Lightweight,
ergonomic design

*The **fastest** and **most**
powerful UV curing tool.*

To ensure profitability and streamline work processes, UV curing technology is being used more and more in various paint processing markets. The technology enables you to work faster and more efficiently, while significantly reducing curing time between process steps. The Colad Fast Curing UV Light can be used to cure UV curing putties, UV curing paints and UV curing primers and body fillers on both small and larger areas.

UV PUTTY RANGE

Fast drying UV putties

Transparent UV putty

- **Fine** to fill the slightest micro-holes - 220g tube
- **Coarse** to fill small cracks, dents and stone chips - 190g tube

- Fast curing for stone chips
- Easy to apply on metal and plastic
- 3 x 50g bottles
- 100 x 1mm touch-up sticks

FILM4CRASH

This durable, flexible, self-adhesive plastic film is designed to seal and protect vehicles after collisions, disassembly, or vandalism. It provides a reliable barrier against all weather conditions when doors have been removed or windows are broken. UV resistant for up to 6 months means you won't face any discolouring of the vehicle interior. The adhesive comes off cleanly with the film without transferring to the surface

Key features

- UV resistant
- Prevents any discolouring of the interior
- Easy to apply on clean and dry surface
- Wrinkles and bubbles don't affect the function of the product
- Easy to remove without adhesive residue
- Film can be used outside up to 6 months
- Apply at room temperature

Pneumatic combi sealant gun

Our professional pneumatic gun handles one-component adhesives and sealants.

Key features

- Processes both plastic and aluminium tubes (290 & 310 ml)
- For use with regular sealants & adhesives
- Reproduces the OEM structure of the seam
- Super easy maintenance: no plugging and blocking of the spray opening, no disassembly, no hassle to remove cured product
- Sprays both coarse and fine structure by using a different outer nozzle
- Separate air regulation for product quantity and spray pattern
- Easy to adjust to any desired structure

\$460

CSG00

Sprayable Seam Sealer

Finixa sprayable seam sealer is a professional quality, durable elastic sprayable and brushable coating, used to close joints and openings and can be used inside door skins and body panels, or any area where a sound deadening and/or structured coating is needed.

Benefits

- Seamless and fast sealing for interior and exterior auto body seams and joints.
- Fast and clean application.
- No primer needed, good adhesion, lasting flexibility.
- Paintable after 30 minutes.

Available in 4 colours White, Grey, Black & Beige

**RESTO
FINISH**

Introducing the new #3 Filler to the Restofill Range.

A premium light weight glazing filler, with superior adhesion to many substrates, including RestoFinish Epoxycoat. RestoFill #3 is a self-leveling filler designed for finishing minor imperfection 0-500 Microns (up to 0.5mm). RestoFill #3 is the final filler before primer. It can be used to skim surfaces leaving a smooth feather edge transition, with a consistency suited for Splines. The glazing filler can be applied accurately to minimise sanding, pinholes and waste. In a handy 440ml pouch
