# Safety tips

When the fire alarm sounds, it's not the time to channel your inner action hero! first of all, don't worry and call 112 immediately.

If you hear the fire alarm, go down the stairs to the first floor, exit the building, and gather at the main entrance. Evacuation plans are on each floor, showing the backup exits. Look for the emergency exit signs.

Remember, you can't use the elevator during an evacuation. If the hallways and stairs are full of smoke, and you can't leave your room, stay inside where you'll be safe. Your safety is our priority!

During May to September, temperatures are pleasant, ranging from 16°C to 23°C. And winter can be harsh, with temperatures frequently falling below -3°C, occasionally dropping to -20°C (-4°F) or even lower. Despite this, winter offers unique experiences like sledding, skiing and enjoying snow-covered landscapes during walks.

**Immediately call the general emergency number 112.**

# For cozy space

The dormitory is a completely new experience. It's really fun, but you need to enjoy your own space, and in order to that – it is worth taking care of what provides comfort!

Soft, warm blanket. This is probably one of the most used items at home!

The object that provides home cosiness and warmth is a rug. Create the mood of the room with the help of colours and texture.

Curtains provide privacy as well as night lighting that you may need during the day to relax after a party or a sleepless night at the library.

Take care of the lighting! When outside it is gloomy and grey, our mood changes, but everything can be improved with the help of light.

A plant. Even photos become more beautiful when we see plants in the background. Did you know that living plants are not only a great element of decor, but also an oxygen filter?

One of the most popular student items only after moving to the Student House – storage boxes!
