TECHNOLOGIES

SUBLIMATION

Printing technique on polyester materials. This technology is built on ecological, water-based inks that are safe for humans. Fabrics are dyed at high temperature. Ink in form of gas penetrates the fibers, allowing for very strong colour saturation with soft, imperceptible to the touch durable print, ensuring highest comfort of usage. Printings are done with highest quality special machines on selected finest fabrics.

FLEX FOIL

One of the most durable of methods printing on clothing which involves heating a thin, single-colour foil into the material using a specialized thermo-press. It guarantees exceptionally durable, flexible print which is smooth and pleasant to the touch. Wide range of colours allows you to create print tailored to Customer needs, while maintaining timeless simplicity and excellent quality.

SUBLIFLOCK

Technique which is enabling multi-colour printing using subliflock foil. It allows on accurate colour reproduction, while the printing remains flexible, silken and pleasant to the touch. Work perfectly well for printing multi-colour crests, logotypes and advertisements.

COMPUTER EMBROIDERY

Highest quality print consist on automatic sewing of pattern into fabric. Main advantage of embroidery is attractive in not only appearance but also is tremendously high durability. Modern embroidery machines and wide range of thread colours allow us to make multi coloured, often complicated prints while achieving most elegant look.

COLOTECH PROCOOL

The special four channel construction of polyester yarn serves for optimal moisture management. Clothes manufactured with **PROCOOL** technology guarantee maximum comfort in all situations and keep the body at constant, comfortable temperature. Knitwear produced with this technology has structure that absorbs moisture very quickly, gives feeling of freshness, coolness and dryness.

SYMBOLS USED IN CATALOGUE:

possibility of sublimation

areas that can be sublimated are marked in **BLUE**

areas that can be used for FLEX and SUBLIFLOCK are marked in white

sewed products

technology **COLOTECH PROCOOL**

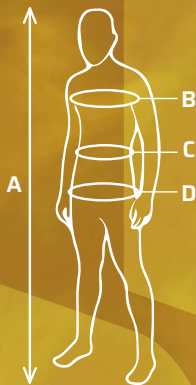

possibility to sew product with long sleeve

NOTICE! Sublimated fabrics have different shade of colour than not sublimated fabric!

D	hips circumferest	67	70	73	76	79

NEW FUNCTION

CREATE YOUR OWN COLOUR SETS AND VISUALIZATIONS ACCORDING TO YOURSELF!

Now you can create visualizations on our website by yourself with use of simple creator. In case of new sets you can also create your own **colour schemes** - from available colour palletete choose the ones that suits you most, and create set which match perfectly to colours of your Club or Company.

STEP 1

Go to **www.colo-sport.com** and find the set for which you would like to create visualization. Remember that only sets marked in the catalogue with **"NEW FUNCTION"** icon can be modified with your own colour scheme.

STEP 2

When you picked already your perfect set from our website choose option **"CREATE YOUR OWN VISUALIZATION"**

STEP 3

In the creator select type of personalization, shorts option, with or without, and create your own list of player surnames and numbers along with their sizes.

STEP 4

From available palletets choose colours for individual elements of pattern to match it to your own imagination.

STEP 5

Add to visualization your graphic (logotype, crests), which you would like to apply on your set in chosen spots. You can add also number and surname, see their sizes, place it and choose their colour.

STEP 6

Add set to your basket. From there you can still edit your set but also continue your order.

NOTICE! Graphic visualizations are saved in RGB colour system. Colours you see on monitor may differ from colours displayed on another monitor when it comes to the same visualization. Because of that, we reserve the right to +/-5-10% deviations between edited colours on monitors and catalogues, and between final product. Details on www.colo-sport.com
