

Brody Chemical

BRODYCHEMICAL.COM
800.488.2436 SALT LAKE CITY, UT

Smart doesn't have to be complex. For decades, our family-owned company has relied on a simple formula for success: **innovation + quality + reliability**. Just like all of our formulas, customers can count on it.

INNOVATION

Brody Chemical is always evolving to find new ways to create better products as well as improving on existing processes. Our research and development is constantly innovating to improve the products and services we manufacture today. We strive to provide a product that not only is extremely effective, but also safe-to-use and environmentally friendly.

OVER 80 YEARS OF EXPERIENCE

Our background in chemistry, quality assurance, and industry specific knowledge helps us understand the obstacles our customers face. Finding solutions to our customers' needs is our primary focus. Providing the right product helps our customers get the job done right the first time, safely and effectively.

ONE-STOP SHOP

We strive to offer complete solutions for your business. The equation is pretty simple. The more solutions and services we can offer to our customers, the more money you can save and the more efficient your ordering will be.

POOL & SPA

Brody Chemical's top-of-the-line equipment and pool and spa products gives you the comprehensive approach you need to keep your pool clean and safe. We strive to do everything we can for commercial pool operators to make your system run smoothly, efficiently, and hassle-free.

Our expert service technicians will meet with you on-site, for the personal touch and on-premise insight you are looking for.

SERVICE

Highly-trained technicians with a personal touch!

Brody Chemical's service team consists of skilled technicians with extensive experience in the commercial aquatics industry. Our technicians are ready to diagnose and address any issues that may arise during day-to-day pool operation.

With over 100 years of experience in the swimming pool industry our experts have the knowledge and expertise to tackle any pool project. Whether it is a small repair or a complete overhaul we have the skills to deliver exceptional results. Our service technicians understand that every pool is unique and requires personalized attention.

Your Satisfaction is Our Top Priority!

You can expect timely communication, punctual arrivals, and efficient completion of projects.

We are committed to delivering exceptional service with our highly qualified service technicians. Our service team engages in ongoing training and hold factory certifications ensuring their expertise in maintaining all the equipment we offer.

Here is an overview of our services:

- Tech support
- Emergency service calls
- Start-up and operator training
- Seasonal pool openings and closings
- Service contracts - including preventative maintenance and ongoing service

PRODUCT COLLECTION

Our chemicals and equipment make sure your pool is chemically balanced, healthy, and sanitary – all backed by the industry's best on-site training and troubleshooting with our expert field technicians.

BEST SELLERS

ACID RITE
8004216

Low odor – creating a friendlier working environment for pool operators.

LIQUID CHLORINE
8080

Eradicate bacteria and fungi while also inhibiting algae growth!

ACCU-TABS
3064

Easy-to-use Calcium Hypochlorite tablet based system!

SANITIZERS

BROMINE 1" TABS 50# BAG

8003-50

Less irritating to skin and eyes!

Bromine is a powerful and effective sanitizer like chlorine but much less irritating to skin and eyes. Bromine has its advantages, because it produces no odor and makes your pool or spa water clean and smooth. Unlike Chlorine, Bromine's unique feature is that the dead or used Bromine cells can be reused as long as new Bromine is being introduced to the water. Bromine is stabilized so it does not require added stabilizers or conditioners, saving you money.

GENERATION 2 BROMINE 1" TABS 50# BUCKET

8005-50

Enjoy all the benefits of Chlorine without the Chlorine odor!

When used as directed, Generation 2 1" tablets sanitize pool and spa water keeping it clean, clear, and odor-free. Clears cloudy water by killing bacteria and destroying contaminants. G2 Bromine is the perfect choice for indoor pools and spas. Brominating tablets provide increased sanitizing in a wider range of pH levels than Chlorine while being less irritating to the skin and eyes. Use with automatic feeders.

