Magnetic Tiles: Triangles & Squares

In recent years, there has been a growing emphasis on integrating STEM (Science, Technology, Engineering, and Mathematics) education into early childhood curricula. Magnetic Tiles seamlessly align with this educational approach by providing a hands-on platform for young learners to explore fundamental STEM concepts.

When children connect Magnetic Tiles to construct buildings, bridges, or other structures, they unknowingly engage in engineering and physics principles. Through trial and error, they discover which designs are stable and why certain shapes are more effective in supporting weight. This practical experimentation lays the groundwork for an understanding of engineering mechanics, balance, and stability.

Age: 3+ **SKU:** 863100

Contents: 40 square magnetic tiles, 60 triangle magnetic tiles

Compatible with widely used mini figures

Video

Magnetic Tiles: Marble Run

The Magnetic Tiles Marble Run allows children to design and build intricate marble tracks using various pieces that easily connect together. The magnets integrated into the components offer a fascinating twist, enabling the creation of gravity-defying pathways that challenge the conventional understanding of physics.

Age: 3+ **SKU:** 863200 **Contents:** 42 magnetic tiles, 50 marble track connectors, 6 balls, 2 figures

Compatible with widely used double scale mini figures

Fun Mags

With this more complex assortment of magnetic pieces, children become acquainted with a wider range of geometric shapes such as trapezoids and spheres as they manipulate the pieces to form structures. As children progress from simple designs to more complex arrangements, they naturally absorb concepts like symmetry, angles, and spatial relationships. Such experiential learning not only prepares them for formal geometry in later years but also hones their visual-spatial skills, which are crucial in fields ranging from mathematics and engineering to art and design.

Age: 3+ **SKU:** E87000

Contents: 100 magnetic shapes

Weight: 3.12 kg **H:** 235mm **W:** 335mm

D: 78mm

Magnesticks

Magnesticks are designed to provide an open-ended play experience, allowing children to engage with the components in limitless ways. The absence of strict rules or predefined structures empowers children to become architects of their own playtime. Engaging with magnetic toys presents a myriad of cognitive benefits for children. As they manipulate the components to construct various shapes and forms, they naturally hone their spatial reasoning skills. The act of figuring out how different pieces fit together fosters critical thinking and problem-solving abilities. Moreover, the magnetic nature of the components introduces an element of physics, offering an early introduction to concepts like polarity and attraction.

Age: 3+ **SKU:** 863052 **Contents:** 52 magnetic shapes in storage tub **Weight:** 2.01 kg **H:** 205mm **W:** 340mm **D:** 250mm

Flexible Magnetic Sheets

Imagine a world where children can explore their creativity and curiosity without limitations. Flexible Magnetic Blackboard and Whiteboard Sheets bring this vision to life by offering a versatile platform that adheres to walls with ease. These sheets are designed to stick to various surfaces, enabling children to transform any room into an interactive learning environment. The combination of a dry-wipe surface and magnetic properties opens up a world of possibilities.

MagneDots

Each magnetic dot possesses an alluring hue, and with the aid of a magnetic pen, youngsters can pick up, move, and place these dots into the grooves of the grid. As children manipulate the magnetic dots with the pen, they're introduced to concepts of cause and effect, spatial relationships, and fine motor skills. The act of arranging the dots into patterns and designs encourages cognitive development and critical thinking. MagneDots seamlessly integrates concepts from various subjects such as mathematics, geometry, and art.

In the ever-evolving landscape of children's educational toys, sustainability is a growing concern. Parents and educators alike seek toys that not only entertain but also promote learning and environmental consciousness. The Bamboo Marble Run sets are a remarkable example of a toy that combines eco-friendliness with educational value and hours of creative fun. These sets encourage children to think critically and problem-solve as they design their own intricate tracks. They must consider factors like gravity, velocity, and balance to create functional marble runs. This fosters analytical skills and helps children understand cause and effect.

Geoclicks Set

Unleash your creativity and embark on endless design adventures with our versatile 500-piece Geoclicks set. Designed to inspire your imagination and help you build a world of geometric wonders. In the fast-paced digital age, it's more important than ever to foster creativity and critical thinking in our children. One of the best ways to achieve this is through open-ended play, and that's where loose parts play sets come into play. These sets, featuring wooden tools, screws, bolts, pegboards, and rods, offer endless construction possibilities that encourage imagination, problem-solving, and fine motor skills development. Loose parts play sets are like a blank canvas for a child's imagination. Unlike traditional toys with predefined purposes, these sets offer a diverse assortment of parts that can be combined in countless ways. Wooden tools, screws, bolts, pegboards, and rods can transform into anything a child's mind can conjure, from towering skyscrapers to fantastical creatures. This open-ended play allows children to explore their creative boundaries, experiment with different combinations, and dream up elaborate scenarios. The absence of strict instructions encourages independent thinking and problem-solving, promoting a sense of autonomy and self-confidence. These sets are a great introduction to using tools for little ones, teaching them how to screw objects together to make constructions. Young hands naturally gravitate toward building towers with the pegs and working their fine motor skills. The wooden tools and boards help to expand free play opportunities and spark children's imagination.

