## Company Overview

Westlab has been supporting the scientific and medical community since 1993.

Reliable suppliers and innovators, we deliver cutting edge, future-proof solutions.

Ensuring that our clients have a consistent supply of the latest products and equipment, from test tubes to intelligent, full-lab fit-outs-when they need them.

**Your  
discovery  
improves  
our world.**

## Westlab Online Accounts

### How to Register for an Online Account:

#### Step 1

Go to [www.westlab.com](http://www.westlab.com) and click on "Register" at the top of the page beside the cart icon.

## Periodic Table

## Westlab Periodic Table

The table is available in 2 sizes and comes with a convenient carry bag.

The periodic table features the 4 new elements officially approved in December 2016.

- Nihonium (symbol Nh)
- Moscovium (symbol Mc)
- Tennessine (symbol Ts)
- Oganesson (symbol Og)

Product Code	Size	Price
663-347C	Size L: 39 in x 30 in	CAS 11.93
663-348C	Size XL: 77 in x 54 in	CAS 194.36
663-346C	French Size XL: 77in x 54in	CAS 194.36

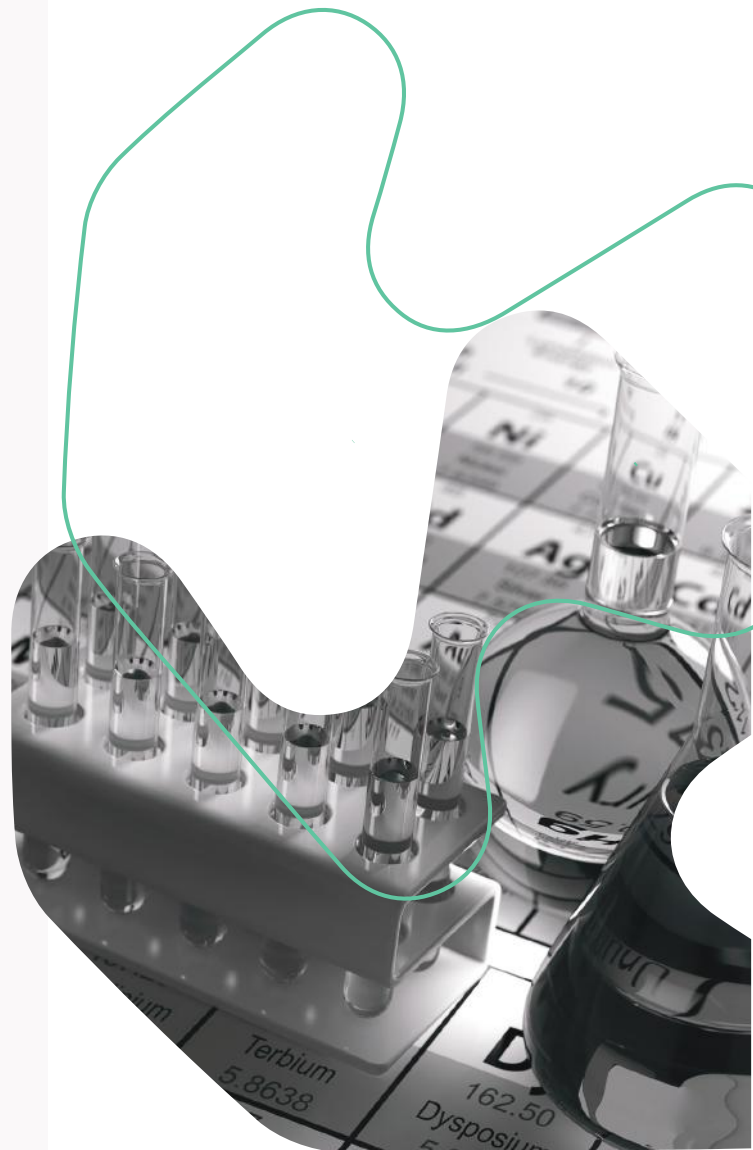

**PERIODIC TABLE OF ELEMENTS**

The periodic table is color-coded by groups:
 

- Metals: Yellow
- Nonmetals: Blue
- Transition metals: Green
- Post-transition metals: Orange
- Alkali metals: Red
- Alkaline earth metals: Purple
- Halogens: Light blue
- Noble gases: Dark blue
- Lanthanoids: Light orange
- Actinoids: Dark orange

The newly discovered elements are highlighted in red:

- Nihonium (Nh)
- Moscovium (Mc)
- Tennessine (Ts)
- Oganesson (Og)

### Standard Dissecting Set

Packaged in a 6 loop leatherette case, this dissection kit contains a 7.5cm straight glass dropper, 11cm chrome forceps with pin, stainless steel scalpel, stainless dissecting scissors, straight wood teasing needle, curved wood teasing needle, and a ruler.