ACCU-TABS 3" 60# BUCKET**3064-60****Easy-to-use Calcium Hypochlorite tablet based system!**

Accu-Tab helps to keep both indoor and outdoor pools and spas operational by consistently and accurately delivering the chlorine needed to kill harmful bacteria, control algae and destroy organic contaminants. The easy-to-use Calcium Hypochlorite tablet-based system is built on advanced engineering, proprietary delivery and tablet technology.

CAL HYPO Calcium Hypochlorite GRANULAR**100# DRUM 3064-100 25# BUCKET XGL71440****Keep your swimming pool sparkling, clean, and clear with Calcium Hypochlorite!**

When algae starts getting out of hand, turn to fast acting granular Hypochlorite. This high chlorine content product is effective at killing and deactivating harmful contaminants such as bacteria, algae, and other microorganisms. Granular Cal Hypo will provide you with the sanitizing power you need to keep your swimming pool or spa water crystal clear and safe for your swimmers. This non-stabilized formula is great for super-shocking your water or every day routine dosing without containing Cyanuric Acid.

CHLORINE 3" TABS**50# BUCKET 5600****25# BUCKET 5600-25****The best, most effective chlorine tablets at the lowest price!**

These Chlorine tablets are fast-acting, pure tri-chlor, with no fillers or binders often used in other Chlorine tablets. Safe and pure. They consist of 90% stabilized Chlorine and 99% active ingredients and they come packaged in locked, easy open buckets.

GRANULAR CHLORINE**50# BUCKET BE8032****25# BUCKET XORQCVDB025****Crystal-clear and skin-friendly pool water with a longer shelf life!**

With the aid of Brody's Granular Chlorine, you can take advantage of pool water that is crystal clear and gentle on your skin. Compared to other brands of Chlorine that use Calcium Hypochlorite, it has a longer shelf life and a milder odor because it is based on Cyanuric Acid. The inclusion of bactericide, algicide, and disinfectant in this unique solution provides additional advantages.

LIQUID CHLORINE 12%**8080****Commercial grade 12% Sodium Hypochlorite and NSF certified!**

Commercial-grade Sodium Hypochlorite Liquid Chlorine NSF grade. This 12% strength SH is available in different size packaging for your specific needs. Easy-to-use, fast and effective, no mixing required. For commercial pools feed via an automatic chemical controller and peristaltic metering pump. A great alternative to tablet and granular products. No build-up of scale or Cyanuric Acid. A broad spectrum oxidizing biocide that effectively eliminates bacteria and fungi and inhibits algae.

BULK LIQUID CHLORINE DELIVERY**Why handle dangerous chemicals and heavy drums?**

We provide bulk quantities of Liquid Chlorine (Sodium Hypochlorite 12.5%-15.0%). Our extensively trained drivers professionally dispense the Liquid Chlorine into your bulk container eliminating most handling for pool operators and eliminating the need for container deposits. Available in Utah only.

POOL SALT

XPCHPOOLSALT40

Natural, quick dissolving, high-purity pool salt!

Pool and spa salt is a high-purity Sodium Chloride, all-natural choice for your salt water pool or spa. The ultra-fine granules are easy to apply and ensure quick dissolve time. This product is intended for systems that require direct application of salt to pool water. Your salt Chlorine generation owners manual will provide you with detailed information regarding salt level requirements.

SHOCK TREATMENTS

WIPE OUT

8012

Chlorine-free, pool oxidizing shock!

Durachlor Wipe Out is a non-chlorine pool shock treatment. It will destroy contaminants such as perspiration, sun tan oils, and other impurities that can affect swimmer comfort. By destroying organic waste, this product can lower your sanitizer consumption, as well as brighten and clarify your pool water. This product dissolves rapidly and completely, and it allows bathers to re-enter the water after just 15 minutes. Restore sparkle and clarity to your pool water with Durachlor Wipe Out.

clearVIEW SHIMMER N SHOCK

XQRQCVD050

Chlorine-based shock treatment to control bacteria and algae!

