

Stay COOL

WITH AN AIR-SOURCE HEAT PUMP

The Inflation Reduction Act includes tax credits & rebates

Take advantage of new federal tax credits to purchase an energy efficient air-source heat pump (ASHP)

- A heat pump provides whole-house heating and cooling and is a super efficient way to save hundreds of dollars a year on energy bills.
- Mini split systems work great in homes with no central venting systems, such as older homes or new additions.
- In 2022, sales of heat pumps exceeded that of gas furnaces for the first time in the U.S.*

Visit www.EnergyStar.gov for more information on approved units and find MiEnergy's \$300/ton rebate and more at www.MiEnergy.coop
