HIKVISION®

Improve Guest Experience

03 / Joyful Check-in

Rich information displays and relaxing audio broadcasts keep guests waiting joyfully and comfortably.

- Promotion video
- VIP welcome
- Activity announcement

Reduce complaints by captivating displays

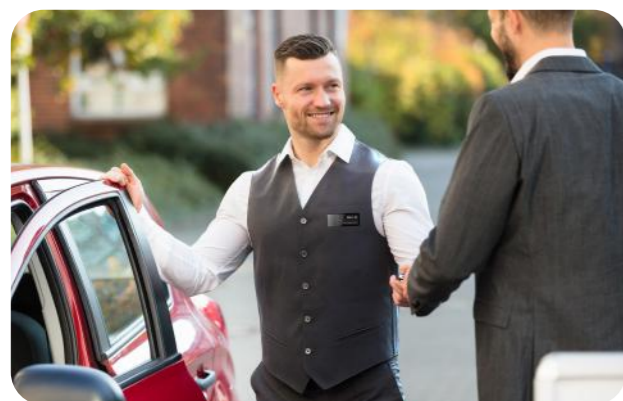

Provides eye-catching naked eye 3D visuals, LED walls, and posters in hotel lobbies, presenting a range of information.

Enhance waiting time with soothing music

Provides various broadcast modes, text-to-speech function, video & audio linkage, and more.

02 / Transparent Room Service

01 / Digital Valet Parking

- The use of digital badges of hotel employees during services promotes professionalism and builds trust with customers.
- By wearing these badges, conflicts between employees and customers can be minimized.

The digital badges worn by hotel staff during room services also enhance hospitality, housekeeping transparency, and service security.