Code	Unit	Price
113-2002	EA	CA\$ 18.59

### Vinyl Dissecting Pads

Long-lasting, washable, odorless, vinyl pads replace wax in dissecting pans. Pads reseal themselves—eliminates heating and remelting of wax to restore smooth surface and they remove easily for cleaning. Ready to use for 11 1/2" x 7 1/2" Standard Dissecting Pans.

Code	Unit	Price
113-1903	EA	CA\$ 30.56

### Scalpel Handles #4

These scalpel handles are made of high carbon stainless steel, provide a strong grip and are a must for any dissection lab. Scalpel handle #4.

Code	Unit	Price
070219-0004C	EA	CA\$ 7.77

### Scalpel Handles #3

These scalpel handles are made of high carbon stainless steel, provide a strong grip and are a must for any dissection lab. Scalpel handle #3.

Code	Unit	Price
070219-0003C	EA	CA\$ 7.77

## Dissecting Supplies

### Dissection Pans

Made to last, these dissection pans are great for general use. Each pan has smooth, rolled edges and they are stackable. When resurfacing, put on hot plate to melt wax. 28 x 18 x 4cm.

Code	Unit	Price
113-1900	Wax Included, EA	CA\$ 26.57
113-1901	Standard, EA	CA\$ 17.75

### Scissors

A variety of stainless steel scissors gives your students more possible dissection procedures. Sharp, open shank, 11cm.

Code	Unit	Price
071903-0130C	sharp/blunt - 11cm	CA\$ 8.72
113-2001	sharp/sharp - 13cm	CA\$ 4.73

### FlaskScrubber Glassware Washer, freestanding, 115V, 60 Hz

Compliance: UL 61010-1, CAN/CSA C22.2 No. 61010.1, ETL listed. FlaskScrubber Glassware Washers are designed to wash and dry narrow-neck and general purpose labware. They have a lower spindle rack that holds up to 36 pieces of primarily narrow-neck glassware such as volumetric flasks. Water and detergent are pumped through the spindles to reach the innermost areas of your glassware. Forced air drying through the spindles (not available on FlaskScrubber 33 models) ensures thorough drying inside and out. Specialized inserts for pipets, BOD bottles, petri dishes, culture tubes and small utensils enhance the FlaskScrubber's versatility. The washer may be outfitted with an Upper Standard or Spindle Rack to increase capacity. In addition, a Lower Standard Rack may be used instead of the Lower Spindle Rack.

## Ductless Fume Hoods & Accessories

### Westlab Premium Ductless Fume Hood

The Purair® ductless fume hoods are a series of high efficiency products designed to protect the user and the environment from hazardous vapours generated on the work surface. At the heart of the Purair fume hood product line is the innovative Air Science Multiplex™ Filtra-

tion Technology that creates a safe work environment over the widest range of applications in the industry. The Premium Ductless Fume Hoods use the 11 lbs fume hood filters. The 24 inch and the 36 inch Fume Hoods use one filter each and the 48 inch Fume Hood uses two filters. In order to pro-long the life of the main filter you can purchase the optional pre-filter which will pick up any particles in the air to prevent blockage of the main filter.

## Incubators & Ovens

### Laboratory Analog Incubator - Acrylic Door

The versatile Quincy Lab incubators were custom-developed for laboratories that need a dependable, compact incubator for cultures, test kits, eggs and biologicals. For lab applications requiring a constant thermal environment, these units are ideal for clinical, industrial and school laboratories, for physicians' offices, and as a general purpose warming cabinet.