Shimmer N Shock is a 99% Sodium Dichlor granular product. No pre-dissolving is necessary and this product is completely soluble and will leave no residue. Will not cause pH bounce. This is an economical shock treatment that will restore sparkle and clarity to dull water.

WATER BALANCERS

ACID MAGIC

8100

User-friendly Muriatic Acid!

Up to 90% less fumes as standard Muriatic Acid. Acid Magic contains buffering agents to help prevent burns to intact skin. It has been tested and is safe to use in all heated and unheated pools. Also great for cleaning, clarifying, and etching. Works just like Muriatic Acid without the fumes. Acid Magic is certified NSF-ANSI for use in pools, spas, hot tubs and other recreational facilities.

ACID-RITE

8004216

Now controlling pH levels is easier than ever with the Acid-Rite pH adjustment system!

Acid-Rite tablets, made of Sodium Bisulfate, have low odor creating a friendlier working environment for pool operators. Acid-Rite eliminates the cumbersome handling and safety issues associated with Muriatic Acid and granular Sodium Bisulfate, and concerns over maintaining alkalinity with CO2 systems. And, like our Accu-Tab system, the Acid-Rite system is simple, accurate and requires very little maintenance.

ALKALINE BUILDER

8002

Keep your pool water perfectly balanced!

Our Alkaline Builder is used to raise the total alkalinity of swimming pool water. The total alkalinity reading is a very important part of pool water balance. Low total alkalinity can cause rapid deterioration of plaster, paint, and vinyl, as well as metal fittings, which can result in iron and copper stains. This product raises total alkalinity and acts as a buffer to prevent pH "bounce."

SODIUM BICARBONATE 50# BAG

R1230

Alkalinity increaser to increase total alkalinity!

Sodium Bicarbonate is a simple way to keep your pH and chlorine levels healthy. Alkalinity in pools helps prevent sudden changes in pH levels. If your pool lacks the right amount of alkalinity pH levels can swing from low to high or high to low. This is also known as pH bounce. A healthy alkalinity range 90-120ppm. Use BC's Sodium Bicarbonate to get your chemical balance back on track.

PH DOWN

8008

Lowers the pH of swimming pools, hot tubs, and spa water!

This product is used to lower the pH of swimming pool, spa and hot tub water. The effectiveness of a disinfectant, such as chlorine, is controlled by maintaining the pH between 7.2 and 7.8 pH. This is achieved by keeping the total alkalinity between 80 ppm and 180 ppm. pH and total alkalinity are related. They should be tested and the results considered together. After testing the water, refer to the pH total alkalinity chart to determine the correct amount of this product to use.

PH UP

8009

Rapidly raises pH and total alkalinity!

pH Up is a clean, simple, highly concentrated pH up powder. Use it to raise and maintain optimal pH levels. An excellent product to use as a no-mix powder in pool and spa applications. The active ingredient in our pH up is Soda Ash (aka Sodium Carbonate). Easily reduces any acidity and corrects water conditions. Also reduces eye and skin irritability by reducing water acidity. Helps slow the rapid dissipation of Chlorine caused by acidic water.

PH UP LIQUID

2730

Increases the waters pH effectively and conveniently!

Easy-to-use liquid is distributed quickly through the water - raises pH and total alkalinity in spas and hot tubs. Accurate liquid measurement helps prevent over dosing. Compatible with all sanitizers including Bromine and Chlorine. Can be used to adjust pH in both water and soil. Highly soluble formula raises the pH level without clouding the pool or spa water. More convenient to apply than Soda Ash.

POOL ACID

8010

Liquid pH adjuster for pools and hot tubs!

Pool Acid controls the pH level of water in pools and hot tubs. Formulated for the highest potency making an extremely economical formula to use. Our Pool Acid is excellent for cleaning the scale and mineral deposits that form around pools and spas. Excellent for use with an automated pool feeder that controls pH and sanitation.

SODA ASH (Sodium Carbonate)

R1238

Increases the water's pH effectively and conveniently!