Digital Badge

- Ultra HD recording
- Customized display
- eMMC built-in storage

04 / VIP Notification & Service

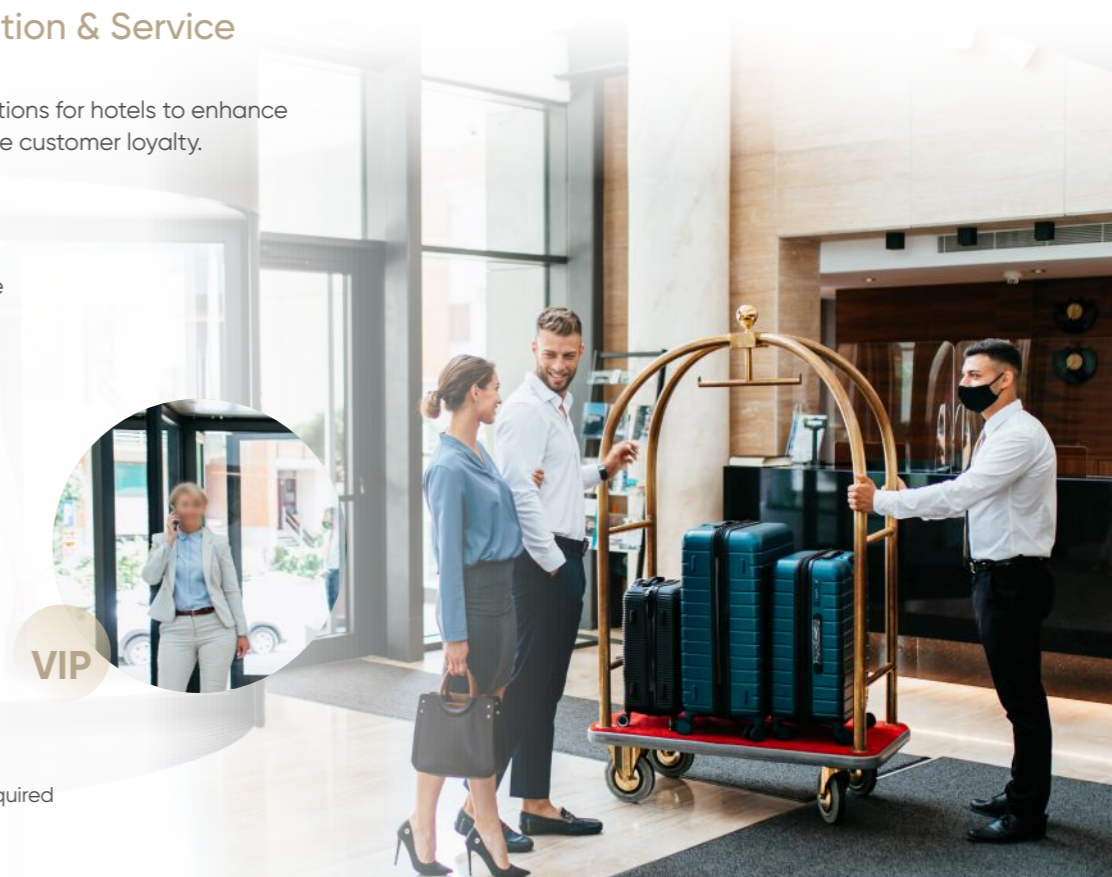

Hikvision provides VIP notifications for hotels to enhance customer services and improve customer loyalty.

Better stay experience

- VIP notification and welcome
- Breakfast included check

Privacy redaction

- Add privacy masks in live view or recorded videos

*Guests' prior consent shall be required

05 / Auto Elevator Control

- Hikvision's access terminals can seamlessly integrate with elevator controllers.
- Guests can easily access their authorized floors through face recognition verification.

07 / Special Care Service

- Fall detection radar prevents indoor falls with privacy and contact-free approach.
- Panic alarm panel facilitates real-time emergency response and handling.

