KD250 Dehumidification Wood Kiln

If you think high quality lumber drying is too complicated or expensive, you're in for a pleasant surprise with the KD250 Wood Kiln. Now you can dry your own lumber down to 6-8% moisture content for pennies per board foot. With up to 4,000 board foot capacity, the KD250 Dehumidification Wood Kiln includes auxiliary heating, two 16", 1/4 HP circulating fans, prewired electrical panel, manual over temperature vents, four wood moisture probes, and controls that display temperature and humidity by the most accurate method known with wet bulb and dry bulb sensing.

Capacity	1,500 - 4,000 bd.ft.
Temp Range	70° -120°F
Electrical Requirements	220V / 60Hz Single Phase
Bed Extension	Production Rates