Highways Road Tape Rolls

Road tape encourages children to think outside the box and create their own miniature worlds. The tape's unique road design enables children to design roads, highways, and intersections on various surfaces, transforming any ordinary space into a bustling urban landscape. This creative freedom empowers children to visualise, plan, and execute their ideas, honing their problem-solving skills in the process.

Age: 3+ **SKU:** 840001

Contents: 6 road tape rolls (60 metres)

Highways Town Scenery with Bamboo Blocks

A unique and imaginative playset that transports children to a bustling town brimming with diverse opportunities. At its core, the set comprises of a series of graphic screens depicting different locales within the town, as well as traffic lights, pelican crossings, plus a number of blank road signs which can be brought to life using the Highways Road Safety Sticker Set (sold separately). These screens serve as the backdrop for the Highways wooden figures that represent various jobs and professions (sold separately), turning the set into an immersive storytelling experience. The slats on the bamboo blocks securely hold the screens and road signs, enabling them to be placed within your Highways environment. By gathering around the town, children can engage in group learning experiences, share ideas, and collectively explore the content. This not only nurtures social skills but also fosters a sense of community and teamwork, laying a foundation for future collaborations.

Age: 3+ **SKU:** 660002 **Contents:** 44 graphic upstands, 48 bamboo blocks

Includes both British and Irish road signs to be used with the 'Highways Town Scenery' blank road signs.

Highways Road Safety Sticker Set

With the introduction of a road safety sticker set designed to accompany the miniature town playsets, children can now not only engage in imaginative adventures but also learn essential lessons about road safety in a fun and interactive manner. The road safety sticker set adds a layer of realism to the miniature town, making it a more accurate representation of the real world. As children interact with the stickers, they begin to recognise the significance of each road sign and traffic signal, learning how these elements contribute to road safety. Through hands-on exploration, children develop an understanding of how pedestrians and vehicles interact in a shared space. This knowledge translates into an increased awareness of safe behaviours as pedestrians and future drivers.

Age: 3+ **SKU:** 840002 **Contents:** 267 stickers

These wooden figures encourage open-ended play, enabling children to create narratives, scenarios, and worlds entirely of their own making. Through the act of role-playing with wooden people, children often embody characters from different walks of life, allowing them to understand perspectives beyond their own. This play can lead to the development of problem-solving skills as children navigate their characters through diverse situations, thus enhancing critical thinking abilities.

Each Hammer & Tack set includes a corkboard, wooden pieces in different shapes and sizes, a child-safe hammer, and small tacks. These playsets encourage children to create their own mini worlds and stories while simultaneously developing crucial developmental skills. Picking up tiny tacks and carefully positioning them on the wooden pieces before gently tapping them with a hammer requires precision and control. As children work on this process, their fine motor skills and hand-eye coordination naturally improve. These skills are foundational not only for tasks such as writing and drawing but also for everyday activities like buttoning clothes and using utensils.

At first glance, the Lacing Board may appear simple, but it's a treasure trove of possibilities waiting to be explored. Its key features are the grippy holes and a triangular applicator, which together provide an engaging platform for children to create intricate designs and images. The lacing board is designed with special grippy holes that hold the lace securely in place. These holes are strategically placed to enable children to push the lace through, creating a canvas for their imagination to run wild. The grippy nature of the holes ensures that the lace remains snugly in place, making it easy for young hands to manipulate and experiment with. With an ergonomic tripod grasp, the applicator allows children to easily thread the lace through the grippy holes. Its design encourages a pincer grasp, which is vital for developing key fine motor and handwriting skills. As children move the applicator from hole to hole, they not only create beautiful patterns but also enhance their hand-eye coordination and dexterity.

REUSE ▶ REFILL ▶ RETHINK

THE WORLD'S ONLY **REUSABLE** GLUE STICKS

Sticking Around for a Greener Tomorrow!

Despite major brands advertising their glue sticks as recyclable, in reality they are rarely (if ever!) accepted because they contaminate the recycling process. U-fill bypasses the recycling system altogether and is easy and fun for children to use. Once the glue stick is empty, make sure it gets reused by simply twisting in a refill. Pop the empty refills into a collection bag, then we collect these and reuse them in production!

My First Go Multi-Walker

The My First Go Multi-Walker is a push toy designed to aid toddlers as they take their first steps. It features a sturdy wooden frame with a handle, four wheels, and interactive elements including beads, gears, shape sorters, and mini-mazes attached to its sides. As toddlers push the walker, they not only work on their walking skills but also engage with the various educational components designed to stimulate their minds.

Safety is a paramount concern when it comes to toddler toys. Equipping the walker with a brake system addresses this concern by allowing children to stop the walker's movement when needed, reducing the risk of accidents or collisions.