### Lab Air Forced Oven

The Air Forced series models offer a forced air circulation allowing for a more uniform distribution of heat throughout the chamber, which also facilitates evaporating. These ovens are designed to meet the laboratory needs of industry, research

organizations, and schools. Well-crafted and versatile, they are used for part drying, baking, curing, sterilizing, evaporating, heat treating, annealing, and testing. Cabinets are as attractive as they are durable. Exteriors are painted light gray and have a hard, scratch-resistant hammer finish. Doors open with high-impact thermoplastic handles. Cabinets have heavy steel double-wall construction. Work space is insulated from the outer cabinet with one inch of high-density mineral wool, and interiors are made of corrosion-resistant aluminized steel.

## Microscopes

### Westlab Stereo Zoom Research Microscope

- Excellent optical performance for researchers
- Wide zoom ranges from 6.7x to 45x (Standard). Power extend-

able up to 180X

- Ultra-Wide Field of View (FOV) of 22mm with WF-10X Eyepieces
- Extra Long Depth of Field (DOF) for Longer Focal Range/Clear Zone
- High Working Distance of 105mm
- Hi-Power LED Daylight Illuminations (Reflected & Transmitted)
- Auxiliary Objective Lenses & Hi-Power Eyepieces Available as Upgrade Options
- 2 year warranty for peace of mind

Code	Unit	Price

### Westlab Binocular Research Compound Microscope

- Westlab's premium Binocular Research Compound Microscope has the highest grade DIN infinity corrected PLAN achromatic

lenses with a guaranteed >95% flat field measured from the centre

- Free of image distortion and chromatic aberration at edges
- PLAN eyepiece WF-10X with large lens (double the size of other eyepieces) and ultra-wide field of view of 20mm
- Multi-layered lenses with high resolution and anti-mould, anti-glare and anti-scratch coating
- Basic powers: 40X, 100X, 400X and 1000X. Also extendable to a maximum of 2000X
- Upgradable to dark field, polarizing, phase contrast and fluorescence microscope
- Safety limit stop built-in to protect objective lenses and slides
- 2 year warranty for peace of mind

## Westlab Single Channel Pipettors

### High Durability in pipetting revolution!

The new Westlab Pipettor is the next step in pipetting revolution. It's high quality, robust European construction with a metal shaft and tip assures long lasting accuracy with limited maintenance. This fully autoclavable pipettor (excluding control knob) features a double 'O' ring shaft for universal tip compatibility and a superb air tight seal. The Westlab pipette has a detachable volume mechanism for easy visibility for both right and left handers. Only available at Westlab.

- Detachable volume controller.
- Metal tip base for higher durability in the daily contact with tips and long lasting accuracy and precision.
- Supplied with serial number and declaration of conformity.
- Volume Display visible during right hand & left hand operation.
- Volume mechanism interchangeable between fixed and variable for ease operation. Converting fixed volume pipettes to variable volume pipettes by changing the volume knob.

### Nitric Acid Compartment

A separate, entirely polypropylene, slide-in isolation compartment is available as an accessory to semiisolate nitric acid or nitric acid spills from all other products stored in the acid cabinet. We urge the purchase of this accessory to avoid reaction between products, particularly between Nitric and Acetic acid. While this isolation compartment is commonly used to isolate nitric acid, it can be used to isolate any materials you need separated from the other items in your storage cabinet. Exterior Dimensions: 13 5/16W x 13 7/16"H x 15 1/4"D. Capacity: 5 x 2.4 Liter."

## Water Baths & Water Purification

### Premium Water Bath

- Displays actual and set point temperature simultaneously
- Three push-button pre-sets for frequently used temperatures

- Integrated timer
- Hinged gable cover
- Calibration capability
- Reservoir sizes 5 and 20 liters
- Reservoir made of 304 Stainless Steel
- Reservoir drain (for the 20L)
- Primary and automatic safety thermostats
- Also compatible with waterless bath beads
- 3.25" LCD Display
- Ambient +5° to 100° Working Temperature Range
- ±0.1 ° Temperature Stability

### Cartridge for 153-602 ISG Deionizer

This cartridge is an easy replacement cartridge design for the ISG water deionizer. They containing specifically designed resin which changes colour through absorption of contaminating ions. This allows for easy identification of when each cartridge needs to be changed. When the colour changes from blue to brown it is then time to change the cartridge.