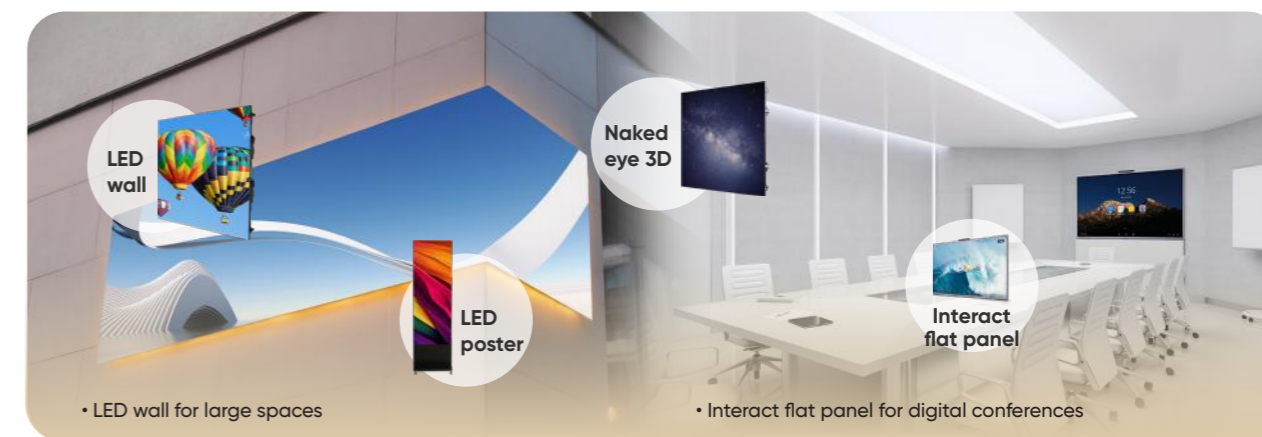

Fall detection radar

Panic alarm panel

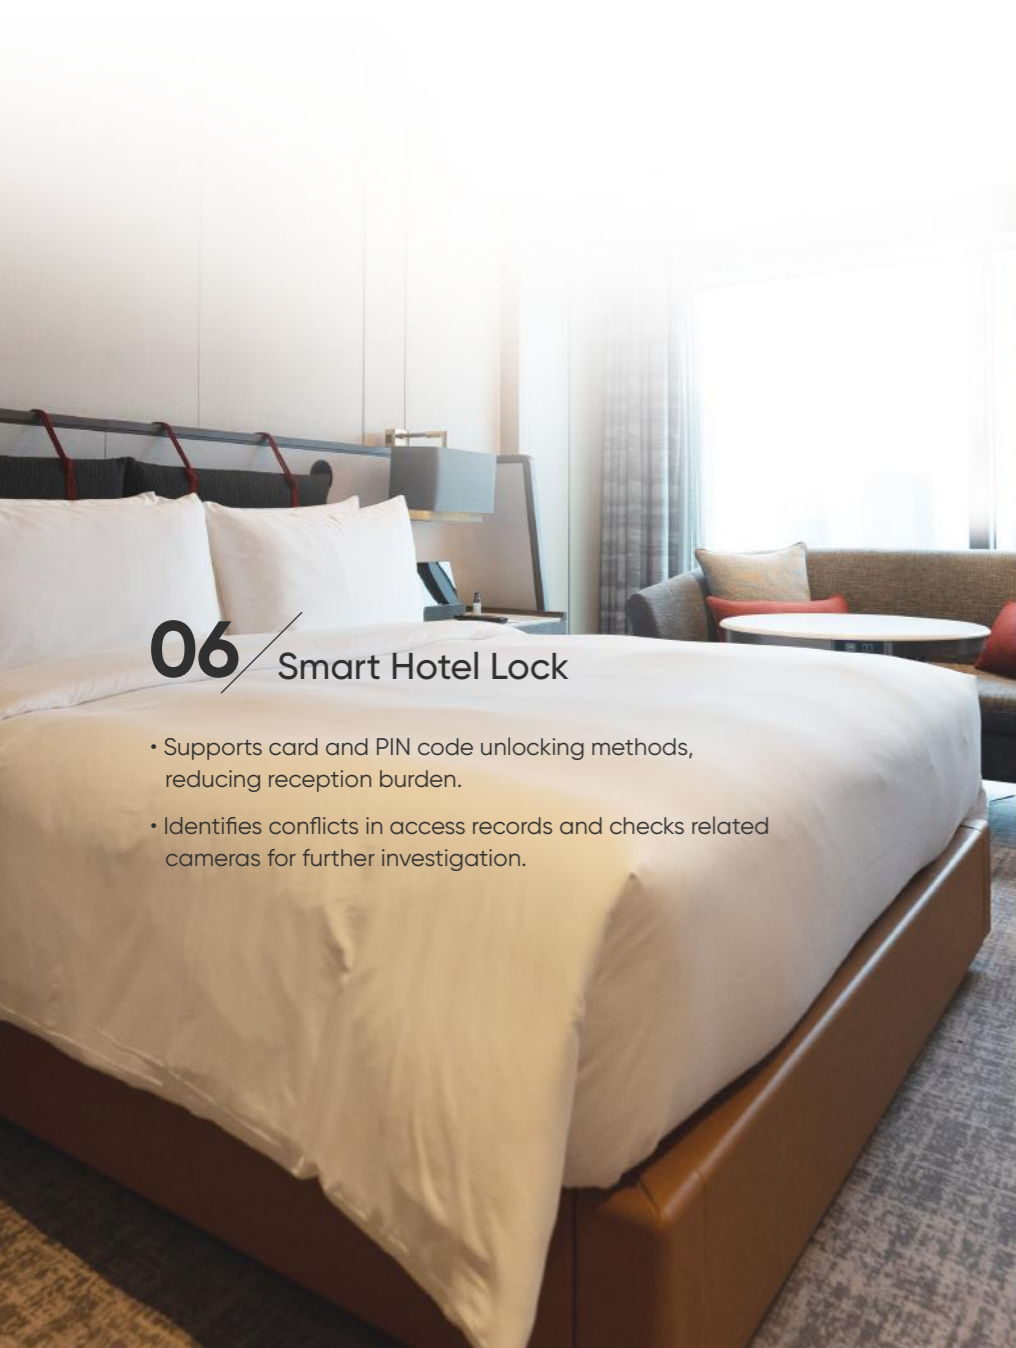

08 / Digital Conference Room

Hikvision offers appropriate sizes of LED wall or flat panel to provide a luxury experience for guests.

06 / Smart Hotel Lock

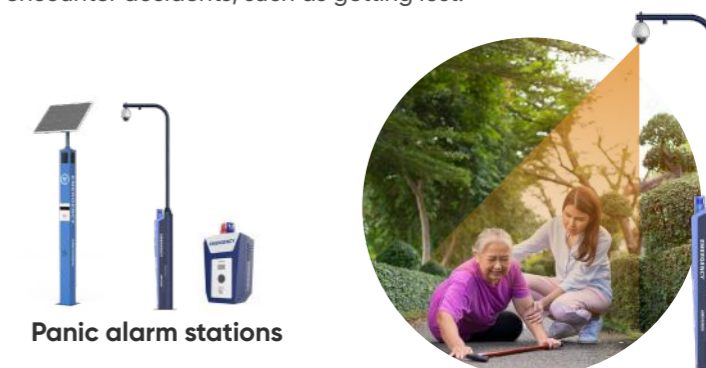

- Supports card and PIN code unlocking methods, reducing reception burden.
- Identifies conflicts in access records and checks related cameras for further investigation.

