farmers through education and training programs.

The non-profit Better Cotton Initiative is made up of environmental and human rights organizations and companies in the textile industry.

Source: 2022-23-Annual-Report BCI

of global cotton production
is Better Cotton

Better Cotton connects people and organisations across the cotton sector, from field to shop, to promote measurable and continuous improvements for the environment, farming communities and the economy in cotton growing regions.

The Better Cotton Programme now accounts for 22% of global cotton production.

The programme helps textile brands to make targeted investments in improved conventional cotton cultivation. Better Cotton is often firmly anchored in their strategies and is a building block for greater sustainability in the cotton sector.

In addition to cotton from the Better Cotton Programme, the brand usually also uses other standards that cover other sustainable aspects in the supply chains of its articles, such as testing for harmful substances by OEKO-TEX 100 or recycled materials.

INDICATIONS

A Word about Printing on Your Textiles

Please note, that in garments whose washing and care instructions indicate a higher laundry temperature than 40° C, this information is rendered invalid once the garment has been printed on. We generally advise you to wash your printed textiles at no temperature above 40° C so as not to affect the quality of the printing.

Color Designations, Sizes and Laundry Properties

Color designations and sizes that appear in this catalog are not regulated by any industry standards. This can mean e.g. that a T-shirt in size XL made by manufacturer A can have quite different measurements than a T-shirt in size XL made by manufacturer B. Even within the same brand, different articles (e.g. polo shirts and T-shirts) can have different measurements although they are identified by the same size. Especially the so-called Slim-Fit/Body-Fit Shirts may diverge in size from the unisex articles of the same brand. Similar rules apply to shirts for women and men of the same manufacturer. It goes without saying that women's shirts are cut in a different style than the respective men's shirts although their size designations may be completely identical. Color designations are often not really informative. This already starts with the name itself. But even with color names about which most consumers have an image in their mind, there are often divergencies. Royal Blue or Apple Green are colors that conjure up different pictures in different people's minds. There simply is no binding industry standard for colors. So it may happen that the same color designation may look completely different from one product to the next between different brands or even between different articles of the same brand. Unfortunately, this issue cannot be solved by the color bars printed here in this catalog. Each printed color bar will appear differently depending on the ambient light source, and textile colors cannot be rendered 100% truly when printed on paper. So before you order a larger quantity of textiles and especially before you start printing or embroidering them, we encourage you to order a sample item. We cannot accept any complaints due to subjective expectations of sizes or colors. We'd like to draw your attention to one further important point that cannot be stressed enough: each textile article made from cotton or a cotton and polyester mix fabric needs to be laundered before it is put on and worn for the first time. Due to the chemical residues on textiles (although completely harmless and safe in themselves) it may otherwise happen that when the textiles are worn without having been laundered before, especially under the influence of ultraviolet rays, a chemical reaction between the residues and the body's perspiration takes place, affecting or even impairing the color of the garment. These color changes will persist and cannot be remedied by later laundering. Please note that claims or complaints in this matter cannot be accepted.

Information about battery disposal

In connection with the sale of batteries or the delivery of equipment that contains batteries, we are obliged to draw your attention to the following. You are legally required as an end user to return used batteries. You can hand in old batteries, which we stock or have stocked as new batteries in our range, at our warehouse (address) or mail them back to us free of charge. Alternatively we suggest you use the public collection points that have been set up in your neighbourhood. The symbols shown on batteries have the following meanings. The crossed out rubbish bin symbol means you must not put the battery in household waste.

Pb = Battery contains more than 0.004 per cent lead

Cd = Battery contains more than 0.002 per cent cadmium

Hg = Battery contains more than 0.0005 per cent mercury.

Please observe the information provided above.

Underwear may never be returned or exchanged.

Unpacked shirts/blouses may not be exchanged or returned.

Shipping umbrellas from length 60 cm in separate boxes.

Masks and hygiene products may never be returned or exchanged

Neutral.