## Data Loggers

# NeuLog

Plug and play - Connect to any device

Configure NeuLog system to **your needs**.

**Hardware you are connecting to**

**Connection**

**Select Sensors**

NeuLog Vs Others		
NeuLog	Other Systems	Why it Matters
Plug and Play Auto Calibrate	Calibration, set up	Saves time, works instantaneously
Use up to 50 sensors at a time, any configuration	Limited number of sensors and configurations	Flexible, easy to set up, saves time and money
Free	Software - for purchase	Save money
Browser based, always the same	Apps for every device	No learning curve, consistent user experience everywhere
Browser based, always free	Upgrades require investment	Save money
Processor and memory in every sensor	No memory or processor in sensors	Connect to any technology now or in the future
Fully digital	Some digital, some analog	System easy to update, no cost involved. Range, resolution, configuration easier and faster

## Science Kits

## Westlab Stem Kits

### STEM- Total Redox Fuel Cells Kit

Students will help design and construct a makeshift fuel cell to get stranded HAWC astronauts back to a lunar outpost.

Code	Unit	Price
118-1020	Kit	CA\$ 313.85

### STEM- Urine Trouble Kit

Students will learn about procedures to recycle urine into drinking water and test their results for safety.

Code	Unit	Price
118-1021	Kit	CA\$ 418.32

### STEM- High & Dry Solar Water Heating Kit

Students will design and construct their own water heaters and analyzing their results.

Code	Unit	Price
118-1040	Kit	CA\$ 216.83

### STEM- Earthbound & Down Mass Driver

Students will take on the role of a HAWC engineering team tasked with designing and testing a mass driver to assist with building a mass driver to launch Helium-3 shipments from the Moon to Earth.

Code	Unit	Price
118-1030	Kit	CA\$ 340.83

### Electricity & Magnetism Kit

Supplied with an easily understood instruction manual. The kit contains the following: Voltmeter 0-1.5; 0-3v, Milliammeter 0-500 mA; 0-1000mA, Electroscopes, Battery Kit, Mini Rheostat, Two Bar Magnets 5cm in length, Compass Needle, Two Resistors, Mini Electromagnet, Horseshoe Magnet, Two Mini Contact Switches, Two Bulb Holders, Package of Iron Filings, Battery Holder D-Cell, Coil of Wire, Steel Rod Electromagnet, Acrylic Piece 19mm x 120mm, Two Plastic Rods 5mm x 120mm.

Code	Unit	Price
445-9999	Kit	CA\$ 148.16

## Westlab Stem Kits

### Snap Circuits Pro 500 Experiments

Award-winning Snap Circuits® makes learning electronics easy and fun! Follow the colorful pictures in our manual to build exciting projects such as AM radios, burglar alarms, doorbells, and much more! Snap Circuits® features building components with snaps to assemble electronic circuits that function like the printed circuit board found in most electronic products.

Code	Unit	Price
446-0140	Kit	CA\$ 170.60

### Snap Circuits Extreme

Contains over 75 modular snap-together parts that will allow students to build over 500 projects in electronics. The full-color project book will make it a snap to construct projects related to transformer; relays; 7-segment LED displays; transistors and diodes. Also learn series/parallel circuits; AM/FM radios ; resistance and capacitance.

Code	Unit	Price
446-0130	Kit	CA\$ 296.42

### Snap Circuits w/ Educational Deluxe Case

Snap Circuits® makes learning electronics easy and fun! Just follow the colorful pictures in our manual and build exciting projects such as AM radios; burglar alarms; doorbells and much more! You can even play electronic games with your friends. All parts are mounted on plastic modules and snap together with ease. No tools required. Includes Projects Manual.

“ Thank you soooo much for all your help. We got the sodium silicate in time to use it for the gr. 12 chem lab. The girls were making super balls among other things like slime and silly putty. The arrival of the solution let them complete all of their activities. Thank you again very much! ” - **Havergal College**

## Westlab AP Biology Science Kits

### AP Biology Investigation #1: Artificial Selection

Students will study the process of artificial selection using Innovating Science fast growing plants.

Code	Unit	Price
118-0181	Kit	CAS 120.44

### AP Biology Investigation #5: Photosynthesis

Students will learn the necessary components and conditions for photosynthesis to occur while using leaf disks to measure the accumulation of oxygen and relate it to the rate of photosynthesis.