09 / Remote Assistance

Ensures prompt response for guests when they encounter accidents, such as getting lost.

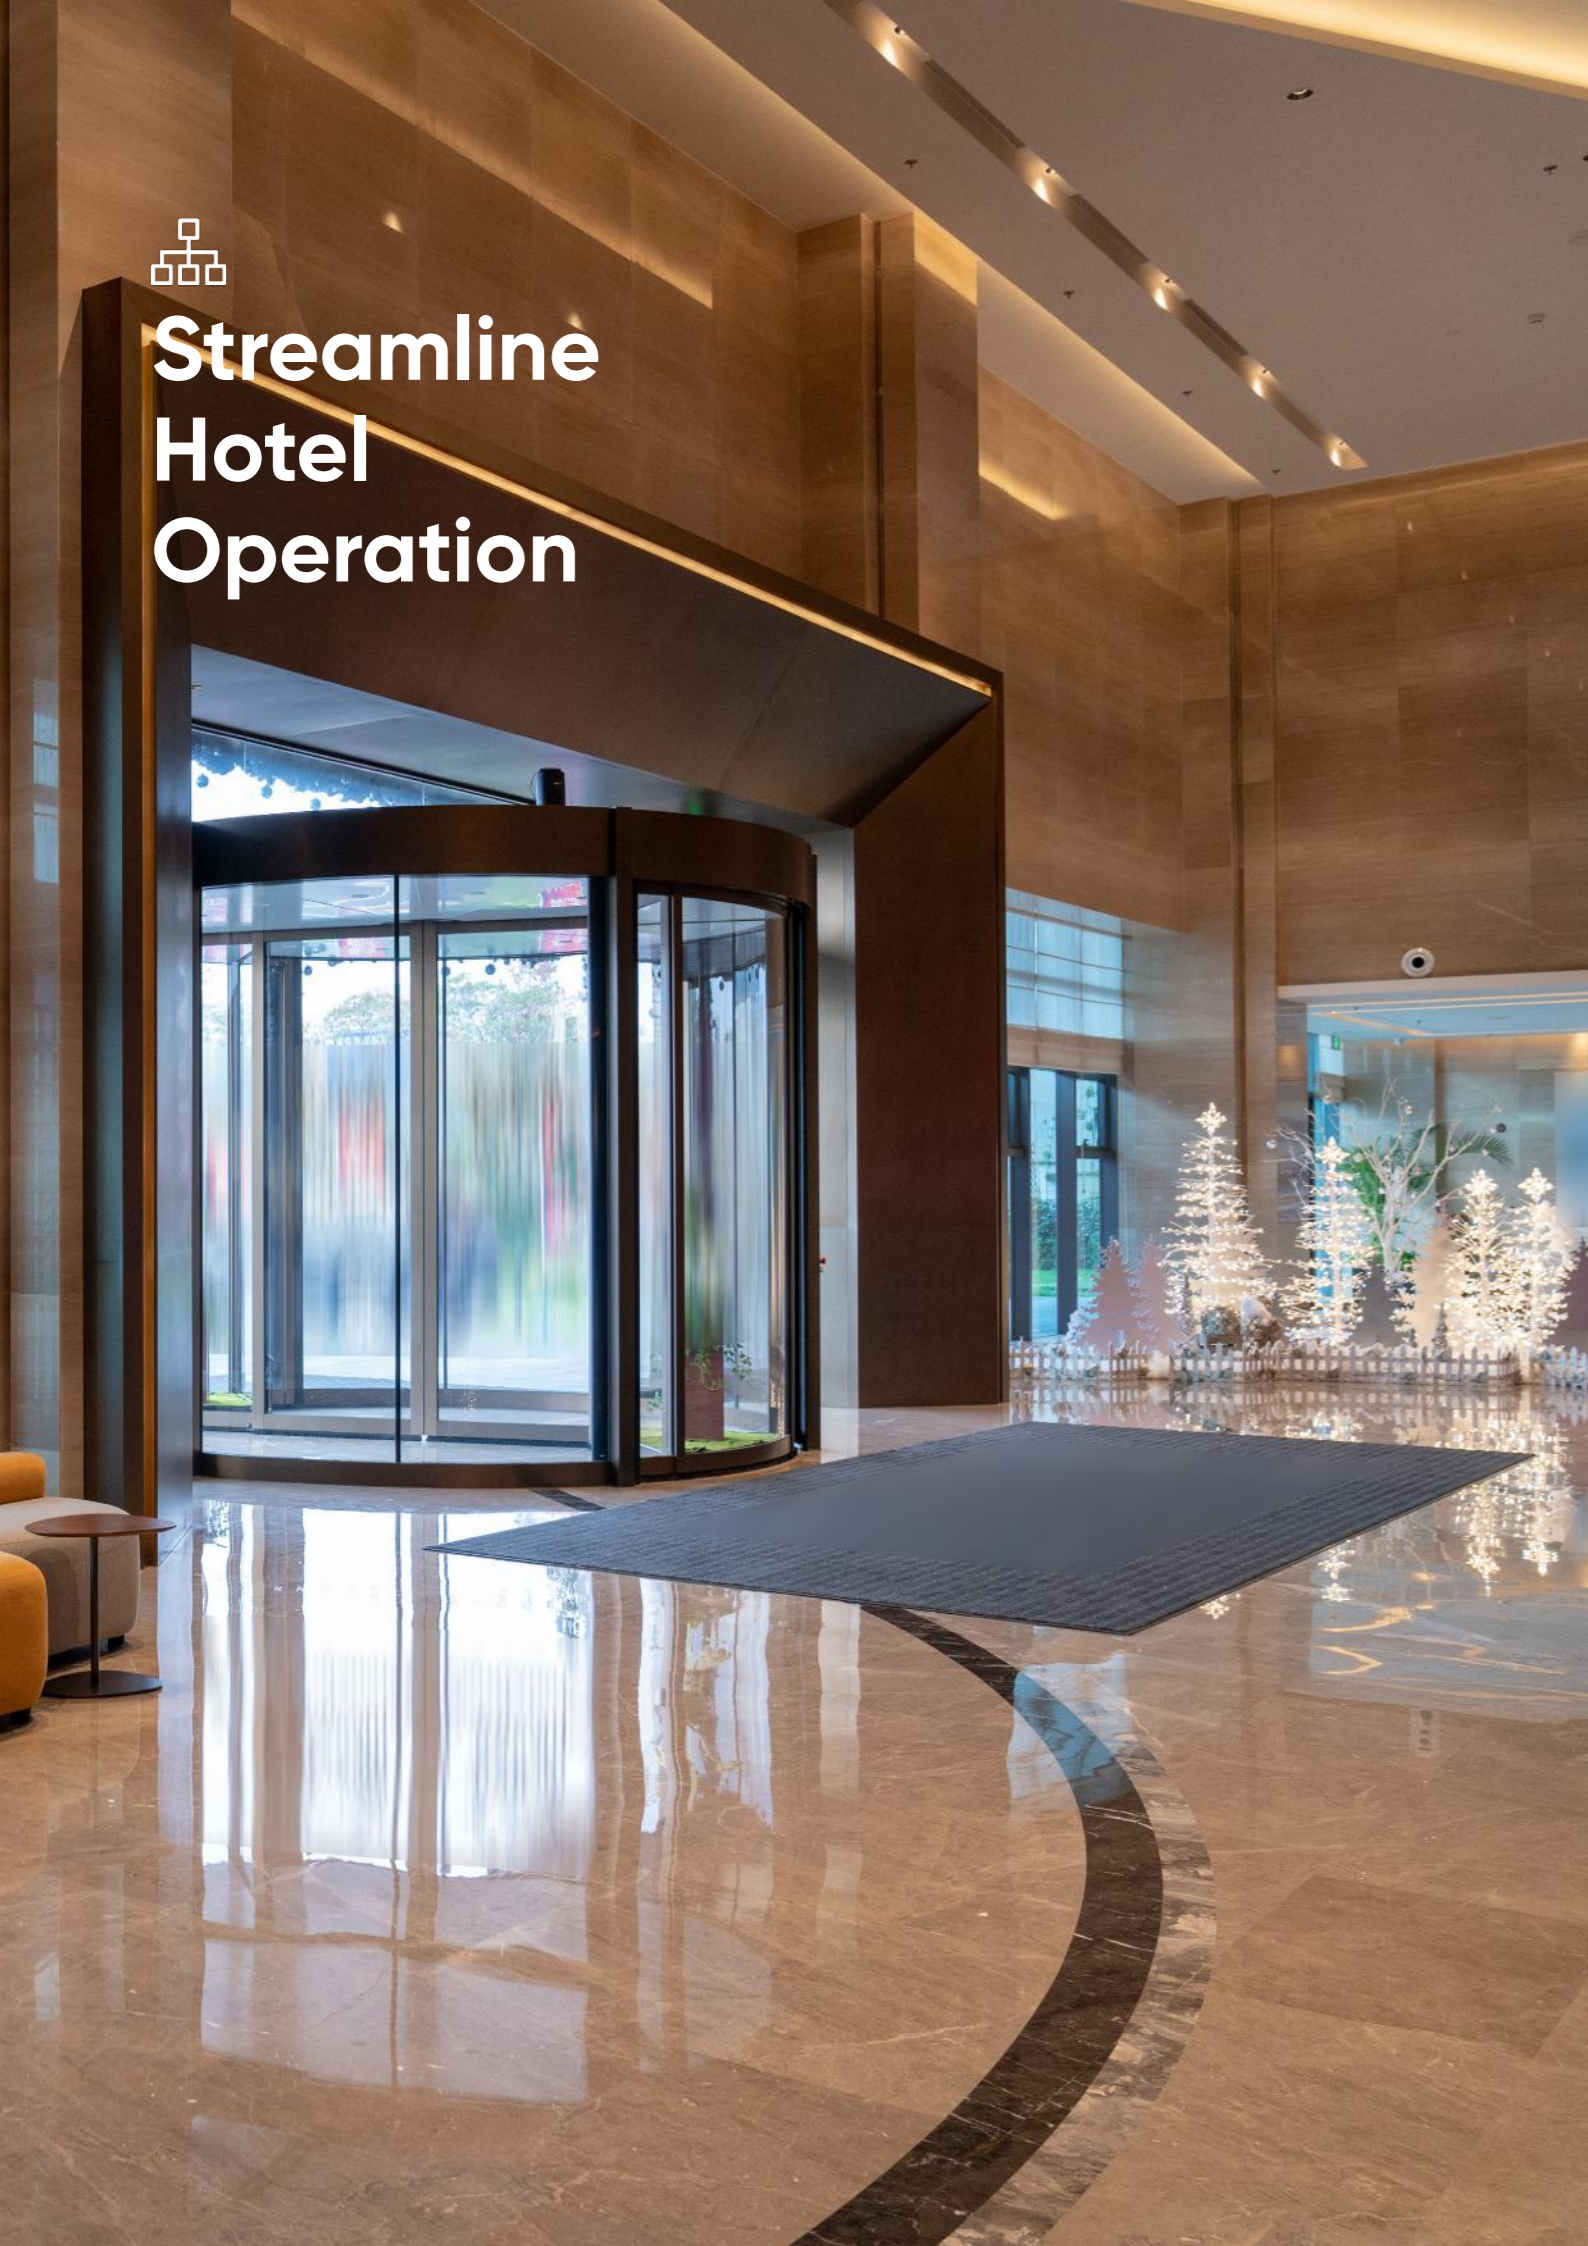

- Wired & wireless options
- Built-in camera and SD card
- Emergency call
- Two-way audio
- Remote management via HikCentral platform

Streamline Hotel Operation

Digital Security Patrol

- Accurate online task design for patrol schedule management.
- QR codes at regular points and access control devices at important areas help ensure task compliance of patrol personnel.
- Diverse reports aid post-patrol analysis.

AI Patrol

AI patrol on AI-enabled edge devices enables 24/7 proactive detection for safer living conditions.

AIOP products

HikCentral Professional

Absence on duty

Smoking Detection

Abnormal Temperature

Emergency Evacuation

- Integrates alarm and access control systems to automatically open doors for evacuation.
- IP speakers broadcast emergency information in real-time, while public screens display the same information.
- Access terminals facilitate roll call in a secure location, comparing it with pre-emergency records to identify potentially trapped individuals.

Digital Twin

3D visualization offers a better understanding of asset layout and space utilization.

- Improve corporate image
- Occupancy analysis
- Quicker respond (Emergency evacuation)
- Virtual patrol
