

Building a Multidisciplinary IBD Care Center

Expert tips from the REACH-IBD event at Crohn's & Colitis Congress 2024

Integrated Care in Community IBD Centers

Integrated Care

REDUCES

- Overall Cost
- Surgeries
- Comorbidities

CHALLENGES

- Higher Direct Cost
- Time Commitment
- Potential for Conflict

Integrated care is vitally important for the care of our IBD patients, and creating centers of care are important in decreasing cost and increasing the value of care.

TAUSEEF ALI, MD

Establish rapport with core team members.

TOP TIPS

Lead through project management with research and cost-benefit analysis.

Building an Academic IBD Center

Track Clinical Volume

Use metrics like endoscopy, infusions, visits, surgeries

Seek Institutional Support

Collaborate across the institution

Conduct SWOT Analysis

Assess current staffing and needs.

Develop a Business Plan

Include vision, goals, and financial targets

COMMON THEMES

Metrics & Business Plans: Use metrics to show productivity and business plans to demonstrate value.

Institutional Understanding: Know your institution's environment and culture.

Multidisciplinary Partnerships: Prioritize collaborations across specialties.