Code	Unit	Price
118-0185	Kit	CAS 103.74

### AP Biology Investigation #7: Mitosis & Meiosis

Students will study the cellular steps involved in DNA replication and cell division in both mitosis and meiosis.

Code	Unit	Price
118-0187	Kit	CAS 326.66

### AP Biology Investigation #4: Diffusion and Osmosis

Students will study the movement of water and nutrients across a cell membrane and observe osmosis in living tissue.

Code	Unit	Price
118-0184	Kit	CAS 256.20

### AP Biology Investigation #6: Cellular Respiration

Students will use a respiration chamber to measure and record the rate of oxygen consumption (cellular respiration) using germinating seeds versus a non-germinating control sample.

Code	Unit	Price
118-0186	Kit	CAS 386.82

### AP Biology Investigation #8: Bacterial Transformation

Students will genetically engineer bacteria through transformation with a plasmid that confers antibiotic resistance.

Code	Unit	Price
118-0188	Kit	CAS 410.45

“ The quick response is fantastic and I have to say, I LOVE ordering stuff from westlab online. Its quick and efficient and payment connected to the school is great. The lab ware selection of materials looks professional enough (blue and green colors) so that lab work doesn't feel outdated. Good for student morale to have nice equipment :) ” - **Woodbridge College**

### AP Biology Investigation #9: Restriction Enzyme Analysis

In this lab students will understand the action and specificity of restriction enzymes, while learning the components involved in the process of DNA electrophoresis.

Code	Unit	Price
118-0189	Kit	CA\$ 197.92

### AP Biology Investigation #13: Enzyme Activity

Students will learn the nature and specificity of enzyme-catalyzed reactions.

Code	Unit	Price
118-0893	Kit	CA\$ 72.24

### AP Biology Investigation #11: Transpiration

Students will study the process of transpiration/transpiration pull and the role it plays in water/nutrient movement in plants.

Code	Unit	Price
118-0178	Kit	CA\$ 177.98

## Westlab AP Chemistry Investigations

### AP Chemistry Investigation #1: Concentration and Transmitted Light

Students will be guided through an investigation to study food dyes and determine how the absorbance of light can be used to study color and determine concentrations of chemicals in solutions.

Code	Unit	Price
118-0191	Kit	CA\$ 44.73

### AP Chemistry Investigation #3: What Makes Water Hard?

Students will investigate the suitability of gravimetric analysis for determining the amount of water hardness in the form of calcium carbonate found in various water samples. The activity contains enough materials for 15 groups of students.

Code	Unit	Price
118-0193	Kit	CA\$ 48.93

### AP Chemistry Investigation #5: Separation of Molecules

Students collect data using different solvents to identify the optimal solvent for separation. They will then illustrate the intermolecular forces that are acting on the molecules in the separation. Students evaluate the chromatograph with different solvents and establish a connection between molecular structure and intermolecular attraction to the solvent.

Code	Unit	Price
118-0195	Kit	CA\$ 88.10

### AP Chemistry Investigation #2: Mass % of Copper in Brass

Students will design a laboratory procedure to analyze the amount of copper in brass using a spectrophotometer. Students identify the correlation among wavelength, absorbance, and concentration for each of three possible ions that may be obtained from brass: copper, zinc, and iron.

Code	Unit	Price
118-0192	Kit	CA\$ 65.31

### AP Chemistry Investigation #4: Acid in Fruit Juice and Soft Drinks

Study how the concentration of acids in various consumer beverages may be determined by titration with sodium hydroxide. Students will determine the proper indicator to use in the titration of a weak acid. Students will create an experiment to calculate the molar concentration of acid in a beverage.

Code	Unit	Price
118-0194	Kit	CA\$ 64.16

### AP Chemistry Investigation #6: What's in the Bottle?

Students will identify unknown chemicals based on laboratory testing of their physical and chemical properties. Students will identify the 4 different kinds of bonds that exist in chemicals: ionic, polar covalent, nonpolar covalent and metallic.

Code	Unit	Price
118-0196	Kit	CA\$ 98.91

## Westlab AP Chemistry Investigations

### AP Chemistry Investigation #7: Green Chemistry and Purification

Students will design their own experiment to separate two substances using green chemistry principles. Students will also design and perform an experiment to quantitatively measure the weight percent of the mixture.