A clean, simple, highly-concentrated pH up powder. Use it to raise and maintain optimal pH levels. Excellent product to use as a no-mix powder in pool and spa applications. The active ingredient in our pH Up is Soda Ash (aka Sodium Carbonate). Easily reduces any acidity and corrects water conditions. Reduces eye and skin irritability by lowering water acidity. Helps slow the rapid dissipation of Chlorine caused by acidic water.

POOL ADDITIVES

CALCIUM BUILDER

8004

Powdered calcium builder for water that is low in calcium!

Calcium hardness is a common reference to pool chemistry. The recommended level for calcium hardness is 200 ppm and both high and low levels result in pool problems. Low calcium hardness results in corrosive water which softens your tile grout and can cause erosion on your pool surface. Also, metal equipment and accessories can rust quickly and water becomes aggressive. The calcium hardness level can simply be increased through the addition of Brody Chemical's Calcium Builder.

DEFOAMER

8006

Multi-purpose, concentrated foam control!

This product is a water soluble defoamer, offering immediate defoaming action and long term foam prevention. Works with super-speed to knock down typical foam caused by such elements as fats, detergents, oils, and wastes, regardless of temperature or locale. This product removes foam caused by agitation, high water temp, or bather load from spa and hot tub water without reducing the Chlorine or Bromine content.

WATER CLARIFIER

8013

Keep your pool water sparkling and crystal clear!

This product is a flocking agent to help keep pool water sparkling and crystal clear. It causes suspended particles to flock together into larger particles so that they may be easily removed by the filter. You can see immediate results as the water in your pool or spa turns clear shortly after you add this product. Unaffected by Chlorine or Bromine, non-irritating, biodegradable, and effective at all pH values. Will not clog filter system.

POOL STABILIZER

BE8056

Prevents the loss of chlorine from the sun!

Using a pool stabilizer is a necessary part of keeping your pool clean. Pool Stabilizer is Cyanuric Acid (CYA). CYA slows down how quickly Chlorine evaporates so that Chlorine will stay in the water longer. CYA works by binding to Chlorite ions in Chlorine and protecting them from UVA ray damage. Without a stabilizer, UV rays can easily break apart the Chlorite ions in Chlorine which allows them to evaporate in the air. Can be used in pools and hot tubs.

ANCILLARY

ALGATEC SUPER ALGAECIDE 64OZ 8/CASE XMCGEC10064

Fastest green algae remover for all types of swimming pools!

Will not interfere with pool water pH or sanitizer levels and can swim immediately after treatment. Kills rather than starves algae and prevents algae regrowth due to biostatic inhibitors. Kills most algae in 8-24 hours and black algae in 7-10 days. Salt pool friendly formula contains no metals, Bromides or quats. Works synergistically with Chlorine for fast clean up. Non-staining, non-foaming, non-metallic.

CLEAR VIEW QUAT POWER ALGAE CONTROL 12 qt/case

XORQCVLQPQT12

Controls the growth of algae slime!

ClearVIEW quat power controls the growth of algae slime. This product is great for weekly maintenance, effectively controlling algae slime in your swimming pool and spa water. Non-metallic, effective over a wide pH range. The active ingredient is 48.8% Dimethyl-Benzyl Ammonium Chloride.

BORIC ACID 55# BAG

Provides beautiful, sparkling, crystal-clear water!

Boric Acid is a white crystalline powder that is used in swimming pools to buffer pH and inhibit algae growth and lower Chlorine demand. It also reduces corrosion and adds a tint or sparkle to the water and improves the water "feel." Boric Acid protects from pH rise by binding to hydroxides. Borates are considered a natural mineral that improves water quality and clarity by binding to contaminants and harmful particles in the water.

DESCALER

104007

Easily removes scale and water deposits!