Code	Unit	Price
118-0197	Kit	CA\$ 34.23

### AP Chemistry Investigation #9: Analyzing the Components of Pain Relievers

Students will test the solubility of each possible component of a commercially available pain reliever in an organic solvent, ethyl acetate, and in a basic aqueous solution of sodium bicarbonate. These results will help the student create a procedure that will be used to separate components in a mixture and determine percent composition.

Code	Unit	Price
118-0199	Kit	CA\$ 88.73

### AP Chemistry Investigation #11: Beers Law and Rate Law of Crystal Violet

Students will determine the rate law for the reaction of crystal violet and sodium hydroxide. Students will also prepare dilutions of stock crystal violet solutions to generate a Beer's law calibration curve. This lab will require students to integrate prior chemistry knowledge involving spectroscopy, Beer's law, solution dilution, calibration curves, and chemical kinetics.

Code	Unit	Price
118-0200	Kit	CA\$ 65.10

### AP Chemistry Investigation #8: Determine the Actual % of Hydrogen Peroxide

Students will determine the actual concentration of the Hydrogen Peroxide in the bottle by titration and determine if it is lower than the value on the label. Hydrogen Peroxide will degrade over time, and students will determine how much it degrades.

Code	Unit	Price
118-0198	Kit	CA\$ 49.25

### AP Chemistry Investigation #10: How Long Will That Marble Statue Last?

Students will observe and measure the evolution of carbon dioxide gas from the decomposition of calcium carbonate when mixed with an acid. Students will also create experiments to determine the rate of reaction with different concentrations of hydrochloric acid.

Code	Unit	Price
118-0210	Kit	CA\$ 120.44

## Westlab AP Chemistry Investigations

### AP Chemistry Investigation #13: LeChatelier and the Colours of the Rainbow

Students will investigate Le Chatelier's principle and why it works. They will also investigate this principle by testing several systems at equilibrium and then selecting specific ones to produce the colors of the rainbow based on specific applications of Le Chatelier's principle. Students will then be challenged by selecting which reaction system to use for which color in producing the rainbow while trying to only use a given "stress" once.

Code	Unit	Price
118-0213	Kit	CA\$ 105.21

### AP Chemistry Investigation #15: Preparation of Effective Household Products

Many household products contain buffering chemicals. Students will design a procedure to determine the buffering agents that are in different household products such as foods, beverages and over the counter drugs.

Code	Unit	Price
118-0215	Kit	CA\$ 68.15

### AP Chemistry Investigation #14: Structures & Concentration Acid/Base Titrations

Students will conduct a series of acid–base titrations and determine the concentrations of two unknowns. They will create a procedure to collect quantitative titration data using a buret and pH meter. Using titration data that they collected, they will determine the concentration of each unknown.

Code	Unit	Price
118-0214	Kit	CA\$ 65.31

### AP Chemistry Investigation #16: Preparation of Effective Buffers

Students will design a buffer that can maintain a pH within a narrow range when certain amounts of acid and base are added. The activity contains enough materials for 15 groups of students as well as a Teacher's Guide and Student Study Guide Copymasters.

Code	Unit	Price
118-0216	Kit	CA\$ 144.27

Westlab  
Spaces

## Integrated Capabilities

### SOLUTIONS

Westlab Spaces specialises in the design, consultancy and supply of modular laboratory joinery packages for the Education, University and Industrial laboratory and testing facilities.

Our laboratory joinery solutions are primarily specified through architecture and construction firms, as well as directly with clients to create and deliver outstanding laboratory spaces.

Discover the value of fresh thinking and modular lab design.

### Consultation

We know that not all laboratories are the same. That's why our design consultants meet with clients to fully understand how the laboratories will be used (purpose) as well as the project requirements and constraints.

### Strategy & Design

Our drafting and design consultants get together to develop practical workflows that are fully compliant to relevant Australian standards. Using our online 3D Design platform, the team brings to life the layout concepts.

### Manufacturing

Westlab manufactures both in-house and through a network of local and global partners to ensure quality and assist with the reduction of manufacturing and transport downtime. Our ISO 9001 certification means we have all the processes in place to guarantee quality and timely outcomes.

### Project Delivery

We have dedicated Project Managers that oversee and conduct quality control checks at every stage of the projects cycle. We collaborate with clients to ensure a fast and hassle-free hand over with minimal downtime.

Our knowledge of the laboratory industry coupled with our capabilities allows us to create spaces that unlock your next discovery – on time and within budget.

## Free Consultation and Lab Design

### LETS TALK!

The first step in designing your inspiring laboratory is always the most challenging.

To help you get started, we offer a complimentary initial consultation and 3D laboratory design valued at \$4,750.

Having designed and built more than 274 laboratories, we are experienced in creating inspiring and efficient laboratories spaces for our clients.

The complimentary laboratory design includes...

- Virtual Room Assessment
- Basic Lean/Flow Analysis
- 1x Detailed Floorplan Concept
- 1x 3D Furniture Concept
- Detailed costing Proposal of Project

### Stratford Hall

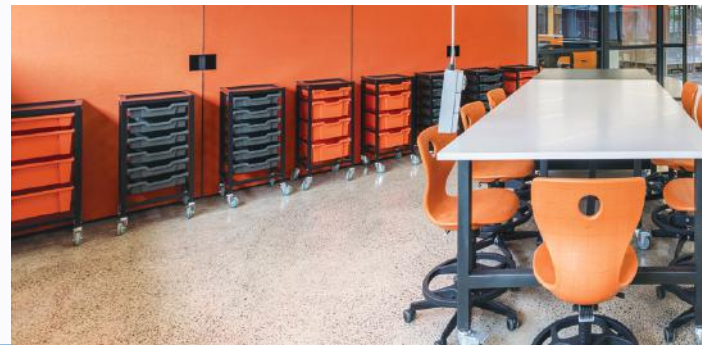

Stratford Hall chose Westlab Spaces to install this vibrant lab furniture into their Vancouver based school. The heat and chemical resistant countertops and spacious cabinets are perfect for educational purposes and come highly recommended from school's science department head. "I consider the lab more like a work of art than simply another room in our school, and feel refreshed even after spending hours on end working in it.

### Wyndham Tech School

The team at Westlab worked closely with the directors at Wyndham Tech, the Architect (Gray Puksand) and the builders (Harris HMC) to refine finishes that were suitable to the application such as cabinetry framework, benchtop materials and a full range of STEM equipment.

As a result, Westlab manufactured and installed a full state-of-art STEM joinery package and related fittings and fixtures at Wyndham Tech School in Werribee delivering a stunning outcome.

### Deakin University

The art Materials Science Corrosion and Polymer Laboratories facility is designed with a modular, prefabricated system that offers a high quality and flexible laboratory work-space. Key features include a shelf service spine mounted to the ceiling that allows a clear and flexible work-space underneath. Detachable bench modules and cabinet modules on wheels allow the system to be configured to meet the need of all researchers.

### Al Siraat College

Westlab Spaces worked with Al Siraat College to build several 21st-century laboratory science and preparation rooms. The project included a number of E-Pod with Chemtemp Extreme chemical resistant benchtop.

After providing our free design and consultancy package and a number of design reviews the project was underway. As usual, our projects team were true to our values, creative, fast and hassle-free and this project was completed within the time frame and on budget.

## Westlab Lab List

### 3 Easy Steps

1. Fill in required quantity.
2. Eliminate unneeded products
3. Submit draft to Westlab for bulk package discount.

### Information

Through this wish list program, Westlab is partnering with teachers to assist with building new labs to enrich the education of Canadians while incentivizing the cost to fit schools ever decreasing budgets. This package has Westlab recommended volumes for a class of 30 students and provides a base of common education lab consumables. Lab start up quotes are completed in 24 hours.

#### Innovation

We look at the world differently, always searching for trailblazing solutions to your needs. Delivering cutting edge lab equipment and supplies.

#### Efficiency

We work on the frontfoot to ensure a timely and consistent supply of our latest solutions, via a local supply chain - ensuring your peace of mind.

#### Expertise

We proactively search for the best solutions, enabling you to focus on your next discovery - safe in the knowledge that you are always working with the best on offer.

“ We are very proud of our analytical testing lab and Westlab did a great job! “