The economical, safe, and easy way to remove rust, corrosion, scale, and water deposits from almost all surfaces. It keeps fumes to a minimum and is harmless to most paints and finishes. It acts quickly to penetrate and lift away scum and water deposits. Descaler is a chemical combination of deep penetrating detergents and safe, easy-to-use acids. It will dissolve carbonates and other hard water scales, such as iron, rust, magnesium, and many other insolubles.

FILTER CLEANER

8007

Fast-acting solution that helps restore your sand filters!

Brody Chemical's Filter Cleaner quickly and effectively cleans indoor and outdoor swimming pool filters to turn a murky swimming pool into a clear and sparkling oasis. Cleans and prolongs the life of the filter, improves filtration efficiency, multi-purpose and great for cleaning all filter types and as a backwash aid for DE and sand filters. Compatible with all filter and pool types.

POOL FILTER SAND 50# BAG

XSND50

Top of the line pool filter sand!

Transform your pool into a shimmering oasis with our top of the line pool filter sand. Say goodbye to cloudy water and experience the most inviting swimming pool possible. The secret lies in maintaining your sand pool filter's efficiency by regularly refreshing the filter sand every 3 years or even sooner for continuous filter usage. Each granule is carefully sized for maximum filtration leaving no room for impurities to tarnish the clarity of your pool water.

Enhance the efficiency and safety of your pool operations by automating the chemical delivery process.

Pool automation encompasses various aspects of the pool system, starting from fundamental sanitizer and pH adjustments. Brody Chemical excels in installing, maintaining, and training for all levels of chemical and equipment automation. Our services extend from basic setups to comprehensive automation, including remote monitoring and integration with other pool equipment, ensuring your pools are operated as safely and efficiently as possible.

Brody Chemical also provides equipment leasing options.

Whatever the size of your aquatic facility, the Accu-Tab® Water Treatment system can easily integrate into your existing operation. With three chlorinator series to choose from, each Accu-Tab chlorinator is solidly built in the USA using high-quality PVC that is both durable and corrosion resistant.

The Accu-Tab System edge.

INSTALLATION

System can be installed quickly in any pump room and integrates easily into any aquatic facility

MAINTENANCE

Few moving parts within chlorinator; in most cases, maintenance needed once per year

SAFETY

Reduced risk of spills/leaks; no need for expensive safety systems or secondary spill containment

HELPS PREVENT GROWTH

Provides consistent chlorine protection to guard against algae, mold and bacteria development

STORAGE CONVENIENCE

Pails stack for convenience, use less space than drums, tanks and totes of liquid

DELIVERY CONTROL

Patented spiral design delivers consistent strength solutions

Take the Dive into a Simpler, Safer Chlorination System

Proper chlorination is one of the critical factors for safe-guarding the health and safety of your patrons and keeping your facility in compliance with state and local health codes. The Accu-Tab water chlorination system is a safer, simpler and more effective way to chlorinate your aquatic facility and help to maintain high-quality standards.

Each chlorinator is hand-made from rugged PVC, while our PowerBase® Automated systems are individually built on Aluminum frames using UL listed components, making them both compliant and tough enough to withstand harsh environments.

Acid-Rite pH Adjustment System

X9501111 and X9501031

***No metering.
No mixing. No contest!***

For operators of aquatic facilities, the risks and hassles associated with Muriatic Acid and granular Sodium Bisulfate systems are over.

Powered by innovative tablet-erosion technology, the Acid-Rite pH Adjustment System is an effective alternative to bulky liquid acid systems and cumbersome granular Sodium Bisulfate bags.

The Acid-Rite system provides reliable pH balancing combined with easy installation and maintenance. Additionally, Acid-Rite tablets, made of Sodium Bisulfate, have low odor creating a friendlier working environment for pool operators.

- Easier to handle 45 lb. resealable pails
- Solid chemical made of Sodium Bisulfate with no dual containment necessary
- Acid Rite feeders rarely need maintenance. No small tubing that can kink or crack
- Tablets have low odor and are red in color to help eliminate mixing of chemicals
- Effective alternative to bulky liquid acid systems
